The Capital is PRETORIA, pop 1926, European, 54,326. Pretoria, which is also the seat of the Union Government, is pleasantly situated on the River Aapies, and has wide, shady streets and magnificent buildings The principal town is JOHANNESBURG, 5,500 feet above sea level, about 35 miles S W of the capital Johannesburg is the centre of the Witwatersrand goldfields, and possesses magnificent buildings. Among its other industries are printing, brickmaking, brewing, tobacco manufactures and iron foundries The population in 1926 was (European) 170,741

Pretoria is distant from London 7,200 miles; transit, *via* Capetown, 19 days.

ORANGE FREE STATE

The Province of the Orange Free State has a total area of 49,647 square miles, and is divided into 27 districts. The population at the last six censuses was —

Year	White	Coloured	Total
1890 ..	77,716	129,787	207,503
1904 .. .	142,679	244,636	387,315
1911	175,189	352,985	528,174
1918	187,678	...	
1921 .. .	188,556	440,271	628,827
1926 .	202 985	..	...

In 1926, of the Europeans, 104,392 are males and 98,593 females. The estimated mean population (European) for the year 1928 is 208,700.

The number of European births registered in 1927 was 5,325, deaths 1,587, and marriages 1,800.

Religion.—The Census of 1921 showed the following results.—Dutch Churches, 207,536; Anglican Churches, 50,807, Presbyterians, 13,562; Congregationalists, 2,763; Methodists, 135,778; Lutherans, 7,931; Roman Catholics, 9,879; Jews, 4,761; Heathen, 174,697; Others, 21,113

Education.—Higher education is under the control of the Union Ministry. In 1927 there were 850 public and aided private schools, with an enrolment of 44,356 pupils, and, except when the parents object, both official languages are taught.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. E. R. Grobler.

Executive Committee, E. A. van der Walt, J. A. D. Serfontein, H. J Odendaal, C. T. van Schalkwyk, jr.

Provincial Secretary, R A Gregorowski.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 22,695 Europeans in 1926. A new sewerage system and an additional water supply are in successful operation. Six new bridges of masonry, 85 ft. span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan., 1904

Bloemfontein is distant from London 6,700 miles; transit, *viâ* Capetown, 19 days.

Imperial Crown Colonies and Protectorates.

NOTE.—*The Indian Empire, The Dominion of Canada, Newfoundland, The Commonwealth of Australia, The Dominion of New Zealand,* and *The Union of South Africa* are shown separately in the preceding pages.

BERMUDA

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15′ N lat and 64° 51′ W. long, comprising an area of about 19 square miles, with an estimated population (1927) of 30,814 (15,833 white, and 14,981 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown, and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to New York. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4′ N. to 4° 10′ S., and from long. 108° 50′ to 119° 20′ E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1 845 000, consisting chiefly of Dyaks, Malays, Kyans, Papuas or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celebes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within "Netherlands' India." The remainder of the island is under British protection.

BRITISH NORTH BORNEO

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population is 257,804, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 7 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 5 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

The chief products are timber, tobacco, rubber, copra, cutch, birds'-nests, salt fish, damar, sago, coco-nuts, rattans, and all varieties of jungle and sea produce. The country is suitable for the cultivation of sugar, tapioca, coco-nuts, kapok, ground nuts, rubber, pepper, and gambier on a large scale. Gold has been found. Coal of good quality is now being produced at the rate of 5,500 tons per month at Sebattik, in the south eastern corner of the territory.

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior; there is a branch from Beaufort to Weston (20 miles). There are several wireless stations. There is a State bank at Sandakan with a branch at Jesselton.

There is an Armed Constabulary numbering 676 all ranks, composed of Indians and Natives under European officers, armed with S.M.L.E. rifles and Lewis guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

BRUNEI

Sultan, H.H. Ahmed Tajudin Akhazul Khani Waddin, *suc* Sept., 1924.
Joint Regents, Pengiran Bendahara and Pengiran Pemancha.

A native State on the north-west coast of the island of Borneo. The total area is about 2,500 square miles, the population being 25,454 (April, 1921), of whom 23,938 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of nearly 12,000. Native industries include fishing, cloth-weaving, brass foundries and silversmiths' work. The chief imports are rice, cloth, tobacco, sugar, petroleum, and sundries; the exports are chiefly cutch (mangrove extract), rubber, jelutong, and sago. The revenue for 1927 was £46,916, and the expenditure £49,816; the debt (Dec 31, 1927) is £48,883. Total imports 1927, £165,847, exports, £168,794.

High Commissioner, The Governor of the Straits Settlements.
British Resident, Brunei, P A B McKerron.

Brunei is 5 hours by steamer from Labuan. There are wireless stations at Brunei, Labuan, Tembirong, and Belait.

BRITISH GUIANA,

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec 31, 1926, was estimated at 306,844, of whom 126,908 were East Indian immigrants. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 141,000 acres (of which 58,589 acres are in sugar-cane and 32,798 in rice), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potaro River (a tributary of the Essequibo) are the *Kaieteur Falls*, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The meteorological records taken on the coast-lands during a period of 80 years show, as regards temperature, that the climate is a very equable one. The mean temperature is 80 4°, its recorded extremes during this long period ranging between 68° and 92°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 70° and 89°. In the interior the mean temperature is higher—82 6°, its extremes ranging from 66° to 103°. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 90 8 inches distributed over 192 days of the year, and its range from 52·7 to 135·2 inches per year. In the interior the average recorded rainfall is 58·5 inches per year, ranging from 45·2 to 80·4 inches per year. The birth-rate in 1926 was 34 7, and the death-rate 25 5 per 1,000. The chief product is sugar, which forms 49 per cent of the export trade. The leading exports are sugar (£1,260,470 in 1926), rum, diamonds, timber, balata, bauxite, and rice. There are about 9,000 aboriginal Indians; they are occupied largely in fishing, hunting, and raising crops of cassava.

The British Guiana Order in Council, 1928, providing for the Government of the Colony and for the Constitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined, came into operation on July 18, 1928. The Legislative Council

* Exclusive of land sales

consists of the Governor as President, of 10 Official Members and of 19 Unofficial Members. Executive and administrative functions are exercised by the Governor and an Executive Council. There are 2,600 miles of post-office telephone wire, with 12¾ miles of aerial cable, and 574 of telegraph lines, with 75 post-offices. There are 95 miles of railway.

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29′ 5″ to 15° 53′ 55″ N. latitude and 89° 9′ 22″ to 88° 10′ W. longitude. Its extreme length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 8,598 sq. miles, with a population (Census 1921) of 45,317—22,564 males and 22,753 females; the estimated population (Dec. 31, 1927) being 49,249 — 24,336 males, 24,913 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily. Fruit, including bananas, plantains, coco-nuts, pineapples, oranges, and mangoes also grow well, while inland there are extensive regions of good pasturage. About 60,000 acres are under cultivation. The best description of cacao trees grow wild in the bush. There are 80 primary schools in the colony, and 5 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1927 was 679,317 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 4 appointed members and a Legislative Council of 6 official and 7 appointed members. The Governor is President of both Councils.

BRITISH WEST INDIES.

The West Indies, so named in 1492 by Columbus, who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30′ to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within

* Against this liability there is an accumulated Sinking Fund of £465,707. A sum of £1,269,497, advanced by the Crown Agents pending the raising of a loan to finance the City improvements and Coastal Drainage and Irrigation Schemes now in progress, is not included in the above total.

7 miles of the coast of Venezuela (South America), and is divided into three main groups. I. GREATER ANTILLES, which contain the largest islands, *Cuba* (44,000 sq. miles) and *Hispaniola* (28,000 sq. miles), being Independent; Jamaica and its dependencies, British; and Puerto Rico, a dependency of the United States. II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are *Independent*, 12,300 *British*, 3,890 *United States*, 1,350 *French*, 430 *Netherlands*, and 90 *Venezuelan*.

Trade Enquiry Office in London, The West India Committee, 14, Trinity Square, E.C. 3.

THE BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 42′—27° 34′ N. lat. and 72° 40′—79° 5′ W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1927 of 58,101, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), Cat Island, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, San Salvador or Watlings Island, Rum Cay, Long Cay, Ragged Island and Biminis. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering, the exports of sponge in 1927 being valued at £107,280. Tomatoes are being cultivated in large quantities for shipment to the United States. Mahogany, lignum-vitæ, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established, the land under the fibre plant being 16,445 acres, and the value of Bahamas hemp fibre exported in 1927, £10,632. The imports are chiefly foodstuffs, wines, sprits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members and an elective Representative Assembly of 29 members.

BARBADOS,

the most windward of the West India Islands, is situated in 13° 4′ N. and longitude 59° 37′ W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population (Census of 1921), was 156,312. The principal exports are sugar, molasses, rum, and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and the Lodge School and Harrison's College provide for higher education for boys, and Queen's College and Codrington High School for girls. Barbados alone of the W.I. Islands makes local provision for University training, Codrington College having been founded under the will of Christopher Codrington, who died in 1710. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1921, 13,486), on the shores of an open roadstead (Carlisle Bay).

	1926-27	1927-28
Revenue	£387,462	£414,884

Barbados, distant 3,635 miles; transit, 13 days.

JAMAICA,*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42′—18° 32′ North lat. and 76° 11′—78° 23′ W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1921, of 858,118 (males, 401,973; females, 456,145), whites 14,476; coloured, 157,223, blacks, 660,420; East Indians, 18,610; Chinese, 3,696, not specified 3,693.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St Jago. It was taken possession of by the Spaniards in 1509, but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 210 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages; the number of accounts open in the Govt. savings banks was 78,450 (1927). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits and nuts, chiefly bananas, oranges and cocoanuts, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members, the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), of 10 Nominated Members, and of 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census 1921) 62,707, the next in importance are Spanish Town, pop. 8,694; Montego Bay, 6,580, and Port Antonio, 6,272. Chief exports (1927) bananas, £2,365,464, sugar, £792,227; coffee, £320,178; pimento, £265,308; cocoa, £176,477.

Kingston is distant from London 4,000 miles; transit 12 days.

The Cayman Islands.

The Cayman Islands, forming a dependency of Jamaica, between 79° 44′ and 81° 26′ W. and 19° 15′ and 19° 46′ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 225 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1921) 5,253.

The principal town is Georgetown, in Grand Cayman, population (1921) 1,070.

Revenue, 1927, £6,148; expenditure £7,651.

Imports, 1927, £40,964, exports, £13,422.

Commissioner & Judge of the Grand Court, H. H. Hutchings (*house and fees*) . . . £600

* The Government publishes annually a *Handbook of Jamaica*, full of information respecting the history and *personnel* of the island.

Turks and Caicos Islands.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848 In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles They have an area of about 170 square miles, and a population (1921) of 5,612, of which the principal island, Grand Turk, contains 1,568 Grand Turk is an important cable station. The islands are celebrated for producing the finest salt in the world

A Commissioner administers the government of the Dependency, assisted by a Legislative Board This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

THE LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3) Dominica; (4) Montserrat, and (5) the Virgin Islands, with Sombrero; all, except the last, having their own local Legislature These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislature on certain subjects. The population of the federal colony at the Census of 1921 was 122,242. The General Legislative Council consists of 10 official and 10 elective members, with the Governor as President.

(1) Antigua and Barbuda.

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6′ N. lat. and 61° 45′ W long., and is about 70 miles in circumference Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 17,000 are under cultivation The population (with Barbuda) in 1921 was 29,767, including 12,542 males and 17,225 females Settled by the English in 1632, and granted to Lord Willoughby by Charles II, the island has always been more distinctively English. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected Cotton is planted on a small scale and the island also exports molasses, tamarinds, pine-apples, and arrowroot. In March, 1898, the Crown Colony system of government was instituted

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35′ N., long. 61° 42′ W. Area, 62 square miles. Population, 900. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables, and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing. *Magistrate*, Capt. G. Downing, (*and quarters*) £260.

Redonda, is a small island with a phosphate industry.

(2) St. Kitts-Nevis with Anguilla

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population (Dec. 31, 1927) of 35,853 and a total area of about 150 square miles The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (estimated population Dec 31, 1927, 18,770), the principal island, is the oldest colony in the West Indies; it is situated in lat. 17° 18′ N. and long. 62° 48′ W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a

height of 3,711 feet (Mount Misery) The capital, Basseterre, is a port of registry, and had 57 vessels of 919 tons in 1927.

Nevis (population 12,414) is separated from St Kitts by a strait some 3 miles wide and has an area of 50 square miles. Sugar-cane and cotton are grown. Its greatest elevation is 3,596 feet. The chief town, Charlestown, is a port of entry

Anguilla (population 4,669) is about 60 miles N W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles Salt is the principal product, and small stock are raised.

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20′—15° 45′ N. lat and 61° 13′—61° 30′ W. long, 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, vanilla, and fruit The population was estimated at 41,051 on Dec. 31, 1927; included in this total are 400 Caribs, of whom about 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members, 4 of whom are elected, and 2 nominated by the Governor The principal towns are Roseau, on the south-west coast, population 7,374, and Portsmouth, population 1,190.

(4) MONTSERRAT

is situated in 16° 42′ N. lat and 62° W. long., 26 miles S W. of Antigua It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, with a population (1925) of 11,673. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. A great part of the island was devastated by hurricanes in 1924 and 1928. The chief exports during the year 1926 were cotton-seed meal, cotton, cotton-seed oil, onions, limes and its products, sugar, papaine and animals of all kinds The chief town is Plymouth, with a population (1921) of 1,709. A wireless station was opened in 1925.

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27′ N. lat and 64° 40′ W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,082. There is good pasturage for cows, sheep, and goats. Sugar, cotton and coco-nuts are grown in increasing quantity, and a tobacco and cigar industry has been established, fishing and poultry-rearing are also carried on. The capital of the group is Road Town, on the south-east of Tortola; population (1921), 463.

TRINIDAD AND TOBAGO.

Trinidad is the most southerly of the West India Islands It is close to the north coast of the continent of S America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3′—10° 50′ N. lat and 60° 55′—61° 56′ W. long., and is about 50 miles in length by 38 in breadth, with an area of 1,862 square miles (541,682 acres cultivated), and a population at the Census of 1921 (including Tobago) of 365,913, estimated at 391,705 on Dec. 31, 1927 The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797 The chief town and port of entry, Port of Spain (pop. 65,016), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop 11,201), about 30 miles south of the capital, Princestown (pop 5,267), and Arima (pop 4,453) A remarkable phenomenon is the asphalt lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1927, 186,364 tons (£464,475) were exported. The soil is rich and productive, the most important products being sugar, cocoa, mineral oil, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1927) were cocoa £1,671,883, sugar £784,990; and petroleum £2,336,361 On Dec 31, 1927 there were 14 companies actively engaged in the production of oil, the royalties payable on oil won from Crown Lands being £39,965. Coal, iron, graphite and gypsum are known to exist in small quantities; and traces of gold have been found in the Northern Range. On Dec 31, 1927, there were 288 Elementary and Intermediate Schools, 47 being Government and 241 Assisted, Trinidad having 252 and Tobago 36, in addition to 7 colleges for higher education, which also receive a grant-in-aid. There are 123 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council, and a Legislative Council of 12 official and 13 unofficial members, 6 of the latter being nominated by the Crown and 7 elected.

	1926	1927
Revenue	£1,787,288	£1,686,053
Expenditure	1,580,213	1,487,024

Exports	5,546,376	6,726,016

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between 11° 9′ N. lat. and 60° 43′ W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados, is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population (Census 1921) of 23,390 It is one of the most healthy of the West Indies; the temperature varies from 81° to 88°. There are two towns in the island, viz., Scarborough (pop. 1,487) and Plymouth (pop. 436).

CAPITAL, Port of Spain (pop. 65,016); transit, 14 days to U.K.: 8 days to U.S.A.

THE WINDWARD ISLANDS

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St Vincent. The total area is 508 square miles, with a population (1921) of 262,254. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir Frederick Seton Janes, K.B.E., C.M.G. (1924) £2,500

Transit to Grenada from London about 14 days.

GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of 12° 30′–12° 58′ N lat. and 61° 20′–61° 35′ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception It was originally colonised by the French, and was

definitely ceded to Great Britain by the Treaty of Versailles in 1783

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware &c. The Legislative Council consists of 16 members, 8 of whom are officials 3 nominated and 5 elected

St George's, on the south-west coast, is the chief town, and possesses a good harbour.

	1926	1927
Public revenue	£148,447	£155,508
Expenditure	119,001	135,536
Public debt	223,670	261,382
Total imports	386,483	415,607
Total exports	447,401	506,533

Colonial Secretary and Treasurer, Herbert Ferguson, C.B.E. ... .(*and quarters*) £1,060
Chief Justice, J. Stanley Rae 1,000
Attorney-General, N. J. Paterson, K.C . . 800
Chief Medical and Health Officer, Maj. H. E. Sutherland Richards 750
Magistrates, I G Wakeley, M C , *N. Dist.*, T W S. Garraway, *S Dist*, each £500; H Allan Otway, *District Commr. of Carriacou* .... (*and quarters*) 500
Chief of Police, Maj. E. E. Turner (*and quarters*) 450

The Grenadines are a chain of small islands lying between Grenada and St Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop (1921) 7,104

ST LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 54′ N. lat. and 60 59′ W. long, at a distance of about 90 miles W N W. of Barbados, 21 miles N. of St Vincent, and 24 miles S of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 233 square miles with a population (Dec 31, 1927) of 56,065. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1927) are sugar, cocoa, coco-nuts, copra, limes, lime-juice, lime-oil, logwood, molasses, syrup, bananas and other fruits. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 2,480).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1927, 260 steamers (tonnage 569,329) entered Port Castries.

Administrator & Col Sec., Charles W. Doorly ... . (and allowance £200) £1,100
Chief Justice, Capt Oliver Plunkett 700
Attorney-General and Registrar, J. E. M. Salmon (with personal allowance £150) 600
Treasurer and Postmaster, H. J Pink £640 to 650
Chief Medical Officer, V. L. Ferguson, M.D £600 to 700

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10′ 57″ N. lat. and 61° 13′ W. long. is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1921) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, molasses, rum, cassava, cocoa, coffee and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, liquors &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

Attorney-General (vacant) 500

CAMEROONS.

(Joint Franco-British Administration.)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo (the Spanish Mum River Settlements occupying a small intervening area), was obtained by conquest by Franco-British forces during the War of 1914–18, and at the conclusion of Peace its administration was confided by the Supreme Council of the Allied Powers to Great Britain and France jointly.

The approximate geographical limits are between 2°–12° N. lat. and 8° 48′–19° E. long., and the area is about 187,596 square miles, containing a population estimated at 2,144,000; of which total the French sphere is 153,846 square miles, with 1,550,000 inhabitants. The coast-line extends from the Rio del Rey to the Mum River. The territory occupies the north-west corner of the Central African Plateau, with Cameroon Peak (13,370 feet) near the capital on the coast, and the Chelichi and Mandara Mountains on the north-west frontier. The Sanaga is a considerable river flowing into the Atlantic opposite Fernando Po; the Sanga and Dscha (or Ngoko) are tributaries of the Congo, and the Logone-Shari flows into Lake Chad. The inhabitants are Bantus and Sudanese, with some Haussas and Fula tribes, of whom the latter are Muhammadans and the remainder pagans. Cocoa cultivation is a highly successful industry of recent origin, and the Protectorate is rich in forest produce. The exports are rubber, palm oil, palm kernels, cocoa and ivory; the imports are chiefly clothing and textile goods, meat, fish and provisions.

In 1920 the whole area was divided into a British Sphere and a French Sphere.

British Cameroons

The *British Sphere* lies between Nigeria and that part of the former German Cameroons which is now administered under mandate by

the French The total area is 34,236 sq miles, and the total population is 700,050. It is a narrow strip of land reaching from the Atlantic Ocean to Lake Chad, and lies diagonally between parallels of latitude 4° N and 12° 30′ N. and parallels of longitude 8° 30′ and 15° E The nature of the country varies to a remarkable extent from the coastal mangrove swamps and thick forest belts to the grasslands at heights of 4,000 ft to 7,000 ft. and over; yet another contrast may be seen in the sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point in the British Cameroons is the Cameroon Mountain, which, towering above the port of Victoria, rises to a height of 13,350 ft., It is volcanic but has not been active since 1922 The Southern section is administered by the Nigerian Government as a separate Province, the capital being Buea on the slopes of the Cameroon Mountain The principal port is Victoria in Ambas Bay), which is connected by railway with the capital. The Northern section is administered by the Residents of the adjoining Nigerian Provinces of Adamawa and Bornu.

CAYMAN ISLANDS

(*See* BRITISH WEST INDIES)

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55′—9° 50′ N lat and 79° 42′—81° 53′ E long. Its area is (with outlying islands) 25,332 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles, and its greatest width 140 miles The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle The coolest months are December and January; the hottest are April and May.

The population (Census of 1921) was 4,504,549 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543 In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1802, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished, and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain The principal exports are tea, rubber, products of the coconut palm, plumbago, cacao, cinnamon, citronella oil, cardamoms, areca nuts, ebony, and a little vanilla.

About one-fifth of the island is under cultivation, and the approximate areas in 1927, in acres, were :—Rice, 834,000; other grain, 102,000; tea, 450,000; coconuts, 887,000; rubber, 490,000; cinnamon, 25,000, cacao, 34,000; and tobacco, 13,000 The live stock in 1927 included 1,588,000 horned cattle, 60,000 sheep, 175,000 goats, 51,000 pigs, and 1,500 horses Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially cat's-eyes, rubies, &c; and for the pearl fishery in the Gulf of Mannar, off the N.W. of the island The manufacture of salt is a Government monopoly.

There are 895 miles of railway open, 778 being 5 ft. 6 in. gauge and 117 miles 2 ft. 6 in.; and 752 post offices, 351 money order offices, and 228 telegraph offices, with 9,774 miles of telegraph wire

The government of Ceylon is administered by a Governor, aided by an Executive Council of 9 members, and a Legislative Council of 49 members. The Legislative Council contains representatives of the various territorial divisions of the island, and special safeguards provide for the representation of minorities and unrepresented interests. Of the 37 unofficial members 34 are elected and 3 nominated by the Governor.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local boards; and in the country districts the Ceylonese retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo The natives are Muslims The islands are unhealthy, and the main exports are dried fish, cowrie shells, coco-nut coir, and tortoiseshell.

Colombo, distant from London (overland) 5,868 miles; transit, 19 days.

THE CHANNEL ISLANDS,

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lithou (38), a total of 47,083 acres, or 73·4 square miles. The 1921 Census population of Jersey was 49,494, and of Guernsey, &c , 40,120, total, 89,614.

The climate is mild, and the soil exceptionally productive The land under cultivation in 1916 was 49,678 vergées (2¼ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes, and wheat, and of Guernsey green crops and oats, fruits and tomatoes. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade The chief town of Jersey is St. Helier, on the south side; the principal town of Guernsey is St Peter Port, on the east coast.

The trade of the Channel Islands is principally with the United Kingdom.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33′ and 35° 41′, and E long 32° 20′ and 34° 35′. It is about 40 miles distant from the nearest point of Asia Minor, and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad, from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east The area is 3,584 square miles. The population at the census of 1921 was 310,715, of whom about 20 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are

grain of various kinds, sesame, linseed, flax, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes oranges, pomegranates, asbestos, aniseed, sponges, sumac leaves, terra umbra, gypsum, salt, pyrites, and chrome. In 1927 the wine export was 1,450,848 gals., and that of spirits 13 349 gals., the bulk of the wine going to Egypt, and of spirits to Egypt, Syria and Castellorizo. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered by a Governor, assisted by a Legislative Council composed of 24 members, 9 being official and 15 elected. The island is divided into three electoral districts each returning one Muhammadan member, and 12 electoral districts each returning one non-Muhammadan member.

For administrative purposes the island is divided into six districts, in each of which the executive government is represented by a commissioner. For judicial purposes it is divided into three judicial districts. The law courts were reconstituted in 1927, and there are now a supreme court, 3 divisional courts, 3 assize courts, 3 district courts, and also magisterial and assistant district judges' courts. In all the courts Cyprist judges (Christian and Moslem) take part. There are also 3 Mussulmen religious tribunals, styled *Sheri* Courts, and a *Sheri* Tribunal of Appeal.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 18,579 in 1921, the other principal towns are Larnaca (population 9,768), Limassol (13,291), Famagusta (6,890), Kyrenia (1,913), Paphos (4,119), and Morphou (4,250).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou, 25 miles, in 1907, and to Evrykhou, 15 miles, in 1915. There is a regular service of steamers between Cyprus and Egypt, Syria, Cilicia, Palestine, Smyrna, Constantinople, Greece, France and Italy.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15′—53° S. lat. and 57° 40′—62° W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 4,618 sq. miles, and a population in 1921 of 2,094. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764, this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the English for the protection of the whale-fishery, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 1927. The climate is cold but vigorous, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved suitable for sheep, 605,675 being carried in 1927; the output of wool is about 10m. million lb. annually. The population is mainly British, and is principally engaged in sheep-farming. The chief exports are wool, tallow, hides and sheepskins. The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 4 members, and a Legislative Council,

the members of both being appointed by the Crown.

CHIEF TOWN, Port Stanley Population (1921) 897

Dependencies of the Falkland Islands.

The total area of land and sea included in the dependencies of the Falklands is over 3 000 000 square miles *South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whaling industry) at Grytviken Harbour In the *South Shetlands*, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land station which arrives and departs with the whaling fleet The *South Orkneys* also have a seasonal land station, and the Argentine Government have, with the permission of H.M Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later. The other dependencies, of which the principal units are the *South Sandwich Islands*, and a part of the *Antarctic*, or South Polar, continent known as *Graham's Land*, are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1926 amounted to £221,595 The local expenditure was £100,325, the surplus (after meeting administrative expenses at Port Stanley) being devoted to local research and development. The trade is considerable, the exports being valued at £4,160,743, and the imports at £530,017 in 1926 The whaling industry carried out from these dependencies is greater than that of the rest of the world combined Thirteen companies (2 British, 11 Norwegian) caught 13,188 whales in the 1925-6 season, the landed value of the oil being £4,101,709

In 1928 a claim was made by Norway to *Thomson* and *Bouvet* Islands in the Antarctic and by Argentina to the *South Orkneys*, these claims were not admitted by the British Government, but Bouvet Island was ceded to Norway in November, 1928, as an act of grace

Port Stanley is distant about 8,130 miles; transit, 25 days from Liverpool. Telegrams by cable and wireless telegraphy *via* Monte Video

FEDERATED MALAY STATES

(*See* MALAYA).

* Colony and Dependencies

FIJI

This is a group of 200 to 250 islands (of which some are, however, mere coral islets and reefs), in the South Pacific Ocean, about 1,100 miles north of New Zealand. They extend 300 miles from east to west and 330 north to south, between 15° 45'—21° 10' S lat and 176° E.—178° W long The gross area of the group is about 7,083 square miles The islands are of volcanic origin with lofty mountains, and well wooded The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land) The climate is equable and remarkably healthy for Europeans, the average temperature in the shade in the cool season is 72° F. rising to 84° in the hot season extremes having been seen 60° and 94° Vegetation is remarkably luxuriant, the chief products being bread-fruit bananas, plantains, pea-nuts, yams, and dalo (taro), cocoa-nuts, sugar-cane rice maize, and cotton. The principal exports are sugar, copra, bananas, tiocas shell molasses, rubber, maize, hides and pelts and beche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 8 members Laws are passed by a Legislative Council (of which the Governor is president) containing 12 nominated members (one specially representing Indian interests), 7 elected members and 2 native members, appointed by the Governor. Native administration is carried on through the chiefs under the Governor's supervision The population (Dec 31, 1927) was 173,836 (90,263 native Fijians, 69,463 Indians, 4 458 Europeans, and some Polynesians and others)

GAMBIA

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447, and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888 It now consists of the Island of St. Mary, British Kombo Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 24, 1921, was 9,227, and that of the Protectorate 201,303. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form ninety-five per cent. of the total exports, they are sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides, and calabashes are also exported, and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco A Company of the W.A.F F (4 officers and 120 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 142 men), which performs both civil and military duties There are 4 Government wireless stations. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

Bathurst is distant from London 2,600 miles; transit about 12 days.

GIBRALTAR,

a rocky promontory, 2¾ miles in length and ¾ of a mile in breadth, and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713 Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Elliot, afterwards *Lord Heathfield*, held it for 3 years and 7 months against a combined French and Spanish force The town stands at the foot of the promontory on the N W side Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade During the year 1927 4,429 vessels entered, with a total tonnage of 6,624,204. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer motor spirit and perfumery. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks The estimated civilian population (1927) was 16,120.

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members, there is no Legislative Council.

GOLD COAST.

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 3° 7′ W to 1° 14 E of Greenwich. It is divided into three parts —Gold Coast Colony, 23,490 sq. miles, Ashanti, 24,560 sq miles, and the Northern Territories, 30,600 sq. miles—a total area of 78,650 sq miles It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the 11° of N. latitude It is bounded on the west and north by the French colonies of the Ivory Coast and French Sudan, and on the east by Togoland The population (Census of 1921) was. *Gold Coast Colony*, 1,171,913, *Ashanti*, 406,193; *Northern Territories*, 530,355, total, 2,108,461, excluding 2,033 Europeans The natives are almost all Pagans, but there are 60,000 Muhammadans, and the number of Christians is steadily increasing

The trade in 1927 was principally with the United Kingdom (44 per cent.), U.S. (19), Germany (13), Netherlands (11) and France (5 per cent.). Gold is found in considerable quantities, and diamonds were discovered in 1919, there are also large deposits of high-grade manganese The principal product is cocoa, more than half the world's supply being produced in the Colony, rice and sisal hemp plantations have been started and steps have been taken to improve the coconut industry The principal exports in 1927 were. cocoa, £11,727,566, gold and gold dust, £737,182, manganese £682,962; and diamonds, £512,159 The chief imports are textiles, building materials, cotton goods, provisions, kerosene, and hardware. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation The Government assists the missionaries in educational matters and has established schools of its own, and a University College at Achimota, 6 miles from Accra, is being built. Great efforts are being made to improve the sanitary condition of the coast towns. The principal towns are lighted and policed. 2,600 miles of telegraphs have been established in the Colony, of which 290 miles are in Ashanti and 203 miles in the Northern Territories There is a wireless telegraph station at Accra A Government railway runs from Sekondi through Tarkwa the centre of the gold-mining industry to Kumasi (168 miles) Another line runs from Accra to Kumasi (192 miles) And a third from Huni Valley (53 miles from Sekondi on the Sekondi-Kumasi line) to Kade in the Central Province, 98 miles from Huni Valley and this line was open over all its length by the end of 1927. In 1928 a harbour was opened at Takoradi

The seat of government is Accra (population (38,049). The other principal towns are Cape Coast (14,921), Ada (1,620) Elmina (5,262), Sekondi (9,500), Tarkwa (2,671), Keta (9,839) Axim (3,781) Kumasi (20,268), Saltpond (6 342) and Winnebah (6 980) The government of the Colony is administered by a Governor, aided by a nominated Executive Council There is a Legislative Council of 12 official and 9 unofficial members, for the Colony, excluding Ashanti and the Northern Territories

ASHANTI.

Ashanti was placed under British protection on Aug. 7, 1896, and a British Resident was appointed to Kumasi. Under Orders in Council of Sept. 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast Colony being appointed Governor of Ashanti, though the laws and ordinances of the Gold Coast Colony do not apply to the annexed territory. It is divided into two provinces under Provincial Commissioners: the Eastern Province, headquarters Kumasi, and the Western Province, headquarters Sunyani. The population (census 1921) was 406,193. Kumasi, the chief town, has about 25,000 inhabitants. There are Government schools at Kumasi, Sunyani and Juaso, and a number of mission schools. Agriculture is extending, and cocoa plantations are being formed. In the southern parts of Ashanti are rich forests with excellent timber trees (mahogany, cedar, &c.), trees yielding fruits, rich in oil, rubber and cocoa-bearing plants, and species yielding gum copal. The country is well watered, and, with proper restraints on wasteful native farming and on over-exploitation, would contain inexhaustible supplies of valuable forest products. In the northern parts the forests are sparser, though timber and oil trees are common and game plentiful; the products there are chiefly maize, kokoyams, bananas, ground-nuts, and cocoa, the plantations of which are rapidly extending.

Chief Commissioner, John Maxwell, C.M.G. £1,600
Deputy Chief Commissioner, Maj. F. W. F. Jackson, C.M.G., D.S.O. 1,350
Provincial Commissioners, (vacant)...each 1,200
Circuit Judge (*Ashanti and Northern Territories*) (vacant) 1,200

NORTHERN TERRITORIES.

In 1901 the Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. The country is divided into two provinces under Commissioners; the Southern Province, with headquarters at Tamale, and the Northern Province, with headquarters at Navaro. By the census taken in 1921 the population was about 530,360. The Muhammadans have substantial mosques; there is a Roman Catholic mission. Government schools have been established at Tamale, Gambaga, Salaga, and Wa. Good permanent roads are being made. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), and are said to contain wide auriferous areas.

Chief Commissioner, Maj. A. H. C. Walker Leech, C.M.G. £1,600
Provincial Commissioners, A. J. Cotterell; Lt.-Col. P. F. Whitfield, D.S.O. ... ... each 1,200
Commandant of Constabulary, Capt. J. Massie 960

Accra is 11 days' sail from Liverpool, 3,920 miles; transit, 14 to 30 days.

HONG KONG.

The Crown Colony of Hong Kong, consisting of a number of islands and of a portion of the mainland, situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 9′ N. lat. and 113° 52′ 114° 30′ E. long., and bounded on the N. by the Shum Chun River.

Hong Kong is an island about 11 miles long and from 2 to 7 miles broad, with a total area of 28½ square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lyeemoon) not more than a quarter mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; *British Kowloon* was subsequently acquired by the Pekin Convention of 1860; and the *New Territories*, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with an estimated population (1927) of 978,000. The non-Chinese residents, excluding naval and military, numbered about 20,800 (1927).

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 20 square miles. With the exception of liquor and tobacco the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1926) 18,410,682 tons; (1927) 22,063,380 tons. A railway, of which 22¼ miles belong to the Government, runs from Kowloon to Canton; the length north of the Shum Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,810 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 86 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather, matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1927

there were 941 schools subject to Government supervision, attended by 49,111 pupils The University (opened in 1912) includes faculties of medicine, engineering, and arts

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 14 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls certain sanitary measures

THE ISLE OF MAN (Mona),

an island in the Irish Sea, in lat 54° 3′ – 54° 25′ N. and long 4° 18′ – 4° 47′ W , nearly equidistant from England, Scotland and Ireland The total land area is 145,325 acres (227 sq miles) with a population (1921) of 49,270 In 1925 the births numbered 761 and the deaths 787 The cultivated area (1926) was 81,041 acres, and the live stock included 3,819 horses 18 734 cattle, 89,717 sheep, and 2 642 pigs In the 9th century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western Isles, and Man For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule On his accession to the English throne, Henry IV seized on the Isle of Man, and in 1406 bestowed it on the Stanley family In 1827 the Crown purchased it for the sum of £417,144

The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce Forty-seven miles of railway have been constructed, and about 25 miles of electric tramroad.

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches —the Governor and Council and the House of Keys The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, 2 members appointed by the Governor, and 4 members appointed by the House of Keys The House of Keys (possibly from the Scandinavian *kese* = chosen) is one of the most ancient legislative assemblies in the world It consists of 24 members, elected by the male and female owners and occupiers of property, 16 from the six *sheadings*, 5 from Douglas, and 1 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. An annual contribution of £10,000 is made to the Imperial Government. In 1923 the Tynwald offered the Imperial Government the sum of £200,000 as the Island's contribution to the cost of the Great War.

CAPITAL, Douglas. Pop. (1921), 20,326 (Castletown is the ancient capital); the other towns are Peel and Ramsey.

(*See* BRITISH WEST INDIES.)

KENYA.

Kenya Colony and the *Kenya Protectorate* are situated in Eastern Equatorial Africa. The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland (35,812 sq. miles) was ceded by treaty in 1925, and on the north by an agreement with Abyssinia in 1908. On the west the Colony adjoins Uganda, the boundary being determined by an Order in Council in 1926 to include in Kenya an area on the west of Lake Rudolph and north of the River Turkwel, stretching from Mt. Elgon to Mt. Zulia (on the boundary of the Sudan), which was formerly part of the Uganda Protectorate. On the south Kenya adjoins the mandated Tanganyika Territory. The population of the Colony is estimated at 2,736,517 (Europeans 12,529, Asiatics 30,583, Arabs 10,557, and Africans 2,682,848). The area is 225,100 square miles.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility in the interior, as well as on the coast. The Colony is divided for administrative purposes into 7 provinces, which are subdivided into districts, and 5 extra-provincial districts.

The districts most suitable for settlement by Europeans are those of Kyambu, North Nyeri, Nakuru, Naivasha, Kericho, Uasin Gishu, and Trans-Nzoia. There is also a considerable region still undeveloped.

Kenya Protectorate also includes the *Witu Protectorate*, a small tract of country at the mouth of the river Tana.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population about 39,824, of whom 869 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions to Kahe, Fort Hall, West Kenia Archers Post, Masai Province, Eldama Ravine, Kericho, Rumuruti, Kitale, Eldoret, Machakos, Kisii, and Mumias; also telegraph connexion between Mombasa and Tanga. Radio-telegraph station at Mombasa. The Kenya and Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 2,732 feet in length. There are also about 128 miles (under Kenya and Uganda Railway management) from Nairobi to the Nyeri District. There are about 90 miles from the main line at Magadi junction to the Magadi Soda Lake. A line (142 miles) has been built from Nakuru to Turbo, and is being continued to Mbulamuti on the Nile, a further 185 miles. The Voi-Kahe railway (92 miles) is also under Kenya and Uganda Railway management, and branch lines have been constructed to Solai (26 miles) and Kitale (41 miles). Nairobi, the capital of the Colony, and central station of the Kenya and Uganda Railway, has a population of 32,854, of whom about 3,800 are Europeans. There are also some 600 European farmers in the immediate neighbourhood of Nairobi.

The principal imports are piece goods, provisions, agricultural machinery and appliances, motor and other vehicles, building and fencing material, rice, flour, and petroleum. The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked. The principal exports are cotton, coffee, maize, fibres, oil-seeds, carbonate of soda, wool, hides and skins.

(*See* BRITISH WEST INDIES.)

MALAYA.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements*, the *Federated Malay States*, the *Non-Federated Malay States*, and the Protected *State of Johore* The total estimated population of BRITISH MALAYA (1922) was 3,437,841 (as compared with 2,672,754 in 1911). Of the 1922 total, 2,110,606 were males and 1,327,235 females, the disparity being principally due to the large number of Chinese male immigrants The total European population at the Census of 1921 was 14,954. The total trade of British Malaya was valued in 1927 at £115,565,541 for Imports (£15,471,011 from U K), and at £123,868,363 for Exports (£18,507,114 to U K)

(1) THE STRAITS SETTLEMENTS.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies), Penang (including Province Wellesley and the Dindings), Malacca, the Cocos or Keeling Islands, Christmas Island, and Labuan These Settlements have an entire area of about 1,600 square miles, with an estimated population (1928) of 1,095,635

The Government consists of a Governor, assisted by an Executive Council of 10 members, and a Legislative Council of 13 official and 13 unofficial members, appointed by the Crown Of the unofficial members 11 are nominated by the Crown and 2 are selected by the Chambers of Commerce at Singapore and Penang The law of the colony is the common and statute law of England as it was in 1826, qualified by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial.

There is railway communication from Singapore, across the Straits of Johore, to Bangkok.

The principal exports are Para rubber, tin, preserved pineapples, tapioca, gambier, copra, pepper, sago, cocoa-nut oil, tanned hides, raw hides, rattans, coffee, spices, gums and dyestuffs (cutch, mangrove, bark, &c.) The rubber exports amounted to 210,135 tons in 1924, 248,138 tons in 1925, 272,546 tons in 1926, and 270,749 tons in 1927. The chief imports are dried fish, rice, milk, sugar, cigarettes and tobacco, coal, cotton piece goods, machinery, ironware, opium, petroleum, sarongs, slendangs and kains.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 217 square miles, and an estimated population (1928) of 553,366 It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16′ N. and long. 103° 53′ E., with 350,355 inhabitants in 1921. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year The railway from Singapore to Bangkok was open for passenger traffic on July 1, 1918

The number of merchant vessels entered and cleared in 1927, exclusive of native craft, was 17,964, with a tonnage of 27,259,514. The total for the whole colony was 26,375, with a tonnage of 39,693,766 The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 64,562 (tonnage, 2,302,838). The harbour, in the extent of its shipping, is one of the greatest

ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of $7,20 000 000. The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was $3,500,000.

Singapore is a free port; no duties are levied upon anything except opium, tobacco, spirits, wines, beer, and petroleum consumed in the colony. The trade returns aggregate for 1927 (including inter-settlement trade) amounted to $1,754,720,203 (including the value of bullion and specie), the value of exported tin being $92,929,440, and of Para rubber $271,353,914.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north west coast of Borneo, in 5° 16′ N. lat and 115° 15′ E. long., and forms part of the Settlement of Singapore. Its area is about 28 square miles, and its estimated population in 5,791. It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine harbour. The exports consist of coal, cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Imports (1927), $2,471,184; exports, $2,926,621.

Resident, A. Gilmour (*acting*).

The Cocos-Keeling Islands are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The estimated population is 965, and the islands export about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 529 miles E. of the Cocos Keeling Islands, has an area of about 56 square miles and an estimated population of 911. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1927 was 226,651 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (est. pop., 1928, 286,197), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (est. pop., 1928, 238,230), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18′ N., long. 100° 21′ E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1927 (including Intersettlement trade) amounted to $620,927,996; the export of tin from the port being $214,784,122 in 1927. *Province Wellesley* is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kedah in 1798, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, and rubber plantations.

The Dindings Territory (area 183 square miles; est. pop., 1928, 27,607) is at present little developed; but it contains, what is considered the best natural portion of the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long, by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 720 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, March 17, 1824, being exchanged for the British settlements in Sumatra. The estimated population in 1928 was 104,344. Aggregate trade, 1927, $86,410,290 (including Para rubber, $42,707,801, exported).

SINGAPORE, the capital of the Straits Settlements, is distant from London 8,730 miles; transit, 22 days. Penang, 20 days; and Malacca, 23 days.

(2) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements, they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1921 of 1,334,890. The principal towns are Kuala Lumpur (Sel.), pop. 80,424; Ipoh (Pk.), 36,860; Taiping (Pk.), 21,121; Kampar (Pk.), 12,325; Seremban (N.S.), 17,272; Klang (Sel.), 11,655; and Teluk Anson (Pk.), 10,869.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above mentioned control.

There are 1,105 miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (120½ miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where it is connected with the Siamese State Railways, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 23 hours, and that between Prai (Penang) and Bangkok 34 hours (compared with a sea journey of 6 days). The railway runs

direct between Singapore Island and the mainland, crossing the Straits of Johore by a causeway. At Gemas there is a branch from the main Singapore-Penang line running northwards through Negri Sembilan and Pahang as far as Mirapoh. This line will eventually connect with another running South through Kelantan now under construction. Through communication between F.M.S. and Kelantan *viâ* the Siamese State Railways is in operation. There are 2,600 miles of metalled road, 113 miles of unmetalled roads, and 1,972 miles of bridlepaths, while the principal rivers are navigable for small boats.

The Federated Malay States contribute largely to the supply of raw materials of the British Empire, and although production of plantation rubber and tin predominates, figures given below show that other products are produced and exported in large quantities. Gold has always been found in small quantities, chiefly in Pahang, and about half a million tons of coal are annually mined in Selangor and used locally. While with the growth of the rubber industry there has been a tendency to neglect some of the older agricultural products, such as indigo, coffee, sugar, pepper, nutmegs and other spices, it has been proved that large areas in the Federated Malay States are suitable for the cultivation of the oil palm, and 19,000 acres have already been planted and nearly 30,000 acres alienated for this cultivation.

Principal exports from the Federated Malay States:

		1926.	1927
Para Rubber	*Tons*	161,188	126,784
Para Latex	*Gallons*	2,059,655	1,546,720
Tin and Tin Ore	*Tons*	45,947	52,180
Copra	,,	65,829	57,536
Firewood, Timber and Planks	,,	53,302	61,087
Rice and Padi	,,	7,318	8,508
Pineapples, Canned	,,	3,940	3,968
Tapioca	,,	4,388	2,597
Arecanuts	,,	1,422	1,356
Rattans	,,	812	1,037
Palm Oil	,,	726	852
Palm Kernals	,,	180	178
Gambier	,,	203	165
Gold	*Ozs.*	12,115	9,790

The climate is very uniform, and though the days are sometimes oppressive, owing to the high humidity, the nights are cool by comparison. The mean maximum shade temperature is 86° F. and the mean minimum 72° F. The mean humidity is 90%. The yearly rainfall averages 100 inches, varying from 65 inches at the driest station to 167 inches at the wettest. Although there are no clearly defined wet and dry seasons, the months of Jan., Feb., June, July and August have considerably less rainfall than the remaining months.

The States are policed by a mixed force of Indians and Malays, officered by Europeans.

	1926.	1927
Public revenue	$102,541,400	$105,404,453

Kuala Lumpur is distant 8,500 miles from London; transit, 21 days (*viâ* Penang).

(3) THE NON-FEDERATED MALAY STATES.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11, 1885, as amended by an agreement dated

* All salaries are exclusive of allowances.

May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909. In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadanism

JOHORE, with an area of 7,678 square miles and an estimated population of 321,000, occupies the southern extremity of the Malay Peninsula. In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer. In 1914, following an agreement of that date, a General Adviser was accepted The Legislature consists of a Council of State to which European and Asiatic unofficial members are appointed The judicial system resembles that of the Federated Malay States Judges of Supreme Court of the Straits Settlements and of the Federated Malay States are *ex officio* Judges of the State of Johore and *vice versâ*. Johore is primarily an agricultural country producing, as major crops, rubber, coconuts, tapioca and pineapples. The cultivation of African oil palm is also making progress Tin ore and iron ore are exported in considerable quantity The Johore State Railway runs for 120 miles through the middle of the State. There are 650 miles of metalled road.

	1926.	1927.
Revenue.....	$18,782,565	$18,239,023
Expenditure	18,000,232	15,828,240
Public Debt	nil.	nil.
Imports	35,782,758	39,422,252
Exports	£39,262,451	88,317,154

The Capital, Johore Bahru, has a population of 16,000.

Sultan, H.H. Sir Ibrahim, G.C.M.G., K.B.E.; *born*, 1873; succeeded his father, 1895.
General Adviser, G. E. Shaw.
Chief Minister, Dato Abdullah bin Jaafar.
State Secretary, Dato Ismail bin Bachok.
Judge, J. McCabe Reay.
Legal Adviser, W. Pryde.
Financial Commissioner, A. S. Small.
Commissioner, Lands and Mines, W. E. Pepys.
Commissioner, Trade and Customs, S. W. Jones.
Assistant Adviser, Muar, A. C. Baker.
State Engineer, F. Glendinning.
Principal Medical Officer, Dr. R. D. Fitzgerald.
Postmaster-General, Dato Mohamed Salleh bin Alí.
Superintendent of Education, H. R. Cheeseman.
Controller of Labour, H. T. W. Oswell.
Protector of Chinese, N. Grice
Warden of Mines, F. C. Marshall.
Commissioner of Police, A. J. Sheedy.
Superintendent of Surveys, C. T. M. Husband.
Conservator of Forests, H. W. Woolley.

KEDAH, between 5° 5′ – 6° 35′ N., lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1921 was 338,544, and the approximate area 3,150 sq. miles. Rice is the principal crop in North Kedah, while cocoa and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 12,000. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 52 British officials, employed in the Public Works, Survey, Police, and Medical departments.

	1926	1927
Revenue	$9,179,487	$8,988,429
Expenditure	5,481,218	6,396,500
Public Debt	nil.	nil.

Sultan, H.H. Sir Abdul Hamid Halimshah, K.C.M.G.
Regent, H.H. Tunku Ibrahim, C.M.G., C.V.O.
British Adviser, T. W. Clayton.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 316 sq. miles, and the population is 44,500, of whom 40,000 are Malays. The capital is Kangar, a few miles up the Perlis River, but H.H. the Raja lives at Arau, which is on the main trunk line from Singapore to Bangkok. Rice is the principal crop, and tin ore and rice are the principal exports. The State came under British protection in 1909, and the revenue has since increased from $200,000 to $600,000

	1926 (A.R. 1348).	1927 (A.R. 1346)
Revenue	$614,665	$643,114
Expenditure	630,768	622,752
Public Debt.....	150,000	50,000

Raja, H.H. Tuan Syed Alwi, C.B.E.
British Adviser, L. A. Allen

KELANTAN lies between 4° 35′ - 6° 15′ N. and 102° 22′ - 102° 37′ E on the east coast of the peninsula, with a total length of about 115 miles and a breadth of 60 miles. The total area is 5,713 square miles; population (1921 Census) 309,300. The northern portion is flat and fertile, producing rice, cocoa-nut and betel nut and affording pasturage for large quantities of live-stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is mountainous and unproductive. The capital, Kota Bharu, 6 miles from the mouth of the Kelantan River, has a population of 12,000. Kuala Krai is the headquarters of the Southern Administrative District, and Pasir Puteh of the Eastern.

	1926.	1927.
Revenue	$2,372,595	$2,448,090
Expenditure	1,927,734	2,949,348
Public Debt	3,265,696	3,450,128

Sultan, H.H. Sir Ismail, K.C.M.G.
British Adviser, R. J. B. Clayton (*acting*).

TRENGGANU, between 4° and 5° 55′ N. and 102° 15′ – 103° 30′ E., lies south of Kelantan on the east coast of the peninsula. Area, about 5,500 square miles. Population (1921), 153,705. Industries of agriculture (mainly rice), fishing and fish-curing, silk weaving, shipbuilding, and tin mining. The principal exports in 1927 were Para rubber, tin ore, dried fish, cotton and silk sarongs, gambier, areca nuts, copra, iron ore and wolfram. The capital, Trengganu, on the river of that name, contains 13,000 inhabitants.

	1926-27 (A.H. 1345.)	1927-28 (A.H. 1346.)
Revenue	$2,364,105	$2,402,150
Expenditure	1,342,410	1,542,404
Public Debt	1,200,000	1,000,000

Sultan, H.H. Sir Suleiman Badrul-alam Shah, K.C.M.G.
British Adviser, W. M. Millington (*acting*).

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24½ square miles, Comino the site of the *Sultan's* disaster in 1889 and now a sanitary station - and several islets The civil population of the whole group, on Dec. 31, 1922, was 218,510. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe They speak English and Italian There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Valletta. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1921 (June, July, August and September) was 76·7°. In winter the mean temperature was 55·6°. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful The principal occupation of the people is in connexion with shipping, about 8,000 females being occupied in making lace.

Città Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 500, but its suburb, Rabato, had about 10,000 inhabitants in 1921 22. Città Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum; 115 elementary and infant schools, 4 central schools, 2 secondary schools, and 63 night schools, maintained at a total cost to the Government of £102,566 in 1927–28; in addition there are garrison schools, a Dockyard school, and 59 private schools of which 10 receive grants-in-aid from the Government

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly. The Senate is composed of 17 members, 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the other 7 being elected by a special electorate. The Legislative Assembly consists of 32, returned by 8 electoral districts, each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects and a Nominated Council consisting of the Lieutenant-Governor, the Legal Adviser and three officers chosen from the Navy, Army and Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta When any legislative or administrative act is done which, in the Governor's opinion, affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry

In 1927 the Port of Valletta was entered by 2,554 vessels (tonnage, 3,487,704).

Capital, Valletta. Population (1921), 22,392.

Malta is 2,280 miles by sea, and *viâ* Naples about 1,995; transit, 3½ days.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17′ 57° 46′ E. long. and S. lat. 19° 58′ 20″ 33′, and comprising an area of 720 square miles. The permanent population at the Census of 1921 was 376,474, of whom 265,455 were Indians, the majority born in the Colony, and the remainder mainly of French or mixed descent. The estimated population (Dec. 31, 1927) was 401,693.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved since British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 194,881 acres, 157,731 are under sugar, 20,050 under lime and 17,150 under other crops; the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with Great Britain. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. The shipping entered and cleared, in 1927, amounted to 1,246,460 tons, of which 51 per cent. was British. In 1927 there were 144 miles of railway (120 of 4 ft. 8½ in. gauge and 24 of 2 ft. 6 in.), 64 post-offices and 54 telegraph offices in the Island, with 516 miles of telegraph, including block telegraph for the railway, and 202 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through Instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches: (1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant in aid schools. The total expenditure on education in 1927-28 amounted to Rs 1,432,348. Of the pupils in the Government and aided schools, 89 per cent. are Roman Catholics, 2 per cent Church of England, 1 per cent. other Christian denominations, 23 per cent. Muhammadans, and 35 per cent. Hindus and others.

CAPITAL, Port Louis. Population (1921), 50,308.

	1926.	1927.

DEPENDENCIES OF MAURITIUS

(1) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1921), 6,584 Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius

Magistrate, J. B. Colin ..... . .Rs 9,000 to 12,000

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil The most important is Diego Garcia (pop 1921, 445), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and possesses a good harbour. The total population of the "Other Dependencies" (1921) is 1,365.

Transit from London to Mauritius, 28 to 30 days

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Kamerums on the east. The Protectorate (Headquarters, Lagos) is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The area of the whole territory (including the mandated area of the Cameroons) is about 373,678 sq. miles, and the population is 18,765,790.

By Order in Council of Nov 1922 (amended 1928) there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as President, 27 official members, 3 elected members representing the municipal area of Lagos (Eric C Moore, Dr. C. C. Adenyi Jones and Dr J. A. Caulerick), 1 elected member representing Calabar (Ata Amonu) and 14 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The export trade relies mainly upon certain staple articles of great value, principally palm oil and kernels, ground nuts, cocoa, cotton lint, and tin. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation between Lagos and Kano (705 miles). Branch lines run from Minna to Baro (on the Niger), and from Zaria to Bukuru (143 miles). Another railway runs from Port Harcourt, at the head of the Bonny estuary, to the coalfields at Udi (150 miles), and thence through Makurdi (291 miles) on the Benue river to Katanchan (458 miles), where it was linked up with the Western line in July, 1926 Further railway extensions are in progress. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Ontsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco building material, soap, and haberdashery.

Transit to Lagos from Liverpool, 15 days. Cable communication to Lagos. Inland telegraphs to all important places.

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi. The population of the Protectorate (Dec. 31, 1927) was 1,306,934, including 1,829 Europeans and 982 Asiatics, and it has a total land area of 37,890 square miles.

The principal exports are tobacco, cotton, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of tobacco is considerable; tea, cotton, fibre and rubber are also exported in fair quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are eight steamers. A railway from Port Herald (the "inland port" of the Protectorate) to Blantyre (113 miles) is open for traffic. An extension from Port Herald to Chindio (the terminus of the Central Africa Railway) on the Zambesi (61 miles) was opened in 1915. The Trans-Zambesia Railway, from Beira to Murraça (on the southern bank of the Zambesi River) was opened in April, 1922; the terminus is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre. A further extension to on Lake Nyasa is projected. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,225. During 1928 a new road from Salisbury to Blantyre *via* Tete (Portuguese E. Africa) was open for light cars and was freely used during the dry season.

Mails to and from England are despatched every week *via* Cape Town and Beira. Between Beira and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's Line *via* Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape *via* Salisbury, and, with the Portuguese wires, to Chinde and Quilimane. The telegraph lines extend northwards as far as Ujiji on Lake Tanganyika.

The chief towns are Blantyre (population about 600 Europeans and 7,000 natives), Limbe (near Blantyre), and Zomba, the headquarters of the Government.

PACIFIC ISLANDS.

High Commissioner, His Excellency Sir Eyre Hutson, K.C.M.G. ... £1,200
(In addition to £3,000 as Governor of Fiji, and allowance of £150 as Consul-General for Western Pacific.)
Secretary to High Commission, Henry Guy Pilling, M.A. (House Allowance £75) ... £700 to 800
Chief Judicial Commissioner, Sir A. K. Young, K.C. ... 400
(In addition to £1,200 as C.J. of Fiji.)

(1) *The British Solomon Islands*, protected since 1893, consist of Guadalcanal, Malaita, San Cristoval, New Georgia, Choiseul, Ysabel, and other islands situated east of New Guinea, with a total area of about 11,000 square miles, and a population, 1919, of 675 Europeans, 78 Asiatics, and about 150,000 natives. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul and Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1926 27 was £77,445, and the expenditure £63,746; exports, 1926 27, £454,040; imports, £296,721. The seat of government is Tulagi.

Resident Commissioner, Capt. R. R. Kane, M.C. (and £150 allowances) £1,000 to £1,200
Secretary to Govt., N. S. B. Kidson ... £500 to £600

(2) *The Gilbert and Ellice Islands*, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 58' W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52' S. and long 169° 35' E., which is the seat of government, was pro-

claimed British in 1900. Total area, 180 square miles; population (1926) 185 Europeans, 420 Asiatics, and 29,345 Pacific Islanders. Revenue (1926-27), £52,925; expenditure, £44,869; imports (1926-27), £113,453; exports, £395,728.

Fanning Island, in lat. 3° 30′ N., long. 159° 23′ W., and Washington Island, 66 miles N.W. by W. of Fanning Island. Pop., 37 Europeans in connexion with Pacific cable station, and about 470 Gilbert Islanders in copra industry. The Islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1916, and Christmas Island was included in 1919.

Resident Commissioner, A. F. Grimble, M.A., (and £100 allowances) £800 to £1,000

(3) *The Tonga or Friendly Islands*.—A protectorate over the Tonga Islands Kingdom was proclaimed May 18, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and an estimated population (1926) of 530 Europeans, 235 half-castes, 25,918 Tongans, and 365 others—total 27,048. The limits of the group are between 15° and 23° 30′ S. and 173° and 177° W. Nukualofa, on the Island of Tongatabu, is the seat of government. The present Queen Salote succeeded the late King George Tubou II. in 1918. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared owing to a tidal wave, in June, 1919. Revenue, 1926-27, £72,562, expenditure, £83,513, imports (1927), £157,783, exports, £235,391. The total shipping entered and cleared in 1927 was 120,863 tons.

Agent and Consul, J. S. Neill, B.A. £800 to £1,000 (and duty allowance £200)

(4) *The Phœnix Islands* (McKean, Gardner Birnie, Hull, Enderbury, Phœnix, Canton, and Sidney), between 2° 30′ and 4° 30′ S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. 25° 3′ 30″ S., long. 130° 8′ 30″ W. Pop. (1914), 140, descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported.

Chief Magistrate, Richard Edgar Christian.

(6) *The New Hebrides Group*, about 500 miles west of Fiji and 250 miles north-east of New Caledonia, is under the administration of British and French officials as provided for by an Anglo-French Convention of 1906 and a protocol of 1914. Native pop. about 60,000. Principal products, copra, coffee, cotton, cocoa, maize, wool, sandalwood and shell. Joint revenue, 1927, £24,498; expenditure, £17,907. Total imports, 1927, £307,939, total exports, £398,028. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia; there is a two-monthly service with France, *via* Panama.

British High Commissioner, Sir Eyre Hutson, K.C.M.G.
French High Commissioner, M. Guyon.
British Resident Commissioner, (vacant) (*Allowances* £300) £800 to £1,000
French Resident Com., M. H. D'Arboussier.
President of Joint Court, Count de Buena Esperanza.
British Judge, Capt. C. G. Francis.
French Judge, M. G. Sachon

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE.

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes in addition, a large area E. of the Jordan and S. of the Yarmuk.

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923. The country consists of a W. maritime lowland, the mountain region of Judea (which forms the backbone of the district) and, on the E., the depression through which the Jordan wends its way from the Sea of Galilee (Tiberias) to the Dead Sea. The *Dead Sea*, 1,292 feet *below* the level of the Mediterranean, is 46 miles long and has an average width of 8½ miles, it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet *above* mean sea level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (census Oct. 23, 1922), of 757,182, of whom 590,890 are Muhammadans, 73,024 Christians, 83,794 Jews, and 9,474 members of other faiths. The approximate population on July 1, 1927, was 778,369, not including Bedum, who are about 103,000 in number. Since 1919 about 60,000 immigrants (mostly Jews) have settled in the country; in 1927 the Jewish immigrants came principally from Poland (35 per cent.), Russia (20 per cent.) Rumania (6 per cent.). In 1927, 2,713 Jews (956 men, 1,140 women, and 671 children) entered Palestine as immigrants; in the same period, 5,071 emigrated from Palestine, the net increase thus being 2,358.

Palestine is divided into 2 administrative districts, under District Commissioners, and the Jerusalem Division under a Deputy District Commissioner. English, Arabic and Hebrew are the official languages of the country. The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it surrendered to General Allenby on Dec. 9, 1917, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct., 1922, of 62,578. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham. *Bethlehem*, the scene of Christ's Nativity, is 5 miles S. of Jerusalem. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 in 1922. Other large towns are Jaffa (47,709), Tel-Aviv (40,000), Gaza (17,480), Acre (6,420), and Haifa (24,634).

The railway system of Palestine consists of five sections: *Rafa-Haifa*, containing south ward to Kantara to join up with the railway of Egypt, passengers and freight being transported across the Suez Canal at Kantara; *Haifa-Acre-Samakh*, continuing beyond Samakh to Damascus in the French mandated territory of Syria; *Jaffa-Lydda-Jerusalem*; and *Nablus-Jaffa-Tulkarem*. The main junction of the Government Railways is at Lydda, the general offices being at Haifa.

The chief ports are Jaffa, Haifa and Acre. There are branches of Barclay's Bank, Anglo-Palestine, Banco di Roma, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and cereals, wine, olives, and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. In 1927 there were 315 government schools and 2 training colleges, with a total of 722 teachers and 20,079 pupils.

	1924–25.	1926–27.

TRANSJORDAN

Emir, H.H. Abdullah, G.B.E., K.C.M.G., second son of King Hussein of Hejaz, *succeeded* April, 1921.

Transjordan consists of the 4 Districts of *Ma'an*, *Kerak*, *Balqa*, and *The Ajlun*, and is under the same mandate as Palestine. It is bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Hejaz and Nejd, and has a coast to the Red Sea a few miles south of Akaba. The Emirate has an Arab population of about 200,000, of whom almost all are Moslems. The area is unknown as the boundaries are not definitely determined. The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception of the first few miles) through Transjordan territory from Deraa to Kalaat el Mudowwara, where it enters Hejaz territory and continues to Medina.

CAPITAL, Amman.

High Commissioner, *see* Palestine.
Chief British Representative, Lt.-Col. C. H. F. Cox, C.M.G., D.S.O.
Officer Commanding Arab Legion, Lt.-Col. F. G. Peake, C.B.E.

RHODESIA.

The total area of Rhodesia is about 440,000 square miles and the total population is 1,881,726 (1921). The territory is named after *Cecil Rhodes*, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north, to the Limpopo River in the south.

SOUTHERN RHODESIA.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, the political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,344 square miles, and the population (1926) 976,685, of whom 39,174 are Europeans. The native population is 933,809, with 3,622 Asiatics and other coloured persons, including those of mixed race. The total number of European births in 1927 was 1,023 (a rate of 24·3 per 1,000) and of deaths 388 (9·2 per 1,000), the marriages numbering 436 (20·9 per 1,000). Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor, appointed by the Crown, with an Executive responsible to the Legislature, which consists of a Legislative Assembly, but that body may pass a law constituting a Legislative Council, in addition

The laws in force in the Cape Colony up to June 10, 1891, were adopted for Southern Rhodesia, so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established at Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways. The former is a continuation of the line from Cape Town to Vryburg, *viâ* Kimberley, and was

opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury (301 miles) was completed in Oct 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 374 miles. The main northern extension of the railway was constructed from Bulawayo. It taps the Wankie coalfields and crosses the Zambesi at the Victoria Falls (282 miles). Branch lines of standard gauge primarily constructed in the interests of established mines are:—Salisbury-Sinoia (82 miles), Mt. Hampden Junction-Shamva (73 miles), Gwelo Selukwe (24 miles), Bulawayo West Nicholson (204 miles), Gwelo-Umvuma Victoria (123 miles), and Sourabula-Shabani (63 miles). There is also a short branch line, Bulawayo Matopas. To provide facilities for the transport of passengers and goods in areas in process of development not directly served by existing railways, a system of road motor services has been organised. In May, 1928, routes covering 1,126 miles were in operation. *The African Transcontinental Telegraph Line* ("Cape to Cairo") has been constructed as far as Ujiji in East Africa, about 3,250 miles from the Cape.

Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1927, was of the value of £67,968,736. The output for the year ended December 31, 1927, was valued at £7,458,862. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, platinum, corundum, and other minerals have also been produced in considerable quantities. Though the climate is sub tropical, the average altitude makes it well suited for European occupation, and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit-trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crop is maize, and tobacco, cotton and citrus fruits are largely exported. The total area under cultivation in 1927 was 347,000 acres (maize 264,000, tobacco 30,000, cotton 8,000). The export of citrus fruit in 1927 was 130,000 boxes. Cattle (2,325,402 on Dec. 31, 1927) thrive well, and the annual show at Bulawayo and Salisbury are regarded as among the premier shows of beef cattle in South Africa. The exports of cattle in 1927 were 44,000 head. Dairy products sold include butter 1,710,000 lb., milk 827,000 gallons, cheese 99,000 lb., and eggs 344,000 dozen. In addition to the main industries of mining and farming there are creameries, cotton ginneries, bacon factories, oil, soap and candle factories, cement and lime works, and many other undertakings. Land is cheap and may be had on favourable terms. Considerable efforts have been made by the government during recent years to increase the number of new settlers. During the years 1925-27 settlers and dependents numbered 941 (396 under Empire settlers scheme, and 545 from High Commissioner's Office, etc.). In addition, a further 1,004 men and youths obtained situations on the land in 1925-27.

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided in the Government schools. For European children there are 85 Government schools (7 high, 2 vocational, 17 public, 11 preparatory, 2 primary and 46 farm and mine schools). In addition, 6 private schools (4 high, 2 elementary) receive Government aid. Children in rural areas where the population is too scanty for a school are provided for by Government grants to tutors or governesses. The total number of European children in all types of schools at the end of 1927 was 7,488. There are six schools for children of mixed race, with 469 pupils, and native education conducted by mission agencies with Government aid is provided in 1,534 schools, with 99,535 pupils. Grants in aid of native education in 1927 amounted to £29,814, the total educational expenditure being £283,607 in 1927.

SALISBURY, the seat of government, is situated on the Mashonaland plateau, 4,880 ft. above sea-level (white population, census 1926, 7,324). BULAWAYO, the largest town in Matabeleland, 4,460 ft. above the sea-level, had a white population of 8,251 (1926). Other centres are Umtali, Gwelo, Gatooma, Que Que, Shamva, Wankie, Victoria, Shabani, Selukwe, Enkeldoorn, Melsetter, Hartley, and Gwanda.

NORTHERN RHODESIA.

Northern Rhodesia lies to the North of the Zambesi, its political neighbours being Tanganyika and the Belgian Congo on the north, Nyasaland on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west. The country comprises an area of 287,950 square miles, and with the exception of the Luangwa, Zambesi and

Kafue Valley the altitude exceeds 4,000 feet. The permanent European population in Dec. 1927 was computed at 7,275, an increase of 2,651 in two years; the native population was estimated at 1,237,486. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 2,500,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco, cotton, fibre, wheat, oil seeds, and citrus. Stock raising is carried on by many farmers. The native-owned cattle in the territory is estimated at 318,767, and European-owned 97,479. Extensive mineral deposits have been discovered, lead, copper and zinc predominating, and several properties are being developed. Gold, vanadium, and coal are also present. Many species of game are to be found, and good sport at a moderate cost is available for the big game hunter. The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border. The Zambezi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses. There are 37 post offices, 11 of which are money order offices. A telegraph line exists alongside the railway line throughout its whole length in the territory; there is also a telegraph line from the Nyasaland border to Abercorn, and another from the same border further south to Fort Jameson. The administration of the territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 14 members, with a majority of official members. The seat of Government is at Livingstone on the Zambesi. The country is divided into 8 magisterial districts for fiscal and administrative purposes. The most important centres are Livingstone, Broken Hill, Fort Jameson, Lusaka, Mazabuka, Abercorn, Kasama, Fort Rosebery, Ndola and Mongu-Lealui.

ST. HELENA.

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55′ S. lat. and 5° 42′ W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1921) of 3,520. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it *circ.* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry have been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension, an isolated Island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55′ 55″ S. lat., and 14° 25′ 5″ W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 2,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it. The island was administered by the Board of Admiralty until Oct. 27, 1922, when by Royal Letters Patent it became a Dependency of St. Helena and was transferred to the Colonial Office. Georgetown, the capital, is situated in

a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month. *Resident Magistrate*, Frederick Wood.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population of about 600,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelingkang, and Batang-Lupar mountains; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (20 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 110, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1904. The country produces sago, gutta-percha, india-rubber, beeswax, illipe nuts, birds'-nests, oil, gold, silver, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. The large petroleum field at Miri and Bakong, in the Baram district, is now a valuable asset; oil exports (1927), 609,456 tons.

	1926.	1927.
Revenue	$6,357,835	$6,243,065
Expenditure	4,650,605	5,764,318
Imports	24,195,491	22,684,998
Exports	53,466,924	49,730,269

CHIEF TOWN, Kuching. Population (1921), 30,000. Distance from London, 8,700 miles; transit, 25 to 30 days. There are 20 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Saturday. There is also direct communication with Sibu and Miri.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 156 square miles, of which Mahé occupies nearly 56 square miles, the most important of the dependencies are the Amirantes, Farquhar Isles, Coetivy, Astove and the Aldabra Group. The population was estimated (Dec 31, 1927) at 26,835, an increase of 2,312 since the Census of 1921, when the total was 24,523 (Mahé 19,426,

Praslin 1,909, La Digue 1,303, other islands 1,795). Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour and the lighthouses in the vicinity have been fitted up with modern automatic lights. Although only 4° S. of the Equator, the islands are healthy, the death rate in 1927 being 15·87 per 1,000. There are 27 Roman Catholic and Church of England primary schools, there are also 2 secondary schools.

The principal exports are copra, vanilla, coco nuts, coconut oil, tortoise shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 members (2 *ex officio* and 1 nominated), and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 miles, with an estimated area of 4,000 square miles. In 1921 its population was 85,263, of whom 1,161 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 180 miles, between 10° 40′ and 13° 21′ of W. long. Its estimated area is 27,000 sq. miles, and its population about 1,486,138. For administrative purposes it is divided into 3 Provinces, under Provincial Commissioners, assisted by 15 District and 13 Assistant District Commissioners. The principal peoples are the Timnes and Korankos in the north, the Temnes in the centre, and the Mendes in the south.

The principal exports are palm kernels, kola nuts, palm oil, and ginger, piassava, hides, and rice are also exported. The value of the palm kernels exported in 1926 reached £1,216,780. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendemba, a distance of 227½ miles, and a branch line 104 miles in length extends in a north easterly direction from Baiya to Kamabai. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the ports, and in the Protectorate as feeder roads to the railway. There are 2,289 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Governor, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND.

(The Somaliland Protectorate)

Somaliland occupies the "North-Eastern Horn" of the African continent, jutting out into the Indian Ocean along the south of the Gulf of Aden, and is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia. The British Protectorate, declared in 1884, contains about 68,000 sq. miles, its boundaries being defined by treaties with Abyssinia, France and Italy, the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits in the north and south. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 344,700. The Protectorate garrison is now confined to a Camel Corps, 400 strong, and a Police force of 525, the Dervish power having been finally broken in 1920. The chief products of British Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

	1926	1927
Total imports	£307,423	£427,516
Total exports	245,301	357,575

Principal towns, Berbera, Bulhar, Zeilah, Hargeysa, Burao, Erigavo and Buramo.

SOUTH AFRICAN HIGH COMMISSION.

High Commissioner for South Africa, The Earl of Athlone, K.G., G.C.B., G.C.M.G., G.C.V.O., D.S.O., A.D.C. (also receives £10,000 as Governor-General of the Union of South Africa) ... £3,000

Imperial Secretary and Accountant, Capt. Hon. B. E. H. Clifford, C.M.G., M.V.O. ... 1,900

Asst. Imperial Secretary and Chief Clerk, Shirley Ealas, C.B.E. ... 1,150

Auditor, T. A. Williams ... 1,100

The High Commission.—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner; by a similar Commission issued in 1905 in Lord Selborne, since 1910 it has been vested by a separate commission in the successive Governors-General of the Union of South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland. He exercises in the Colony of Southern Rhodesia certain powers and functions in regard to native administration which were granted or reserved to him by the Southern Rhodesia Constitution Letters Patent, 1923; and under the Letters Patent, the Southern Rhodesia Order in Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect.

BASUTOLAND

(The Territory of Basutoland)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The Census of 1921 showed 495,937 natives and 1,603 whites, 1,069 coloured and 172 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue is derived from Customs, native tax, income tax on Europeans, Post-office, and licences. Telegraph offices have been opened at Leribe, Masern, Peyatepaneng, Morija, Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek. There are 533 native schools, with 46,945 native scholars on the roll, a large proportion being in the schools of the French Protestant Mission, there are also 8 white schools, with 115 pupils. The amount spent on education in 1926-27 was £41,412. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware, and groceries.

	1925-26	1926-27.

Staff Officer of Police, L. Clementi 600

Masera is distant from London 7,668 miles; transit, through the Cape, about 20 days.

BECHUANALAND.

(*The Bechuanaland Protectorate.*)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Rhodesia, Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles; the *Caprivi Zipfel* was attached to the Protectorate for administrative purposes by Proclamation (1922). The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 Coloured and 150,185 Natives.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kafir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 426,344 at the Census of 1921. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Tshekedi, Regent during the minority of Senetse (Bamangwato), of Isang (Bakgatla), of Sebele II. (Bakwena), of Bathoen (Bangwaketse), of Seboko Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, *viâ* Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaberones, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in 1901 from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

SWAZILAND.

(*The Swaziland Protectorate.*)

Swaziland (called by the natives *Kwa Ngwane*) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and the Portuguese province of Mozambique (Delagoa Bay). The total area is 6,705 square miles, and the population (1921) 112,932, of whom 2,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. Except in the Low Veld the country is well watered and healthy.

A Special Court having the full jurisdiction of a Supreme Court, and Courts of Assistant Commissioners having a restricted jurisdiction, have been established. Native chiefs continue to exercise jurisdiction according to native law and custom in civil disputes between natives, subject to a final appeal to the Resident Commissioner. The *Paramount Chief* is Sobhuza, son of the late Paramount Chief Bunu.

The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were about 350,000 head of cattle in the Territory at the end of March, 1928. In the winter season between 250,000 and 300,000 sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal. The agricultural products are tobacco, maize (the staple product), millet, pumpkins, ground-nuts, beans, and sweet potatoes, grown in insufficient quantities to meet local requirements. Most of the sub-tropical fruits can be grown with success. Large areas of land are suitable for growing cotton. The country possesses considerable mineral wealth, including gold, tin, coal, and copper. During the year ended Dec. 31, 1927, 154 tons of cassiterite tin, valued at £42,776, were exported; and 1,135 ounces of gold (valued at £4,795) from Pigg's Peak Mine.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. At each of the district headquarters—Hlatikulu, Stegi, and Pigg's Peak—there is a small number of Europeans in the vicinity of the station, likewise at Bremersdorp, the old headquarters of the Territory. There are schools for Europeans at various centres, and the Government has established a school for natives at Zombode. There are two schools for coloured

children. Grants are also made to the various native missions for educational purposes.

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles) and Bremersdorp (23 miles); also bi-weekly services between Bremersdorp and Stegi (43 miles) and Bremersdorp and Gollel (112 miles). Four times a week an omnibus runs between Piet Retief and Hlatikulu (57 miles). Elsewhere the communication is by cart or runners. There are 17 post offices, and telegraph and telephone offices at Mbabane, Stegi, Pigg's Peak, Bremersdorp, Ezulweni, Hlatikulu, Mahamba, and Geodgegun.

STRAITS SETTLEMENTS

(*See* MALAYA).

THE SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36′ N. lat., and reaches from the French Sahara about 19° 10′ E. (at 22° N.) to the north-west boundary of Eritrea (Italian) in 38° 30′ E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 1,200 miles. The northern boundary is the 22nd parallel of North latitude, on the east lie the Red Sea, Eritrea and Abyssinia, on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa. The total area is about 1,007,500 sq. miles, with a population of about 6,000,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. The *Gambela enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The *Nile* enters the plains of Lado, in the Mongalla Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,600 miles, and from its sources to the confluence its length may be reckoned at 2,400 miles, giving a total waterway of 4,000 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*, the remaining (first) cataract being in Egypt at Assuan.

Government.—The Sudan is administered by a Governor-General, aided, since 1920, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports *ad* the Red Sea ports may not exceed those levied in Egypt. The Sudan is divided into 14 provinces (*mudirias*) under governors (*mudirs*), under whom are British District Commissioners in charge of two or more districts (*mamurias*); a Sudanese official is in charge of each *mamuria*. *Civil Justice* is administered by a Chief Justice and four puisne judges, one of whom is also Registrar-General of Lands. There are also Province and District Judges who are usually the Governors and District Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals lie from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consists of three judges of the High Court. The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment. There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadis, and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. *Criminal Justice* is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to them also appeals lie. Certain Nomad Chiefs have petty Civil and Criminal jurisdiction, and courts of Native Chiefs have been instituted in the Southern Provinces. The Sudan is garrisoned by native troops, forming the Sudan Defence Force. A small garrison of British troops is quartered at Khartoum. The *Police* are locally enlisted and are under Provincial administration.

Education.—In addition to *khalwas* and *kuttabs* (vernacular schools) there are 11 *primary schools*, where instruction is given in English as well as Arabic, attended by about 1,300 pupils; a *secondary school* at Khartoum (Gordon College), and a *training college* (also at Gordon College); and *technical* or *trade schools* at Khartoum, Omdurman, and Atbara.

Production.—The Sudan is the chief source of the world's supply of gum and ivory. Egyptian cotton has been successfully established, and increasing quantities are being produced annually. The Gezira Irrigation Scheme (by means of the Sennar Dam on the Blue Nile at Makwar, about 170 miles south of Khartoum) will enable 100,000 acres to be put under cotton every year. High grade long staple American cotton is also produced under irrigation in Berber and Dongola, and as a rain crop in other provinces. The total cotton area in 1927 was approximately 230,000 acres, and the 1927-28 crop is estimated at 472,000 *kantars* of Sakellaridis and 62,000 *kantars* of American. The opening up of the Eastern Sudan by the new Kassala Railway is an event of much importance to the cotton cultivation of the Sudan. Other products include sesame, senna leaves and pods, ground-nuts, dates, hides and skins, salt, and gold. The principal grain crops

are dura (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bulrush millet). Large quantities of ivory are exported, and the cattle and sheep trade of the Sudan is capable of great development. For some years Egypt has depended to a great extent on the Sudan for its meat supply. The forests which line the Blue Nile River banks, rich in fibres and rammé material, extend to the frontier of Abyssinia. On the White Nile the forests contain valuable trees. The ebony tree, the gum acacia, the bamboo, the rubber creeper, and the sudds in the upper reaches are composed of an inexhaustible quantity of papyrus. The finest gum forests are in Kordofan, and the best rubber in the Bahr-el-Ghazal. Gold is being successfully exploited in the Sudan, a mine being worked at Gabait in the Red Sea Province. Natural salt fields on the Red Sea coast near Port Sudan supply the whole need of the country, and considerable quantities are exported annually to Abyssinia. The output of these salt fields is capable of great expansion.

Communications.—The railways and steamers throughout the country are administered by a Government department. In 1928 there were 2,800 miles of railways open for traffic, and an extension of 277 miles from Kassala, joining the present line at Makwar, will be completed early in 1929. The gauge is 3 ft. 6 in. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. The line to Kassala, 217 miles in length, connects with the Red Sea line at Haiya Junction, 226 miles W. of Port Sudan. There are over 3,000 miles of the various reaches of the river Nile and its tributaries under navigation by a fleet of shallow draught steamers and barges. Three of these routes are only practicable in the flood season, June to September. In the southern provinces motor car services are maintained in the dry season (December to March) between Rejaf and Nairobi (800 miles), Rejaf and Kampala (600 miles) by private companies in Uganda, and by an all-weather route, Rejaf to Aba (232 miles), operated by the Sudan Government and also by private enterprise. In the interior of the country there are other dry season motor roads. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 5,737 miles in 1928. There are 80 stationary and 16 travelling Post and Telegraph offices, and 10 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

Advisory Engineer, C. G. Hodgson, O.B.E.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town has been rebuilt and now contains a large mosque for Muhammadans, a cathedral, and the Gordon College, with extensive Government buildings. Population 31,965. Opposite Khartoum, on the Blue Nile, is Khartoum North (14,319), and on the White Nile is Omdurman (79,238), the former Mahdist capital.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY has a coast-line of about 500 miles and an estimated area of 373,500 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (April, 1921) at 4,107,000, the coloured population (other than native) being 14,991. The thickly populated provinces of *Ruanda* and *Urundi* are now under Belgian administration. In 1927 the native population of Tanganyika Territory was estimated at 4,319,000. The total white population is about 5,300. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Considerable progress has been made with the reorganization of a system of education suitable to the needs of the natives. In 1927 there were 91 Government schools, 1,043 Roman Catholic schools, and 1,314 Protestant schools, with a total roll of 137,666 pupils. The expenditure on education in 1927-28 was £66,677. There are also 3 schools for the children of Dutch settlers in the Arusha district, and a school for young European children has been established in Dar-es-Salaam. There is a monthly paper (printed in Swahili) published by the Government.

The total area under forests is about 4,240 square miles, of which about 4,007 square miles are included in the Government Forest Reserves, and about 55 square miles are privately owned. The plantations are chiefly of sisal fibre and coffee, grown by non-natives, with maize and cotton as minor industries; and among natives, of cotton, ground-nuts, rice, millet, and pulse crops. In 1927 there were 4,705,625 cattle, and 4,778,540 sheep and goats in the Territory. The value of minerals produced in 1927 was—diamonds £102,480, gold £34,630, salt £28,644, mica £21,000, tin £10,555, garnet £1,025, red ochre £160. Companies desiring to investigate the mineral resources can obtain information and assistance from the Mines Department, Dar-es-Salaam.

The chief exports are sisal, cotton, coffee, ground-nuts, hides, skins, copra, grain, simsim, bees-wax, glue, diamonds and gold; the chief imports being cotton piece goods, iron and steel manufactures, foodstuffs, machinery, building materials, kerosene and motor spirit, sugar, rice, spirits, and cigarettes.

	1926-27	1927-28.
Revenue ..	£2,202,908	£1,904,000
Expenditure .	.. 2,069,838	1,707,000
	1926	1927
Imports	£3,152,422	£3,672,064
Exports .. .	. 3,025,978	3,440,576

Two battalions of the King's African Rifles are now stationed in the Territory, and there is a Police Force of about 2,360 all ranks.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, Mikindani, and Kilwa, all of which are accessible to ocean-going vessels. In 1927, 464 steamers (exclusive of coastal boats) of 1,932,219 tons, and 4,522 dhows of 106,264 tons entered and cleared at the various ports from places beyond the Territory. There are two railways of metre gauge in the Territory. The Tanga Railway from Tanga to Moshi (219 miles), with a branch line Sanya Junction to Sanya River (21 miles) towards Arusha. The Kenya and Uganda Railways connect with this railway at Kahe Junction. The Central Railway from Dar-es-Salaam to Kigoma (772 miles), with a branch line from Tabora to Mwanza (235 miles). Also a 60-c.m. tram line from Mingoyo near Lindi to Ndanda (57 miles). This is worked by hand during certain periods of the year only. Steamers run on Lakes Victoria, Nyasa and Tanganyika. Dar-es-Salaam is in telegraphic communication with many inland centres, and with the adjoining territories Nyasaland, Kenya and Uganda. Cable communications exist between Dar-es-Salaam and Zanzibar, and communication with the Belgian Congo is effected by wireless between Kigoma and Albertville. A wireless station with a range of 450 miles spark transmission and 1,000 miles continuous wave transmission was erected at Dar-es-Salaam in 1927. There are 106 post offices and postal agencies, 84 of which are telegraph offices. Telegraph Money Order and savings bank business are conducted at 20 head offices, and postal order and ordinary money order business at 33 sub-offices. Telephone exchange are established and trunk telephone communication is in operation between 22 centres.

TOGOLAND.

(*Joint Franco-British Administration.*)

The total area is about 43,040 square miles, with an estimated population of 920,000. The British sphere consists of an area of about 13,040 sq. miles with an estimated population of 187,940. No portion of the coast is included in the British area. The mandated sphere is administered by the Government of the Gold Coast, and the revenue and expenditure are included in the totals for the Gold Coast. A trade school has been established by the administration at Yendi.

TRINIDAD and TOBAGO.

(*See* BRITISH WEST INDIES.)

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6′ S. and long. 12° 2′ W., discovered in 1506 by a Portuguese admiral (Trisão da Cunha), after whom they are named. The population numbers 127, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land. Two missionaries Rev. R. A. C. Pooley and Mr. Philip Lindsay), were sent out from England in 1927 on a 3-year mission to the islanders.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ½ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20′ S. and 9° 44′ W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

THE UGANDA PROTECTORATE.

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows: On the north, the Uganda Sudan boundary, on the east, a line drawn from Mt. Zulia, on the Sudan boundary, along the Turkana escarpement over the top of Mt Elgon, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area, 94,204 square miles, including 15,027 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:

(1) *Eastern Province*, comprising the districts of Busoga, Bugwere, Bugishu, Budama, Teso, Lango, and Karamoja.

(2) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, and West Nile.

(3) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(4) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly free districts; but the work of repopulating these islands has now been completed, and natives and their cattle have been repatriated.

The whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of *Buganda* is recognised as a native kingdom under a *Kabaka* (H.H. Daudi Chwa, grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native assembly. In Buganda (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by native "kings"), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to higher courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative Councils) makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland, Zanzibar, and Tanganyika Territory. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a volunteer reserve of Europeans.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan. 1921. The former consists of 6 appointed members and the latter includes the former, with 3 unofficial members, and is presided over by the Governor.

The total population of Uganda (December, 1927) is given as 3,157,008, composed as follows: Natives, 3,143,670; Asiatics, 11,464; Europeans, 1,874. Among the natives approximately 790,000 belong to the intelligent, civilised Baganda, a race converted to Christianity by British and French missionaries. Until recently educational work has been in the hands of the various Missionary Societies, who receive grants towards scholarships, &c., for students and teachers; their efforts are now being supplemented by a Government scheme. About 2,000,000 natives speak Bantu languages; there are a few Congo pygmies living near the Semliki river, the rest of the natives belong to the Masai, Nilotic, and Sudanese groups.

	1926	1927.
Revenue	£1,389,641	£1,292,306
Expenditure (excl. loans)	1,295,612	1,430,976
Poll-tax	427,000	526,605
Customs	409,300	348,033
	1926	1927
Total Exports	£3,597,437	£2,310,260

The import figures are now merged in those of Kenya (*q.v.*). The export trade is mainly in cotton (£2,310,260), coffee, chillies, oil-seeds, rubber, ivory, and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

The headquarters of the British administration is at ENTEBBE; the native capital of Buganda is at MENGO (Kampala). Nile steamers ply to Rejaf, which is about eight days' march from Nimule, the Sudan port of the Kenya and Uganda Railway Marine Service on Lake Albert. A regular steamer service is maintained by the *Kenya and Uganda Railway Administration* between Kisumu, the railway terminus, and Entebbe, Port Bell, and Jinja, the principal Uganda ports on Lake Victoria. The *Busoga Railway Marine*, which, with the Busoga Railway, is controlled by the Kenya and Uganda Railway, deals with the traffic on Lake Kioga. There are two steamers and a large number of lighters on that waterway. An additional steamer and subsidiary craft (also controlled by the K. & U. R.) ply on Lake Albert and the Nile between Butiaba, Nimule and Belgian port of Kasenye at the south of Lake Albert. The *Busoga Railway*, of the same gauge as the Uganda Railway, 62 miles in length, runs from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, and deals with the cotton output in the regions round Lake Kioga, connecting that lake with Lake Victoria. The Turbo-Elderet branch line of the Kenya and Uganda Railway now extends to Mbulamuti (on the Busoga Railway) and a further extension from Tororo to Soroti *viâ* Mbale is under construction. There is a railway from Port Bell to Kampala, 7¼ miles in length. There is a fleet of Government motor vans.

Governor and Commander-in-Chief, His Excellency Sir William Frederick Gowers, K.C.M.G. (1925) (*and* £1,500 *duty*) £3,500
Private Sec. (vacant).

CAPITAL (Administrative Hdqrs.), Entebbe.

WEIHAIWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1, 1898, and lies in latitude 37 30 N., longitude 122·10 E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and a population in 1921 of 154,416, in which are included about 300 resident on the island of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian 121·40—an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small. At the *Washington Conference*, 1921–22, Great Britain offered to restore the territory to China, but in the absence of a settled government in China the offer has not yet been implemented, and the terms of the lease of 1898 are still in operation.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the ports of Shanghai, Hong Kong, Chefoo, and Tientsin.

Commissioner, R. F. Johnston, C.M.G., O.B.E.
Judge of the High Court, Sir Peter Gram.
Crown Advocate, Allan G. Mossop.
Secretary to Government and Senior District Officer, C. René Lee.

* Member of Executive Council.

Junior District Officer and Magistrate, W. La B. Sparrow
Senior Medical Officer, Dr. Frances Clark
Financial Secretary, P. D. Crawley

WINDWARD ISLANDS.

(See BRITISH WEST INDIES.)

ZANZIBAR.

(*The Zanzibar Protectorate.*)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, K.C.M.G., K.B.E., *succeeded* his brother in law, Dec. 9, 1911.

The Zanzibar dominions became independent in 1850 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tungh Bay and north as Warsheikh; but since the cession of the coast line from Ruvuma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadir and Kismayu coasts to Italy in 1904 and 1924 respectively, they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kimimbani (Dick's Head), the islands of Lamu, Manda, Patta, and Siu. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander in Chief in the Kenya Colony and Protectorate (*q.v.*). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at Rs.1,09,28,913 in 1927) and produce quantities of copra (exports in 1927, Rs.44,97,675). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed. Of late years its importance as a port of transhipment and distributing centre has increased owing to the development of the mainland, to the opening up of the coast ports to direct foreign service with Europe, and to the transfer to Aden of the coal trade with the Benadir coast. Recent figures, however, tend to indicate that the island will continue, from the very fact of its geographical position, to retain control of the local traffic of that portion of the trade which goes to small towns up and down the adjacent mainland coast. There are 190 miles of road throughout the Protectorate suitable for motor traffic.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, petroleum and piece goods; the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1921) was 216,760, the area of the former 640 square miles, and of the latter 380 square miles.

Tonnage of ocean-going steamers which entered the port in 1927, 2,553,143; and 4,026 dhows (85,739 tons).

	1926	1927
Revenue	£449,037	£540,345
Expenditure	649,896	622,983
Imports	1,643,600	1,771,124
Exports	1,586,000	1,828,258

British Resident, Sir A. Claud Hollis, K.C.M.G., C.B.E. (and duty allowance £1,125) £2,400
Chief Secretary, R. H. Crofton 1,600
Chief Justice, G. H. Pickering 1,600
Treasurer, N. B. Cox 1,400
Attorney-General, C. B. Frances 1,400
Director of Agriculture, V. H. Kirkham 1,350
Director of Education, W. Hendry 1,200
Comptroller of Customs, G. D. Kittoppe 1,100

Zanzibar is distant 6,850 miles; transit, 20 days.

THE U.S. IMMIGRATION LAW.

The U.S. Immigration Quota Law was passed by Congress on May 25, 1924, and signed by the President on May 26, 1924. The Law was prompted by a desire to regulate immigration so as to keep the United States open for those of "Nordic" (formerly called "Germanic") origin, who were the founders of the United States and whose institutions it was held desirable to maintain, experience having shown that during 1890 1920 the immigrants from Eastern and Southern Europe numbered 11,520,409 against a "Nordic" immigration (from Western and Northern Europe) of 4,550,964. These figures show a complete reversal of the figures for 1820–1890, which were "Nordic" 11,920,220 and Eastern and Southern Europe 1,782,427. (In each case the immigration from "Other Lands" was about 11 per cent. of the total). The Quota Law of 1924 fixed for four years a total of 164,667 to be admitted annually, divided into quotas based on the foreign-born populations of the U.S. in 1890, the quotas in force until June 30, 1928, being as shown in Column 2.

Origin	Number.	Per cent.
Western and Northern Europe:		
Gt. Britain & Northern Ireland	34,007	20·5
Irish Free State	28,567	17·4
Germany	51,227	31·1
Scandinavia	18,003	11·4
France, Netherlands	8,491	5·2
Belgium, &c.		
Total, "Nordic"	141,197	85·7
Eastern & Southern Europe	19,045	12·2
Other Lands	3,525	2·1
Total	164,667	100·0

The Act of 1924 changed the Law of 1917 with a view to weeding out undesirable or ineligible aliens before starting instead of after arrival. It also relieved many immigrants from detention at Ellis Island. The principal U.S. Consular Officer in each foreign country is the Quota-control Officer, and it is his duty to see that the quota is not exceeded; it is also his duty to examine the information given on *questionnaires* and to eliminate applicants who are feeble-minded and those whom prison records show to be undesirable citizens.

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40·5 per cent. of the total population, and in 1926 89·8 per cent. The birth registration area was established in 1915; it included at that time 31·1 per cent. of the total population, and in 1926, 76·8 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1917 to 1926

Calendar Year.	Births * Number	Rate per 1,000	Deaths * Number	Rate per 1,000.
1917	1,35,1,792	24·7	1,068,432	14·3
1918	1,36,3,640	24·6	1,471,467	18·1
1919	1,37,1,438	22·3	1,090,430	13·9
1920	1,48,8,194	23·7	1,142,558	13·1
1921	1,74,4,261	24·3	1,033,039	11·6
1922	1,77,8,911	22·5	1,101,803	11·8
1923	1,792,646	22·4	1,193,037	12·3
1924	1,9,0,614	22·6	1,17,1,996	11·8
1925	1,878,886	21·4	1,219 019	11·8
1926	1,846,068	20·6	1,185,247	12·2

* Exclusive of still births.

IMMIGRATION AND EMIGRATION.

From 1820 to 1930, 33,684,803 alien immigrants landed in the United States. In the fiscal year ended June 30, 1928, 307,255 immigrants and 193,476 non-immigrant aliens were admitted, a total of 500,931. During the same year, 77,457 emigrant and 196,899 non-emigrant aliens departed, a total of 274,356. The net increase for the year was 226,275.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual drunkenness, and imprisonment on conviction of felony, are legal causes of divorces.

Year	Marriages * Total	Divorces Granted. To Wife	To Husband	Total.
1906	853,290	48,607	23,455	72,062
1916	1,040,684	74,863	33,800	112,036
1923	1,227,924	122,480	52,905	185,096
1924	1,178,328	125,348	52,984	179,952
1925	1,188,033	121,333	52,147	177,449
1926	1,202,574	125,563	52,854	180,852

* The totals include divorces for which no detailed statistics were obtained.

PHYSIOGRAPHY.

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25° 40′ North and longitude 67° 124° 40′ West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line on both oceans has an estimated length of about 15,000 miles, besides 3,620 miles on the great lakes and 8,741 on the Gulf of Mexico. The principal river is the mighty Mississippi Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:- Rivers flowing to the Pacific, 634,080 square miles; to the Atlantic, 433,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron, copper, lead, zinc, and aluminium; the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver); while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows: Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the *second Monday of the January* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *second Wednesday of February* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of $75,000, with a travelling allowance of $25,000. Executive duties:

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers thereof.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States, Calvin Coolidge, of Massachusetts, *born* at Plymouth, Vermont, July 4, 1872; elected Vice President Nov. 2, 1920; became President (on the death of Warren G. Harding) Aug. 3, 1923; *re-elected for further term*, Nov. 4, 1924. *Republican.*

1. *Vice President*, Charles Gates Dawes, of Ohio (*born* Aug. 27, 1865), *elected Vice President* Nov. 4, 1924. *Republican.*

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

2. *Secretary of State*, Frank B. Kellogg, of Minnesota (*born* 1856), *appointed* Feb. 16, 1925.
3. *Secretary of the Treasury*, Andrew W. Mellon, of Pennsylvania (*born* 1855), *appointed* March 4, 1921.
4. *Secretary of War*, Dwight Filley Davis, of Missouri (*born* 1879), *appointed* Oct. 14, 1925.
5. *Attorney General*, John G. Sargent, of Vermont (*born* 1860), *appointed* March 17, 1925.
6. *Postmaster-General*, Harry S. New, of Indiana (*born* 1858), *appointed* March 4, 1923.
7. *Secretary of the Navy*, Curtis D. Wilbur, of California (*born* 1867), *appointed* March 18, 1924.
8. *Secretary of the Interior*, Roy O. West, of Illinois (*born* 1868), *appointed* July 20, 1928.

Secretary of Agriculture, William M. Jardine, of Kansas (*born* 1879), *appointed* March 5, 1925.
Secretary of Commerce, William F. Whiting, of Massachusetts (*born* 1864), *appointed* Sept. 12, 1928.
Secretary of Labour, James J. Davis, of Pennsylvania (*born* 1873), *appointed* March 5, 1921.

PRESIDENT ELECT.

President of the United States (1929–1933), Herbert Clark Hoover, *born* at West Branch, Iowa, Aug. 10, 1874; *Republican.*
Vice President (1929–1933), Charles Curtis, *born* at N. Topeka, Kansas, Jan. 25, 1860.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote, and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 211,877. The *Senate* consists of 96 members. The salary of a Senator is $10,000 per annum, with mileage at 20 cents per mile each session. The *House of Representatives* consists of 435 representatives besides a delegate from Alaska, a delegate from Porto Rico, 2 resident commissioners from the Philippines, and a resident commissioner from Porto Rico The salary of a Representative is $10,000 per annum, with mileage as for Senators

THE SEVENTIETH CONGRESS.
(Dec 5, 1928– March, 3, 1929.)

President of the Senate, Charles Gates Dawes, *Illinois* $15,000
Speaker of the House of Representatives, Nicholas Longworth, *Ohio* $15,000

LIBRARY OF CONGRESS.
(National Library),
Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814 In 1815, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress (now $110,500); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress, with the stipulation that future accessions should follow it The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers The Library of Congress now contains 3,726,502 volumes (gain in 1927-28, 169,735) The building was first occupied in 1897 and in 1928 it contained about 592,586 square feet (over 13½ acres) of floor space. The total cost to June 30, 1927, is approximately $7,500,000. The book stacks, including the new stack built over the south-east and north-east interior courts, contain a little over 158 miles of shelving, affording space for 5,140,000 octavo volumes, 48,000 folios, and 84,000 volumes of newspapers. The library is maintained by Congress, the appropriation for 1928-29 being $2,680,487. An auditorium for chamber music (the gift of Mrs. F. S. Coolidge) was opened in 1925, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service.

Librarian of Congress, Herbert Putnam, LL.D $10,000
Chief Assistant Librarian, Frederick W. Ashley 6,500
Executive Assistant, Allen R. Boyd 4,600
Secretary, Jessica L. Farnum 3,500

THE SMITHSONIAN INSTITUTION.

The Mall, Washington, D.C.

Secretary, C. G Abbott.
Asst. Secretary, A. Wetmore.
Chief Clerk, H. W. Dorsey.
Accountant, Nicholas W. Dorsey.
Editor, Webster P True.

Board of Regents.

Chancellor, The Chief Justice of the U S.
Chairman, Executive Committee, F. A. Delano.

Government Bureaux under direction of Smithsonian Institution.

National Museum.

Assistant Secretary in Charge, Alexander Wetmore
Administrative Assistant to the Secretary, W. de C. Ravenel.
Head Curators, G. P. Merrill; Leonhard Stejneger; Walter Hough.
Editor, Marcus Benjamin.

National Gallery of Art.

Director, William H. Holmes.

Freer Gallery of Art.

(A unit of the National Gallery.)

Curator, John E. Lodge.

Bureau of American Ethnology.

Chief, M. W. Stirling.

International Exchanges.

Secretary (in Charge), C. G. Abbott.
Chief Clerk, C. W. Shoemaker.

National Zoological Park.

Director, William M. Mann.

Astrophysical Observatory.

Director, C G. Abbott.

Regional Bureau for the United States International Catalogue of Scientific Literature.

Assistant in Charge, Leonard C. Gunnell.

NATIONAL COMMISSION OF FINE ARTS.

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1920, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding $10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, *Detroit, Mich.*
Vice-Chairman, Wm. Adams Delano, *N.Y.*
Members, Lorado Taft, *Ill.*; Abram Garfield, *Ohio*; Benjamin W Morris, *N.Y.*; Ferruccio Vitale, *N.Y.*; Ezra Winter, *N.Y.*
Secretary and Executive Officer, H. P. Caemmerer.

THE JUDICATURE.

The *Federal Judiciary* consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from decisions of the highest Courts of the States. (2) The *Circuit Courts of Appeal*,

dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit (3) The *District Courts*, eighty-seven in number, each served by a District Court Judge.

THE SUPREME COURT

(The Capitol, Washington, D C).

Chief Justice, William Howard Taft, *Conn*, *born* 1857, *apptd.* 1921 ..... $20,500

Associate Justices (each $20,000).

Marshal, Frank K Green, *D.C.* 5,500
Reporter, Ernest Knaebel, *Colo.* 8,500

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S

The present authorised commissioned strength of the Regular Army is, Commissioned officers 12,159; warrant officers 1 208; enlisted men (approximately) 118,750, exclusive of 6,445 enlisted men in the Philippine Scouts. The actual strength of the entire active Army of the United States on June 30, 1928, including retired and reserve personnel on active duty at the time, was 134,505, of whom 12,112 were commissioned officers, 1,208 warrant officers, and 121,185 were enlisted men. These figures include the 6,445 enlisted men of the Philippine Scouts. The Army is made up entirely of volunteers.

U.S. WAR PENSIONS.

(*Exclusive of World War Pensions.*)

Year	Number of Pensioners on Roll			Total Payments.
	Invalids	Widows, &c	Total	
				$
1900	752,510	241,019	993,529	138,462,130
1923	253,686	286,070	539,756	263,012,500
1924	248 049	277,490	525,539	229,994,777
1925	244,657	267,880	512,537	217,150,612
1926	245,879	255,844	501,723	207,844,348
1927	246,194	243,748	489,942	230,152,712
1928	259,030	232,164	491,194	228 965,672

The total disbursement in pensions since the War of Independence is $7,720,464,744, of which $7,101,082,789 has been paid on account of the Civil War The cost of maintenance and expenses of administration in the fiscal year ending June 30, 1928, including the cost of medical examinations and special field examinations, amounted to $1,830,125.

World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals, as claims of this nature are adjudicated in the U.S. Veterans' Bureau, which has jurisdiction over such matters. (*See* "Ordinary Expenditures" under "Finance," *post*)

THE NAVY OF THE U S

The new construction authorised for the U.S. Navy since 1918 is 8 light cruisers, 6 river gunboats and 2 aircraft carriers (converted from battle cruisers) These were all under construction in Oct 1927, since which time the 4 gunboats *Guam*, *Tutuila*, *Luzon* and *Mindanao*, and the aircraft carriers *Lexington* and *Saratoga* have been completed In addition, 3 fleet submarines, authorised by Act of Aug. 29, 1916, have been completed and 2 more authorised under the same Act are under construction, the V4 having been completed The three-year building programme initiated in the Act of Aug. 29, 1916, provided for the following construction:—

	1916.	1917	1918.	Totals
Battleships	4	3	3	10
Battle Cruisers	4	1	1	6
Scout Cruisers	4	3	3	10
Destroyers	20	15	15	50
Fleet Submarines	—	—	9	9
Coast Submarines	30	18	10	58
Fuel ships	1	—	2	3
Repair ship	—	—	1	1
Transport	—	—	1	1
Hospital ship	1	—	—	1
Destroyer Tenders	—	1	1	2
Submarine Tender	—	1	—	1
Ammunition ships	1	—	1	2
Gunboats	1	—	1	2

Of the "all big gun" battleships the *Maryland*, *Colorado* and *West Virginia* have been completed for sea. These ships carry eight 16-in. guns (with secondary batteries of twelve 5-in. and eight 5-in. anti-aircraft guns), and are 624 ft. long, 97 ft. wide, and displace 32,600 tons; they are driven by four electric-drive turbines of 28,900 h.p. except *Maryland*, which has 36,100 h.p. On Dec. 18, 1924, Congress authorised the Navy Department to effect important

alterations to the six oldest battleships retained in service, and on March 12, 1927, authorised modernisation of 2 additional battleships, *Oklanoma* and *Nevada*. The battleships not retained in service have been disposed of in accordance with the terms of the *Washington Treaty* of Aug 17, 1923, limiting naval armaments.

Of the vessels which were authorised in the 3-year programme, the following have not been started —12 destroyers, 3 fleet submarines, 1 transport, and 1 submarine (Nelt)

Information as to characteristics, costs, &c., available for publication concerning naval vessels, may be found in the *Ships' Data Book*.

EDUCATION.

State School Systems, 1925-1926

In 1925-26 the total number of children in the United States 5 to 17 years of age was 30,064,621, of whom 24,741,468 (12,451,427 boys and 12,290,041 girls) were enrolled in public elementary and secondary schools, and 2,438,725 were estimated to be enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 19,855,881, the average length of school term was 169·3 days, and the average number of days attended by each pupil enrolled was 135·9 days In 1925-26, 814,169 teachers (138,810 men and 675,359 women) were employed. The average annual salary of all teachers was $1,227. The total number of buildings used as school houses was 256,104, and the estimated value of all public school property was $4,676,603,539

The total money received for school purposes, excluding balances on hand, was $2,171,844,689. Of this amount, $258,782,039 was received from permanent school funds and from the rent of school lands, $254,592,332 from State taxes or State appropriation, $1,444,482,833 from local tax or appropriation, and $301,450,986 from all other sources, State and local. The total payments, excluding payments of bonds, were $2,026,308,190. This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, $411,037,774 ; for salaries of superintendents, supervisors, principals and teachers, $1,100,316,674; and for all other purposes, $514,953,742.

Compulsory Attendance Laws, 1922.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1925-26.

Of the 975 universities, colleges, and professional schools, 154 are public institutions and 821 under private control or management. The total number of instructors in both private and public institutions was 62,224 (48,649 men and 13,575 women) The public institutions enrolled 290,893 undergraduate and graduate students (186,136 men and 104,757 women). The private institutions enrolled 532,002 undergraduate and graduate students (323,596 men and 208,406 women). In general engineering, 12,788 students were enrolled; in chemical engineering, 4,238; in civil engineering, 10,829, in electrical engineering, 15,666; in mechanical engineering, 9,743, and in mining engineering, 1,663

The total number of baccalaureate degrees conferred in 1925-26 was 71,529 (41,106 men and 30,423 women), altogether 11,451 graduate degrees were conferred (7,700 men and 3,751 women); 1,214 honorary degrees were conferred.

The schools of theology enrolled 13,655 students and reported 1,357 graduates ; law schools, 40,359 students and 7,938 graduates, schools of medicine, 19,682 students and 4,122 graduates ; schools of dentistry, 11,777 students and 2,666 graduates, schools of pharmacy, 10,815 students and 3,497 graduates ; and schools of veterinary medicine, 537 students and 123 graduates.

Teachers' Colleges and Normal Schools, 1925-26.

In 1925-26, 402 teachers' colleges and normal schools reported to the United States Bureau of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 102 are State institutions ; 101 are teachers' colleges (schools granting a degree after four years' work beyond high school) ; 27 are city normal schools ; 108 are county normal schools ; and 64 are private normal schools. The total number of instructors in all teachers' colleges and normal schools was 14,231. The total number of students enrolled was 294,064 (63,993 men and 230,071 women). Of this total enrolment, 270,206 students are in normal training courses. The number of graduates from the normal training courses was 6,263 men and 41,047 women, making a total of 47,310. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 73,091 The total receipts for normal schools were $64,693,494. The total number of volumes in the libraries was 3,225,994.

Nurse Training Schools, 1926-27.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Education. In 1926-27 the number of such schools reporting was 1,797. The number of pupils enrolled in these schools in 1926-27 was 77,768 and the number graduated 18,623. Of the schools reporting, 75 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 359,077 beds, and the average daily number of patients is 276,194 In 1926-27 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals 954 schools required 8 hours of duty daily, 339 schools required 9 hours of duty, and 293 schools required 10 hours of duty. In hospitals for the insane, the number of hours of duty required was usually 10 or more. Thirty schools required 12 hours of duty, and none required more than 12 hours.

The remuneration granted the pupils in general hospitals is usually less than $200. In the first year 46·9 per cent. of the schools pay under $100, and 47·4 per cent. pay from $100 to $199 ; in the second year 26·2 per cent. of the schools pay under $100, and 65 per cent. pay from $100 to $199 ; in the third year of the course 18·6 per cent pay under $100, and 68·5 per cent. pay from $100 to $199. In the schools in hospitals for

the insane the remuneration usually exceeds $400. In the first year of the course 72·1 per cent of the schools pay $400 or more; in the second year of the course 63·6 per cent of the schools pay $400 or over, in the third year of the course 72·4 per cent. of the schools pay $400 or more.

More than 85 per cent of all the nurse training schools in general hospitals offer a three-year course About 10 per cent. offer a two-year or two-and-one-half year course In hospitals for the insane, more than 86·7 per cent of the schools offer a three-year course, and the remaining schools offer a two-year course 32·2 per cent of the general nurse training schools require one year of high school work for admission, 31·2 per cent require two years of high school work for admission, 32·8 per cent. require a full high school course, and 2·3 per cent require only the completion of the elementary grades for admission

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1925-26.

In 1925-26, 17,710 public high schools reported to the Bureau The total number of teachers in these secondary schools was 163,555 * (58,496 men and 105,059 women) The total number of pupils enrolled in these schools was 3,065,009 (1,445,886 boys and 1,619,123 girls). The total number of coloured pupils included in the preceding figures is 75,713. In the first year of the course 1,108,158 pupils were enrolled, in the second year 823,191, in the third year 611,986 and in the fourth year 504,355 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools, 676,064 pupils were enrolled. The number of graduates reported was 434,539 (190,054 boys and 244,485 girls).

There were 9,865 high schools that reported a four-year curriculum. In these four-year high schools there are 1,850,594 pupils enrolled (886,942 boys and 963,652 girls) In addition, there are 1,109 junior high schools, with 652,043 pupils (321,664 boys and 330 379 girls); 1,949 junior-senior high schools, with 619,757 pupils (293,746 boys and 326,011 girls), and 411 senior high schools, with 267,220 pupils (125,515 boys and 141,705 girls).

* Includes 5,238 men and 18,444 women teachers in junior high schools

Private High Schools and Academies, 1925-26.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. In 1900 the number of students enrolled in these schools was 110,797 In 1925-26 the number enrolled was 295,625. The number of schools reporting in 1900 was 1,978, and the number reporting in 1924 was 2,500 The total number of instructors in these private high schools in 1926 was 20,145 (7,397 men and 12,748 women) In this group of schools, more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational Of the 2,500 schools reporting in 1926, 416 were for boys only, 812 were for girls only Altogether, 105 of the schools had military drill in 1926, enrolling 15,006 students.

The lowest American percentage was 19 in 1880, 1881 and 1882; the highest was 91 in 1825

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding Island possessions and Alaska, is 1,903,216,640[1] acres, of which in 1925 924,319,352 were farms (505,027,400 acres improved) The total number of farms in 1925 was 6,371,640, of which 2,326,155 are between 100 and 500 acres, 1,421,078 between 50 and 100 acres, and 1,450,643 between 20 and 50 acres The value of farm products of the United States in 1926 was $16,566,000,000, as compared with $16 810,000,000 in 1925 Crops in 1926 were valued at $9,266,000,000, live-stock products (including animals sold or slaughtered) at $7,300,000,000

The outstanding decline in values of crops was in cotton, which declined from $1,799,000,000 (for lint and seed) in 1925 to $1,294,000,000 in 1926, a decline of $505,000,000, or 28 per cent. Fruit crops, forage crops and tobacco showed little change Vegetable crops declined from $1,288,000,000 in 1925 to $1,117,000,000 in 1926, most of which represented a decline in the value of the potato crop All animal products except wool and mules had a larger gross value in 1926 than in 1925 The largest increase was in hogs, which increased from $1,437,000,000 to $1,662,000,000, an increase of $225,000,000, or 15 per cent. Cattle and calves increased from $919,000,000 to $1,081,000,000, an increase of $162,000,000, or 18 per cent. Dairy products produced in 1925 were valued at $2,746,000,000, and in 1926 at $2,952,000,000, an increase of $206,000,000, or 7·5 per cent. Poultry products increased from $1,117,000,000 in 1925 to $1,181,000,000 in 1926 at $2,952,000, an increase of $64,000,000, or 6 per cent Sheep showed little change. Wool declined from $95,000,000 to $85,000,000, the production being 272,453,000 lb (35,642,000 fleeces) in 1927, against 260,976,000 lb. (33,548,000 fleeces) in 1926, and 245,562,000 lb. (32,235,000 fleeces) in 1925.

Minerals.—The total value of metallic minerals produced in 1927 was estimated at $5,520,000,000 (pig iron, $646,226,139; copper, $220,609,000; gold, $45,418,600, and silver, $34,266,328), and of non-metallic minerals the total value was $4,294,000,000 (bituminous coal, $1,029,657,000; Pennsylvania anthracite, $420,941,726, petroleum, 901,129,000 barrels of 42 gallons, value $1,172,830,000); clay products, $430,428,494 (1926), stone, $198,661,662; natural gas, $317,930,000, cement, $281,735,676.

[1] Decrease in land area due to building of Pathfinder and Shoshone Reservoirs in Wyoming and several reservoirs in connexion with irrigation projects in Montana.

MANUFACTURES.

The manufacturing establishments enumerated at the biennial Census of 1925 numbered 187,390, the value of their products being $62,713,714,000, as compared with a value in 1923 of $60,258,470,000. The leading manufacturing States, ranked according to value of products, are New York, Pennsylvania, Ohio, Illinois, Michigan, and New Jersey.

Cities Ranked by the Value of their Manufactured Products for 1925.

City	1925.
New York	$5,324,414,000
Chicago	3,439,163,000
Philadelphia	1,937,415,000

Leading Industries in Principal Cities Ranked by Value of Products for 1925.

New York—Clothing; Printing and publishing; Fur goods, Millinery and lace goods, Bread and other bakery products, Slaughtering and meat packing; Tobacco

Chicago—Slaughtering and meat packing, Printing and publishing, Clothing; Electrical machinery, apparatus and supplies; Foundry and machine-shop products

Philadelphia.—Textiles, Printing and publishing; Clothing, Sugar refining, Electrical machinery, apparatus and supplies

Detroit.—Motor vehicles, Motor vehicle bodies and parts; Foundry and machine-shop products; Brass, bronze, and copper products, Slaughtering and meat packing

Cleveland—Motor vehicles, Iron and steel; Foundry and machine-shop products, Electrical machinery, apparatus and supplies, Slaughtering and meat packing

St. Louis.—Motor vehicles, Slaughtering and meat packing; Boots and shoes; Clothing

Baltimore.—Smelting and refining, copper; Clothing; Slaughtering and meat packing, Sugar refining; Petroleum refining; Tinware, Printing and publishing

Buffalo—Flour-mill and grain-mill products, Motor vehicles; Slaughtering and meat packing

Boston.—Printing and publishing; Clothing; Sugar refining, Confectionery; Boots and shoes, Cutlery and edge tools, Foundry and machine-shop products.

Milwaukee.—Motor vehicle bodies and parts, Knit goods, Foundry and machine shop products; Slaughtering and meat packing; Boots and shoes, Electrical machinery, apparatus and supplies.

Los Angeles.—Printing and publishing; Motion pictures, not including projection in theatres; Petroleum refining, Slaughtering and meat packing, Foundry and machine-shop products; Lumber—planing-mill products.

Pittsburgh.—Iron and steel; Bread and other bakery products; Slaughtering and meat packing, Foundry and machine shop products

Cincinnati.—Clothing; Slaughtering and meat packing, Printing and publishing.

San Francisco—Printing and publishing; Sugar refining, Coffee and spice, roasting and grinding, Tobacco; Slaughtering and meat packing

Minneapolis—Flour-mill and grain-mill products; Linseed oil, cake and meal; Printing and publishing, Foundry and machine-shop products; Bread and other bakery products

Automobile Industry—The value of the complete passenger cars and business vehicles manufactured in 1925 was $2,825,304,929; of parts and accessories, $1,507,198,772, and of tyres and tubes $818,596,778 The number of complete passenger cars produced was 3,581,240 and the number of complete business vehicles (trucks, delivery wagons, ambulances, fire-department apparatus, &c) was 343,044, while 59,819,299 tyres and 77,387,836 inner tubes were also manufactured in 1925 The automobile factories (motor vehicle and motor-vehicle bodies and parts factories) gave employment of 426,110 wage earners, who received $723,931,334 in wages in 1925 The number of motor vehicles registered in 1927 in the U S A was 23,133,241. The gasoline produced in 1927 amounted to 13,878,270,000 gallons, and that consumed to 12,506,970,000 gallons. The taxes levied on motor vehicles by the Federal, State, and Municipal Governments in 1927 amounted to $760,373,653. The number of motor vehicles (including chassis) exported in 1927 was 384,197.

PUBLIC ROADS.—On Dec. 31, 1926, the total length of public roads was about 3,000,000 miles, approximately 550,064 miles of which were surfaced roads. In 1926 the total expenditures for construction and maintenance were approximately $955,793,000.

SHIPPING.—On June 30, 1927, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 556 sailing vessels of 730,689 gross tons; 2,139 steam vessels of 10,357,868 gross tons, a total of 2,695 vessels of 11,088,557 gross tons. In the year ended June 30, 1927, sailing and steam vessels of 78,730,612 tons entered at the various ports of the U.S.; of this total 28,396,758 tons were American and 50,333,854 tons foreign. The tonnage cleared from the various seaports was 80,790,849, of which 29,867,261 tons were American and 50,923,588 tons foreign.

POSTS AND TELEGRAPHS.—On June 30, 1927, there were 50,266 post offices in the U.S. handling 26,686,555,729 "pieces" of mail matter, of which amount 26,330,239,121 were domestic and 356,316,608 foreign. The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES, AND CURRENCY.

The *Weights and Measures* in common use are shown on page 461. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the *dollar* of 100 *cents*. The rate of exchange on certain dates in 1928 will be found on p. 450.

INDIAN POPULATION.

In 1928 the Indian population of the United States, exclusive of Alaska, was 355,481 by blood (Oklahoma containing 119,335, Arizona 46,481, New Mexico 22,869, S. Dakota 23,124, California 18,912, Montana 13,734, North Carolina 12,309, Washington 13,573, Wisconsin 11,427, and Minnesota 15,310, and the 38 remaining States less than 10,000 each). Total disbursements authorised for the fiscal year ended June 30, 1927, for Indian Service were $12,654,685. In addition to this the sum of $19,475,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1928, amounted to $1,716,815,123, of which $920,106,386 was tribal, and $796,708,737 individual.

RECLAMATION.

Commissioner, Elwood Mead, Interior Dept Building, 19th and F, N.W., Washington, D.C. Employees Washington Office, 52, Field, 1,500 to 2,000. Expenditure per year about $10,000,000.

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in the 17 arid and semi-arid States of the far West. Twenty-seven primary projects, comprising about 3,200,000 acres, are under construction or operation, and the major works and in serving an additional 1,500,000 acres under private canals that generally get stored water from the government reservoirs. The funds for this work have come chiefly from the sale of public lands, from repayments by the water users, and from royalties from oil and gas leasing and other mineral operations and Federal power permits, and the money expended is returned to the fund by graduated payments of settlers.

The Bureau has built 16,400 miles of canals, ditches and drains (including 146,200 canal structures), involving the excavation of 266,826,300 cubic yards of materials. In connexion with this work there have been constructed 117 storage and diversion dams with an aggregate volume of 20,883,000 cubic yards, including the *Arrowrock Dam* (349 feet high), Idaho, on the Boise River, and the *Elephant Butte Dam* (306 feet high), New Mexico, on the Rio Grande. The Bureau has built 110 tunnels, 1,090 miles of road, 88 miles of railroad, 3,351 miles of telephone line, 35 power plants, and 1,951 miles of transmission lines. It is mining coal, and has manufactured over 1½ million barrels of cement and sand cement. The construction cost to June 30, 1928, was $178,000,000.

Nearly 535,000 persons are living on the 38,000 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,200,000 acres above referred to, 1,378,990 acres were irrigated and 1,431,560 acres were harvested, producing crops worth $72,047,200, or an average of about $50·33 per acre. The additional lands using stored water yielded crops worth $61,160,010 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers of the World War have a preference right of 90 days to enter these farms.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "New Reclamation Era," an illustrated monthly publication, containing

articles of interest to irrigation farmers and engineers, and numerous settlement and other booklets.

An engineering library of about 6,500 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested

GOVERNMENT PRINTING OFFICE,

North Capitol Street, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time The present buildings, having a floor space of 17 acres, together with the machinery and equipment which they contain, represent an expenditure of approximately $8,000,000. The annual cost of operation and maintenance is about $13,000,000 There are about 4,100 persons annually employed in the various divisions of the office at a total yearly compensation of $8,500,000 In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U S Government The office has the largest battery of type-setting machines in the world, including 149 linotype machines, 90 monotype key boards and 129 monotype casting machines, which produced about 2,100,000,000 ems of type in fiscal year 1928 The 189 presses of the office are credited with 1,920,000,000 chargeable impressions, not including 200,500,000 on money order forms and 1,730,000,000 on postal cards During the year the office handled approximately 80,000 separate jobs In addition to the execution of all kinds of printing and binding, this office produced 10,350,000 square inches of electrotypes and stereotypes, and 697,000 square inches of half-tones and linecuts, supplied blank paper to other Government establishments at a cost of $560,000, and manufactured its own printing and writing inks, rollers, glue, type and type metal, some of these supplies being furnished to various branches of the Government It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Public Printer, George H Carter, *Iowa*. $10,000
Deputy Public Printer. John Greene. *Mass.* 7,500
Product Man., Elwood S. Moorhead, *Pa.* 5,200

COTTON REPORT AS OF JULY 1, 1928.

The Crop Reporting Board of the United States Department of Agriculture, from the reports and data furnished by crop correspondents, field statisticians, co-operating State Boards (or Departments) of Agriculture and Agricultural Colleges, makes the following estimate of cotton acreage in cultivation on July 1, 1928.

Estimate of Cotton Acreage, by States.

State	Area in Cultivation.		
	July 1, 1927 Acres	July 1, 1928. Compared with Last Year. Per Cent.	July 1, 1928. Acres.
Virginia	65,000	130	84,000
North Carolina	1,749,000	107	1,871,000
South Carolina	2,454,000	105	2,577,000
Georgia	3,501,000	113	3,956,000
Florida	67,000	140	100,000
Missouri	305,000	128	390,000
Tennessee	985,000	115	1,133,000
Alabama	3,214,000	108	3,471,000
Mississippi	3,408,000	111	3,783,000
Louisiana	1,585,000	119	1,886,000
Texas	16,850,000	109	18,366,000
Oklahoma	4,187,000	117	4,899,000
Arkansas	3,142,000	115	3,613,000
New Mexico	100,000	114	114,000
Arizona	140,000	143	200,000
California	130,000	171·3	223,000
All other	23,000	126	29,000
U S. Total	41,905,000	111·4	46,695,000
Lower California (Old Mexico) *a*	110,000	145	160,000

a Not included in California figures, or in United States total.

The acreage of "All other States," for July 1, 1927 and July 1, 1928, respectively, is made up of 2,500 acres and 4,000 acres in Illinois, 1,400 and 1,600 acres in Kansas, and 29,000 and 23,000 acres in Kentucky

The acreage in Arizona of Pima Egyptian long staple cotton is estimated at 48,000 acres in 1928 compared with 45,000 acres in 1927.

Dependencies of the U.S.A.

THE PHILIPPINE ISLANDS

are situated between 4° 40′-21° 10′ N. lat and 116° 40′-126° 34′ E long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 114,400 square miles, of which total 103,288 square miles are contained in the eight largest islands, the 7,075 other islands having a combined area of 11,112 square miles At the Census of 1918 the population was ascertained to be 10,314,310, almost all of Malayan stock, of whom 7,790,937 are Roman Catholic, 1,417,448 are Aglipayan, 124,575 are Protestant, 443,037 are Muhammadan, 508,596 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921)

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan In 1565 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec 10, 1898.

On Aug. 1, 1927, the Philippine Scouts, which form a part of the United States regular Army, consisted of 97 officers (29 being citizens of the Philippine Islands), and 6,871 enlisted men On the same date the regular Army in the Philippines (other than the scouts) consisted of 525 officers and 3,875 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Aug., 1927, consisted of 395 officers and 6,095 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

In 1926 the income of the Philippine Government was $39,808,463 and the bonded indebtedness $73,050,000. The expenditure on education in 1925 amounted to $12,074,242.75 for public schools only; the University had an enrolment of 4,693 students, and there were 1,096,758 pupils enrolled in the public schools. The principal exports are sugar, abaca (Manila Hemp), coconut oil, copra, embroideries, desiccated coconut, lumber and maguey; the imports being cotton and its manufactures, iron and steel and their manufactures, mineral oils, meat and dairy products, automobiles and accessories, wheat flour, rice, silk and its manufactures, paper and its manufactures and coal. The value of the total trade for 1926 reached the considerable amount of $256,183,311 50, of which $119,298,992 was in imports and $136,884,319.50, in exports During this year 60 per cent of the imports was from the United States and 73 per cent. of the exports was sent to the same country.

Values of important articles exported.

Article	Value.
Sugar	$32,229,634
Abaca (Manila Hemp)	32,142,038
Coconut oil	22,345,217
Copra	18,586.733
Tobacco products	8,631,582
Embroideries	5,992,389
Desiccated coconut	2,757,658
Lumber	2,552,811
Maguey	2,383,420
Hats	1,561,673

Towns.—Capital, Manila, in the island of Luzon, population, 316,266 The next largest towns are Cebú (81,808), Legaspi (now) (71,091), Iloilo (63,353) and Zamboanga (43,832), there are several others with populations from 25,000 to 40,000

GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26′ N lat and 144° 39′ E long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States The area of the island is estimated at 225 square miles, with a population on July 1, 1927, of 17,018, of whom 15,944 are classed as native, 410 of the naval station, and 664 other than native The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island

CAPITAL, Agaña Port of entry, Apra.

PORTO RICO.

Porto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50′-18° 30′ N lat. and 65° 30′-67° 15′ W. long., with a total area of 3,435 square miles and a population of 1,299,809 at the census of 1920, estimated at 1,400,000 in 1928. Three fourths of the population are of Spanish descent and about one fourth coloured The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 982 miles from Key West Porto Rico was discovered in 1493 by Christopher Columbus It was explored by Ponce de León in 1508, and he was made Governor of the island in 1509. It continued a Spanish possession until Oct 18, 1898, when it was ceded to the United States as a result of the Spanish-American War Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown The trade is principally with the U.S. About 460 miles of railroad were in operation in June, 1922, and there are good harbours at San Juan and Ponce. The legislative functions are vested in a legislature which consists of a elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts

and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years The Governor is appointed by the President of the U.S. and holds office at the pleasure of the President. A Supreme Court of 5 members is also appointed by the President. There is a Cabinet composed of 6 heads of Departments, two appointed by the President and four by the Governor The Governor also appoints all inferior judges Great improvement has been made in the progress and welfare of the Island during the present century—the Island is self-supporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are in force. The capital, San Juan, had 200,000 inhabitants in 1928, other towns being Ponce (70,000), Mayaguez (25,000), Arecibo (12,000), Bayamon (12,000), and Caguas (15,000)

TUTUILA, AMERICAN SAMOA.

American Samoa consists of the island of Tutuila, Aunuu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population of 8,763 in 1926, distributed as follows:—Tutuila and Aunu'u, 6,626; Ta'u, 1,202; Olosega, 427. Ofu, 431; Rose Island, uninhabited, and Swain's Island (annexed May 13, 1925), 87

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles Copra is the only export of importance.

VIRGIN ISLANDS.

The three islands, St Thomas, St John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of $25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1917 of 26,051. *St. Thomas* (28 sq. miles) has a population of 10,191; *St. Croix* (84 sq miles) has a population of 14,901, the capital being Christianstäd (or Bassin); *St. John* (20 sq. miles) has a population of 960, the capital being Cruz Bay. St Croix exports sugar and cotton.

CAPITAL, St. Thomas, contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Capt. Waldo Evans, U.S N. (ret).
Government Sec., Capt E. H. Van Patten, U.S N.

THE PANAMA CANAL.

The administrative organisation for the canal is known as "The Panama Canal." Its headquarters are at Balboa Heights, Canal Zone, with the Governor of the Panama Canal (Brig.-Gen. Meriwether L. Walker, U S.A.) at its head.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for $40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of $10,000,000, of the territory through which the canal was to be constructed The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of $25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1928, were $495,417,628. Tolls and other revenues (including profits on business operations), from its opening until June 30, 1928, amounted to $202,944,285

The Canal was opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 15, 1916.

Fiscal Year	No of Transits.	Canal. Net Tons.	Cargo Tons.
1915	1,075	3,792,572	4,888,454
1916	758	2,396,162	3,094,114
1917	1,803	5,798,557	7,058,563
1918	2,069	6,574,073	7,532,031
1919	2,024	6,124,990	6,916,621
1920	2,478	8,546,044	9,374,499
1921	2,892	11,415,876	11,599,214
1922	2,736	11,417,459	10,884,910
1923	3,967	18,605,786	19,567,875
1924	5,230	26,148,878	26,994,710
1925	4,673	22,855,151	23,958,836
1926	5,197	24,774,591	26,037,448
1927	5,475	26,227,815	27,748,215
1928	6,456	29,752,637	29,630,709

The canal is fifty statute miles long (44·08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet

in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet

Consuls-General		300	250
Commercial Secs., Grade II.	800–1,000	250	200
Inspectors and Consuls			
Commercial Secs., Grade III	600–800	100	100–200
Vice Consuls	300–600	50–250	100 200

ABYSSINIA or ETHIOPIA.

Empress, Her Imperial Majesty Waizeru Zauditu (daughter of late Emperor Menelek), *born* 1876; *acceded* Sept. 27th, 1916.

Regent Plenipotentiary and Negus (*and Heir Presumptive*), His Majesty Ras Taffari Makonnen, G.C.M.G. (Cousin of the Empress), *born* 1891; *crowned as Negus* Oct 1928

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of 10 to 11 millions, of whom about one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Massowah (Eritrea), the French colony of Djibuti, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous It contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c, flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Domestic slavery is general and has legal recognition.

The Abyssinians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelek, the son of Solomon by the Queen of Sheba. The form of government is a feudal despotism. There is no popular literature, and little education, but a school with English and French teachers has been founded by the Negus at Addis Ababa. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture and cattle breeding. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £2,500,000 for imports and exports, but it continues to suffer severely from the prevalent depression. The import duty on all goods at Gambela is 10 per cent. *ad valorem*, and at Dire-Dawa and Harrar 8 per cent *ad valorem*; in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. A railway (495 miles) has been built under French auspices from Jibuti to the capital, and Dire Dawa. The posts and telegraphs are under French management. The principal towns besides Addis Ababa, are Adwa (the capital of Tigré), Gondar, Debra-Markos, Saiyu, Aksum, Antalo, Ankober, Goré, Dembecha, Jubé, Jimma, and Harrar. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

CAPITAL, Addis Ababa (population fluctuates, but is ordinarily about 50,000). Harrar, in Eastern Abyssinia, has a population of about 45,000.

Imports from U.K. (1926)..... £100,000
Exports to U.K. (1926) 16,370

FLAG: Green, red, yellow

BRITISH LEGATION.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General, S. P. P. Waterlow, C.B.E (1928) £3,100

1st Secretary, R. Dunbar, M.C

Archivist, A. P. Hood.

BRITISH CONSULAR OFFICES.

Addis Ababa—Consul, R. W. Bullard, C.I.E.; *Vice-Consul*, M. E. Taylor

Dibouti—Vice-Consul, T. C. M. Salmon.

Harar—Consul, C. H. F. Plowman, O.B.E.

Jijiga—Vice-Consul, Capt. H. E. Long.

N.W. Abyssinia (*Dangila*)—*Consul*, Maj. R. E. Cheeseman, O.B.E.

Southern Ethiopia (*Mega*)—*Consul*, Maj. A. T. Miles, D.S.O., M.C.

Western Ethiopia (*Gore*)—*Consul*, Capt. E. N. Erskine, M.C.

S.W. Ethiopia (*Magi*)—*Consul*, W. Pennefather Holland.

Adis Ababa is 500 miles from Zaila, *viâ* Harar; letters from London are from 20 to 24 days in transit if the mail connects with steamer service from Aden; train from Djibouti takes 3 days; caravans take from 35 to 45 days.

AFGHANISTAN

King of Afghanistan and its Dependencies, H.M. King Amanulla Khan; *succ.* 1919.
Salute in British territory, 21 guns.

Minister in London, Shuja-ud-Dowla Khan, 31 Prince's Gate, S.W. 1.

1st Secretary, Ghulam Jilani.
2nd Secretaries, Syed Akram; Abdullah Khan.
3rd Secretaries, Muhammad Yunus; Akbar Shaw.

Afghanistan lies on the N.W. frontier of India. Estimated area, 245,000 sq. miles, and pop. 6,380,500. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896–7), on the N. by Asiatic Russia (boundary fixed 1886–7 and 1893–5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan (with Qataghan, Kafiristan (now Nuristan), and Wakhan), and four minor provinces, the Eastern, Southern, Farah, and Maimena, which are under governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurrahman (1880–1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. Considerable quantities of rifles and artillery have been purchased in Europe and the army now consists of about 25,000 regulars, but is more of a *gendarmerie* than a regular army; Turkish instructors are employed and Turkish influence predominates in the army. An Air Force with about 20 serviceable aircraft was established in 1924, the majority of pilots and mechanics being Russians. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the King, who is the Court of Appeal. They have recently been codified under the name of the "Fundamental Law." Recently steps have been taken to develop education, hitherto controlled by the mullahs. Two schools under French and German superintendence respectively have recently been opened and a large number of middle and primary schools in the provinces. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (220 miles), along which a motor service was established by the late Amir, and the road from Kandahar to Chaman (70 miles). The Sind-Pishin railway is now completed to the Baluchistan-Persian frontier. The trade of Afghanistan with India is estimated at about £3 700,000 a year. The exports to India are mainly fruits and nuts, raw wool, skins and *ghi*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. The Afghan customs duties are heavy. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £4,000,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904–5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence.

His Majesty the late Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasrulla Khan, by a *coup d'état* thereupon seized and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, soon after declared himself, and was recognised as King. Afghan troops crossed the Indian frontier on May 3, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by the King and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent.

A treaty was signed by representatives of Afghanistan and Great Britain on the Nov. 22, 1921, by which the two Governments agreed to respect one another's internal and external independence, to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government are allowed to import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted without payment of customs duty. A Trade Convention has been concluded and Afghanistan has recently adhered to the International Postal Union. King Amanulla and Queen Suraya paid official visits to many of the principal countries of Europe, and to Egypt, Persia and India, in 1927–28.

CAPITAL, *Kabul* (about 80,000). The chief commercial centre is Kandahar (50,000). Other provincial capitals are Herat (20,000), Mazar-i-Sharif (20,000), and Khanabad (5,000).

British Envoy Extraordinary and Minister Plenipotentiary, Lieut.-Col. Sir F. H. Humphrys, G.C.V.O., K.B.E., C.I.E. (1922) £4,500

Counsellor, B. J. Gould, C.I.E., I.C.S.
Secretary, L. W. H. D. Best, M.C.
Military Attaché, Maj. P. C. B. Dodd, D.S.O., M.V.O.

Oriental Secretary, Khan Bahadur Sheikh Mahbub Ali Khan.
British Consul at Jelalabad, Khan Sahib Muhammad Jehangir Khan.
British Consul at Kandahar, Khan Bahadur Mahmud Khan.

ALBANIA.

(Shkiperia.)

King of the Albanians, Zog I., b. 1893; *elected President*, Jan. 31, 1925, *proclaimed King*, Sept. 1, 1928.

Minister of Foreign Affairs, Ilias Bey Vrioni.

Minister in London (vacant).
Legation, 16, Inverness Terrace, Hyde Park, W.2.
Chargé d'Affaires, Ekrem Bey Vlora.

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic, total area about 20,000 sq. miles, total population estimated (1922) at 1,000,000. The political neighbours are, on the north and east, Yugoslavia, and on the south-east and south, Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, having been in power only six months, and during the Great War the country was invaded by troops of the Central Powers and of the Allies, and remained in a state of anarchy. After the Armistice a National Council at Durazzo established a provisional government, supported by an Italian military occupation of the country. The independence of the country was reaffirmed and guaranteed by the Supreme Council of the Allies. The provisional government was in power until 1920, when a revolt overturned it and set up a new government which remained in power until upset by a further revolution in December, 1924. A new Constitution was proclaimed on Jan. 21, 1925, under which Albania became a Republic under a President (elected for 7 years), with a Council of Ministers, a Senate, and a House of elected Representatives. On Sept. 1, 1928, the Constituent Assembly proclaimed the country a democratic monarchy and offered the crown to Ahmed Bey Zogu, the President, who assumed the title of Zog I, King of the Albanians.

The country is very primitive, agriculture and sheep and goat rearing being the principal industries, and olives and olive-oil, grains and tobacco the principal products; but there is some mineral wealth which remains largely undeveloped.

Kortcha—Vice-Consul, J. Pursell.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a Judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30′—60° E. long. and 12° 45′—34° 50′ N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud and Dahna deserts), and the total population is believed to be about 5,000,000. The various Arab States are shown below:—

THE KINGDOM OF NAJD AND HEJAZ.

King of the Hejaz and Najd and its Dependencies (Jan. 11, 1926), H.M. Abdul Aziz Ibn Abdul Rahman el Faisal al Saud, G.C.I.E., *born* 1882.

In the 18th century Najd was an independent State and the stronghold of the Wahabite sect. It subsequently fell under the Turkish yoke, but in 1913 the present Sultan threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and accepted the surrender of the greater part of Asir.

Najd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahna Deserts, and reaches eastward to the

Persian Gulf (Hasa). The population is largely nomadic and is estimated at 1,275,000 Arabs, negroes and half-breeds, the majority being Muhammadans of the Wahabite movement. There is little agriculture, but wheat and barley are grown, the principal industry is camel and sheep raising. The exports are woven cloaks, dates, live stock, hides and skins. The capital is Riyadh, and the principal trading centres are Hufuf, on the Persian Gulf littoral (30,000), Shaqra, Anaisah, Buraida, Hail and Hauta (Central), which have populations of 8,000 to 10,000. The only ports (Persian Gulf) are Qatif and Ojair, which are suitable only for sailing craft. Riyadh is a station on the Pilgrims' trans-Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabites.

The *Hejaz* extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes. On the coast are the small ports of El Wedj, Yambo, Rabegh and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind", and inland are many settlements through which runs the course of the Hejaz Railway. The *Oasis of Khaibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina* (*El Medina*, "The City"), 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. *Jeddah*, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets. The course of the *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo.

The total cost to the British Government of the subsidies paid to King Ibn Saud during the years 1917 to 1923 is approximately £542,000. No subsidy was paid before 1917 or after 1923, and the subsidy was given in the first instance in consideration of assistance in the war against Turkey. The later payments were made subject to the following conditions:—

(1) That Ibn Saud refrained, and restrained his adherents from aggressive action against the Hejaz, Kuweit, and Iraq.

(2) That he afforded co-operation in the matter of the Hajj (pilgrimage to Mecca) by maintaining the safety of pilgrim routes to his territory.

(3) That he consented to be guided generally by the wishes of His Majesty's Government in regard to his foreign policy, and to co-operate with them in promoting their own policy, which had for its object the maintenance of peaceful conditions in Arab countries and the promotion of the economic interests of both parties.

No terms of repayment were suggested.

CAPITAL, Riyadh (pop. 20,000)

Jeddah—British Agent and Consul, F. H. W. Stonehewer Bird.

THE PRINCIPALITY OF KUWAIT

Ruler, Sheikh Ahmad al-Jabir as-Subah, C.I.E., *acceded* March, 1921.

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Najd (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop. 50,000), is an entrepot for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1903.

British Political Agent, Lt.-Col. J. C. More, D.S.O.

THE SULTANATE OF OMÂN

Sultan, H.H. Seyyid Sir Taimur bin Faisal bin Turki, K.C.I.E., C.S.I., *born* 1886, *succ.* Oct. 5, 1913.

Omân (area 82,000 sq. miles, estimated pop. 550,000) is a Muhammadan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omân, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Omân proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1926–27 to £474,202, and in 1927–28 to £518,944. Dates and dried fish are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat (with the sister town of Matrah), has an estimated population of 22,000.

Muscat—British Consul and Political Agent, Maj. G. P. Murphy, I.A. *per mensem* Rs. 2,200.

ASIR.

Chief, Syed Hason bin Ali Al Idrisi, *succeeded* December, 1925.

Geographically, Asir extends from a line drawn inland from Lith on the southern limit of Hejaz to the northern boundary of Al Yemen (about lat. 27° 15′ N.) and includes the seaboard down to lat. 16°. Its breadth extends about 180 miles eastwards to Bishah in the north and to the boundary of the Beni Yam in the south. According to Arabian geographers, Asir is part of Al Yemen. The territory of Al Idrisi has decreased considerably in area during the last two years, having been encroached upon by Ibn

Saud from the north and by the Imam of Al Yemen from the south. It now only extends from Hali to a point between Jizan and Midi. It includes the Farsan Islands. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

THE IMAMATE OF YEMEN.

Imam, Yahya Muhammad Hamid-ud-din, *born* 1869

Yemen occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 3½ millions. Under Turkish rule, it was divided into the vilayet of Sana, Taiz, and Hodeida, and it extends inland to the borders of the Hadramut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown. The chief port of Yemen is Hodeida which is noted for the export of coffee, shipped from Hodeida to Masawa and Aden, and thence to Europe. The trade from Yemen perhaps exceeds that of the remainder of Arabia. The Imam is the head of the Zeidi sect of the Shiah Division of the Muhammadan religion; about half of his subjects are Zeidis, the remainder being Shafais, over whom he rules by *force majeure* alone. On the withdrawal of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protectorate populated by the Shafai sect of Sunni Muhammadans, and also the Tihama, or coast lands, from S. of Hodeida to Sheikh Said. Since 1920 the Imam of Yemen has been gradually encroaching on the Aden Protectorate, which is populated by tribes of the Shafai sect, but has now been ejected by air action from Aden, in support of the Protectorate tribes. In 1925, the Imam occupied Hodieda, which had been evacuated by the Idrisi, and later took the ports of Midi and Loheiya, together with the intervening country between the highlands and the coast, all of which is populated by Shafai tribes. The rule of the Imam is very unpopular with the Shafais owing to his exactions. About 60 miles to the south of Sana is the town of Dhammar, an ancient seat of learning.

CAPITAL, Sana; population, about 40,000

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadharim, an ancient people of Arabian stock (Hadoram was the son of Joktan, *Genesis* x., 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Qabr Hud) and Shibam (Qabr Salih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 750,000. The most important Coastal Chief is the *Sultan of Shehr and Mokalla* (H.H. Sultan Omar bin Awadh) who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Sawwun and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Qa'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Ka'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

TRUCIAL COAST.

The independent tribes on the *Pirate Coast*, which partly encloses the Persian Gulf from Ras-el-Khemma to Odeid, are bound under treaties with the Government of British India to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the coast ports largely consists in exports of pearls to India *vid* Lingah and Bahrein (a British island off the coast of Hassa).

ARGENTINE REPUBLIC.
(República Argentina.)

President (1928–1934), Señor Hipolito Irigoyen (*assumed office*, Oct. 12, 1928). . . .$96,000

There is a Consulate-General at *Dublin*, and there are also Consulates at *Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport*, and *Glasgow*; and Vice-Consulates at *Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough*, and *Swansea*.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of

the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles, its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south he the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.) The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 10,622,348 in 1927. Immigration is encouraged and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1927 the immigrants numbered 391,947, and the emigrants numbered 279,242. The climate is moderate. Spanish is the language of the country.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive $18,000 (paper) *per annum*.

Production.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were 37,064,850 cattle (1922), 36,208,982 sheep (1925), 9,432,421 horses (1925), 523,416 mules (1925), 4,819,835 goats (1925), and 1,436,638 pigs (1924). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1927 the exports of wheat were 4,225,494 metric tons, oats 604,828, linseed 1,894,565, maize 8,343,597 metric tons, butter 21,232 tons, wool 148,990 tons, sheepskins 15,247 tons, dried oxhides 25,838 tons, salted oxhides 145,128 tons, frozen beef 236,420 tons, chilled beef 466,669 tons, frozen lamb and mutton 83,126 tons. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, in the Department of Escalante. The Argentine State Oilfields at Comodoro Rivadavia produced 763,585 cubic metres in 1927; the output of private companies was approximately 524,730 cubic metres.

Communications.—There were (1924) 22,225 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 43,153 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are aeroplane services between Argentine centres. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. In 1927 3,378 ships of a total tonnage of 11,862,737 (49 per cent British) entered the port of Buenos Aires.

Defence.—The Navy consists of 2 super-Dreadnought battleships (reconstructed in 1925), 2 modern, light cruisers, 3 destroyers, 3 submarines, and 2 sloops are being obtained in Europe. Strength about 800 officers and 12,000 men. The principal naval base is at Puerto Belgrano, near Bahia Blanca, and there are minor bases at La Plata and Buenos Aires, while a new submarine and air base is being built at Mar del Plata, near the mouth of the La Plata. The naval aviation base is at Puerto Belgrano, with an airship base at Punta Indio. The Army is organised in 5 divisions, and numbers about 1,500 officers and 25,000 men on a peace footing. The divisions should consist of about 40,000 men on a war footing.

Education.—*Primary* Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. *Secondary* Education is controlled by the National Government in National Colleges, numbering 45 in 1923, with 15,500 students, average annual fees $45 (paper); in Normal Schools, numbering 86 in 1923, with 14,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are *National Universities* at Cordoba, Buenos Aires, La Plata, and Tucuman, and Faculties at Santa Fé, Rosario and Paraná.

AUSTRIA.
(Oesterreich.)

President of the Federation (Nov. 20, 1924), Dr. Michael T Hainisch
Federal Chancellor, Minister of Foreign Affairs, and Minister of the Interior (Oct. 20, 1926), Dr. Seipel.
Vice-Chancellor, Karl Hartleb.
Education, Richard Schmitz.
Finance, Dr. Viktor Kienbock.
Agriculture and Forestry, Andreas Thaler.
Social Welfare, Dr. Josef Resch.
Commerce and Communications, Dr. Hans Schürff.
War, Karl Vaugoin.
Justice, Dr. Franz Slama

Minister in London, Baron George Franckenstein, 18 Belgrave Square, S W 1.
Counsellor, Baron William Engerth
Secretary, Karl von Zeilessen
For Debt Clearing, Dr Felix Weiser
Consul-General, Max Mannaberg, 48, Hans Mansions, S W 3.

PRIOR to the War the Austrian Empire, joined to the Kingdom of Hungary, was the largest Empire, next to Russia, on the continent of Europe, situated between 42° 52′ N. lat. and 9° 30′—26° 20′ E. long It embraced an area of 240,456 sq miles, and a population (1914) of nearly 53,000,000 At the conclusion of the Great War, the territories of Austria comprised an area of 32,175 square miles with a population (1923) of 6,534,481 (estimated Dec. 31, 1927, at 6,678,527)

On June 28, 1914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914-18. Before the armistice of Nov 11, 1918, the Hungarians, Czechoslovaks, Poles, Jugoslavs and Rumanians had seceded from the "Dual Monarchy," and a Republic of "German Austria" was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28, 1918)

Under the *Treaty of St Germain* (Sept. 10, 1919) the political neighbours of Austria are Germany and Czechoslovakia on the N.; Italy, and Yugoslavia on the S ; Switzerland on the W , and Hungary on the E

Under the new Constitution (Nov., 1920), Austria became a Republican Federation of eight Provinces :—

Province.	Area (sq miles).	Population 1923
Lower Austria and Vienna	7,560	3,146,229
Upper Austria	4,627	876,074
Carinthia	3,679	370,817
Styria	6,320	978,845
Salzburg	2,765	223,023
Tyrol	4,881	313,385
Vorarlberg	1,010	139,999
Burgenland (West Hungary)	1,533	285,609
Total	32,175	6,534,481

Under the Constitution the Bundesrat and Nationalrat were constituted; a government formed, and a President elected; Vienna was later formed into a separate Province. The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan-Germans* coming next in order. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German Coalition Government under Doctor Seipel (a priest). Elections were held again in October,

1923, and in March, 1927, and a similar Government was returned on both occasions

Complete religious liberty is one of the fundamental laws of the new Republic The prevailing religion is Roman Catholic

Defence.—During the War of 1914–18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed Under the *Treaty of St Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up Service in the Republican Army is by voluntary enlistment for twelve years.

Education.—Primary education is compulsory and free, the children in attendance at schools numbering about 720,000 in 1927 Secondary education is provided in gymnasia, real-schools and middle schools, and there are universities at Vienna, Graz and Innsbruck.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation. The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct., 1922, the exchange value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £1 being equal to 325,000 crowns (in place of 24·22). The circulation on Sept 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about £25,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1923 In the following June the big League of Nations loan was successfully floated, nearly one half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923 The High Commissioner, Dr. Zimmerman, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec., 1922 Great progress has been made since in reducing Government expenditure and increasing the revenue Thus about 79,000 superfluous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr. Zimmerman left Vienna in July, 1926. The issue of uncovered bank-notes was stopped on Nov. 18, 1922, and the Austrian crown was stabilised at about Crs. 320,000 = £1 In 1925 a new currency was introduced, the unit being the Austrian *schilling* (=10,000 paper Crowns), the rate of exchange in Oct., 1927, being 34 5 *sch.* = £1 sterling. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic The favourable condition of the Austrian State Finances is shown in the following abstract of the results of 1926 and 1927. These accounts are drawn up according to the so-called "League of Nations" arrangements

	1926.	1927.
Receipts	£28,000,000	£31,900,000
Current Expenditure	£25,000,000	£28,700,000
Working Surplus ..	£3,000,000	£3,200,000
Capital Expenditure	£3,900,000	£5,600,000
Deficit—or Surplus .	£900,000	£2,400,000

That part of the Capital Expenditure which exceeds the working surplus was paid for out of the residue of the League of Nations Loan.

	1926.	1927.
Total Imports ...	£82,450,000	£92,298,000
Total Exports .	£50,577,000	£60,820,000
Imports from U K	£2,973,000	£3,904,000
Exports to U K. ...	£2,004,000	£2,189,000

Communications.—In Sept., 1919, there were about 4,140 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1914, but the new Republic is land-locked

Industries.—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes Forestry and stock raising are important. The forests are principally coniferous trees The live-stock includes horses, cattle, sheep, pigs, and goats The vine is extensively cultivated The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery.

CAPITAL, Vienna, on the River Danube Pop (1923) 1,865,780, other large towns are Graz (152,706), Linz (102,082), and Innsbruck (56,402).

FLAG. Three horizontal bands red, white, red.

Commercial Attaché, M. C. Bastin.
Assistant do. and Vice-Consul, M. A. de Clercq.
Chancellors, M. F. G. Lockem, A. Bomhals.

A Kingdom of Central Europe, with a total area (1927) of 11,750 square miles and a population, Dec. 31, 1926 (excluding Eupen and Malmédy) of 7,874,602. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately overcame the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its Library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £100,000,000, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 15, 1918, at the great turn of the tide, Antwerp was reoccupied by the victorious Belgian army, and Brussels and the remainder of Belgian soil a few days later. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary the Sambre divident into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Scheldt (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

GOVERNMENT.—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 120 senators (with the exception of 27 elected by the provincial councils) and 186 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; *i.e.*, to revise article 47 of the Constitution. This was done (Feb. 7, 1921) and a new Chamber was elected in 1925. Deputies receive 25,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Under Annex IV. of the *Treaty of Versailles* Germany undertook to deliver to Belgium certain livestock to replace the animals seized or destroyed during the War of 1914–1918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

DEFENCE.—In 1914 the *Army* on a peace footing consisted of about 50,000, all ranks. In the War of 1914–1918 over 500,000 passed into the armies, which were reorganised on French territory during the defensive period of the campaigns. An organised force of 200,000 co-operated with the Allies during the decisive offensive of the autumn of 1918. Those returned as dead or missing, during the War, numbered 102,382. In 1923 a new Recruiting Law was passed, entailing

compulsory service for 12 months, with certain exceptions. The yearly intake of recruits is fixed at 44,000, and the Army consists of a First Army of 3 Corps and 6 Divisions, and 1 Cavalry Division

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control Roman Catholic largely predominating There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound The Universities of Ghent and Liege are maintained by the State; those of Brussels and Louvain are free institutions Louvain University has been rebuilt. After considerable opposition, and by way of a compromise, Ghent University, which had hitherto transacted its business and given its teaching in French, was in 1923 made bi-lingual, many Flemish lectures being substituted for French, and Flemish becoming the official language of the University.

Revenue (1927) .. .. *Francs*	9,578,381,875
Expenditure (1927)	7,915,095,650
Debt (Dec 31, 1925)	47,010,007,500
Stabilisation Loan (Oct. 1926)	£20,000,000
Imports (1927) ....*Francs*	29,179,537,000
Exports (1927).	26,620,738,000
Imports from U K (1927) ..	3,397,386,000
Exports to U.K. (1927)	4,881,195,000

The imports in 1926 were manufactured articles (5,014,912,000 francs), raw materials (12,006,178,000), foodstuffs and beverages (5,886,873,000), and live animals (38,434,000); the exports were: raw materials (7,025,094,000 francs), manufactured articles (10,793,026,000), and foodstuffs and beverages (1,898,551,000) and live animals (160,804,000)

COMMUNICATIONS.—In 1927 there were 4,793 kilometres of State railways (normal gauge) and 5,064 kilometres of narrow gauge In 1924 there were 46,187 kilometres of telegraph wire and 2,259 offices. The navigable rivers and canals have a length of 1,231 miles (1919), and there are 6,177 miles of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1927) of 155 vessels (453,038 tons), in addition to which there were 535 fishing boats. In 1927, 18,684 vessels entered at Belgian ports (tonnage 27,825,695). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since reopened for traffic). The vexed question of the Scheldt, of which the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments The navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population (Dec. 31, 1925) of 801,656 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (300,026); Ghent (163,364), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (168,562) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

THE BELGIAN CONGO.

Governor-General, His Excellency General Tilkens.

The Independent State of the Congo became a Belgian Colony by a law of Oct 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated (1924) at 12,000,000. The total European population (Jan., 1926) was 15,236, of whom 9,638 were Belgians, 1,181 were British, 420 Americans, 801 Italians, 1,148 Portuguese, 107 Swedes, 103 Russians, 45 French, 309 Dutch, 234 Swiss, 512 Greeks, 127 Luxemburgers, 28 Danes, 29 Norwegians, 20 Spaniards, and 106 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Boma to Tchela in the Mayumbe Above Leopoldville the river and its numerous affluents are navigable by steamer for about 5,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (125 kilometres), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (273 kilometres) was completed in 1916, connecting the West Coast of Africa with British East Africa and the East

Coast The Katanga Railway reached Bukama in May, 1918, thus linking up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. The Bas Congo and Katanga Railway from Bukama to Ilabo on the Kasai River (a distance of 650 miles) has been completed as far as Kanda-Kanda, and will be open over its whole length at the end of 1928. It will then be possible to travel by tram direct from Cape Town to the river Kasai, a distance of 3,400 miles Work has been started on the Stanleyville-Lake Albert Railway, which will run between the Congo River and the Nile, providing the last link to direct river and rail communication between the Cape and Cairo. Another new line will run from the copper mining district of Katanga towards the West Coast, reaching Lobito Bay (Portuguese Angola) In addition, there are many carriage and motor roads. The most important motor road is the *Route Royale Congo-Nil*, 900 kilometres in length, from Djamba, on the Rubi, to Redjaf, on the Nile A regular goods and passenger service is now running on this route Another runs from Bukama (*via* Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasai, a distance of 1,000 kilometres, which can be covered in 5 days by touring car as against 40 days by porter. A telegraph line connects Banana to Coquilhatville (895 miles); Boma with Pshela (85 miles), Stanleyville with Ponthierville (79 miles); Kasongo with Uvira (265 miles); Kindu with Kongolo (219 miles); Kabolo with Albertville (169 miles), Sakania with Bukama (448 miles), and Buta with Bambili (138 miles), a total length of 2,298 miles. There is telegraphic communication with Europe. Fifteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. A great Inter-Continental wireless station is being erected at Kanga to communicate direct with Brussels The West Coast District has a rather scanty rainfall (40 inches), but on the Mamube Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Wild rubber and wild coffee are common; coffee, cocoa, Pará and Ceara rubber and cotton are successfully planted. Mines are very extensive. Extensive radium deposits have been discovered in the Katanga. The copper district of Katanga has enormous deposits of copper ore, and the smelters at the Lubumbashi produce about 7,000 tons of copper monthly (1926), plant has also been erected at Panda for the extraction of nickel. A rich tin-belt extends from Bukama towards Lake Tanganyika The gold-bearing districts of North-eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond-bearing gravels are worked in the south The exports are mostly palm-kernels and palm-oil, ivory, rubber, gum-copal, cocoa, copper, gold, and diamonds. Capital, Leopoldville (Leopoldsville-Kinshasa) (pop. 1,521 whites, 17,000 natives) Principal towns, Boma (pop 400 whites, 2,300 natives); Elisabethville (Katanga) (pop. 2,622 whites, 12,500 natives), Stanleyville, Eastern Province (390 whites, 7,500 natives), Coquilhatville (378 whites, 10,000 natives).

	1924.
Revenue ..... *Francs*	182,358,043
Expenditure	177,152,508
Debt	647,997,235
Imports	489,645,238
Exports	477,004,348
Imports from U K	55,139,125
Exports to U K	13,240,980

By the *Anglo-Belgian Agreement* of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa (*see* "Tanganyika Territory"), which adjoin the Belgian Congo on the E., were assigned by Great Britain to Belgium. *Ruanda* and *Urundi* formed the N.W. corner of German East Africa from 5° S. lat. to the S borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Nuausa (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi)

Attaché, Pastor Llobet.
Consul-General, Senor Don Arturio Prudencio, 5 Fenchurch Street, E C 2

The Republic of Bolivia extends between lat. 8° and 23° S and long. 57° 30' and 73° W., and its area is about 594,460 square miles*, with an estimated population of 2,825,439. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830)

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of

* Official estimate; other estimates give an area of 708,195 square miles.

12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes, the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are (1928) 1,312 miles of railways in operation, and the construction of a line from Cochabamba to Santa Cruz, in two sections of 115 and 110 miles respectively is in the preliminary stages. There are 4,000 miles of telegraph wire, and wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia) is now completed. There is through railway communication with Buenos Aires from La Paz. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (729 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosi to Sucre, the legal capital, is under construction, and trams run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, *Mejillones*, and *Antofagasta* by the "Pacific War" of 1879-1882 (*see* Chile). The Peace Army amounts to about 5,000, all ranks, the War Effective being about 105,000.

Estimated revenue (1927)	Bs.49,135,126
Estimated expenditure (1927)	50,307,124
Public debt (June 30, 1927)	172,544,762
Exports (1927)	127,083,926
Imports (1927)	66,104,673
Imports from U.K. (1927)	12,814,040
Exports to U.K. (1927)	101,195,978

Consul-General in Liverpool, Senhor Luiz Villares Fragoso.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela, on the west by Peru, Bolivia, Paraguay, and Argentina, on the south by Uruguay; and on the east by the Atlantic Ocean; and extends between lat. 5° 10′ N. and 33° 45′ S. and long. 34° 40′ and 73° 15′ W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast line on the Atlantic of 3,700 miles. The Republic comprises an area of 3,298,870 square miles, with a population (Census 1920) of 30,635,605.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are *Serra do Mar* in São Paulo; the *Serra do Mantiqueira* (Itatiaiassu, 9,000), and the *Serra do Espinhaço* (Itacolumi, 6,000 feet), in the south-east of Minas Geraes; the *Serra do Paranan*, between Goyaz and Minas Geraes, the *Serra dos Aymores*, which divide Espirito Santo

from Minas Geraes; and the *Serra da Gurgueia, Branca* and *Araripe*, which envelop Piauhy.

Brazil is unequalled for the number and extent of its rivers. The *Amazon*, the largest river in the world, has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its northern tributaries are the *Rio Branco, Rio Negro*, and *Japura*; its southern tributaries are the *Juruá, Purus, Madeira* and *Tapajos*, while the *Xingu* meets it within 100 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goyaz to the Gulf of Pará. The *Parnahyba* flows from the encircling mountains of Piauhy into the Atlantic. The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguassu, which unites with the Uruguay at the Argentine boundary, are the majestic *Falls of the Iguassu*, and on the São Francisco are the no less famous falls of *Paulo Affonso*.

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. The constitution rests on the fundamental law of Feb 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil*. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write, they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 212 members; members of both houses are paid. The language of the country is Portuguese, foreign languages being read and spoken in the following order:—French, Italian, English, German and Spanish.

PRODUCTION.—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being 34,270,324 (Census of 1920). The chief products of the country are coffee, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *herva-maté*, rubber and tobacco. the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manáos, coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and *herva-maté* (tea). The imports consist principally of every description of manufactured articles. In 1927 the principal exports were: £71,833,000 (75·5 per cent. of whole) cocoa, hides, rubber, *herva-mate* and tobacco. The principal imports are machinery, wheat, iron and steel products, cotton goods, and coal and coke.

In 1927 the foreign trade of Brazil was shared as under:

Imports from		Exports to	
U.S.A.	£42,843,000	U.S.A.	£40,982,000
U.K.	16,899,000	Germany .	9,222,000
Argentina . .	9,480,000	France. ...	8,549,000
Germany ..	8,468,000	Argentina ..	5,340,000
France	5,036,000	Netherlands	5,029,000
Belgium . .	3,260,000	Italy	4,062,000
Italy	2,754,000	U.K.	3,079,000
Portugal .	2,487,000	Belgium	2,472,000
Netherlands .	2,396,000	Uruguay	2,437,000

DEFENCE.—The peace effective of the Army is about 50,000 all ranks. The Navy consists of 2 Dreadnoughts, 2 old battleships, 5 protected cruisers, 2 scouts, torpedo boats, and some small vessels and aircraft.

EDUCATION.—*Primary* education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were over 1,000,000 pupils in 1920. *Secondary and Technical* education is carried out by Federal, State and Municipal authorities, with 42,000 pupils in Federal schools and 40,000 in State and Municipal institutions in 1920. Higher education (12,000 students in 1920) is carried out by Federal and State governments at the State *University* of Rio de Janeiro, and at the University colleges at Manáos (Amazones) and Curityba (Paraná) and other private colleges.

COMMUNICATIONS.—In December, 1925, there were 19,026 miles of railway open. Length of telegraph wires, 55,000 miles. In 1925 steam and sailing vessels of 33,146,010 tons (of which 6,295,012 were under the British flag) entered Brazilian ports, the principal harbours being Manáos, Pará, Maranhao, Pernambuco, Maceio, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

2nd Sec., M. Dimitre Naoumoff.
Press Secretary, Dr. T. Tchitchovsky.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece. The total area is stated at 39,824 square miles, with a population (March 1, 1927) of 5,483,125. The prevailing religion of the Bulgarians is the Orthodox Greek Church, with a Gregorian (Western) Calendar (since 1916)

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia She thus became involved in the defeats of 1918, and on Sept 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly* which ceded the S. Dobrudj to Rumania and E. and W. Thrace to Greece.

GOVERNMENT.—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him The legislature is a single chamber National Assembly or *Sobranyé* of 246 representatives, elected for a maximum term of four years by adult manhood suffrage. Members receive 400 *leva* a day and travelling expenses.

PRODUCTION.—Agriculture is the principal industry of the people and employs over half the population, the principal crops being wheat, rye, barley, oats, tobacco and fruit. The live-stock includes sheep, goats, cattle, pigs, horses, asses and mules. Coal of good quality is mined at Pernik and Trevna, and some, iron, gold, silver, lead, manganese, copper and oil shales are worked, but the mineral development is in its infancy. The chief manufactures are woollens, cottons and cigarettes. The exports consist principally of tobacco, eggs, maize, wheat, flour, silk cocoons, sheep, cattle, barley, lamb skins, rose oil, haricots, kid skins and charcoal; the principal imports being textiles, metal goods, machinery, cereal products, hides and skins, wood, oils, colonial produce, mineral oils, gums, paper, tannery materials, stone glass, and earthenware, chemical products, and rolling stock.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 58,000, all ranks. During the War (Oct.-1915-Sept. 1918) about 560,000 passed into the ranks of the Army, and of those over 250,000 became casualties. By the *Treaty of Neuilly* the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good; the number

AREA AND POPULATION.

Territory	Square miles.	Population
China Proper	1,532,800	414,011,519
Manchuria	363,700	22,083,434
Tibet	463,320	6,500,000
Chinese Turkestan	550,580	2,491,000
Total	7,910,400	445,085,953

The estimated foreign population of China was as follows in 1925: British, 15,247, Japanese, 218,851; Russian, 79,785; American, 9,844, Portuguese, 3,739; German, 3,050; French, 2,576; the total being 326,841. Out of a total of 7,921 foreign firms in China, 725 were British, 1,141 Russian, 3,940 Japanese, 184 German, 377 American, and 229 French (in 1923).

China became a Republic on Feb. 12, 1912, with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (*Tuchuns*) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The *Treaty of Kiakhta*, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China, as the Suzeran Power, appoints Residents at Urga and three other towns. *Mongolia* has since developed into an independent self-governing republic, and is in alliance with the *Soviet* Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the provinces of China proper. The exact status of Tibet is still unsettled.

The revolution of 1911 brought out a victorious general in the person of Yuan Shih-kai, but from his death in 1916 until June 1928 his subordinates and their successors fought for supreme power. Presidential elections were held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect. The Emperor (who had lived in the Imperial Palace since his enforced abdication) was stripped of his title and driven out of the capital in 1924, and such government as existed in 1927 was centred in Peking (for Northern China), while the Kuomentang (People's National Party) was represented by a Nationalist Government at Canton (for Southern China). In June 1928 Peking was captured by the Nationalists, and the capital of the country was transferred to Nanking, and on October 10, 1928 (the anniversary of the outbreak of the Revolution at Wuchang in 1911), Chiang Kai-shek, the commander-in-chief of the victorious Nationalist armies, was installed as President of the Republic.

EDUCATION.—In 1918 19 there were 134,000 schools in operation, with 4,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers.

COMMERCE. The net trade of the open ports is stated as follows in *Haikwan taels*.

Year.	Imports	Exports	Total
1914	569,241,382	356,226,629	925,468,011
1922	945,049,650	654,891,933	1,599,941,583
1923	963,801,762	785,957,554	1,749,759,316
1924	1,118,440,788	847,757,004	1,966,197,792
1925	992,294,32[illegible]	812,847,463	1,805,141,784
1926	812,853,874	807,755,813	1,620,609,687

The import of Indian opium is now prohibited.

External Trade, 1926.

COMMUNICATIONS. — *Railways.* — About 7,000 miles were open in Jan. 1922, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping - The China Merchants Steam Navigation Co. have a fleet of 32 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1923 the total tonnage of the 167,746 vessels and junks entered and cleared at Chinese ports was 128,202,625 tons. Of these ships 36,937 (42,942,264 tons) were British, 27,261 (35,081,216 tons) Japanese, and 5,608 (5,859,851 tons) U.S.A. In June, 1918, a vessel of 14,750 tons, constructed at the Kiangnan Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1922 there were about 50,000 miles of land lines and several high-power wireless installations.

CUSTOMS AND POSTS.—The Chinese Maritime Customs is the controlling service, this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General*. By an Imperial Decree of May, 1906, the Maritime Customs Dept was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a Foreign Co-Director General, with a considerable foreign staff, was appointed; letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices (1921) was 2,429, and of postal agencies 8,877. In 1922, 426,363,616 postal packets and 4,791,420 parcels were handled.

BUDGET (July 1919–June 1920).

Ordinary Revenue	*Taels* 400,838,002
Extraordinary Revenue	89,581,785
Total	490,419,786
Ordinary Expenditure	*Taels* 271,289,205
Extraordinary Expenditure	224,473,681
Total	495,762,886

Chinese Debt (Jan., 1920).

War Loans outstanding	£30,000,000
Boxer Indemnity do.	48,000,000
Railway Loans do.	40,000,000
General Loans do.	50,000,000
Japanese Loans do.	30,000,000
Short term Loans do.	17,000,000
	£215,000,000

About 10*s* 2*d* per head of the population.

At the end of September, 1922, according to the official statement of the Ministry of Finance, the total debt was *taels* 1,906,000,000, or less than 5 *taels* (11*s*.) per head of the Chinese population. Included in the expenditure of 1919 20 is the sum of 214,000,000 *taels* towards repayment of debt.

OUTLYING TERRITORIES.

Manchuria lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

Mongolia was formerly a part of the Chinese Empire, but by the Treaty of Kiakhta of 1915 it was recognized as an autonomous republic.

Tibet (area, 750,000 square miles; pop. 3,000,000) borders on British India. (*See* p. 629.)

Chinese Turkestan (or *Sinkiang*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes *Zungaria* and Chinese *Tartary*, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi. (*See* p. 629.)

CAPITAL OF THE CHINESE REPUBLIC, Nanking. Population (1928), 1,000,000.

Nanking, selected as the capital of China in 1928 in place of Peking, is the principal city in the province of Kiangsu, and the seat of the provincial government of Kiang-nan (embracing the three provinces of Kiang-su, Kiang-si and Ngan-hui. About 1000 A.D. it was named Kiang nan, but in 1368 this was changed to Nanking ("Southern Capital"). The city is built on the south bank of the Yangtse Kiang river, about equidistant from Canton and Peking, and is connected by railway (192 miles) with Shanghai. *Peking*, the former capital, had an estimated population of 1,300,000 in 1921.

Shanghai comprises (*a*) the *International Settlement* administered by the Shanghai Municipal Council (for the defence of which British Forces were despatched), the estimated population being: Foreigners, 31,430, and Chinese, 809,729; (*b*) the *French Concession*, an independent administration (population: Foreigners, 7,811, and Chinese, 297,720); and (*c*) the *Shanghai City, Chapei* and *Nantao* areas surrounding these settlements.

The population of the principal ports is estimated as follows:—Amoy, 400,000; Canton, 1,370,000; Changsha, 1,272,000; Chingkiang, 500,000; Chungking, 1,021,600; Foochow, 1,500,000; Hangchow, 729,950; Hankow, 290,000; Harbin, 365,000; Ichang, 450,000; Kiukiang 380,000; Kiungchow, 590,000; NANKING, 1,000,000; Ningpo, 2,200,000; Shanghai, 2,000,000; Soochow, 1,100,000; Tientsin, 838,000; Tsingtau, 310,000; Wanhsien, 752,000; Wenchow, 1,750,000; Wuchow, 350,000.

FLAG: White sun on blue ground.

Counsellor, Don George Garcés.
Consul-General, Don Alfonso Palao, 7 Sicilian Avenue, Southampton Row, W.C. 1.
Consul-General in Liverpool, Senor Dr. Don Genaro Payan, 41 North John Street

The Republic of Colombia lies in the extreme north-west of South America, having a coast line on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., with an estimated area of 462,606 square miles, and a population (Census 1918) of 5,855,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caqueta and Putumayo. The Patia flows through the famous *Mauma Gorge* of the Western Cordilleras, and one of its tributaries (the Careht, or Upper Guaitara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Funza is the Great *Fall of Tequendama*, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher *Columbus*, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 *Simon Bolivar* (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in enormous quantities, and in the year ended April 30, 1928, the Tropical Oil Co. (At Infantas) produced 17,582,149 barrels of crude oil, of which 16,114,506 were delivered by pipe line (350 miles) to Cartagena, for export, and

1,332,117 refined locally. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs The chief exports are coffee, precious metals, hides, india-rubber, and bananas. All religions are tolerated.

The standing army consists of about 10,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 1,500 miles being open in 1928, with 21,900 (1928) miles of telegraph There is a bi-weekly passenger and mail aeroplane service (German) between Barranquilla and Girardot and Buenaventura, the transit to the coast from Bogotá being thus reduced to two and a half days; a similar service, by same company, is in operation between Cartagena and Barranquilla. There are wireless stations at Barranquilla, Bogotá, Medellin, Cali and Cúcuta Spanish is the language of the country.

Education, Luis Dobles Segreda.
Works, Enrique Fonseca Zuñiga.
Public Safety, Arturo Quiros
Public Health, Dr. Solon Nuñez

Minister in London (vacant)
Consul-General, Percy G. Harrison, 7 Crosby Square, E C 3

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 27′ and 11° 10′ N lat. and from 82° 30′ to 85° 45′ W. long, contains an area of about 23,000 English square miles, and a population (1926) of 471,524

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1927) are coffee (£2,178,931), bananas (£1,212,200), cacao, gold and silver bullion, skins and hides, fresh fruit, timber and sugar The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1927, 50 per cent from United States, 15 from United Kingdom, 16 per cent from Germany).

The chief ports are Limon, on the Atlantic coast, through which passes the whole of the important banana trade with the U S and U.K, as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast In 1927, 696 foreign vessels (1,321,670 tons) entered at Costa Rican ports. About 415 miles of railroad were open in 1924 In 1927 there were 336 post offices, dealing with 10,076,502 packets, and 148 telegraph offices (3 wireless), with 2,612 miles of telegraph and telephone line A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country

CUBA.

(República de Cuba.)

President of the Republic (1925-29) Gen Gerardo Machado (*assumed office*, May 20, 1925).
Vice-President Colonel Carlos de la Rosa.
Foreign Affairs, Dr. R. Martinez-Ortiz.

Minister in London, Señor Dr Don Guillermo Patterson *Legation*, 30 York Terrace, Regent's Park, N.W 1
Counsellor of Legation, Dr. Don Gabriel Suarez Solar
Commercial Attaché, Señor Don Ramon Vasconcelos Maragliano
Consul, Señor Dr. Don Raul Mejer, 46 Kingsway, W.C 2.

Cuba (the largest of the "West India" Islands) lies between 74° and 58° W long., and 19° and 23° N. lat., with a total area of 44,178 sq miles and a population of 3,413,216 (Dec 31, 1925)

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880-1886 The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent. of these being under sugar cane and 30 per cent. under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar; sugar crop 4,932,095 tons (1925-6), 4,508,670 tons (1926-7); the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line; there are about 1,500 miles of roads

Spanish is the language of the island.

Consul, Dr. František Pavlásek, 18 Bedford Square, W.C. 1.

Part of the Austro-Hungarian Monarchy declared its independence on Oct 28, 1918, as the Czechoslovak Republic, and ten days later the *Narodni Vybor* (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the S., the German and Polish Republics on the N., the German Republic on the W., and the Polish Republic and the Kingdom of Rumania on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Bratislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt Vereczka) —a total area of about 54,877 sq miles with a population (Census of 1921) as under:—

Bohemia	6,781,936
Moravia	2,633,027
Slovakia	2,926,824
Silesia	650,442
Ruthenia	596,601
Total	13,588,830

(The estimated increase since the last census brings the total to 14,300,000 on Jan 1, 1927.) Of the total population 8,760,957 (65·5 per cent.) are Czechoslovaks, 3,123,448 (23·3 per cent.) Germans, 747,096 (5·5 per cent) Magyars, 461,466 (3·4 per cent.) Ruthenians, and 75,852 (0·5 per cent) Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers appointed by the President. The coalition of Czech parliamentary parties (which with short intervals had monopolised the executive from the foundation of the Republic) broke up in the Spring of 1926. For a time the Government was carried on by a non-parliamentary cabinet. At present a coalition of the Czech, German and Slovak "bourgeois" parties are in office. In the present Ministry two portfolios (those of Justice and Public Works) are, for the first time, held by representatives of the German minority, and in January, 1927, two representatives of the Slovak Peoples (Catholic) Party joined the Ministry. The Constitution guarantees religious and political freedom. About 80 per cent of the people are Roman Catholics.

By the Peace Treaty Czechoslovakia acquired about 80 per cent of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead are all mined, while the whole country is rich in mineral and thermal springs. Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of ten millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Except in Slovakia and Ruthenia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czechoslovakia is in a far more flourishing state than most of its neighbours.

Czechoslovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, *via* the Danube, to the Black Sea.

	1929.

According to the Law instituting the Czechoslovak Bank of Issue, the Bank is obliged to maintain the foreign exchange value of the Czech Crown at the average level of the two years before the formation of the Bank. This level is officially understood to be between 290 and 303 United States gold cents to 100 Kc. The rate of exchange has in point of fact for a long time been practically stable at about 1264 Kč. = £1.

The Bank of Issue commenced operations on the 28th April, 1926.

CAPITAL, Prague (Praha), on the Vltava (Moldau), the former capital of Bohemia, with a population estimated in 1923 at 676,657; other large towns are Brno (Brunn) in Moravia (pop. 221,758); Plzen (Pilsen), the brewing centre in Bohemia (pop. 88,419); Bratislava (Pressburg), where the Danube forms the S. boundary of the Republic (pop 93,289), and Kosice (Kaschau) in Eastern Slovakia (pop. 52,898).

FLAG. White, blue, red.

DANUBE COMMISSIONS.

The *International Danube Commission*, (Headquarters Vienna) was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria, Bavaria, Bulgaria, Czechoslovakia, France, Great Britain, Hungary, Italy, Rumania, Wurttemburg, and Yugoslavia The Commission maintains the liberty of navigation and the equal treatment of all flags on the Danube from Ulm (Wurttemburg) to Braila (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the *European Commission of the Danube*, created by the Treaty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal), this canal will be deepened to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Braila, where transshipment into river barges is necessary A pilotage and river-improvement service is maintained by the International Commission at the Iron Gates (headquarters, Orsova), the expenses being met by shipping dues

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin and Orsova (Iron Gates), in *Rumania*, Russchuk, Vidin and Lom Palanka, in *Bulgaria*; Belgrade, the capital of *Yugoslavia*; Buda-Pest, the capital of *Hungary*, Bratislava in *Czechoslovakia*, Vienna (the seat of the Commission), and Linz, in *Austria*; Passau and Regensberg, in *Bavaria*, and Ulm, in *Wurttemburg*.

The financial situation of the European Commission is shown below, as at Dec. 31, 1927:—

	Gold francs
Balance from 1926	1,612,249
Receipts during 1927	5,090,048
Expenditure, 1927	6,359,180
Balance in hand	343,117

The receipts consist almost entirely of navigation dues (5,030,653 francs) The expenditure includes 2,062,101 francs on the prolongation and strengthening of the embankments at Sulina, and 251,507 francs in repayment of the British portion of the loan raised by the Commission in 1924

THE INTERNATIONAL DANUBE COMMISSION.

British Delegation, Col. J. G. Baldwin C.B., *Plenipotentiary Commissioner (Delegate)*, H. C. Dick, M.B.E., H.B.M. Consul, Bratislava (*Asst. Delegate*).

EUROPEAN DANUBE COMMISSION.

British Delegate, Col. J. G. Baldwin, C.B. (*Plenipotentiary Commissioner*).

DANZIG.

(Freie Stadt Danzig.)

Under Articles 100 and 102 of the *Treaty of Versailles*, the City of Danzig with the surrounding territory (constituting a total area of about 726 sq miles, with a population estimated at 390,000) was set up as a Free City, under the protection of the League of Nations, Poland undertaking to conduct her Foreign Affairs. The Free City was constituted Nov. 15, 1920, with an executive Senate and an elected Legislature of 120 members The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. In Jan., 1922, the Free City entered the Polish Customs Union. The principal exports are timber (Danzig is at present the largest timber exporting port in Europe), coal, cereals, cement, bacon, eggs, mineral oils and sugar, and the imports herrings, iron ore, machinery, scrap-iron, artificial manures, fats, foodstuffs and textiles. The tonnage of shipping entered in 1927 was 3,889,854 tons, and of those cleared 3,932,577 tons.

Danzig — High Commissioner of League of Nations, Professor J A. van Hamel.

Vice-Consul, M. J. A. Vestbirk.
Consulates at Hull, Liverpool, Manchester, Belfast, Falmouth, Newcastle-on-Tyne, and Leith.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zeeland, Funen, Lolland, &c., the penin-

sula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34′—57° 44′ N lat. and 8° 5′—12° 40′ E long., with an area of 15,042 square miles, and a population (Nov. 5, 1925) of 3,435,000. Nearly one-half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1927, 1,299,200 hectares were under corn crops, 497,500 sugar and other beets, and 864,700 hay crop. In July, 1927, the live stock numbered 524,725 horses, 2,912,630 cattle, 231,000 sheep, and 3,730,730 swine. The crops in 1927 included 8,834,330 hkg (hkg = 100 kilogrammes) of oats, 7,855,960 of barley, 2,632,710 rye, 5,558,070 mixed corn, and 2,560,540 qrs of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. There is a seagoing mercantile marine of 659 steamers, with a tonnage of 494,334. There are (1927) 5,126 kilometres of railway and 14,511 miles of telegraph line.

DEFENCE.—The Army consists of about 12,000 trained men, the vote for 1926-27 amounting to Kr. 41,000,000 (including supplementary estimates of Kr. 3,000,000). The Navy consists of 4 coast-defence ironclads and 1 completing, 2 small cruisers, 23 torpedo-boats (built and building), 14 submarines (built or building). Vote, 1924-25, Kr. 16,000,000.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

	1926-27.	1927-28.

The outlying possessions and colonies of Denmark have an area of about 50,000 square miles, with about 35,000 inhabitants. They include the FAROE, or Sheep Islands (515 sq. m., pop., 1925, 22,835), GREENLAND (ice-free portion about 50,000 sq. m., total area about 830,000 sq. m., population, 1921, 14,400), the trade of which is a Government monopoly.

Copenhagen, distant 728 miles; transit, 36 hours.

DOMINICAN REPUBLIC.
(República Dominicana.)

President (1924-1930), Horacio Vasquez, *elected* July 12, 1924.
Foreign Affairs, Lic. Rafael Augusto Sanchez.

Chargé d'Affaires and Consul-General in London, C. M. Lamarche, 19 St. Dunstan's Hill, E.C. 3.
Consul, Octavio Ventura.
Vice-Consul, A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus, who named it Hispaniola. The island was peopled by the Spaniards with imported African slaves, who soon exterminated the "Indian" tribes. In 1821 an independent republic was proclaimed and the Spaniards abandoned the country. The present republic of San Domingo broke away from Haiti in 1844 and its independence is secured under a law of Nov. 6, 1844. The Dominican Republic comprises an area of 19,332 square miles, with a population of 897,405.

On Nov. 29, 1916, American Military Forces landed in Santo Domingo and a military Government was proclaimed. From Oct. 21, 1922, a provisional Dominican government was in office until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of

the Foreign obligations, which continue to be administered by an American official

Sugar and cocoa are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, cotton, wax, honey, logwood, tortoiseshell, hides, maize, lignum vitae and divi-divi. There are about 150 miles of public railroad, and telegraphic (2 wireless stations) and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America, New York, Curaçao, Porto Rico and Cuba. The programme of highway construction is being actively pursued, and in addition to the highway across the Island, there is a direct road from Santo Domingo to Port au Prince, the capital of Haiti, which enables the journey from capital to capital to be completed by motor car in one day. Up to Oct. 31, 1924, there were 343 miles of first-class road constructed and opened.

Of the import trade in 1926, 65 per cent. came from U.S. and 5 per cent from Great Britain. British trade is hampered by distance (as compared with U.S.), by lack of resident British merchants, lack of British industrial undertakings in the Republic, and by indifferent and slow steamship services from Europe.

	1925. (U.S. $)	1926. (U.S. $)
Receipts....	$13,120,160	$12,671,285
Payments	14,011,431	13,416,588

Foreign Affairs, Señor Dr. Homero Viteri Lafronte
Interior, Señor Julio Moreno
Finance, Señor Segundo Luis Moreno
Public Instruction, Señor Dr Daniel Cordova Toral.
Social Welfare and Labour, Señor Dr Pedro Pablo Egüez.
War and Marine, Señor Commandante Carlos A. Guerrero

Minister in London, Señor Don Gonzalo Zaldumbide (resident in Paris)
Chargé d'Affaires, (vacant)
Consul-General in London, Señor Don Ernesto Chacon, 23 College Hill, Cannon St., E.C. 4.
Consuls at *Liverpool*, *Birmingham*, *Hull*, *Glasgow*, and *Cardiff*.

An equatorial State of South America, extending from lat. 1° 38' N. to 6° 5' S., and between 60° 20' and 81° W. long. (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq. miles

The former *Kingdom of Quito* was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century *Pizarro's* conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft.), Illiniza (17,405 ft.), Carihuairazo (16,525 ft.), Cotocachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,186 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common

Its chief products are cocoa, vegetable ivory, bananas, cotton, coffee, India-rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textiles and other manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The *Galápagos* (Tortoise) *Islands* (2,870 square miles) belong to Ecuador.

In October, 1926, an American Financial Mission arrived in the country and their recommendations have been enacted as laws. A new customs' tariff, prepared by the Mission, came into force on July 1, 1927, and produced 25,553,096 *sucres* in the year ended June 30, 1928, and a new monetary law reintroducing the gold standard, the currency being stabilized at 5 *sucres* = $1 U.S. A Central Bank was established on March 4, 1927, and a new banking law enacted. In order to assure the success of the new Economic Laws the Government has engaged the services of three American experts for three years.

In November, 1927, the Swedish Match Company of Stockholm secured the exclusive right to import and manufacture matches in Ecuador for a period of 25 years in return for a loan of 8,800,000 *sucres*, which sum was applied towards the establishment of a Mortgage Bank.

The language of the country is Spanish.

	1926. *Sucres.*
Revenue	44,856,457

Finan. Under Sec., Ahmed Abdul Wahab *Bey*.
Foreign Under Secretary, Ibrahim Wagih *Pasha*
Director-Gen., Foreign Affairs, Sheriff Sabri *Bey*.
Director-Gen. Ports and Lighthouses, Rear-Adm G. Tomlin, C.M.G., M.V.O

Egyptian Minister in London, (vacant).
Offices of Legation, Bute House, 75 South Audley Street, W. 1.
Counsellor, Sesostris Sidarouss *Bey*, C.V.O.
1st Secretary, Abdul Rahman Fikry *Bey*.
2nd Secretary, Georges Cattaui.
Attaché, Radi Abou-Seif Radi.

* A *Waqf* is an institution of Muhammadan Law similar to the "trust" of English Law When property is made *Waqf* it is dedicated expressly or implicibly to some charitable or religious object, or for the benefit of private individuals. The nearest British equivalent is "The Public Trustee."

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (*a*) the valley and delta of the Nile, (*b*) the Libyan or Western Desert, and (*c*) the Arabian or Eastern Desert, (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberzed (or St John's Island). This territory lies between 22° and 32° N lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with the Sudan The western boundary runs from a point on the east, N. of Sollum (long 25° E), inland in a south-westerly direction for some distance and then turns S along a meridian line approximately in long 24° E until it meets the parallel of 22° N lat., which forms the N boundary of the Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15′ E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddâns* (12,431 square miles) and the area of lakes at 641,000 *feddâns* (1,039 sq miles), a total of 8,308,000 *feddâns* (13,470 sq. miles), but within the boundaries above-mentioned is enclosed an area of about 363,181 sq. miles. The population (Census of 1927) numbered 14,168,756, distributed as under:—

Division	Population	
	1917 Census	1927 Census.

(†) Dahkla and Kharga Oases. (‡) Including Siwa Baharia and Farafra.

Of the total population in 1917 males numbered 6,369,517 and females 6,348,738, in 1927, males numbered 7,036,298 and females 7,096,996 (Nomads being excluded in each case)

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The *Nile* has a total length of 3,470 miles from the Victoria Nyanza to its mouths. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 23 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from S.E. to N.W. are known as Kharga, Dahkla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great back-bone of high and rugged mountains extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux or sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the *wadis*, and running water (mostly brackish) is found at a few points.

Native Population.—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as *Fellahin* (*fellah*=ploughman, or tiller of the soil). The *fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,942 in the total of the Census of 1917 (including 126,432 local subjects of foreign origin). A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and 107,364 Sudanese and Berberins), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayum. The third element is the *Nubian* of the Nile Valley between Aswan and Wadi-Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the foreign residents were 205,998, of whom 30,797 were Turks, 56,731 Greeks, 40,198 Italians, 24,354 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4,225 Russians, 157 Germans, 23,932 other Europeans and Americans, and 1,496 Persians.

Religions.—At the Census of 1917 there were 11,623,753 Muhammadans, 1,026,107 Christians, 59,582 Jews and 8,814 other religions. The chief Muhammadan religious authorities in Egypt are the *Sheikh el Gami el Azhar* and the *Mufti el Di-qar el Masrkya*.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

Rulers of Egypt since 1811.

Name	Born.	Reigned.
Mohammed Aly (*Vali*)	1769 ..	1805-1848
Ibrahim (*Vali*)..	1789 ...	1848
Abbas I ,, ...	1813 .	1848 1854

Abbas II (*Khedive*)..	1874 ...	1892-1914
Hussein Kamel (*Sultan*)....	1853 ...	1914-1917
Fuad I (*King*).	1868 ...	1917-

Legislature.—Legislative power is exercised by the King in concurrence with the Parliament within the limits laid down in the Constitution established by Royal rescript of April 19, 1923, and general elections took place for a Parliament, consisting of two houses, which first assembled March 15, 1924. Parliament consists of a Senate of 122 members of whom two-fifths are nominated by the King, the remainder being elected on the basis of 1 Senator for every 180,000 inhabitants; and of a Chamber of Deputies elected on the basis of 1 for every 60,000 inhabitants.

Executive.—The executive power is exercised by the King through his Ministers within the limits of the Constitution, the Ministry being held jointly responsible to the Chamber of Deputies.

Local Government.—The chief towns constitute governorships (*muhafzas*), and the remainder of the occupied country is divided into provinces (*mudirias*), which are subdivided into districts (*markaz*), each under a *mamur*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from

each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganised in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arábi *Pasha*) assumed alarming proportions, and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. The defence of Egypt is reserved by the Constitution and remains under British control, the British garrison (under the command of a British general officer) amounting to 3 cavalry regiments, 3 batteries of artillery, 2 companies of engineers, 7 battalions of infantry and 1 armoured car company, a total of 11,420. Service in the *Egyptian Army* is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot, but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £E20, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which had a strength of about 11,220 all ranks in 1927.

There is no *Navy* in the proper sense of the term, there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The *Egyptian Police* (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 369 officers and 6,162 men. There are also 60,859 *ghafirs*, or native night-watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1922-3 there were 151 *Elementary Schools* (*Maktabs*) under Government supervision, with 23,996 pupils and 3,710 *Maktabs* under inspection for grants-in-aid with 279,409 pupils; there were also 54,528 pupils in other elementary schools. The government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There were also 1,148 Egyptian institutions with 111,935 pupils and 569 foreign institutions with 56,916 pupils. There are *Colleges* of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University was founded in 1908 at Cairo.

Agriculture.—The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile—this portion amounts at present to 5,600,000 acres (1926), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. In 1926 the land was held as to 5,060,338 *feddans* by 2,053,056 native owners, and as to 538,168 *feddans* by 6,596 Europeans. The principal crops grown during *Saif* (summer) are cotton, rice, sugar cane, and Sorgho (a variety of maize). *Nili* (flood) part of *Saif*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and rice. *Chitwi* (winter) commences in November and ends in June. The principal crops are cereals, berseem (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba. The total cotton crop and the value of the quantities exported in recent years:—

Year	Kantars	Export value
1924-25	7,273,974	£E57,544,253
1925-26	7,964,645	43,825,564
1926-27	7,652,189	35,961,447
1927-28	6,041,499	—

Live Stock.—In 1925 the cattle numbered 676,994, buffaloes 722,943, horses 34,017, mules 21,480, donkeys 709,789, sheep 1,091,016, goats 455,054, and camels 259,345.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollum, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1924, was 1,923 miles. 27,585,000 passengers and 5,780,491 metric tons of merchandise were carried during 1923-4, the net receipts being £E1,810,487. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor

and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 818 miles of light railways exploited by public companies.

Caravan Routes.—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—For the SUEZ CANAL *see* pages 826–7.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft, the principal are those of Sollum and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitin, Jemsa and Hurghada in the Gulf of Suez, and Safaga, Qosseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depôt at Suez. The principal port is Alexandria, where 2,102 vessels (4,782,305 tons) entered and 2,106 vessels (4,800,655 tons) cleared in 1925.

Posts and Telegraphs.—There were in 1925 3,311 post offices and stations, dealing with 58,753,000 letters and post-cards, and 26,391,000 newspapers, &c., and a total foreign correspondence of 43,000,000. There were on March 31, 1925, 136,522 miles of telegraph and telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarraf* (village tax-collector).

Debt.—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund (£E30,000,000 on March 31, 1926), the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1925 and 1926:

Debt.	1925.	1926.
	£	£
Guaranteed Debt, 3 per cent.	5,072,300	4,870,700
Privileged Debt, 3½ per cent.	31,127,780	31,127,780
Unified Debt, 4 per cent.	55,971,960	55,971,960
Total	92,172,040	91,976,440

The *Cost* of the Debt (in the Budget for 1926–27) inclusive of £E664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1894, which were guaranteed on the Egyptian Tribute, was stated at £E4,914,830.

CAIRO, the capital (population 1,059,824), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalîli, the Hamzâwi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population 570,314), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World" (*see* p. 87). It now contains two royal palaces, Ras-el-Tîn and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1917 the towns of Tanta (74,195), Port Said (75,102) and Assiut (51,431) also exceeded 50,000 inhabitants.

CAPITAL, Cairo.

The most northerly of the Baltic provinces, is bounded on the N by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea, and on the E by Lake Peipus and *Soviet* Russia (along a line roughly parallel with the eastern shore of the lake). The islands of Dago, Osel and other smaller islands in the Baltic form part of the Republic. It has an area of about 17,953 sq miles (within the boundary settled by agreement with *Soviet* Russia), with a population (Jan 1, 1928,) of about 1,115,000 (87·7 per cent. Estonians, 8·2 per cent Russians, 1·7 per cent. Germans. Agriculture and dairy farming are the chief industries, engaging 59 per cent. of the population. The value of the agricultural production in 1926 was £15,000,000, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon, and eggs the chief products of dairy farming There are important manufactures, including cotton, woollen, paper, timber, matches and distilling, with annual production valued at £7,000,000 There were (1928) 420 miles of broad gauge and 290 miles of narrow gauge railway in operation.

Legislature consists of a single-chamber Assembly (Riigikogu) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being the Head of the State. The supreme organ of the Judicature is the State Court of Justice in Tartu (Dorpat)

Prime Minister, Juho Sunila
Foreign Affairs, H J Procope

Minister in London, Monsieur A. H Saastamoinen, 2 Moreton Gardens, S Kensington, S W. 5
Counsellor, Eino Wahkangas.
2nd Sec, Ville Niskanen.
Military Attaché, Lt.-Col. J. G G Tauchei.
Consul-General, L. Norrgren, 57 Gordon Square, W C 1

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent sovereign state (Dec 6, 1917) The following year the country sustained severe disturbances on account of the aggression of Russian Bolshevism, but succeeded in restoring order, and the relations between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 149,926 square miles, with a population (1926) of 3,558,220, of whom (in 1920) 2,574,228 were Finnish-speaking, 340,963 Swedish-speaking, and 1,603 Laps, leading a nomadic life in the north. Nearly all the inhabitants are

Lutherans The *Aland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia (area 557 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 1 at Helsinki (Helsingfors) and 2 at Turku (Åbo), the university of Helsinki (founded 1640) has 3,000 students, of whom 900 are women In addition, there are 1 technical and 2 commercial schools The leading crops are rye, barley, oats, potatoes Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (62,400,000 acres) are a great source of wealth; there is no European country so wealthy in forests except Russia, the exports of timber in 1927 being 1,300,000 standards; wood pulp, cardboard and paper, and dairy produce are also exported There are (1927) 3,164 miles of railroad and about 3,900 miles of telegraph, with a well developed telephone system (22 8 per 1,000 inhabitants) There is railway connexion with Sweden and Russia, and telephone connexion with Estonia, Russia, Sweden and Norway. The merchant fleet (1927) consists of 4,991 vessels (491,689 tons), of which 547 are steamers.

Service in the Army is universal and compulsory, the peace effective being about 25,000 all ranks; there is also a volunteer organisation of Civic Guards with an enrolled strength of about 100,000.

The country was formerly governed by the Finnish Senate of 22 members, with a Diet of 4 estates elected by the people, but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finnish and Swedish are the official languages.

Consulate General, 51 Bedford Square, W.C. 1.
Consul-General, M. Campana.
Consul at Liverpool, M. de Ledeulx.

There are also Consuls at Southampton, Newcastle-upon-Tyne, Cardiff, Glasgow, Dublin, and in Jersey.

The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N. lat., and from 7° 45′ E. to 4° 45′ W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfort* (May 10, 1871) amounted to 5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles,

making the present area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March 6, 1926) of 40,743,851 (inclusive of Alsace and Lorraine). In 1926 there were 766,226 births, 346,126 marriages, and 713,458 deaths, in 1920 the excess of women over men was 2,500,000.

France has always been attractive to foreigners, of whom (1926) 2,498,230 were resident there, including (in 1921) 470,873 Italians, 415,546 Belgians, 303,141 Spanish, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789-1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20–June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the *Senate* of 314 members (elected by indirect vote for 9 years, one-third being renewable every 3 years) and the *Chamber of Deputies* of 597 members (elected by direct vote for 4 years). Members of the legislature receive 27,000 francs a year and travelling facilities over the railways.

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The agricultural production is shown in the following table:—

Crop	Production 1921. Quintals	1925 Quintals	1926 Quintals.
Wheat.....	88,034,290	89,900,000	63,080,000
Rye	11,276,110	11,090,000	7,660,000
Barley... .	8,342,850	10,270,000	9,980,000
Oats	35,482,950	47,560,000	52,850,000
Potatoes...	83,096,550	151,950,000	111,360,000

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent (892,410,000 gallons of wine were produced in 1926), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1926 amounted to 270,534,000 gallons. The live stock (1926) included 14,482,440 cattle, 10,775,260 sheep, and 5,776,900 pigs. The mineral resources include coal, pig iron, copper, lead, silver, antimony and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the *Saar Basin* are ceded to France for 15 years, at the end of which time the inhabitants are to decide by a *plébiscite* whether they will remain French, return to Germany, or become a self-governing community. The coalfields abut on Lorraine, and have an area of 217 square miles, with a population of 640,000, and they include the towns of Saarbruck (60,000), Saarlouis (16,000), and Merzig (10,000), on the River Saar. In 1911 the coal mines of France produced 30,000,000 tons, and the production of the enlarged area reached 52,480,000 metric tons of coal in 1926. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—The *National Army* of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie and Republican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. These forces have a total strength on a peace footing (in 1923) of 356,600 all ranks (exclusive of the Armies of Occupation in the Ruhr, the Sarre and in Syria, which absorbed 132,000 all ranks). In the War of 1914–1918 over 20 per cent of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis and Morocco). Of this total over 1,500,000 were returned as killed or missing. By law of 1919 the French Army consists of 350,000 all ranks on a peace footing, and of 1,300,000 on a war footing, with a reserve (including Territorials) of 2,000,000 all ranks. The *French Navy* was manned in 1920 by 56,000 officers and other ranks, and consisted in 1923 of 6 Dreadnought and 3 Pre-Dreadnought battleships, 6 cruisers, 5 light cruisers, 51 destroyers, and 47 submarines, 20 airships and 98 aeroplanes.

ARMISTICE MONUMENT.—In the Forest of Compiègne is a *Carrefour de l'Armistice*, from which the *Clairière de la Victoire* leads to the Armistice Monument, unveiled Nov. 11, 1922. The monument marks the spot where the Germans signed the armistice terms presented by Maréchal Foch, and bears the inscription *Ici le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asservir.*

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (*a*) Ministry of Public Instruction; (*b*) Superior Educational Council, charged with the actual administration, (*c*) Consultative Committee (advisory); (*d*) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (*a*) Territorial Academies, with inspecting staffs for all grades; and (*b*) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary Secular, comp. and free.* Age 6–13. Schools include (*a*) infants; (*b*) lower primary; (*c*) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary.* State lycées, communal colleges, and many private establishments, 7-yrs. course, either (*a*) purely classical, (*b*) purely modern; (*c*) Latin and sciences; or (*d*) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5–6 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State

universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Montpelier, Nancy, Paris, Poitiers, Rennes, Strassbourg, and Toulouse

COMMUNICATIONS.—The length of the *Routes Nationales* in 1926 was 25 000 miles The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways having a length of (1924) 4,222 miles, with 3,291 miles of canals The system of railroads in France is very extensive, they are almost entirely *concedés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on December 31, 1926, was 25,808 miles. The length of telegraph wires (1924) was 221,650 miles, and of telephone lines 148,000 miles In 1928 there were 642,744 private motor-cars registered in France, of which (1926) 541,438 were touring cars. Goods transport vehicles numbered 305,587, cycle-cars 27,450, motor-cycles 232,201, and motor-boats 3,313. In 1925 the passengers carried in civil aircraft numbered 19,768, the weight of cargoes being 2,092,000 lb. (exclusive of 1,963,000 lb. of mails).

Shipping.—The gross tonnage of the French mercantile marine in 1926 was 3,490,606 gross tons, of which 166,209 gross tons were sailing vessels During the year 1927 the tonnage of French and foreign vessels entering French ports amounted to 49,054,766 tons, of which 13,725,607 tons were French; while the total clearings amounted to 41,933,083 tons, of which 11,489,498 tons were French. The chief ports are Cherbourg, Marseilles, Rouen, Bordeaux, Le Havre, Calais, Boulogne, and Dunkirk A bill was passed by the Chamber in 1921 for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the sea to Switzerland, and will also provide electric power and irrigation to the surrounding departments

COMMERCE.—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c, silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

Alsace-Lorraine. — *High Commissioner*, M. Mirman (1920). Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the *Treaty of Frankfort* (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914-1918, the Provinces were regained by France under the *Treaty of Versailles* (June 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxemburg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing The area is 5,605 square miles, the population in March, 1921, was 1,709,749. Principal towns, Strassburg (pop, 174,492), Mulhouse (99,892), and Metz (69,624).

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36′ W to 6° 16′ E. longitude, 37° 6′ N to an undetermined S. limit, about 30° N., covering an area estimated at 222,120 square miles, with a population (1926) of 6,064,865, of whom 872,439 were Europeans and 5,192,426 natives. The revenue in 1928 was estimated at *francs* 997,778,628, and the expenditure at *francs* 997,600,458. The bulk of the trade is with France, the exports to France amounting in 1927 to *francs* 2,439,452,000 (total exports *fr* 3,520,948,000), and the imports from France to *fr.* 3,535,195,000 (total imports *fr.* 4,833,868,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1926 there were 2,696 miles of railroad open for traffic; and in 1927 the number of ships engaged in foreign trade

entering Algerian ports was 4,322 of a net tonnage of 6,985,250 tons. The principal town is Algiers, the capital (municipal population, 1926, 226,218), a most important coaling station and much frequented as a health resort; other large towns are Oran (150,301), Constantine (93,733), Bona (51,895), Sidi-bel-Abbas (43,000), Philippville (30,000), Mascara (28,000), and Tlemençen (27,000).

Governor-General, M. Pierre Louis Bordes (1927).

CAPITAL, Paris, on the Seine. Population (1926), 2,871,429; there are 82,127 houses and 1,149,366 families according to the census of March 1921. Fourteen other cities exceed 100,000 — Marseilles 652,196, Lyons 570,740, Bordeaux 256,026, Lille 201,921, St. Etienne 193,737, Nantes 184,509, Nice 184,441, Toulouse 180,771, Strasbourg 174,492, Le Havre 158,022, Rouen 122,898, Roubaix 117,209, Toulon 115,120, Nancy 114,491, Clermont-Ferrand 111,701, and Reims 100,998 Mulhouse, Amiens and Limoges exceed 90,000, and 30 others exceed 50,000.

BRITISH CHAMBER OF COMMERCE, 6 Rue Halévy, Paris, IXème *President*, H C Welman.

There are also British Chambers of Commerce at 2, Rue Beauvau, Marseilles, and 4, Avenue Massena, Nice

Paris is distant from London 267 miles; transit, 7 to 8 hours.

FRENCH COLONIES.

Colony, &c	Area.	Population
Indo-China	257,000	18,000,000
Asia Minor	150,000	4,500,000
Africa	4,100,200	43,550,000
America	33,200	500,000
Oceania	10,000	100,000
Total	4,550,400	66,650,000

In ASIA—*French India* includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta; Yanaon, in the Godavery delta, and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of (1922) 258,000. *French Indo-China* comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898-9 the port of Kwang-Chow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1922) estimated at 19,983,203, including the civil European population of about 17,500.

In ASIA MINOR—The French mandatory sphere of *Syria, Cilicia* and *Lebanon* has a total area of about 150,000 square miles, with an estimated population of 4,500,000 (*see* also pp. 819-21).

In AFRICA.—*Algeria* (*see* above) is an integral part of France *Morocco* (*see* p 792-4) is a French (and partly Spanish) protectorate.

Tunis (*Bey of Tunis*, Sidi Mohammed ed Habib, *acceded* 1922) has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and an estimated population of 2,000,000, of whom about 600,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. Tunis, the capital, has a municipal population of 185,996; other towns are Sfax (27,723), Bizerta (20,593), Susa (21,398), Kairwan (19,426), Gabes (15,119), and Monastir (8,837). *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,076. It consists of *Senegal* (74,000 sq. miles, pop. 1,250,500), capital, St. Louis; the trade of Senegal in 1926 was *francs* 909,998,954 imports, and *francs* 885,945,699 exports, the principal export being ground nuts (483,000 tons - *francs* 740,869,000 (and the principal import cotton fabrics (*francs* 200,549,000); *Upper Senegal Niger* (304,000 sq. miles), and the *Niger Military Territory* (533,000 sq. miles), which have a total population of about 6,036,200; *French Guinea* (92,600 sq. miles, pop. 1,737,350); *Ivory Coast* (126,100 sq. miles, pop. 1,216,300); and *Dahomey* (38,000 sq. miles, pop. 878,500); adjoining Dahomey is the French Sphere of the former German colony of *Togoland* (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,160 sq. miles and a population of about 450,000 *French Equatorial Africa* consists of the *French Congo* (513,000 sq. miles, pop. 9,000,000) and of the French Sphere in the former German territory of *Cameroon* (267,000 sq. miles, pop. 2,750,000). *French East Africa* consists of the *Somali Coast* (46,300 sq. miles, pop. 208,000) and of the large island of *Madagascar* (226,000 sq. miles, pop. 3,153,500) with its dependencies (Nossi Bé, Sainte Marie, Réunion, and the Mayotte-Comoro Islands, and St Paul, Amsterdam, and Kerguelen Islands) Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrow-root), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75,000; other towns are Tamatave (the chief port), Majunga, Diego-Suarez, Mananjary, Tuléar, Andevorante and Vohémar. Off the south-east coast are the uninhabited islands of St Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian Ocean.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadaloupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French Guiana. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,880.

In OCEANIA.—New Caledonia (7,200 sq. ms., pop. 50,500) is a large island with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Maré, Lifou, Uvéa, &c.), the Huon Islands, and Futuna and Alofi. The

Society Islands (Tahiti, Moorea, &c) have an area of about 650 square miles, and a population of about 14,000, the Marquesas (Nukahiva, Hivasa, &c) 500 sq. miles, pop 2,500. Leeward Isles (Huahiné, Raiatéa, Tahaa, Bora-Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c); the Tubuai Islands (Rurutu, Raivavae, Rimatava, &c), Rapa Island, Makatea, and Maiao Island. The New Hebrides are under Joint Franco-British administration.

GERMANY.

(Deutsches Reich.)

President of the German Reich, General Field-Marshal Paul von Hindenburg, *born* Oct. 2, 1847, *assumed office* May 12, 1925.

MINISTRY.

Chancellor, Herr Hermann Muller
Foreign Affairs, Dr. Stresemann.
Interior, Herr Severing
Labour, Herr Wissell.
Finance, Dr. Hilferding
Agriculture and Food, Herr Dietrich.
Communications and Occupied Territories, Herr von Guérard.
Defence, Herr Groener.
Posts, Dr. Schatzel.
Economic Affairs, Dr Curtius.
Justice, Dr. Koch.

Ambassador in London, Dr Friedrich Sthamer, 9 Carlton House Terrace, S.W. 1
Consular Dept. of the Embassy, 9 Carlton House Terrace, S.W 1

The area of Germany is approximately 182,200 square miles, with a population on June 16, 1925, of 62,592,575 (without Saar district), of whom 30,196,421 were males and 32,396,154 were females The population on Dec 1, 1910, was 64,925,993. Births in 1927 numbered 1,198,323 and deaths 757,257, births being 18·3 per 1,000 of population, deaths 12 per thousand

Religious confessions in the present area were in 1925.—Protestants 40,014,677, Roman Catholics 20,193,334, Jews 564,379, others 1,638,229

There are 45 large towns with over 100,000 inhabitants, and of these 29 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 each in Baden and Hesse, 1 each in Württemburg and Brunswick, and three Hanse Towns

At the outbreak of war, Aug. 1914, "Germany" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor."

By the *Treaty of Versailles* the "Reichsland" of Elsass-Lothringen and the Saar coal basin (temporarily) were ceded to France: parts of Posen and West Prussia to the newly-formed Republic of Poland, North Schleswig to Denmark; and Moresnet and Malmédy to Belgium. Plebiscites held in June 1920 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia, which was held under the Peace treaty, resulted in division between Poland and Germany. Memel City with adjoining territory has been ceded to Lithuania.

The Colonial possessions of the German Empire extended over 1,035,086 sq. miles in Africa, 96,220 sq. miles in the Pacific, and 2,943 sq. miles in Asia- a total of 1,134,239 sq. miles, with a population estimated in 1914 at 15,000,000. By the *Treaty of Versailles* Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions N of the Equator to Japan, and those S. of the Equator to Australia and New Zealand.

On Nov 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov. 11, 1918, Germany was granted an armistice, and on June 28, 1919, peace was signed at Versailles In Jan 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female), and on Feb 11, 1919, the first President of the German Versammlung was elected at Weimar. Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate States The people possess the right of initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (*Reichswirtschaftsrat*)

PRODUCTION AND INDUSTRY.—Germany is primarily an industrial country. On June 16, 1925, 41 4 per cent of all persons with earning occupations were engaged in industry, 30·5 per cent in agriculture. 16 5 per cent in trade and communications, 4 7 per cent in the public services and the professions, 1·8 per cent in the health services, and 5 1 per cent in domestic service. Of the total area in 1925 the area under agriculture was 25,599,305 hectares (whereof 18,498,482 hectares arable land), and the area under forests 12,020,828 hectares. The Live Stock (Dec. 1, 1925) included 3,916,914 horses, 17,202,336 cattle, and 16,199,573 pigs. The production of coal in 1926 was 145,304,500 metric tons, lignite 139,129,300 tons. iron ore 4,793,490 tons, and potash salts 9,415,200 tons. Rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore are also worked Crefeld, Elberfeld-Barmen, Chemnitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries By laws of 1919 and 1920, all coal, heavy iron and steel, potash and coal-tar producing concerns were compulsorily fused into All-German Syndicates, governed by assemblies representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

Under the stimulus of the falling mark exchange, which favoured competition abroad and induced the home public to convert its depreciating currency into solid goods, Industry flourished almost uninterruptedly between 1919 and late 1923, after which (in connection with the currency stabilisation) business suffered temporary depression. A new period of prosperity began in the summer of 1926. As compared with 1919 production of all industrial goods has recovered, and in many cases it

exceeds that of 1913. Bankruptcies for a time almost disappeared, increased again rapidly in 1924 and 1925, and in 1928 were again much below the pre-war average.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This National Insurance is based on mutual insurance and self-administration. The Infirmity Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses, including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of manual workers, became law in 1911. A law establishing Federal Unemployment Insurance for all persons subject to Sickness Insurance and also for seamen, which is financed, without public subsidies, by equal contributions from employers and employed, came into force on Oct. 1, 1927.

DEFENCE.—By Article 160 of the *Treaty of Versailles* the German *Military Forces*, as from March 31, 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100,000 all ranks. By Article 181 of the Treaty, the German *Naval Forces* must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers, and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov 21, 1918) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by its crews in Scapa Flow, while in custody, on June 21, 1919. In consequence of this breach of the Armistice agreement by the German crews the Allies (Nov. 10, 1919) called upon the government to surrender 5 light cruisers, and certain floating docks, cranes, and dredgers, in addition to the previous naval surrenders. By Article 198 of the Treaty the armed forces of Germany must not include any military or naval *Air Forces*, and no dirigible balloons, aeroplanes, sea-planes or flying boats.

COMMUNICATIONS.—The total length of the [illegible] *Railroads* at end of 1926 was 56,002 kilometres, of which all except 3,713 kilometres belonged to the German Railroads Corporation, which under the *Dawes Reparation Scheme* of 1924 acquired all the lines taken over by the Republic from the States in 1921. In addition there were 1,862 kilometres of narrow-gauge railroads. The number of registered automobiles (July 1, 1927) was 267,774, motor cycles 339,226, and motor lorries 100,969. Length of *Telegraph and Telephone Lines* (1926) 394,800 kilometres (length of wires, 16,328,000 kilometres); telegrams transmitted, 46,800,000; post, telegraph, and telephone offices, 47,163; telephone subscribers, 2,688,500; letters carried, 6,771 millions, value of cash on delivery orders, 3,010 mill. m.; money orders, 3,594 mill. m. The number of employés in the service of posts, telegraphs, and telephones was 360,339. The postal services have been financially separated from the general administration. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. At the outbreak of the War of 1914–1918 Germany ranked second to Britain in the list of maritime countries. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17·65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register); number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 1919, 134,535 tons; 1922, 575,264 tons; 1923, 358,000 tons; 1925, 280,937 tons; 1926, 259,281 tons; 1927, 261,105 tons. On Jan. 1, 1927, shipping had increased to 3,419,555 gross tons. Recovery was helped by the establishment of eleven new yards during the War. The chief ports of Germany are Hamburg, on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Konigsberg, on the Pregel; Kiel, on the Baltic (connected with the Elbe by the Kaiser Wilhelm Canal), and Lubeck, on the Baltic. Kiel is being converted into a free port. Under the Peace Treaty Danzig became a Free State, subject in its foreign affairs to the Polish Republic. Traffic in the chief ports has increased since the War at a great rate, and now exceeds that of 1913. Arrivals at Hamburg were: 1913, 14,242,000 net tons; 1927, 19,805,000 net tons. Bremen shipping traffic also exceeded that of before the War.

Kiel Canal Traffic.

Year.	Vessels	Net Tons.
1913	53,382	20,349,929
1921	32,552	9,384,444
1922	42,845	23,972,444
1923	40,622	24,721,549
1924	45,843	24,072,215
1925	47,350	24,463,588
1926	49,420	28,906,243
1927	53,432	30,242,736

FINANCE.—Under Articles 248–263 of the *Treaty of Versailles* the German Government undertook to pay the cost of the Armies of Occupation from Nov. 11, 1918, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank) from Eiten, on the Netherland's frontier, in the north, to the junction of the German-Lorraine frontiers, in the south. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Financial

Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of 2 milliard gold marks, together with a sum equivalent to 26 per cent. of German exports Of the amounts thus payable the various shares from 1921-1929 were apportioned to France 52 ninety-second parts, Great Britain 22, Italy 10 and Belgium 8 ninety seconds; from 1929–1932 the shares are varied to France 130 two hundred and thirtieth parts, Great Britain 55, Italy 25 and Belgium 20 two hundred and thirtieths, and for the succeeding 31 years France 156 two hundred and seventy-six parts, Great Britain 66, Italy 30 and Belgium 24 two hundred and seventy-six parts A new *Reparations Scheme* was agreed to by Germany and the Allies in August, 1924, providing for annual payments rising to 2,500 million gold marks, liable to increase according to an index of prosperity, the money to be supplied from (1) taxation, (2) railway bonds, and (3) bonds imposed on private industry The total capital Reparations liability was not refixed

In November, 1923, was put through a *Currency Reform*, consisting in the creation of a *renten-mark*, nominally worth 1 gold mark, and in the stabilisation of the depreciated paper-mark at 1 billion paper-marks to 1 gold-mark. The stabilised paper mark notes have since been withdrawn from circulation, and the renten-marks are being gradually replaced by reichs-marks of pre-war gold value, issued by the Reichsbank as reconstituted under the Reparations settlement Although the currency reform of 1923 was only provisional it reacted beneficially on the Finances, stopping the rise in the cost of administration and preventing depreciation in the value of the taxes received For covering the deficits in the weeks intervening between stabilisation and complete balancing of the budget, the Republic obtained limited credits from the new Rentenbank. In the financial year 1924 25 a complete budget balance was attained, and surpluses remained for extinction of debts arising out of the Ruhr occupation. The *Budget Estimates* for 1928-29 (in which are not included the separately financed Railways and Posts) were :—

General Administration Budget :—

	1,000,000 Reichs marks.
Ordinary revenue	9,529
,, expenditure	9,529
Extraordinary revenue	146
,, expenditure	142
Budget Charge for Reparations	1,247

The German Debt

The *Debt* of the Republic on June 30, 1928, totalled 7,965 million reichs-marks. Of this sum 902 million marks represented the outstanding liability on the Reparations Foreign Loan of (nominally) 800 million marks, 5,248 million marks represented the depreciated paper mark pre-war and war debts as valorised under the law of July 16, 1925, and 939 million marks consisted of loans from the Renten-Bank and the Reichsbank. Under the paper-mark debt valorisation law bondholders who acquired before July 1, 1920, will ultimately receive 12½ per cent. in gold marks of the nominal value of their holdings with interest. Bondholders who acquired later will receive 2½ per cent., but this will bear no interest until Reparations are paid.

German Foreign Trade.

	1926	1927
Total Imports (mill Rchmks.)	9,951	14,381
Total Exports (mill Rchmks.)	9,783	10,240

Trade with Great Britain

	1926	1927.
Imports from Gt Britain	£47,259,142	£69,415,000

GERMAN FEDERATED STATES.

PRUSSIA

GOVERNMENT (April, 1925).

President, Herr Braun
Interior, Herr Grzesinski
Finance, Dr. Hopker-Aschoff
Agriculture, Herr Steiger
Trade and Commerce, Dr. Schreiber.
Instruction and Worship, Dr. Becker.
Minister of Justice, Dr am Zehnhoff.
People's Welfare, Herr Hirtsiefer.

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1924 of 113,750 sq miles and a population on June 16, 1925, of 38,120,173 (Saar district excluded).

The number of births in 1927 was 737,180, against 1,209,500 in 1913. The number of deaths in 1927 was 462,501 against 656,490 in 1913. Marriages were 333,238, against 323,709. The surplus of births over deaths in 1927 was 275,679.

Prussia possesses a large number of navigable rivers intersecting the country—viz, the Pregel, Oder, Elbe Weser, and Rhine The coasts of the Baltic and North Seas form a number of gulfs and bays The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet The forests are extensive, occupying an area of 18,053,000 acres, chiefly consisting of fir Minerals consist of coal, iron, copper, lead, potash, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c, and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant. Metallic ores, coal, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, sugar-beet, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

	1,000,000 Reichs-marks.
Budget, 1928–29	2,512

The whole of the old *Funded* Debt of Prussia was taken over by the Republic under the arrangement for transfer of the Prussian State Railways It will be valorised on the same conditions as those laid down for the Federal Debt under the law of July 16, 1925.

CAPITAL, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Gross Berlin with a population on June 16, 1925, of 4,013,588.

Other largest cities are Cologne, on the Rhine (598,064), Breslau, on the Oder (554,801), Essen, on the Ruhr (468,696), Frankfort, on the Main (462,849), Dusseldorf, on the Rhine (431,096), Hannover, on the Leine (422,435), and Dortmund on the Emscher (320,256).

BAVARIA

Minister-President, Dr Held

The Republic of Bavaria is divided into two unequal parts The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16′—50° 34′ N. lat and 9° 01′—13° 50′ E. long , the western part, forming the Palatinate, on the left bank of the Rhine The total area is 29,486 sq. miles, and the population on June 16, 1925, 7,421,589 The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn The Bavarian forests are extensive, covering nearly a third of the country , the soil is highly productive, wheat, rye, oats, and barley being the chief products , buckwheat and maize are also grown, and tobacco is one of the staple articles Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. Many important manufactures are carried on. The brewing of beer is carried to great perfection The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c The Thuringian Duchy of Coburg was incorporated in Bavaria in 1921.

	1 000,000 Reichs-marks.
Budget, 1928-29	617

CAPITAL, Munich, on the Isar. Population (1925), 680,704. Other large towns are Nurnberg, N.W of Munich (392,494), and Augsburg, on the Wertach-Lech (165,522).

SAXONY.

The Republic of Saxony has an area of 5,856 English square miles, with a population on June 16, 1925, of 4,980,689. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief town, after the capital, is Leipzig (pop 679,322), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,925 matriculated students in 1912-13); Plauen (pop. 111,398), and Chemnitz (pop. 331,641), the Manchester of Saxony.

	1,000,000 Reichs-marks.
Budget, 1928-29	465

CAPITAL, Dresden Pop. (1925), 628,684.

WURTTEMBERG.

The Republic of Wurttemberg has an area of 7,534 English square miles, and a population (in 1925) of 2,595,114, of whom 30 per cent are Roman Catholics. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pasture-land being nearly equally distributed throughout Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, moonstone, fireclay, &c , abound in the kingdom; mineral springs are also numerous The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, stays, beer, wine, &c.

	1,000,000 Reichs marks
Budget, 1928-29	264

CAPITAL, Stuttgart. Population (1925) 341,461.

MINOR STATES.

Baden, separated by the Rhine from France (Alsace) and Switzerland, has an area of 5,819 square miles, with a population (1925) of 2,336,498. A great part of the surface is mountainous and covered with forest trees, including the Schwarzwald (Black Forest) and the Odenwald, but more than three-fifths of the total area is under cultivation, corn, wine, fruit, potatoes, tobacco and hops being the chief agricultural products. The principal manufactures are cigars, cotton and silk stuffs, brushes, jewellery and trinkets, clocks, chemicals, paper and machinery. More than half the population are Roman Catholics. Capital, Karlsruhe, pop (1925) 145,694 Other large towns are Mannheim (247,486), Freiburg (91,559), Pforzheim (78,434), and Heidelberg (74,892).

Land Thüringen. The Thuringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz, Reuss-Gera, and Gotha, have been constituted into a single state under the title Land Thüringen, with an area of 4,541 square miles, a population of 1,628,398, and two seats in the Federal Reichsrat. In size Land Thuringen is sixth among German states. The new state is governed by a "Volksrat." Capital, Weimar (46,028).

Hesse, in the West Centre, consists of Northern and Southern portions, nearly equal in size, on either side of the Main River, with a total area of 2,968 square miles and a population (1925) of 1,358,445, of whom more than half are Protestants. The country is mountainous but fertile, and agriculture is flourishing. Capital, Darmstadt, pop. (1919) 89,095. Other large towns are Mayence (Mainz) at the confluence of the Main and the Rhine (109,285), Offenbach (78,780), Worms (47,006), and Giessen (33,517).

Mecklenburg-Schwerin, between the Elbe and the Baltic, has a total area of 5,068 square miles, with a population (1925) of 686,838. Agriculture and stock raising are the principal industries, the Mecklenburg breed of horses being famous. The chief manufactures are bricks and machinery. Capital, Schwerin, pop. (1919) 46,322.

Oldenburg, on the North Sea, between the estuary of the Weser (at Bremen) and the Prussian province of Hanover, has detached territories in Lubeck (between Holstein and Mecklenberg) and Birkenfeld (Rhine Province of Prussia). The total area is 2,479 square miles, with a population (1925) of 553,670. The chief industries are agriculture, bee-keeping and stock-raising; the principal manufactures are brewing and distilling, tanning, tobacco and corks. Capital, Oldenburg, pop. (1925) 52,187.

Brunswick, 1,418 square miles, pop. (1925) 508,660; in Northern Germany Capital, Brunswick, pop (1925) 146,654.

Anhalt, 906 square miles, pop (1925) 351,692, is in Central Germany Capital, Dessau, pop. (1925) 70,316.

Lippe, 470 square miles, pop. (1925) 166,023 Capital, Detmold (16,172).

Mecklenburg-Strelitz, between Mecklenburg-Schwerin, Pomerania and Brandenburg, has a total area of 1,130 square miles, with a population (1925) of 112,052. Chief industries are agriculture and wood products. Capital, Neustrelitz, pop. (1925) 12,338.

Waldeck, 438 square miles, pop. (1925) 59,281 Capital, Arolsen (2,793).

Schaumburg-Lippe, 130 square miles, pop (1925) 48,660. Capital, Buckeburg (6,745)

The *Free Hanse Towns* comprise the three cities of *Lubeck*, on the Trave (area 115 square miles, pop. 127,540), *Bremen*, on the Weser (area 99 square miles, pop. 332,547), and *Hamburg*, on the Elbe (area 160 square miles, pop 1,128,753) Each has a small rural territory and has full Federal independence, with a Council of State (under the Presidency of a Burgomaster)

TRADE FLAG. Black, red and gold.

Counsellor, M. Kimon A. Collas.
Secretary, M Jean Romanos.
Consul-General, M. M. Demetrios Sophianos.
Vice-Consul, M. Kallerghi, 131 Gower Street, W.C. 1.

A maritime Republic in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 49,036 sq. miles and an estimated population (1925) of 6,374,000, including refugees from Turkey.

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of *Macedonia* and *Epirus*, *Crete* (2,950 sq. miles, pop. 336,151), and certain *Aegean Islands* increasing the area to 43,522 sq. miles. During the War of 1914-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of *Thrace* (including the monastic republic of *Mount Athos*), and the islands of *Imbros* and *Tenedos*. Under an arrangement with Italy, to come into effect after the ratification of the *Treaty of Sèvres*, *Rhodes*, *Egeo*, and the *Dodecanese* (12 islands) were surrendered by Turkey, and these were to be handed over to Greece by Italy. Greece also received under the Treaty a mandate for the occupation and administration of the town and district of *Smyrna*, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept. 1922, the Greek forces being annihilated, and Smyrna was evacuated on Sept. 8, 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the *Treaty of Lausanne* (1923) Greece lost Eastern Thrace (that part lying E. of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Ægean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous, the coasts are elevated, irregular, and deeply indented.

Government.—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924. The legislature consists of a Senate of 120 members, and of a Chamber of Deputies (or *boulé*) elected for 3 years by universal manhood suffrage.

Production.—Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, olives, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, sponges and carpets.

Defence.—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 250,000 all ranks fought with the Allied Armies. The Navy consisted (Sept. 1927) of 2 battleships, 1 armoured cruiser, 1 light cruiser, 4 modern t.-b.-d., 7 older t.-b.-d., 12 torpedo-boats, and 6 submarines.

Education is free and compulsory, maintained by local taxation supplemented by State grants. Primary education is somewhat backward, especially in the country districts. The University at Athens is of some repute.

Finance. The debt in 1917 was 1,040,900,000 *drachmæ*, and the Balkan Wars of 1912-13 added 354,960,000 *drachmæ*, the Great War added 1,028,000,000 *drachmæ*, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 *drachmæ*.

Communications. There were (1926) 1,470 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons. The post offices (in Old Greece) number 1,150, dealing with 36,000,000 postal packets, telegraphs, 4,951 miles. The mercantile marine consists (1924) of 437 steamships (824,634 tons) and 1,018 sailing ships (113,707 tons). The principal harbours are the Piræus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Kalamata, Laurium, Cavalla, and Canea (Crete).

Budget, 1927-28.

	Drachmæ.

GUATEMALA.

República de Guatemala.

President (1926–1932), General Lazaro Chacon, *assumed office* Sept. 26, 1926.
Minister of Foreign Affairs, Señor Don Carlos Salazar.

Minister in London, Señor Dr. Don José Matos.
Consul-General in London, Señor Don F. Batres, 1x Queen Victoria Street, E C. 4.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45′ to 17° 49′, and in W. Long. from 88° 12′ 49″ to 92° 13′, 43″ and comprises an area of 42,456 square miles, and a population in 1921 of 1,600,535. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Jan., 1918. The country is well watered by numerous rivers; the climate is hot and somewhat malarious near the coast, but very temperate and healthy in the higher regions. About 620 miles of railway were open for traffic in 1927. There were 4,543 miles of telegraph working in 1921. The chief ports are San Jose de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, sugar, timber, *chicle* (chewing gum), hides and beans. Spanish is the language of the country.

HAITI

(République d'Haiti.)

President, M. Louis Borno, *assumed office* May 15 1922, *re-elected* 1926 for 4 years £4,800
Foreign Affairs, Camille Leon.

Minister in London, M. Charles Fombrun
Consul, J. G. Dalzell, 76 Victoria Street, S.W.1

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands.

The Republic, formerly a French colony, was proclaimed independent on Jan. 1, 1804, and is now governed under a Constitution ratified on June 12, 1918. Pending the creation of a Senate and a Chamber of Deputies the legislative power is exercised by a Council of State composed of 21 members, appointed by the President, and holding office during his pleasure. The President is elected by the Council of State for a period of four years.

The area of the republic which embraces the western (or French) portion of the island of Haiti (the larger but less populated eastern division forming the Dominican Republic) is estimated at 10,204 square miles, with a population estimated (Jan. 1, 1927) at 2,300,200 inclusive of white foreign residents and military forces of the United States. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits, it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums, and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany; the principal articles imported from Great Britain are piece-goods, jute bags, hardware, and agricultural tools. An armed Constabulary, urban and rural, was formed in 1916. This force is officered in part from U.S. Marine Corps and Navy, and consisted (1927) of 183 officers (U.S. and Haitians) and 2,537 other ranks. A coastguard service is attached to the Constabulary. There are about 135 miles of railway in operation. In 1925–26 the entries and clearances at Port-au-Prince were 408 steam vessels (1,001,007 tons). French is the official language of the country, but most of the people speak a debased dialect known as Creole French.

	1924–25	1925–26.
Revenue	*$8,097,533	$9,072,930
Expenditure	7,843,640	8,186,148
Total debt (Sept. 30, 1926)		21,661,426
Total imports	20,237,565	18,851,406
Total exports	19,403,762	20,184,005

HONDURAS.

(República de Honduras.)

President, Dr. M. Paz Baraona, *assumed office* Feb. 1, 1925

Consul-General in London, Señor Don H. Blanco Fombona, 9 Oxford Street, W. 1.

The Middle State of Central America, stretching in N. lat. between 13° 10′ and 16°, and W. long. between 83° 10′ and 88° 40′; containing 44,275 English square miles, with a population estimated at 673,408 (1922).

Christopher Columbus landed at Cape Honduras in 1502, and in 1524 the country was settled by the Spaniards. In 1525 *Hernando Cortes* founded the city of Puerto Cortes, and from 1539 to 1821 the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Castilla, Puerto Cortes, Omoa, Roatan, Tela, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. (NOTE.—Amapala is on Tiger Island, port on mainland is San Lorenzo, 2 hours in gasoline launch from Amapala.) From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, good road, 5–6 hours. Road from Tegucigalpa to the Atlantic coast has now been completed as far as Lake Yojoa, and is in fair condition. The journey to the lake takes from 9 to 10 hours in automobile. The lake is crossed by gasoline launch in 1½ hours. From there to the head of the railway at Portrerillos the road is still in very poor condition, but cars travel thereon in the dry season, taking from 2 to 3 hours. Potrerillos is 2 hours by rail from San Pedro Sula, and 3 hours from Puerto Cortes. By taking express automobiles and an express car on the railway, it is now possible to make Puerto Cortes from Tegucigalpa in 24 hours, thus reaching New York in 5 or 6 days. There is also an aeroplane service from Tegucigalpa to Tela, connecting up with the direct steamers for Avonmouth from the latter. There are railway connections between San Pedro Sula, and Tela and La Ceiba. The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being bananas, mahogany, fruit, cattle, sugar, rice, tobacco, coffee, indigo, sarsaparilla, hides and skins, indiarubber, cedar, fustic, rose, and Lima wool (Kapok). There is an immense amount of uncultivated land. The number of cattle in 1920 was approximately 300,000. The forests are extensive, but there is a lack of communications and transport. Its mineral wealth is great. In 1925 there were 1,432 kilometres of railway open, all on the North Coast. The language of the country is Spanish.

	1925-26.	1926-27.
Revenue	£920,130	£1,062,233

Hungary was declared a Republic on Nov. 17, 1918, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugo-Slav Kingdom (*q.v.*) and of Slovakia and Ruthenia to Czecho-slovakia (*q.v.*). The area of Hungary is about 36,279 sq. miles, with a population (almost entirely Magyar) of 8,160,000 (Dec. 1924). The

* In 1925 the Government of Honduras ratified an agreement concluded with the Council of Foreign Bondholders providing for the liquidation of the Foreign Debt by annual payments of £40,000 over a period of 30 years, and these payments are regularly made.

† Bearing 3 per cent. interest.

political neighbours are Czechoslovakia on the N., Yugo-Slavia on the S, Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918, Count Károlyi assumed office as Provisional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet" (Workmen's Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Peidel (Aug 1, 1919) Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris.

On March 21 1920, Admiral Nicholaus von Horthy of Nagybánia was elected Governor of Hungary by vote of the National Assembly, which gave him sovereign rights, with certain restrictions

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct 21 until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers.

All religions are tolerated, the greater number of Magyars are Roman Catholics, but there is a large Protestant minority The parcelling out of the great estates, which was forcibly attempted during the Károlyi régime, has been continued to a small extent, but on an economic basis and at the initiative of the owners, a land-reform bill aiming at the forced sale of the properties exceeding a given area is in process of execution

A single chamber National Assembly (introduced Jan 4, 1920), was replaced in Dec, 1926, by a Parliament composed of a Chamber of Deputies elected by universal suffrage, and an Upper Chamber, which corresponds in a modified form to the Chamber of Magnates as it existed before the revolution of 1918.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine, the value of the agricultural production in 1927 being 3,586,610,584 *pengos*. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

Reconstruction.- During the period following the War the Hungarian currency rapidly depreciated and touched its lowest point in August, 1923, when it was quoted at 380,000 crowns to the £, as against 24 before the War. In 1924 an international loan of £10,000,000 sterling was granted to Hungary, its use being subject to a Reconstruction Plan elaborated by the League of Nations, under which State finances must be stabilised in 30 months. A Hungarian National Bank was also set up with the sole right of issuing banknotes According to special arrangements made with the Bank of England, the Hungarian currency was stabilised upon the £, at 345,000 crowns = £1 sterling, and for some time it now followed the latter's fluctuations A new monetary unit was then introduced, and this is an independent unit, the *pengo* (divided into 100 *Fillér*), the rate of exchange for cheques on London being *pengo* 27 85 = £1 (Oct 1928) The carrying out of the reconstruction scheme was supervised by a Commissioner-General on behalf of the League, and the latter, having recognised that the financial reconstruction of the country had been successfully terminated and the currency stabilised, recalled the Commissioner-General in July, 1926 Partial control still exists as to the pledged revenues of the State and the unused balance of the loan.

No part of Hungary touches the sea The length of navigable rivers is 687 miles, there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom

IRAQ.

(Mesopotamia.)

King of Iraq, Faisal I., G.C.M.G., *born* 1887; elected King of Iraq, Aug. 10, 1921, *acceded* Aug. 23, 1921.

Prime Minister and Minister of Foreign Affairs (Jan 1928), Abdul Mushm Beg al Sa'dun, K.C.M.G.

Minister in London, Ja'far Pasha al Askari, C.M.G.

Legation, 51, Queen's Gate Gardens, S.W 7.

Iraq, or *Mesopotamia*, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E, and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Lausanne, ratified on Aug. 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies A provisional Arab Government was set up by the High Commissioner in Nov. 1920 and in Aug. 1921 the Emir Faisal (3rd son of ex-King Hussein of the Hedjaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. By Treaty between Great Britain and Iraq (Oct. 10, 1922) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations, and as soon as that admission has been accomplished all the responsibilities of Great Britain as the mandatory power will be terminated, by a protocol signed April 30, 1923, the duration of the treaty was cut down from 20 years to 4; but in a new treaty signed at Baghdad on Jan. 13, 1926, provision was made that the treaty of Oct. 1923 should remain in force for a period of 25 years from Dec. 16, 1925, unless before the expiration of that period Iraq shall have become a member of the League of Nations. In March, 1924, a Constituent Assembly met in Baghdad, ratified the treaty between Great Britain and Iraq, and passed an organic law and an electoral law for the election of a Chamber of Deputies. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King, and a Chamber of Deputies of 88 members elected by manhood suffrage. The first Parliament under this Constitution was opened by King Faisal on July 16, 1925.

The total area of the districts comprised within the British Mandatory Sphere is about 150,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. The sphere comprises the former Turkish vilayet of *Mosul*, *Baghdad* and *Basra*. At the Census of 1920 the population was ascertained to be 2,849,282, as under:

Baghdad vilayet	1,360,304
Basra vilayet	785,000
Mosul vilayet	703,378
Total	2,849,282

The *Baghdad* vilayet include the Baghdad, Samarra, Diyala, Kut, Diwamyah, Hillah and Dulaim Divisions; *Basra* vilayet include Basra, Amara and Muntafik, and *Mosul* include Mosul, Arbil, Kirkuk and Sulemani. (Mosul covers a great part of the ancient kingdom of *Assyria*, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1920 1,146,685 Sunni Muhammadans, 1,494,015 Shiite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,302 other religions.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and since the British occupation notable improvements have been effected; the Irrigation Department is at present confining itself to small and immediately remunerative schemes The wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, peas and Indian corn; wheat averages 464lb. per acre, barley 672lb, and rice over 2,000lb. In 1928-29 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent. on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. The Iraq Government granted in July, 1924, an important agricultural and irrigation concession which includes a scheme for putting many thousands of acres under cultivation for cotton in the Diyala river valley. A concession for the exploitation of the oil in the Baghdad and Mosul vilayets was granted to the Turkish Petroleum Company in March, 1925. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British

auspices. Basra was equipped with wharves, railway sidings, &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates and piece goods.

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north west of Erzeroum in the Dumlu Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitliscompom.

The Baghdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, *viâ* Baghdad, a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the Mesopotamian desert W. & S. of Mosul). The line crosses the Euphrates on a wooden bridge at Jerablus. At Aleppo there is a connexion with the Pilgrims' line from Medina (through Damascus and Homs to Aleppo) and, if it is completed, the railway will be served by the port of Alexandretta (Iskanderun) in Cilicia. The first through train from Basra to Baghdad left Basra on Jan. 13, 1920. The total length of line open at that date was 945 miles compared with 1,113 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey; since that time lines have been laid from Baghdad to Kerbala and Baghdad to Kirkuk. The line to Kirkuk will be extended to Mosul.

The chief city is Baghdad, the former capital of the Abbasside dynasty one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an estimated population of 170,000, other towns being Basra, 85,000, and Mosul (opposite the site of Nineveh), 90,000.

	1926 27

Vice-Consul, Comm. P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 70 minor islands (with certain dependencies hereinafter

* Signor Benito Mussolini is the accredited leader of *Fascism*, the *Fasci* representing a revolutionary movement against the alleged inactivity of post War Italian statesmen. The uniform of the movement is a black shirt, and the name is derived from *fascio* or band (*cf* the *fasces* of the Roman lictor) in which the movement was organised.

noted) It is bounded on the N. by the Republics of Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas The total area of the kingdom of Italy in 1914 was 110,623 sq. miles, and by the *Treaty of Versailles* (June 28, 1919) Italy gained from Austria-Hungary the Trentino (about 4,000 sq. miles) and Trieste (with about 1 000 sq. miles of the Adriatic Sea-board).

By a treaty signed at Rome (Jan. 27, 1924), the *Free State of Fiume* came to an end. Yugo-Slavia's sovereignty over Port Baros and the Delta is established by the treaty, and Italy acquired the town and harbour works of Fiume, together with a narrow strip of hinterland. Italy agreed to lease to Yugo-Slavia the Thaon di Revel quay at a rental of one gold lira for 50 years, the railway station being established as an international frontier station. Fiume is now the capital of the newly created Italian Provincia del Carnaro, and has the status of an Italian provincial town.

The total area of the Kingdom of Italy was estimated (Dec. 1927) at 119,743 square miles, with a population (June 30, 1927) of 40,602,000 There is a large settled and floating population of Americans and English.

The Italian peninsula is traversed throughout its length by the chain of the Apennines, the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugo Slavia *Mont Blanc* (15,782 feet), the highest peak of the Alps, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848–1870, in which the great patriots *Mazzini* (*born* 1805, *died* 1872) and *Garibaldi* (*born* 1807, *died* 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870 In 1872 the King of Italy entered Rome, and that city was declared to be the capital The government was that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King), and the *Chamber of Deputies* of 536 members (elected by adult manhood suffrage) Under the reforms instituted by Signor Mussolini an entirely new and complex form of government is being built up—the so-called Fascist "syndical-corporative" state. The Senate and Chamber are to be retained, but the latter will be elected *en bloc*, a list being drawn up by the so-called Fascist Grand Council (whose powers are now being officially defined) and submitted to the electorate for acceptance or rejection as a whole The basis of the composition of the list is roughly to be equal representation of capital and labour, the essence of the "syndical-corporative" idea being that the State should take charge of the economic development and functioning of the country.

PRODUCTION. — Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly.

The principal exports are cotton, silk and woollen tissues, motor cars, olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, borneic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, motor cars, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption

DEFENCE.—The *Army* consists on a peace footing of 310,000 all ranks. About 200,000 conscripts are called up for service in the spring of each year and serve for 18 months; thus about 400,000 men are normally with the colours during the summer months (training season) and 200,000 during the winter months. On May 24, 1915, Italy declared war on Austro-Hungary, and on Aug 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct 31, 1918, amounted to 48 milliards of lire (£1,920,000,000) During the War of 1914 1918, over 15 per cent of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. The killed and missing amounted to 650,000. The *Navy* includes 5 modern and 1 pre-Dreadnought battleship, 16 cruisers, 1 aircraft carrier, 11 flotilla leaders, 60 destroyers, 47 torpedo boats, 42 submarines, 12 gunboats and despatch vessels, 2 river gunboats, and 46 minesweepers and minelayers. The peace *personnel* of the Italian Navy is about 45,000 all ranks. Spezia and Pola, the chief naval and military ports of the kingdom, are securely fortified. The *Air Force* consists of about 80 squadrons of aircraft and 4 airships. The official first-line strength of aircraft is 800 machines, with a further 800 in reserve. The *personnel* for 1926-27 includes 1,774 officers and 17,728 other ranks, the expenditure for 1926 27 being 700 million *lire*, of which 30 million is for *Civil Aviation*.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS.—On June 30, 1926, there were 15,772 miles of railway open for traffic, 1,060 being electrified and 365 in course of electrifica-

tion, the post-offices (1927) numbered 10,751, and there were (1927) 41,030 miles of telegraph line. The sea-going commercial marine (1927) consisted of 1,424 steamers (3,251,302 gross tons) and 3,018 sailing vessels (186,126 tons). In 1927 243,370 ships (67,820,006 net tons) entered Italian ports, the weight of goods discharged being 28,118,420 metric tons, the clearances were 243,281 (67,542,887 net tons), and the weight of goods loaded 9,099,605 metric tons.

ITALIAN COLONIES, &c.

Libia.—The Turkish vilayet of Tripoli and the mutessarifat of Benghazi on the northern coast of Africa, were occupied by Italy in 1911–12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being retained by the Caliph. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly

* Paper Lire. For exchange value, see p. 449.

1,100 miles, and inland to the south a distance of about 800 miles The transferred territory comprises the four sub-provinces or Mutessarifilik of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 810,000 square miles, with a population of about 1,000,000. There are no rivers in the country, and, the rainfall being precarious, a good harvest can only be reckoned on every four or five years Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, *i.e.*, at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 50,000), and of Cyrenaica, Benghazi (population 35,000).

Governor of Cyrenaica, Signor Attilio Teruzzi.
Governor of Tripolitana, General de Bono.

Eritrea is a Red Sea colony, and extends from Ras Kasar, 18° 2′ N, to Ras Dumoira, 10° 42′ N, and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Abyssinia, and on S.E. by French Somaliland It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of about 380,000, of whom about 3,000 are Europeans. The capital is Asmara, Massowa being the chief port, where there is a good harbour. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia.

Governor of Eritrea, Dr. Jacopo Gasparini.

Somaliland.—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 11° N. lat to the Equator, and is bounded on the N. by the Gulf of Aden, on E by the Indian Ocean, and on W by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of Kismayu) transferred from Kenya by Great Britain in 1925, is about 220,000 sq. miles, and the population is estimated at 500,000 to 700,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadisho, on the Indian Ocean.

Governor of Italian Somaliland, Cesare De Vecchi.

Tientsin.—Italy obtained in 1902 a concession of land fronting the Peiho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

Ægean Dependencies—Rhodes, Egeo and the Dodecanese (12 islands occupied by Italy in 1912 during the war with Turkey, viz.:—Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Callimno, Lero, Patino, Cos, Simi, Calchi, and Lipso). The seat of administration is at Rhodes (Rodi) and the total population is about 100,000.

JAPAN.

(Nippon.)

Emperor Hirohito, G.C.B., G.C.V.O., *born* April 29, 1901, *succeeded* Dec 25, 1926, *married* (1924) Princess Nagako, daughter of Prince Kuniyoshi Kuni, and has issue a daughter.

CABINET (July, 1927)

Prime Minister, Gen. Baron Giichi Tanaka
Minister of Foreign Affairs, The Prime Minister, (*ad interim*)
Minister for Home Affairs, Keisuke Mochizuki.
Minister of Finance, Chuzo Mitsuchi.
Marine, Admiral Keisuke Okada.
War, General Yoshinori Shirakawa.
Justice, Yoshimichi Hara.
Education, Kazuye Shoda
Commerce and Industry, Tokugoro Nukahashi.
Agriculture and Forestry, Teijiro Yamamoto.
Communications, Fusanosuke Kuhara.
Railways, Heikichi Ogawa.

Ambassador in London, Tsuneo Matsudaira, 10 Grosvenor Square, W. 1
Chancery of the Embassy, 37 Portman Square, W. 1.
Counsellor, Sadao Saburi.
1st Secretary, Itaro Ishii.
2nd Secretaries, Waro Moriya; Taketi Horiuchi.
3rd Secretaries, Yoshio Muto; Katsumi Niino
Attachés, Hideo Masutani; Motoki Matsumura; Ichiro Ota; Hirokichi Nemuchi; Katsuzo Okamura; Shiroji Yuki.
Military Attaché, Col. Marquess Toshinari Mayeda.
Asst Military Attaché, Major Senichi Kushibuchi.
Naval Attaché, Capt Koichi Shiozawa.
Asst. Naval Attaché, Lt.-Comdr. Taichiro Kondo.
Financial Attaché, Juichi Tsushima.
Commercial Counsellor (1 Broad Street Place, E.C 2.), Shigiro Matsuyama.
Chancellors (37 Portman Square, W. 1), Chitoshi Kunugi, Katsutoshi Yutani, Nagayasu Nishida.
Consul-General (London), Kikuji Yonezawa (*acting*), 1 Broad Street Place, E.C 2.
Consul (Liverpool), Sentaro Edo.
" (*Glasgow*), A. Scott Younger.
" (*Middlesbrough*), Wayman Dixon.
" (*Cardiff*), E. H. Trimby.
" (*Dublin*), A. M. Weatherill

Thus ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshu, Shikoku, Kiu-shiu, Hokkaido or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo, but in diminishing numbers. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 260,783 square miles, with a population (June 1926) of 83,454,489. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-no-yama, the loftiest and most sacred mountain of Japan, about sixty miles from

Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, cornelian, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale, while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the Cryptomeria japonica, Pinus Massoniana, and Zelkowa keaki, the Paulownia imperialis is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 340,000,000 bushels being consumed annually (the average home-grown crop amounting to 290,000,000 bushels). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

Commerce and Industry.—The chief manufactures are silk and cotton woven goods, cotton yarn (247 cotton spinning mills were in operation in June, 1926), matches, paper, glass, cement, chemicals and fertilisers, sugar, brushes, flour, insulated electric wire, woollen fabrics, rubber goods, soap, lacquer ware, porcelain, earthenware, mats, matting, hemp-braids, knitted goods, vegetable oil, crude camphor, camphor oil, straw-plaits, and bronze, while shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S.A., Egypt, and China; wheat from Canada, Australia and U.S.A.; oil cake from Kwantung Province and China; wool from Australia; crude rubber from Malaya; lumber from U.S.A.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa, kerosene oil from U.S.A. and the Dutch Indies, beans, peas, and pulse from China, Kwantung Province, and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, knitted goods, matches, coal, camphor, straw-plaits, porcelain, earthenware, marine products, paper, glass and toys.

Communications.—There were 20,886 miles of railroad open in May, 1926, in addition to 1,735 miles open in Korea, 874 miles in Formosa and 139 in Saghalien, while the South Manchurian Railway in China (695 miles) is under Japanese control. The mercantile marine of Japan and her dependencies consisted in 1927 of steamers and motor vessels of 4,070,960 gross tons, in addition to small craft and wooden ships. The total tonnage entered and cleared at open ports in 1926 was 193,179,636 (95,743 vessels). The three great ports are Kobe, Yokohama and Osaka, the first named having a large transhipment trade, in addition to direct imports and exports. In March, 1927, there were 8,784 post offices dealing with about 4,000,000,000 postal packets annually, and 166,271 miles of telegraph line carrying 67,165,166 messages outwards in the financial year 1926-27.

Defence.—Service in the *Army* is universal and compulsory between the ages of 20 and 40. The peace strength was reduced in 1925 to 200,000 all ranks, organized in 17 Divisions, of which 2 are stationed in Korea, and 1 in the Manchurian leased territory. The *Navy* includes 6 battleships, 4 battle cruisers, 2 large and 21 light cruisers, 3 aircraft carriers, 11 coast-defence ships, 94 destroyers and 64 submarines (Sept., 1926). Japan declared war against Germany on Aug. 23, 1914, and captured the German fortress of Tsingtau in November, 1914. Her fleet was active throughout the war, while her troops took part in the operations in Siberia.

Education is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokio (2), Kyoto, Tohoku (at Sendai), Hokkaido and Kyushu (at Fukuoka), and 5 medical universities.

Estimated Revenue —	1926-27	1927-28.
	Yen.	*Yen*
Ordinary	1,373,145,054	1,458,151,498
Extraordinary	266,237,037	300,818,166

Extraordinary	528,050,984	555,118,461

Debt (March 31, 1927) —	
Internal	3,716,668,990
External	1,461,189,891
Total	5,177,858,881

Trade:—	1926	1927
	Yen	*Yen*
Imports	2,377,424,493	2,179,043,152
Exports	2,044,727,891	1,992,230,218
Imports from U.K.	170,274,500	151,623,821
Exports to U.K.	59,493,735	81,666,347

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with 3,994,236 inhabitants (1926). Imports, *Yen* 186,395,000; exports, *Yen* 263,215,000, in 1925. The colony has been self-supporting since 1906. Estimated rev. and exp. (1927-28), *Yen* 111,599,202. Capital, Taihoku; pop. (1922), 180,362.

Saghalin (Karafuto).—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of 9,324 sq. miles with a population (1925) of 203,504. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1926-27) *Yen* 18,791,079.

The *Kwantung Peninsula*, which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war Area, 1,300 sq. miles; population (1925) 944,254. The port of Dairen provides Japan with a mainland port, ice-free all the year round, and the peninsula is fertile. Imports (1925), £13,608,000, exports, £22,543,000 Estimated revenue and expenditure (1926-27). *Yen* 14,997,515. Capital, Port Arthur (Ryojunko), chief port, Dairen; pop. (1925), 254,433.

The *Pescadores* (Bokoto) consists of about 63 islands, with a total area of 85 square miles, and a population (1922) of 59,384.

Korea (Cho-sen).—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long, and between 34° and 43° N lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 85,156 square miles. Population estimated at 19,519,927 (Dec. 1925); there are 386,493 (Dec. 1922) Japanese in the country The soil is fertile, but mountainous except in the river valleys. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, fish, livestock, cowhides, ginseng, wheat, barley, iron ores, and raw cotton Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is (1925) 1,735 miles. Estimated rev and exp. (1927-28), *Yen* 209,708,462. Capital, Seoul (Keijo-fu); pop. (1922) 272,414.

Imports into Korea, 1926 ..... *Yen* 372,169,783
Exports from Korea, 1926 ..... „ 362,954,800

Pacific Islands.—Under the *Treaty of Versailles*, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German Pacific Islands N of the Equator have been placed under Japanese mandate These islands, in Micronesia, are (1) *The Marshall Islands* (pop. 9,800), with seat of government at Jaluit; (2) *The Caroline Islands* (pop. 24,000), with seats of government at Truk and Ponapé (Eastern group) and Palew and Yap (Western group); (3) *The Ladrone (or Marianne Islands* (pop. 56,000), with seat of government at Sipan. Estimated rev. and exp. (1927-28) for the Pacific Islands, *Yen* 4,546,526.

CAPITAL OF THE JAPANESE EMPIRE, Tōkiō, formerly called Yedo, the residence of the Emperor; population estimated at 1,995,567 (Sept. 1925). On Sept 1, 1923, a disastrous earthquake destroyed great portions of the cities of Tokio and Yokohama, but considerable progress has been made in the work of reconstruction. The chief cities are—

Osaka	2,114,804	Kanazawa	147,420
Tokio	1,995,567	Kumamoto	147,174
Nagoya	768,558	Fukuoka	146,000
Kyoto (ancient capital)	679,976	Sapporo	145,065
		Sendai	142,894

Vice-Consul, Charles E. Junnutz.

A Baltic Republic at the eastern and southern shore of the Gulf of Riga, formerly part of the Russian Empire Latvia was proclaimed an independent state on Nov. 18, 1918 Its frontiers are common with Esthonia, Russia, Poland and Lithuania. The constitution is that of a democratic republic, with universal suffrage and proportional representation Parliament (*Saeima*) consists of a single chamber of 100 members The area is about 41,000 sq. miles, with a population of about 2,000,000

The surface of the country is generally flat with marshy areas, interspersed with many lakes Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries The fisheries are also of importance. The chief exports are flax, timber, butter, paper and glass, chief imports are agricultural machinery and implements and wood and metal machinery The tonnage of ships entered in 1925 was 1,443,682 tons. The chief ports are Riga, Libau and Windau. In 1925 there were 1,602 miles of railway in operation

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S.E., and Mano, N.W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50′, a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State The population is estimated at 1,500,000 to 2,000,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, piassava, palm-oil, coffee, cocoa, ivory, kola nuts and rubber. The chief imports are rice, tobacco, Manchester goods, provisions, spirits, salt, hardware, glass and earthenware and building materials The executive power is vested in a President elected for four years, assisted by a ministry, there are two houses of Legislature, the Senate, with eight members elected for six years, and the House of Representatives with fifteen members elected for four years There is no regular army, but there is an enlisted frontier force of about 600 men under native officers The control of the customs is in the hands of a General Receiver (who is also Financial Adviser) lent by the Government of the U.S.A. There are 15 ports of entry, including 4 river ports, along the 350 miles of coast and 12 interior ports. In 1926, 877 vessels (2,106 135 net tons) entered and cleared at all ports, of these 298 (909,387 net tons) were British

Consul-General, K. Gineitis, 15 Endsleigh St, W.C. 1.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb. 16, 1918. The Republic consists of the former Russian Government of Kovno and portions of the Suvalki and Vilna Governments, and is bounded on the N. by Latvia, on the S. and E. by Poland, and on the W. by Germany and the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of 2,000,000. Under the *Treaty of Versailles* Germany renounced the sovereignty over the town and territory of Memel, and a French High Commissioner, with a small garrison, governed the Territory in the name of the Allies until Jan 1923, when the Territory was invaded and occupied by the Lithuanians. The sovereignty of the Territory has been transferred to Lithuania, as set out in the Convention signed at Paris (May 8, 1924) and ratified Aug 1925. The total area administered is 945 square miles, with a population of about 150,000, of whom about 36,000 inhabit the town of Memel.

The legislature consists of a single chamber Assembly (*Seim*), elected by universal adult suffrage, the Executive being entrusted to a council of ministers.

The chief industries are agriculture and forestry, the chief products of the Republic being rye, wheat, barley, oats and potatoes; the exports are flax, linseed, timber, and dairy produce; the chief imports are textiles, sugar, herrings, and machinery.

Grand Duchess, H.R.H. Charlotte, *born* Jan. 23, 1896, *succeeded* (on the abdication of her sister) Jan 9, 1919, *married*, Nov. 6, 1919, Prince Felix of Bourbon-Parma. *Heir Apparent*, Prince Jean, *born* Jan. 5, 1921.

Minister of State, Joseph Bech.

Chargé d'Affaires in London, H.E. the Netherlands' Minister. *Office* 7 Tavistock Place, W.C. 1.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815–66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918, U.S. troops entering the capital on Nov 22. By the *Treaty of Versailles*, 1919, the country is declared to be free from all ties with Germany. The area is 999 square miles; the population (1916) 263,834, nearly all Roman Catholics. The principality is rich in iron ore. The revenue in 1924 was estimated at 102,674,000 francs, expenditure 104,345,760 francs; debt (Jan. 1, 1921) 128,000,000 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 45,676), is a dismantled fortress.

FLAG. Red, white, blue.

† General Obregon was elected President, in succession to General Calles, July 1, 1928, . he was assassinated at a banquet, July 17, 1928

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30′ N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 768,883 square miles, with a population of (1910) 15 063,207.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, then course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 5,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Patzcuaro* and *Xochimilco*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or *Toltecs*, gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*.* Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810 1821. From 1837 1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1810 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the death of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents is *Porfirio Diaz*, who ruled (except during 1880-4) from 1876 to May 25, 1911. Since the fall of Diaz internal disturbances, in which eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On July 15, 1914, Venustiano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fall of Carranza the executive power was assumed by de la Huerta as provisional President, and on Dec 1, 1920, General Obregon, whose *coup d'etat* had caused the downfall of Carranza, became head of the Republic. The determination of the new government to uphold the Carranza constitution of 1917, which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the rights of foreigners, caused the British, American, French and Belgian governments to adopt a policy of non-recognition of the Obregon administration. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, has called forth strong protests from foreign Powers, but all the Powers except Great Britain eventually recognised the Obregon administration.

Vera Cruz, Tampico, Progreso, and Puerto Mexico are the chief ports on the Atlantic or Gulf of Mexico, and Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas on the Pacific. There were 16,110 miles of railroad open on Sept. 1, 1926, and 54,670 miles of telegraph. The railroads have in a large measure been built by American and English companies. The city of Mexico is linked with Puebla, Tampico, Vera Cruz, Toluca, and Saltillo by telephone; the line is now extended to the U.S. border and thence is connected to Canada. The city is connected by wireless to U.K. and Europe.

The principal agricultural crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines, and Mexico produced 64 million barrels of petroleum in 1927. Woollen and cotton spinning and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 20 per cent consist of silver and gold, while 35 per cent. represents the value of petroleum and its derivatives, mainly shipped from Tampico. Other important exports are copper, lead and zinc, also sisal hemp (henequen), coffee, cotton, resins, fresh vegetables and dried vegetables.

The monetary system has been placed on a gold basis, with a gold *peso*=50 cents U.S.

* The remains of *Hernan Cortes* have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments

currency or 24 58d ; there is a large amount of silver currency in circulation. In Sept 1922, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold *pesos* in 1923, rising by 5 million gold *pesos* annually to 50 million gold *pesos* in 1927. However, this agreement with the International Commission of Bankers was amended in 1925, after the Government had found it necessary to suspend the service of the debt in June, 1924 The effect of the 1925 agreement was to eliminate the debt of the National Railways of Mexico from the public debt, thereby reducing this from 1,561 million Mexican gold *pesos* to 890 millions, as at Dec 31, 1925. Furthermore, the 1925 agreement provided for the postponement of payment of the 75 million *peso* (which had not been met in 1924 and 1925) until 1928–1935. Service of the debt was resumed in 1926. In addition to the 890 millions above mentioned, other items which had not been included in the debt agreement of Sept., 1922, as amended in 1925, amounted to 108 millions as at Dec. 31, 1925, thus making a grand total of 998 million *peso* Mexican gold. The total debt, funded and floating and interest, was stated to be $1,253,105,699 as at Dec 31, 1928

The language of the country is Spanish

Sultan, Mulai Mohamed, *born* 1909 ; *proclaimed* Nov. 20, 1927.

Morocco, the largest of the Barbary States, is situate in the north-west of the African Continent, between 27°-36° N. lat. and 1°-11° 40′ W. long., with a total area estimated at 314,000 square miles, and a population of about 5,000,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the

dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsular of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghir, which encloses a bay containing the port of Agadir, formerly known as the "Gate of the Sudan."

The climate is generally good and undoubtedly healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from November to April, but the summer-heat figures at all the intervening ports (Larache, Kemtra-Mehedia, Rabat-Sale, Fedalah, Casablanca, Mazagan, and Saffi) are markedly higher; the last-named port being the hottest. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.—France is the paramount power, and represents the Sultan of Morocco in all foreign relationships, but the country is divided into three zones—the *French Zone*, the *Spanish Zone*, and the *International Tangier Zone*. Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence." In this Spanish zone (which extended over the whole of Northern Morocco, with the exception of the International zone round Tangier) there were tribal risings in 1921, and during the operations to quell these risings the Spanish Expeditionary force met with serious reverses in the neighbourhood of Melilla. A Civil High Commissioner was appointed in 1922 over the Spanish zone to inaugurate a policy of pacification. In 1924 the military forces of Spain met with further reverses, and were withdrawn to a line running west from Rio Martin (on the Mediterranean) to within fifteen miles of the Atlantic Coast, and thence southwards to the French zone, near Alcazar el Kebir. In 1925 the French became embroiled and a considerable force was despatched from Algeria and France to strengthen the French Army in Morocco. In spite of the fact that he was fighting two European powers, however, Abd el Krim, the Rifi leader, achieved such success as to be able to threaten the safety of Fez itself in July. But the danger was averted and after an anxious summer the autumn brought relief. The French and Spanish in conference in Madrid realised that their best chance of success lay in close co-operation, and the effect of this new policy soon made itself felt. In September the Spaniards landed at Alhucemas Bay and forced Abd el Krim to evacuate his headquarters at Ajdir. Simultaneously the French by pressure from the south were able to make progress which, if less spectacular, was of no less solid a nature, and by the time the rainy season forced a retirement to winter quarters the tide was definitely on the turn. In the Spring of 1926, following an abortive peace conference at Oujda, the French and Spaniards launched their final attack. By May 24 the Riff had been effectively crossed and Abd el Krim's headquarters at Targuist occupied, and on May 27 the Rifi leader surrendered himself to the French. This was the signal for the general break away of the tribes. The French virtually restored peace in their zone and the Spaniards commenced a general movement for enforcing submission and disarmament in theirs. On August 10 they reoccupied Shesharwen and the autumn found them still pursuing their arduous task, which was practically completed in 1927. *Ceuta* (on the Mediterranean coast, opposite Gibraltar), in 35° 54′ N lat and 5° 18′ W long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the adjacent Alhucemas and Zaffarin islands are Spanish possessions. A special international *regime* was designed for *Tangier* before the War by negotiations between the British, French and Spanish Governments but the outbreak of the War prevented this *regime* from being put into operation. A new Convention instituting the *International Zone* of Tangier was, however, signed by the three governments at Paris on Dec 18, 1923, and was brought into force on June 1, 1925. Belgium, The Netherlands, Portugal and Sweden subsequently adhered, but the United States and Italy have not yet (Oct 1927) done so; these two powers therefore retain their Capitulatory rights in the New Zone. The New Convention provides for a complete international administration of the zone, except as regards native affairs, which are reserved to the Sherefian authority.

Production, Industry, etc.—Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenugreek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges and dates, the latter growing also on the southern slopes and in the plains. The live stock includes large quantities of horses, cattle, sheep and goats, while the poultry and egg industry is of increasing importance. Antimony, iron, coal, copper, lead and tin (the last three in considerable quantities) are known to exist, and gold and silver are also found. Rock salt, brine, and phosphates are exported in large quantities. The trade of Morocco is chiefly with France and Algeria, Great Britain, Italy and Spain, the chief imports being cottons, sugar and soft goods, the exports being grain, eggs, hides and skins, and wool. The unit of currency in the French protectorate is the Moroccan *franc*, which is closely allied to the French *franc*, while in the Tangier zones the franc, the Spanish and the *Hassani peseta* are all current, and in the Spanish zone the two last of these currencies.

Communications.—The French Protectorate authorities are now engaged in the serious development of normal gauge railways in their zone, and by the end of 1927 it is expected that about 600 kilometres of normal gauge, apart from the considerable narrow gauge system connecting all the principal centres, will be in working order. The Franco-Spanish Treaty provides for the line between Tangier and Fez, opened to traffic on July 24, 1927. Telegraphic communication is established by submarine cables from Tangier to Cadiz, Gibraltar, Rio Martin, Melilla, Tarifa and Oran, and there are wireless stations at Tangier, Tetuan (military), Rabat, and Casablanca; inland lines have been built by the French to Fez and to some of the ports, as well as to the

borders of the Spanish zone, and the latter line is to be extended to Tangier. The chief roads in the Tangier and Spanish zones are those linking Tangier to Ceuta *viâ* Tetuan in the North, and to Arzila, Larache, and the French zone in the South. The French zone is well equipped with good main roads radiating from Casablanca. *Air Services* are maintained between Casablanca and Toulouse (daily), Casablanca and Oran (twice weekly), and Casablanca and Dakar (weekly).

The principal *Harbours* are Casablanca, Rio Martin (for Tetuan), Tangier, Larache, Rabat, Mazagan, Safi, Kenitra, and Mogador.

External Trade.—The imports into the *French Zone* in 1926 were valued at 1,692,271,000 francs, of which 171,406,000 francs represent the value of imports over the Algerian frontier. The imports into the *Tangier Zone* were valued at 145,936,305 francs and the exports from the zone at 28,594,979 francs.

CAPITAL of French zone, Rabat, population 32,000 (Fez in the North, and Marrakesh in the South being the old capitals of the Sultans).

CAPITAL of Spanish zone, Tetuan, population 30,000 (principal ports, Larache and Rio Martin, for Tetuan).

CAPITAL of International zone, Tangier, population 45,000.

Other towns (with populations exclusive of French army of occupation) are Fez (81,172), Marrakesh or Morocco (139,874), Mequinez (36,662), Sallee (24,202), Casablanca (101,690), Rabat, with Sale (59,009), Mazagan (21,495), and Safi (26,396).

Chancery, 42 Seymour Street, W. 1.
Counsellor of Legation, Dr. J. B. Hulbrecht.
Director of the Chancery, H. N. Brouwer.
Commercial Attaché, F. B. s' Jacob.
Consul Gen., Th. H. de Meester, 28 Langham Street, W. 1.
Consul, Dr. H. G. von Oven.
Vice-Consul, M. J. van Schieven.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46′ 53 34′ N. and long. 3° 22′ 7° 14′ E., consisting of 11 provinces, and containing a total area of 12,761 square miles, with a population, Dec. 31, 1927, of 7,626,072. The majority, about 55 per cent. belong to the several Reformed Churches, and the remainder are Roman Catholics, with about 125,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers. In fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, sugarbeet, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, chemical and pharmaceutical products, matches, perfumery, sugar, bicycles, boots and shoes, starch, potato flour, engines, metal substances, iron and steel, works of art in gold and silver, incandescent lamps, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Coal production (1927) 9,350,000 tons. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—The total extent of canals is about 1,250 miles. There were 2,264 miles of

railroad open in 1925, and (1924) 5,620 miles of telegraph line. The mercantile marine, on Jan. 1, 1927, consisted of 700 steam and motor vessels of 2,436,939 tons. In 1926 about 24,000 vessels (92,500,000 tons) entered and cleared at the various ports. An Act for the damming and draining of the Zuyder Zee was passed in 1918, and work is now in progress.

Defence.—The Home Forces consist of a conscript army, with an annual levy of 19,500 men, producing a first-line army of 270,000, or (including reserves) 350,000 all ranks. The Royal Navy consists of 11 protected and 58 unprotected vessels.

Education. Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial), Wageningen (agriculture), and Utrecht (veterinary).

" NETHERLANDS COLONIES

TOTAL AREA, 832,473 square miles

POPULATION (1920), 49,514,038.

The possessions of the Kingdom of the Netherlands in the EAST INDIES (Administrative Capital *Batavia*, pop., 1920, 253,818) are very considerable, comprising the whole of the SUNDA ISLANDS and MOLUCCAS: *Sumatra* (area, 162,000 sq. miles), *Java* and *Madura* (51,000 sq. miles), *Netherlands Borneo* (200,000 sq. miles), *Celebes Island* (72,000 sq. miles), *Moluccas* (44,000 sq. miles), *Timor Islands* (18,000 sq. miles), with the exception of a portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA. JAVA and MADURA have a population (1926) of 36,403,833 and furnish sugar, tobacco, tea, coffee, tin, rubber, and other products for exportation. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There was (1923) a colonial army of 1,260 officers and 32,129 men. The colonial revenue for 1928 was estimated at fl. 747,194,000 and the expenditure at fl. 798,110,000. The trade of Java was valued in 1927 at fl. 806,485,000 for exports and at fl. 545,101,000 for imports, and the whole of "Netherlands India" at fl. 1,813,000,000 for imports.

In South America the colony of SURINAM, or Netherlands Guiana (imports, 1927, 10,020,516 guilders; exports, 7,689,685 guilders), embraces 49,845 square miles and contains (1926) 142,896 inhabitants, and in the West Indies, CURAÇAO (imports, 1924, 51,189,100 guilders; exports, 32,179,265 guilders; population, 35,083) and five other small islands belong to the Netherlands, having an area of 436 square miles, with a population of 21,288. In 1925 the exports from the Netherlands East Indies to Great Britain was valued at fl. 122,003,000, and the imports from Great Britain at fl. 123,500.

BRITISH CHAMBER OF COMMERCE FOR NETHERLANDS' E. INDIES, Batavia, Java.

NICARAGUA.

(República de Nicaragua.)

President (1929-1933), Señor Don José Maria Moncada, *assumed office* Jan. 1, 1929.

Minister in London, Señor Don Eduardo Perez-Triana, 4 Moorgate, E C. 2.

Consul in London, Señor Saturnino Gámez, 16 Wormwood Street, E C 2.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45′—15° N. lat. and 83° 40′—87° 38′ W. long., containing an area of 51,660 English square miles and a population (census of 1920) of 638,119, of whom about three-quarters are mixed blood and the rest Indians, including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution rests on the fundamental law of Nov 10, 1911 (amended 1913) and is that of a centralised republic. The President is elected by direct suffrage for four years.

The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beans, cocoa, hides, gold and silver Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports

There are 146 miles of railway, 2,500 miles of telegraph and 1,240 miles of telephone, and a powerful wireless station was completed at Managua in 1924 Good roads are very few, and transportation, especially in the rainy season (May-Nov), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 75 per cent of the total trade. Bluefields is an important port on the Atlantic coast, whence considerable quantities of bananas and timber are shipped to New Orleans. Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population.

Education is backward, at least 50 per cent of the population being illiterate

The official language of the country is Spanish.

Vice-Consul, Th. V. Auss.

Norway, an independent kingdom, founded in 872 (fundamental law of May 17, 1814), was united with Sweden under the same King from Nov. 4, 1814, to June 7, 1905, when the union was dissolved The Parliament of 150 members is called the "Storthing," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or fylker, and comprises an area of 124,924 sq. miles with a population (1927) of 2,797,820. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

Agriculture gives employment to a large part of the population but is unable to furnish

sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and pork. In proportion to population shipping is a very prominent industry, and fishing and forestry are also important, manufactures are aided by great resources of water power, calculated at 12 to 13 millions of horse power, of which about 11 per cent. are utilized. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of fish, oil, and other products of the fisheries, timber, matches, explosives, pulp, paper, skins and furs, nails, minerals, iron ore and pyrites, stone, ice, calcium carbide, condensed milk, tinned goods, aluminium, ferro-alloys, saltpetre, &c.

By law of April 5, 1927, prohibition of intoxicating liquor was repealed, the plebiscite of 1926 resulting in a vote of 531,000 to 423,000 against total prohibition.

Defence.—Service in the National Militia is universal and compulsory. The peace strength is about 10,000 all ranks. In time of war all males between the ages of 18 and 55 are liable for service. The Navy consists of 4 ironclads, 29 torpedo-boats, 1 gunboat, 3 destroyers, 8 submarines, and several minelayers. There are 56 seaplanes and aeroplanes.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo was attended in 1927 by 3,562 students.

Communications.—The total length of railways open in 1927 was 2,254 miles, of which 229 miles were private lines. The length of telegraphs and telephones in 1926 was 35,240 miles (State, 21,826) with 533,033 miles of wire (State, 398,757 miles). The mercantile marine, Jan. 1, 1928, consisted of 3,698 vessels, of 1,744,000 net tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1927 to about 430,000,000 *kroner*.

SVALBARD.

(*Spitsbergen and Bear Island*.)

By Treaty (Feb 3, 1920) the sovereignty of Norway over the Spitsbergen Archipelago was recognised by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway.

The Spitsbergen ("Pointed Mountain") Archipelago lies between 77°-81° N. lat. and between 10°-35° E. long., with an estimated area of 25,000 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the main land by Olga Strait; Barents and Edge Islands, separated from the main land by Stort Fjord (or Wybe Jansz Water), Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group.

The principal mineral is coal. In 1927 the coal export was about 313,000 tons. The wintering force in 1927–28 was about 740 strong, the archipelago is also visited by hunters for seal, foxes and polar bears.

Svalbard revenue (1928–9) ..... *kroner* 185,000
do. expenditure (1928–9) ..... ,, 185,000

South Cape is 370 miles from the Norwegian

Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harbour (the postal station, with a high-power Telefunken wireless station) 2½ to 3 days, from Aberdeen 5 to 6 days.

OMAN. *See* Arabia.

PANAMA.

(Republica de Panama.)

President (1928–1932), Señor Don Florencio Harmodio Arosemena, *assumed office* Oct. 1, 1928.

MINISTRY (Oct 1, 1928.)

Secretary of Government and Minister of Justice, Señor Don Adriano Robles.
Foreign Affairs, Señor Dr Don J. D. Arosemena.

Minister in London, Señor Don Octavio Mendez Pereira. *Legation*, 232 Finsbury Pavement House, E.C.2.
Consul-General in London, Don Carlos A. Lopez Garcia, 232 Finsbury Pavement House, E.C.2.
Vice-Consul, Senor C. J. Dunbar MacConnell.
Consul-General, Liverpool, Señor J. Luis Hernández.
Consul in Birmingham, S. Sauri.

Panama, formerly one of the nine Departments of Colombia, revolted in Nov 1903, and established a separate Government. The area of the Republic is 32,890 square miles, the population 442,486 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one-half of the land is unoccupied. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the two oceans.

	1922–23.	1923–24.
Revenue	£1,100,783	£2,039,842
Expenditure	1,257,426	1,513,635

	1923.	1924.
Imports	£2,534,875	£2,497,384
Exports	477,946	493,283
Imports from U.K. (1925-6)	388,150	371,000
Exports to U.K. (1925-6)	64,000	122,000

The total value of supplies purchased for the *Canal Zone Commissaries* for the fiscal year ended June 30, 1927, was $7,356,407 (U.S. $.).
The language spoken is Spanish.

CAPITAL, Panama. Population (1924), 59,635. Colon had a population in 1924 of 31,285.

FLAG: Quarterly, white with blue star, red, blue, and white with red star.

BRITISH LEGATION.

Envoy Extraordinary, Minister Plenipotentiary & Cons.-Gen., Maj. Charles Braithwaite Wallis (1923), (also to Costa Rica).....£3,150
Archivist (with rank of Vice-Consul), D. L. Humber.

PAPACY, The.

Sovereign Pontiff (260th), His Holiness Pope Pius XI. (Achille Ratti), *born* at Desio, March 31, 1857, *elected* Pope (in succession to Benedict XV.) Feb. 6, 1922.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the Sovereign Pontiff of the Western Church, and claims temporal power over the Papal States which were incorporated with Italy from 1860 to 1870, the territory of the Papacy now being confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, which are guaranteed to the Pope (with a yearly indemnity of 3,250,000 lire, which is neither claimed nor paid) by the Italian Government.

British Envoy Extraordinary to the Holy See, & Minister Plenipotentiary, H. Chilton, C.M.G. (36, Via Mercadante, Rome).
2nd Secretary, A. W. G. Randall, O.B.E.
Temporary Secretary, R. Thynne.

PARAGUAY.

(Republica del Paraguay.)

President (1928–32), Dr. José P. Guggiari.
Vice-President, Dr. Emiliano Gonzales Navero.
Foreign Affairs, Dr. Geronimo Zubizarreta.
Finance, Dr Eligio Ayala.
Justice and Instruction, Dr. Rodolfo Gonzalez.
War and Marine, Dr. J. Elliso Da Rosa.
Interior, Señor Belisario Rivarola.

Minister in London, (vacant).
Charge d'Affaires and Consul-General in London, Dr. Venancio B. Galeano, 12 Russell Square, W.C.1.

An inland State of South America, situate between 20° 6′ 30″ S. lat. and 54° 62′ W. long. The area of Paraguay (exclusive of the Chaco) is computed at 61,600 square miles, and it contains a population of about 700,000.

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814–1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840–1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the *Battle of Cerro Corá*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men. The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in the case of the death, expulsion or absence of the President. There is a Cabinet of 5 members.

Paraguay proper consists of a series of plateaus, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asuncion; but is liable to shrink unduly with drought. The plateaus are covered with grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense and valuable forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless, is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, forms the subject of a long standing dispute with that country, it is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

The chief agricultural products are tobacco, oranges and cassava (manioc), maize, rice, sugar-cane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, cotton and tobacco growing, and the gathering of *Yerba* (Paraguay tea), are the principal industries. The chief articles of export are hides, timber, yerba maté, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 2,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (985 miles) occupies 53 hours. Train ferries enable the run to be accomplished without break of bulk. The language is Spanish.

	1925-6.	1926-7

3rd Secretary, Mirza Hossein Khan Ghods.
Financial Adviser, Mirza Eissa Khan.
Consul-General in London (vacant)
Consul, Morteza Gazvini, 4 Broad Street Place, E.C 2. [London Wall 4488]

Persia—called by the natives Irán—comprises an area of 630,000 sq miles, with a population estimated at 9,000,000 to 10,000,000

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. There are 98 miles of railway open, and travelling is mostly by caravans, and transport by pack-animals, but motor transport of passengers and goods on the road between Tehran-Khanikin, Tehran-Pahlevi (Enzeli), Tehran-Tabriz, Tehran-Meshed, Meshed-Duzdab (and to a lesser extent) Tehran-Bushire, has made great progress during the past few years, while the German Junker Company has recently secured a contract for the carriage of mails and passengers by aeroplane between Tehran-Khanikin, Tehran-Pahlevi (Enzeli) and Tehran-Bushire. An agreement for the survey and part building of a railway from Khormusa, on the Persian Gulf, to Bander Pez, on the Caspian, has been made between the Persian Government and a Germano-American syndicate, and the survey and track laying have been begun

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats'

are numerous, and good wool is produced The Persians are mostly Shiah Muhammadans; but there are many adherents of Babaism (an eclectic form of Deistic religions), and Armenian Christians The laws and popular education are based on the precepts of the Koran, but efforts are being made to approximate the educational system more closely to European models. Persia is divided into provinces, of which the principal are under Governors or Governors General

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. He was succeeded in 1907 by his son Muhammed Ali Shah, who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nasr-ul-Mulk, until 1914) As a result of the energy of Prime Minister H.H Reza Khan the authority of the Persian Government was re-established over almost the whole of Persia by means of a disciplined army of 8,000 cavalry and 22,000 infantry, with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars. On Oct. 31, 1925, the Shah Ahmed Mirza, who had been absent from the country for some time, was deposed by the National Assembly which handed over the government to the Prime Minister. On Dec 13, 1925, the Constituent Assembly elected Reza Khan Pahlavi, Shah of Persia. The Shah took the oath on Dec. 15 and was publicly proclaimed, and was crowned on April 25, 1926.

The revenue is derived from land tax, Crown lands, customs, opium and salt, while the recently enacted law concerning a sugar and tea monopoly is calculated to bring in over £1,000,000 annually, and this sum is being earmarked for the construction of railways. British commercial interests in Persia much exceed those of any other country, the trade between the British Empire (including India and Mesopotamia) and Persia amounting to more than 46 per cent. of the total trade of the country.

The leading imports into Persia are cotton fabrics, sugar, iron and steel goods and tea, the principal exports were heavy oils, benzine, petrol, carpets, opium, fruits, cotton and rice.

Revenue (1926-27)	£6,654,668
Debt (Sept. 23, 1927)	1,807,067
Imports (1927-28)	16,450,000
Exports (1927-28)	21,617,700
Imports from U.K. (1926-27)	7,935,000
Exports to U.K. (1926-27)	11,411,000

Foreign Relations.—By the Anglo-Russian Convention of Aug, 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests

In March, 1921, Persia signed a treaty with the Russian *Soviet* Republic, which provides (*inter alia*) for mutual diplomatic and consular representation, restores to Persia Firuzeh and Ashurada, annuls all concessions previously granted to Russians in Persia, hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia, denounces all previous Russo-Persian treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia.

In 1922 the Persian Government engaged a number of American advisers (under Dr. Millspaugh) for the supervision and direction of the country's finances. Considerable strides have been made by the country under this new regime, a balanced budget and a programme for gradual development of the country's resources having been evolved; Dr. Millspaugh's contract has now come to an end, he has left the country and German and Swiss financial experts have replaced the Americans.

In May, 1928, the capitulatory régime came to an end; at the same time a new Tariff Convention was signed, giving Persia Tariff autonomy.

CAPITAL, Tehran (pop. 210,000); other large towns are Tabriz (180,000), Ispahan (80,000), Meshed (80,000), Kerman (50,000), Yezd (60,000), and Shiraz (60,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Consul, Glasgow, Señor Don I. Ezcurra.
Do., Cardiff, Señor Don A. J Bovey (*acting*).

Peru is a maritime Republic of South America, situated between 1° 31′ 29″ and 19° 23′ S. latitude and between 69° and 81° 19′ W The territory between 17° 47′ S and 19° 23′ S. is occupied by Chile, as the result of the Pacific War of 1879–1882. The area of the Republic is estimated at 352,000 square miles, and the population (1921) at 5,550,000. It is bounded on the north by Ecuador and Colombia, as the latter claims a territory in the Amazonian basin ; on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier and for nearly three centuries Peru remained under the Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct 18, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic under a newly drawn constitution of 1919 The President is elected for five years by direct vote of the people and under an amendment to the Constitution (1927) may be re-elected indefinitely

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being *Huascaran* (22,050 feet), *Huandoy* (21,100 feet), *Arequipa* (or Misti) volcano (20,013 feet), *Hualcan* (20,000 feet), and *Lurima*, *Tocoia*, and *Sarasara*, all over 19,000 feet There are four distinct regions, the *costa*, west of the Andes, the *sierra* or western slopes of the Andes, the *pumas* or mountainous wastes below the region of perpetual snow, and the inward slopes (*montaña*) and boundless forests of the Amazonian basin The coastal area, lying upon and near the Pacific, is not tropical, though close to the equator, being cooled by the Humboldt-Current ; its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased, it is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising, at present almost wholly unexplored owing to lack of communication. This part of the country should show most interesting developments in the future The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state There are here dense jungles, of which the principal commercial product is wild rubber The mineral production in 1926 was valued as follows — petroleum £11,772,742, silver £3,758,719, copper £3,582,600, vanadium £1,759,591, gold £487,880, the total mineral production being valued at £22,797,934 The Lobos and other islands on the Pacific coast provide guano (137,000 metric tons in 1925.)

The principal imports are coal, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are, cotton (£6,669,068), gasoline (£5,289,322), sugar (£4,590,137), copper (£4,937,843), petroleum (£3,688,630), and wool (£839,427) In 1926 the U.S.A. sent 47 per cent. of the imports and took 35 per cent. of the exports, while the U.K. sent 15 per cent and took 28 per cent.

The total length of the railways open (1926) was about 2,500 miles, of which 1,084 miles are under the control of the Peruvian Corporation. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wire-

less telegraphy stations have been established in many places.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 8,000 of all ranks; the Navy (now under the direction of a United States Mission) includes 2 cruisers built at Barrow, a destroyer bought from the French Government, and 4 submarines built in U.S.A. There is a military aerodrome at Chorrillos (near Lima) and a seaplane station at Ancon.

Language.—Spanish is the official language of the country, but native dialects (of which Quechua is the most important) are spoken by a considerable portion of the Indian population.

Vice-Consul, M. Witold Hulanicki.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the *Treaty of Versailles* (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic, which is reconstituted within the limits of the 18th-century "Polish Commonwealth." This state extended in the year 1772 over an area of 740,000 sq. kilometres, and included a population of about 23,000,000. The political neighbours of the Republic are the Baltic Sea, the German Republic (Prussian Konigsberg District), and the Republic of Lithuania, in the N.; the Republic of Czechoslovakia in the S.; the Kingdom of Rumania in the S.E.; Soviet Russia in the E., and Germany in the W. The present area of the Republic may be estimated at 386,273 sq. kilometres, with a population, at the 1921 census, of 27,160,000 (of whom 18,660,000 are Poles, and 8,500,000 other nationalities), the estimated population in 1928 being 30,100,000. The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign. Poland was enabled to conclude peace on favourable terms, and claimed the renunciation by the Soviet at Moscow of about 120,000 sq. kilometres, containing a population of about 3,620,000 (1,048,000 Poles).

Government. A Republican form of government was adopted by the Constituent Assembly in 1919, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. The Legislature consists of a Diet (*Sejm*) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age. The Constitution voted on March 17, 1921, is very Liberal. Since Marshal Pilsudski's *coup d'état* of May 12, 1926, amendments have been inserted in the Constitution conferring on the President of the Republic the power of legislation by decree at times when the Diet is not sitting.

Production.—Mining, cotton, metal work, agriculture, sugar, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar-beet; the live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland (Galicia), zinc, lead ore, mineral and potassium

*Pr.zł. = £100 (Sept. 1928).

salts, and in Galicia (Boryslaw) are famous oil fields; the output of crude oil (1927) was 669,444 metric tons. The chief manufactures are textiles, those of minor importance being machinery and metal works, chemicals, and leather. The exports are principally coal, timber, spelter, agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

Defence.—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, has been organized.

Education. Education is compulsory and free, and there is considerable voluntary effort in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at Cracow (founded 1364), Warsaw, Lwow, Poznan, Lublin, and Wilno; Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow.

Communications.—There are about 10,000 miles of railway and over 25,000 miles of telegraph line, with well-developed telephone systems in all the large centres. Over 4,000 miles of navigable waterways exist on the Vistula, Narew, Bug, Warta, and Pilica, of which about 1,100 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed.

Portugal lies in 37°—42° 8′ N. lat. and 6° 15′—9° 30′ W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 35,500 square miles, with a population in 1920 of 6,399,355, and the Portuguese Colonies a total area of 804,841 square miles, with a population estimated at 9,675,000. The Azores and Madeira are regarded, not as colonies, but as a part of continental Portugal. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, vines, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry, the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, tin, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1926) numbered 185 steam and 100 sailing vessels, with a tonnage of 280,116. Railways 2,040 miles in extent were open for traffic in 1924, and there were 5,500 miles of telegraph line in 1927.

Defence.—Service in the militia is universal and compulsory. The peace effective is about 32,000. War strength, about 150,000. The Navy consists of a few small ships of old pattern.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and over 75 per cent. of the population above 7 years old are illiterate. Secondary education is conducted in State lyceums. There

are also military, naval and other special schools. The University of Coimbra (founded A D. 1291) had 1,100 matriculated students in 1910

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at 15 Rua Costa Santos, *Oporto*, and 81 Rua dos Netos, *Funchal, Madeira*).

Lisbon, distance 1,110 miles; transit, 50 hours.

PORTUGUESE COLONIES

CAPE VERDE ISLANDS, off the west coast of Africa, have an area of 1,475 square miles and a population of 142,552. Estimated revenue and expenditure 1928-29, $16,384,970; total trade (imports and exports) 1926-27, $79,003,233.

SAO THOME and PRINCIPE ISLANDS, in the Gulf of Guinea (area 442 square miles, population 59,060. Estimated revenue and expenditure 1928-29, $11,984,664; total trade 1926-27, $124,668,851.

PORTUGUESE GUINEA, on the west coast of Africa, has an area of 14,000 square miles and a population of 806,973. Estimated revenue and expenditure 1927-28, $34,910,060; total trade, 1926-27, $68,424,698.

ANGOLA (Angola and Kabinda) on the west coast of Africa has an area of sq. miles and a population of 5,032,034. Estimated revenue 1928-29, $163,012,860, expenditure, $181,457,932; total trade 1926-27, $497,462,082.

MOZAMBIQUE, in East Africa (Delagoa Bay, Gazaland, Inhambane, Mozambique, Nyassa, Quilimane, and Tete) has a total area of 300,000 square miles, with a population of 3,539,180. Estimated revenue and expenditure, 1927-28, $299,701,814; total trade, 1926-27 (Imports and exports), $628,961,160. A scheme for a transcontinental railway from *Benguella* (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Buluwayo and eastwards to Beira is being developed under British, Belgian and Portuguese control.

PORTUGUESE INDIA has a total area of 1,470 square miles, with a population of 548,242, and includes Goa, Damaun, and Diu. Estimated revenue and expenditure 1928-9, Rs. 5,169,396; total trade 1926-27, Rs. 20,803,279.

MACAO, in China, on the Canton River, has an area of 3 square miles and a population of 157,178. Estimated revenue and expenditure 1928-29, $39,255,797; total trade 1926-27, *Patacas* 25,057,898.

PORTUGUESE TIMOR (the northern portion of the Island), in the Malay Archipelago, has an area of 7,450 square miles, with a population of 394,528. Estimated revenue and expenditure, 1927-28, *Patacas* 1,288,780 (the budget includes a loan to be realized of *Patacas* 1,120,074); total trade 1926 27, *Patacas* 3,178,439.

---

* The $ (*escudo*) is valued at par at 4*s* 5½*d*; for present Exchange value, *see* p. 412.

§ The total National Debt of Portugal, not including the War Debt, amounted (July 1, 1928) to £107 947,872. Adding £5,500,000 as the current value of the War Debt, and subtracting £43,685,000, the value of the Government holding in the various loans, the figure for the Net Debt would be £63,762,872.

Rumania is a kingdom of South Eastern Europe in the classical *Dacia* and *Scythia Pontica*, the territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians The territory is known as Wallachia (Muntenia and Oltenia), Moldavia, Dobrudja, Bessarabia, Bukovina, Transylvania, with parts of the Banat, Crizana and Maramuresh. The kingdom has its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the *Dobruja* (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912–13. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobruja) frontier in 1913. In the War of 1914–1918, Rumania fought on the side of the Allies from Aug. 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities Her territories were greatly increased as a result of the War, and the *ante bellum* area of the Kingdom (74,461 sq. miles) may now be estimated at 159,269 sq. miles, and the 1915 population of 7,897,311 has been increased to nearly 18,000,000 The dominating religion is that of the Greek (Orthodox) Church

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (96 members) elected for 4 years, and of a Chamber of Deputies (361 members) elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties The executive is entrusted to a council of ministers.

PRODUCTION.—The soil of Walachia, Bessarabia, and Moldavia is among the richest in Europe, and it was stated in August, 1921, that "from a comparative point of view Rumania would probably be one of the first war convalescents to attain complete recovery." The wheat crop for 1927 was 2,632,700 metric tons, rye 236,800, maize 3,533,100, barley 1,261,700, and oats 868,100 metric tons The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries The forests of the mountainous regions are extensive (17,795,353 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica, the workers in the oilfields are the largest single unit of workers in any one industry, the production of crude oil was 1,885,225 tons in 1913, 3,244,415 tons in 1926 and 3,669,354 tons in 1927 Manufactures are in their infancy, and the imports are chiefly manufactured goods, textiles, machinery and metals, the exports consist principally of wheat, barley, maize, oats, petroleum, timber, cattle, salt and hides All large estates have been expropriated and divided among the peasants

DEFENCE.—Service in the *Army* is universal and compulsory In the War of 1914–1918 over 900,000 all ranks passed into the Armies of Rumania, and of this number over 25 per cent were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field. This force was the deciding factor in the Rumano-Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest. There is a small *Navy* on the Black Sea and on the Danube (30 vessels).

EDUCATION is free and nominally compulsory, there being 19,374 schools with 1,612,763 in attendance Secondary schools are well attended. There are also special schools and Universities at Bucharest, Jassy, Cluj, and Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS.—In 1928 there were about 6,900 miles of railway open for traffic in the

whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 23,000 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza, the latter is linked with the interior by a railway

Tiflis Consul,
Vladivostock- Consul,

The Union of Socialist Soviet Republics. The Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Russian Union. The total area of the Union is approximately 7,900,000 square miles, with a population (partly enumerated and partly estimated) in 1925 of approximately 140,000 000, the rural population forming 80 per cent. and the urban 20 per cent. Prior to the War of 1914-18 the *Russian Empire* of the Tsar Nicholas II covered more than 8,500,000 square miles, with a population of about 183,000,000.

The federal system of Russia was adopted by the 10th All-Russian Congress of Soviets on December, 31, 1922, and the constituent Republics of the Union are —

Republic.	Sq miles	Population.
I. R.S.F.S.R.	7,238,533	94,865,174
II. Ukraine	183,655	28,397,000
III. Transcaucasia	74,105	5,938,100
IV White Russia.....	23,022	4,151,076
V. Turkmenistan	159,845	1,100,000
VI. Uzbekistan	212,636	4,400,000
VII. Mongolia	1,360,000	3,000,000
	9,251,796	141,852,350

According to the latest census returns (Jan. 1, 1928) the total population was 146,964,363, of whom 71,010,659 were males and 75,953,707 females The returns include 29,498 persons over 100 years of age (12,340 men, 17,158 women.)

The Union is governed by the Congress of Soviets of the Union, and during the intervals of sessions the supreme authority is vested in the Central Executive Committee of the Union, which consists of the Council of the Union and the Council of Nationalities. The regular session of the Union Soviet Congress is convened by the Central Executive Committee (*"Tsik"*) of the Union once a year. *The Council of the Union* consists of 371 members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics;

At par 25 gas *lei* = £1—Average rate (1927) *lei* 826 75 = £1.

counted in proportion to the population of each republic. *The Council of Nationalities* is formed of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of 5 representatives from each, and of representatives of the autonomous Provinces of the R.S.F.S.R. on the basis of 1 representative from each. The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union.

(The autonomous Republics of Ajaria and Abkhasia and the autonomous Province of Southern Ossetia send one representative each to the Council of Nationalities.)

The regular sessions of the *Tsik* meet three times a year, and in the intervals the supreme authority is vested in its *Presidium*, formed by the *Tsik* of the Union, of 21 members, amongst whom are included the whole of the Union-Council Presidium and the Presidium of the Council of Nationalities.

Chairman of Presidium, Michael Ivanovitch Kalinin (*R.S.F.S.R.*); G. T. Petrovsky (*Ukraine*); M. Musabekoff (*Transcaucasia*); A. G. Tcherviakoff (*White Russia*), M. Artakoff (*Turkmenistan*), M. Khaizula-Khodzhaeff (*Uzbekistan*).

Secretary, A. S. Yenukidsky.

Representatives are elected to the Soviet Congress of the Union by indirect voting, each village *Soviet* sending representatives to a *Volost Soviet*, the *Volosts* to *Uyezd* (district) *Soviets*, the *Uyezds* to Government *Soviets*, and the last-named to the Congress of Soviets of the Union. The cities and townships *Soviets* send representatives to the Congress of Soviets Union on the basis of 1 deputy for each 25,000 electors, whereas the provincial *Soviets* send 1 deputy for each 125,000 inhabitants.

The principal executive and administrative organs of the *Tsik* of the Union are: The Council of People's Commissaries, the Council of Labour and Defence, and the Supreme Court of the Union.

The People's Commissariats of the Union are divided into (1) *Federal* People's Commissariats for the entire Union, and (2) *Joint* People's Commissariats of the Union. *Federal People's Commissariats* of the Union are: (1) War and Marine, (2) Foreign Affairs, (3) Foreign Trade, (4) Transport, (5) Post and Telegraph. The *Joint People's Commissariats* are: (1) Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection. The *Federal Commissariats* have their representatives in the constituent republics, who are directly subordinated to them. The *Joint Commissariats* exercise their functions through corresponding Commissariats of the several constituent republics on their territories.

Each of the constituent republics has within its territory its own Congress of Soviets, its Central Executive Committee (*Tsik*), and Council of People's Commissaries (*Sovnarkom*), the latter consisting of Chairman, Vice-Chairman, and the following Commissaries: (1) Chairman, Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection (all these are subordinate to the People's Commissaries of the Union), (6) Agriculture, (7) Education, (8) Health, (9) Social Welfare, (10) Justice, (11) Internal Affairs (the latter six independent), and also including, with an advisory or deciding vote, according to the decision of the respective *Tsik*, the representatives of Federal Commissariats of the Union, *i.e.*, of Foreign Affairs, Foreign Trade, War and Marine, Transport, Post and Telegraph.

The *Council of Labour and Defence* (*Soviet Truda i Oborony*, or *S.T.O.*) is attached and subordinate to the *Sovnarkom*, and in addition to a general direction of commissariats in their economic and military activity, has the power to ratify statutes of joint-stock companies and trusts.

The *Supreme Court of the Union* is attached to the Central Executive Committee, and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics, (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties. The Supreme Court consists of 11 members.

To the Council of People's Commissaries (*Sovnarkom*) of the Union is attached a Joint State Political Department, formerly known as the *Tcheka*, but since 1922 as the O.G.P.U. (*Obiedinionnoje Gosudarstvennoje Politcheskoje Upravleme*), which is designed to combat political and economic counter-revolution, espionage and brigandage. The Chairman of the O.G.P.U. is a member of the Council of People's Commissaries of the Union. The O.G.P.U. is directed by special rules and regulations, which have not been promulgated. The control of the legality of the acts of the O.G.P.U. is exercised by the Attorney General of the Union in accordance with a special decree issued by the *Tsik*.

I. SOVIET RUSSIA.

Rossijskaia Socialistieeskaia Federativnaia Sovet-skaia Respublika—The Russian Socialist Federal Soviet Republic.

President of the Council of the People's Commissaries of R.S.F.S.R., A. I. Rykoff
Chairman of Supreme Council of National Economy, S. S. Loboff.
Finance, I. A. Milutin.
Agriculture,
Internal Trade, N. B. Eismont
Labour, A. M. Bakhutoff
Internal Affairs, A. Beloborodoff.
Justice, D. J. Kurski.
Education, A. V. Lunacharski.
Health, N. A. Semashko
Social Welfare, I. A. Nagovitzin
Workers' and Peasants' Inspection, N. J. Ihin.

The R.S.F.S.R. consists of 50 Governments and includes 11 Autonomous Republics and 10 Autonomous Provinces, *Autonomous Republics*: Bashkir, Tartar, Kirghiz, Mountain, Daghestan, Turkestan, Crimea, Yakut, Karelia, Buriat-Mongol and Volga Germans. *Autonomous Provinces*: Chuvash, Kalmuck, Mari, Votiak, Zyrian (Komi), Oirad, Kabardian-Balkarsk, Karachai-Circassian, Adighe-Circassian, Tchetchen. From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones," the *Black Soil Zone* being subdivided into (1) Central Agricultural Region, (2) Middle Volga Region, (3) Lower Volga Region, (4) Northern Caucasus, (5) Siberia, (6) Kirghiz Autonomous Republic, (7) Crimea; while the *Other Zones* are (1) Western Region, (2) North-Western Region, (3) Central Industrial Region, (4) North-Eastern Region, (5) Basins of the rivers Viatka and Vetluga, (6) Ural.

Government —The *Soviet* Government, although composed of representatives indirectly elected by the masses, cannot be called representative, as no provision is made for "the opposition" to the executive power; and although the rural population (i.e., 80 per cent of the population) elects usually a very small number of Communists (=*Bolsheviks*), nevertheless the Congress of the *Soviets* consists almost entirely of Communists. As to the cities and towns, only candidates nominated or approved by the *Bolsheviks* can succeed in these elections. Under *Soviet* rule individual liberty is considerably less than in the time of Tsardom, while freedom of speech and the liberty of the Press are definitely denied to the people.

Local Government was, and still remains, highly developed. The villages in Imperial Russia had their assemblies (*skhod*) under the presidency of a mayor (*starosta*), they were grouped into "volosts," the latter into districts (*uyezd*), and these into governments (*gubernya*). The districts and governments had their elective councils (*zemstvos*) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was disposed of in return for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*); but in many cases the local authority of such municipalities and local land councils (*zemstvos*) was overshadowed by the superior authority of the *bureaucratic* governor. After the Revolution, the village and other administrative units set up *soviets* of workers and peasants, and the provincial councils send representatives to the All-Russia Congress, municipalities having a double representation from their own *soviet* and from that of the province (or district) in which the municipalities are situated.

Education —Under the Bolshevik *régime* popular education is administered by a commissary, in whose charge have been placed all educational institutions, theatres, museums, and galleries. Beyond this, the State has monopolised the photo-cinematographic industry and the publishing of manuals for schools of all types; and as the *Soviet* Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching, but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued. Generally speaking, only children of workers and officials are allowed to attend the primary schools in towns, and only those who belong to the Communist youth or are members of the Communist party may enter secondary school and universities; exceptions to this rule are reduced to the minimum. The average salary of a village schoolmaster does not exceed £2 a month, which very often is not paid regularly. Very often professors of universities and higher schools get a remuneration of £4 to £7 a month. Only schools established by the Communist party for special party purposes are well supplied in every regard. In 1926 there were stated to be 8,000,000 pupils in the 96,000 elementary and secondary schools, and about 2,000,000 in 6,000 advanced and technical schools; while there are two universities in Moscow and 21 in other large centres.

Religion —The Orthodox Church was disestablished by the *Bolsheviks* and all its property confiscated. All ecclesiastic schools, seminaries and academies have been abolished, and the teaching of religion to persons under 18 years of age forbidden. But the law does not forbid the exercise of religion, and churches remain open in virtue of contracts concluded between the congregations and the local authorities. A recent questionnaire addressed to the soldiers of the Red Army shows that 70 per cent. of them believe in a Deity. The clergy live on voluntary donations from their parishioners. On Feb 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar.

Soviet Union Budget, 1927-28.

	Roubles
Revenue:—	
From Taxation	2,743,200,000
Posts and Telegraphs	168,500,000
Railways, &c.	1,693,600,000
State Trade	281,100,000
Banks	78,200,000
Forests	230,400,000
Mines	65,000,000
Other Properties	30,200,000
Concessions	4,500,000
Miscellaneous	90,200,000
Loans	500,000,000
Balance from 1925-26	30,000,000
Total	5,915,500,000
Expenditure:—	
Government	273,800,000
Defence	822,800,000
Posts and Telegraphs	173,500,000
Railways	1,961,300,000
Unemployment	11,900,000
Propaganda	10,100,000
Debt Service	248,000,000
Miscellaneous	105,300,000
Subsidies	1,095,100,000
Grants to Republics	573,800,000
Grain Purchases	22,000,000
To Reserve	80,000,000

Debt —The outstanding Foreign Debt of Russia on Jan 1, 1917 (before the Revolution), may be stated as under:—

	Debt.
To Great Britain	£622,674,406
To France	*Francs* 3,050,000,000
To U.S.A.	$282,000,000
To Japan	*Yen* 256,000,000
To Italy	*Lire* 36,123,836

Since the revolution various internal loans have been raised, and these were stated to amount on March 1, 1928, to 1,019,000,000 gold roubles, in addition to loans guaranteed by the State of 322,000,000 gold roubles.

Defence.—The *Red Army*, recruited by universal military service, consisted in 1928 of about 800,000 all ranks, including 37 cavalry brigades of about 3,000 men, and about 30,000 sailors serving on land. It was reported that the *Red Air Fleet* was to comprise an organisation of 10,000 aeroplanes for the year 1924; in 1926 it was stated to consist of less than 100 aeroplanes. The *Red Navy* is believed to consist of 2 Dreadnought battleships launched in 1911, 4 old cruisers, 13 destroyers, and 8 submarines.

Agriculture.—The total area under cultivation in 1925 26 is officially stated at 107,172,000 hectares, of which 90,819,000 were under grain, 1,584,000 flax, and 687,000 cotton. The gross yield in 1925-26 was 743,309,000 quintals of grain, 6,586,000 of flax seed, 2,905,000 flax fibre, 4,510,000 hemp, 1,485,000 cotton, and 66,089,000 sugar beet. The *Live Stock* in 1925–26 included 25,768,000 horses, 51,988,000 cattle, 81,938,000 sheep and goats, and 15,599,000 pigs.

The *Soviet* Board of Statistics publish the following particulars of the grain harvests of 1926 and 1927:—

Crop	*Millions of double cwt.*	
	1926	1927
Winter Wheat	77·2	69·2
Summer Wheat	145·9	111·8
Rye	229·4	245·8
Barley	55 2	46·8
Oats	143·4	130·4
Maize	36 9	37 8
Millet	33 0	36 8
Buckwheat	18·9	19·4
Other Cereals	23·4	20·4

In 1927 the cultivated area showed an increase of 2·6 per cent. over the area cultivated in 1926. The total given of cereals in 1926 was 783 million double cwt, of which 762·8 were from peasants' land and 20·2 from Soviet farms. In 1927 the total was 760·7, of which 741·3 was from peasants' land and 19·4 from Soviet farms.

Industry.—The natural riches of Russia in coal, iron-ores, copper, manganese, gold, platinum, timber, naptha, and so on, are enormous. Russia represents a wide field for investing capital in industry, and in the last two decades before the war already attracted considerable internal and foreign capital. The value of the industrial output in 1923-24 is stated at 3,414,000,000 roubles, 1924-25 at 5,040,000,000, and 1925-26 at 6,923,000,000 roubles (at pre-war prices).

The mineral production in 1925-26 is stated at 24,431,000 tons of coal, 8,461,000 mineral oil, 2,197,000 pig iron, 2,892,000 open hearth steel, 2,090,000 rolled metal, and 1,257,000 tons of cement. Other industrial production is stated at 1,981,000 metres of cotton fabrics, 63,100,000 metres of wool fabrics, and 170,000,000 square metres of linen fabrics. The number of workers regularly employed in "big State" industry in 1925-26 was stated at 1,904,000 (1,530,000 in 1924-25), in addition to seasonal workers numbering 587,000.

External Trade.—The external trade of 1926-7 is stated as under in *roubles*.—

Exports from Russia to	Countries.	Imports into Russia from
..	Australia	15,600,000
13,200,000	Belgium	1,100,000
2,200,000	Czechoslovakia	10,800,000
9,900,000	Denmark	1,000,000
5,900,000	Egypt	20,800,000
6,900,000	Estonia	3,600,000
10,500,000	Finland	17,700,000
54,100,000	France	21,700,000
167,300,000	Germany	157,700,000
197,500,000	Great Britain	97,100,000
37,700,000	Italy	3,200,000
57,400,000	Latvia	1,600,000
23,200,000	Netherlands	4,900,000
19,500,000	Poland	13,100,000
6,200,000	Switzerland	11,800,000
17,300,000.?	U.S.A.	143,000,000
678,200,000	Total	623,800,000

Board of Trade figures for transactions between Russsia and Great Britain:—

	1926.	1927.
Imports from U.K	£5,858,000	£4,513,000
Exports to U.K	24,130,000	21,057,000

Of the produce exported, *grain* was sent principally to Great Britain, Netherlands, Italy, France, and Finland; *timber* to Great Britain, Germany, Netherlands, and Latvia; *flax* to Great Britain, Belgium, France, Latvia, and Estonia; *oil* to Germany, Great Britain, France, Egypt, and Netherlands; *furs* to Great Britain, Germany, Latvia, Poland, and U.S.A., *manganese ore* to Italy, Germany Netherlands, and Turkey; *cotton fabrics* to Persia, China, and Mongolia; *sugar* to Persia. Of the produce and manufactures imported, *hides* come from Germany, Great Britain, and Finland; *coal* from Great Britain; *rubber* from Great Britain; *chemicals* from Germany, Great Britain, Belgium, U.S.A, and Sweden; *iron and steel products* from Germany and Great Britain, *agricultural machinery, &c*, from Germany, U.S.A., Austria, Great Britain, Sweden, and France, *motor-cars* from Germany, U.S.A., and Great Britain; *cotton* from U.S.A, Great Britain, and Germany, *wool* from Great Britain, France, Germany, and Finland.

Communications.—In 1925-6 there were 74,429 kilometres of railway line in operation, and 807 kilometres under construction (to be finished during the financial year 1926-7), with 20,456 locomotives and 449,500 goods and passenger wagons. In 1925-6 there were about 1,045,292 employés on the railways. The lines under construction in 1925-6 were Nijni-Novgorod—Kotelnich (379 kilometres), Petrovsk—Blagodarny (68), Uzlov—Venyev (42), Petropaulovsk—Shuche (266), and Teberdinsk (52). In 1926-7 construction was to be commenced on lines Termez—Dushambe (capital of Tadzhik), Kuznetsk—Telbes, and Magnitnaya—Troitsk—Orsk. The principal railway lines are the main *European* network from Leningrad, through Moscow to Astrakhan and across the Urals *vid* Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus, the *Trans-Siberian Line* from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok, where a northward extension runs to Khabarovsk. The *Amur Railway* connects Stryetensk with Khabarovsk, and the Trans-Siberian line thus connects the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv, Bokhara, Samarkand, Khokand and Andijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent Line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the Trans-Caspian system. The *Trans-Caucasian Line* runs through Georgia, Azerbaijan and Armenia, *vid* Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiflis branches run to Kars, and *vid* Erivan to Mount Ararat on

the Armenian frontier, and to the Persian frontier at Julfa. There are in the *Soviet* Union (1923) 164,793 miles of navigable rivers and canals and lakes, of which 103,935 miles are within European Russia, and 60,858 in Asiatic Russia; of the total about one fourth of the distance is navigable by steam vessels, a further eighth by sailing vessels, and nearly one-half by rafts. In 1923 the ships and rafts carried over 10,000,000 tons of goods and 8,218,356 passengers. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Sevastopol and Novorossiysk (Black Sea), Archangel on the White Sea and Ekaterinmsk in the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropaulovsk in Kamtchatka.

Capital.—On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1923 of about 1,700,000. LENINGRAD (before the war "St. Petersburg," and until the death of Lenin, "Petrograd"), the former Capital, founded by Peter the Great on the banks of the Neva in 1703, had a population in 1925 of about 1,000,000. Other centres are Saratov (190,000), Rostov (177,000), Samara (150,000), Nijni-Novgorod (84,000), Voronezn (200,000), Kazan (147,000), Krasnova, formerly Ekaterinodar (143,000), Astrakhan (123,000), Orenburg (109,000), Irkutsk (104,000), Tomsk (90,000), Omsk (144,000), Taskent (200,000), Kokand (112,000), Samarkand (87,000), Vladivostok (100,000). Archangel had about 40,000 inhabitants in 1920.

II.—THE UKRAINE.

(Ukraina.)

President, V. J. Tchubar.

On Nov. 21, 1917, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia," and Podolia and Volkynia in "West Russia"), was encouraged by Germany to declare itself independent as the *Republic of the Ukraine*. The new Republic was invaded by Germany in 1917-18, and subsequently overrun by Bolshevik forces, and a military and economic alliance was concluded between *Soviet* Russia and the *Ukraine Socialist Soviet Republic* (Dec. 28, 1920). The majority of the inhabitants belong to the Greek Orthodox Church. The chief town and seat of government is Kharkoff (pop. 1923, 312,000), other large centres being Odessa, the great port on the Black Sea (with a population in 1923 of 376,000), Kieff (pop. 1923, 406,000), Ekaterinoslav (pop. 1923, 127,000), Nikolayev (81,000), Poltava (88,000), and Taganrog (100,000). The Ukraine is the great cereal-growing district of Russia, and before the Great War the harvests exceeded 1,000,000,000 poods; during the Civil War the production was reduced to 385 million poods, but in 1923 it had increased to 700 millions. In 1922-3 there were 112 sugar-beet factories (200 in 1915) producing 10,000,000 poods (500 millions in 1914-15). The Ukraine also contains large deposits of iron ore and coal, and is the principal source of the European supply of quicksilver. Agriculture is the principal industry, and there are large iron and steel works. Before the Great War the exports from the Ukraine (grain, sugar, hides, bristles, quicksilver, and wool) were of the annual value of about £75,000,000, and the imports (manufactured goods and machinery) about £50,000,000. The Budget of 1923 showed a surplus of 46,000,000 *gold roubles*.

CAPITAL, Kharkoff. Population (1923), 312,000.

III. TRANSCAUCASIA.

(Zakavkarskaya F.S.S.R.)

President of the Council of People's Commissars, M. D. Orakhelashvili.

The Transcaucasian Federation consists of three Socialist Soviet Republics:

Republic	Sq. miles	Population
Armenia	15,065	1,330,969
Georgia	25,470	2,235,034
Azerbaijan	33,570	2,463,098
	74,105	6,038,100

Armenia, or Hyastan.

(S.S.S.R.A.)

President of the Council, M. S. Hambartsumian.

Armenia occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great War it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,518 sq. miles). The rivers Euphrates, Tigris, Aras, Kur, and Tchorokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is *Mount Ararat* (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy); more than half the supply of copper from Russia was derived in 1914 from *Soviet* Armenia, and the value of carpets manufactured in 1914 exceeded 10,000,000 *gold roubles*. The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the *vilayet* of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently occurred. In 1915-17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia*. Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the *Armenian*

Socialist Soviet Republic, on the lines of the Moscow government

CAPITAL, Erivan. Population (estimated), 90,000 Leninkan (formerly Alexandropol) had 50,000 inhabitants in 1925

Georgia, or Sakartvelo.
(G.S.S.R.)

President of the Council, M Ivanoff Kavkazsky

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhasia and Adjaria), and one autonomous Province (Southern Ossetia).

Georgia, a former Kingdom in Transcaucasia with a history of more than 2,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783. At the beginning of 1918 it regained its independence, but in 1921 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation. *Soviet Georgia* is bounded on the N by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W by the Black Sea There are 970 miles of railway, the trunk line connecting the Black Sea ports of Poti and Batoum with Baku, on the Caspian. Batoum and Baku are also connected by a petroleum pipe-line The manganese ore beds are the richest in the world, more than one-half of the world's supply being derived from the Tchiatury mines (in the district of Sharopausky) in 1914 There are also abundant supplies of coal (5 million poods in 1914) and over 500 mineral springs partly unexploited Wine is produced in considerable quantities, and the tobacco plant (chiefly in Abkhasia) yielded 800,000 poods in 1914, a great deal of which was imported by Egypt and produced as local grown. Timber (especially box) is an important industry Oil wells with improved quantities of crude oil have been discovered in many places, particularly in the Shirak Steppe The chief town and seat of government is Tiflis, population (1925) 400,000; the administrative centre of Abkhasia being Sukhum (62,000), and of Ajaria, Batum (32,000); other large centres being Kutais (54,000) and Poti (21,000).

CAPITAL, Tiflis. Population (1925), 400,000.

Azerbaijan.
(A.S.S.R.)

President, M. Musoabekoff.

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south, and from the Caspian on the east to Armenia and Georgia It includes the provinces of Baku, Hanjin (Elisavetpol), the district of Zakatbal and the autonomous territories of Nakhitchevan and Nagorno-Karabach. More than 75 per cent. of the people are Muhammadans. The *Azerbaijan Socialist Soviet Republic* entered the Union as a Member of the Transcaucasian Federation on Dec. 31, 1922. The Republic is very rich in minerals (naphtha, magnetic ironstone, and manganese), but oil is the principal industry, concentrated in the Baku region, the production being 466,800,000 poods in 1914, and 213,000,000 poods in 1922 3 Fishing is also important, and 15,000,000 poods of caviare were produced in 1922. The principal crop is cotton.

The CAPITAL is Baku (pop. 237,000) on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batum (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Hanjin (65,000), Kuba (40,000) and Noucha (50,000).

IV.—WHITE RUSSIA.
(Byelorussiya.)

President (and Chairman of the Central Executive Committee), A G. Tchervyakoff

The independence of White Russia was recognised by *Soviet* Russia in 1919, and a military and economic alliance was concluded Jan 16, 1921. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghilev The political neighbours are Lithuania and Poland on the west, and the Ukraine on the south. The capital is Minsk (pop 118,000), where there is a University founded by the *Soviet* Government, other towns are Bobruisk (41,000) and Moghileff (40,000).

CAPITAL, Minsk. Population, 118 000

V.—TURKMENISTAN
(T.S.S.R.)

President, M Atabaieff

Turkmenistan is bounded on the west by the Caspian Sea and on the south by Persia, with Afghanistan as a south-eastern neighbour. Eighty-five per cent. of the inhabitants are Muhammadan Turkomans, with about ten per cent. Muhammadan Uzbegs and five per cent Russians of the Orthodox faith The seat of administration is temporarily at Poltarask (formerly Achabad), until removal to Lenmsk (20,000), other centres being Merv (15,000), and Karichi (30,000) Krasnovodsk is a port on the Caspian and a railway terminus on the Trans-Caspian line

CAPITAL, Poltarask (26,000)

VI.—UZBEKISTAN.
(U.F.S R.)

	Sq miles	Population.
Bokhara . .	85,000	2,650,000
Khiva	26,000	900,000
Tadzhik	101,636	750,000
	212,636	4,300,000

President, Achun Babaieff

Bokhara lies between Turkmenistan (on the W.), the Kara Kalpak territory of the R S F S.R. (on the N), and is bounded on the south by Afghanistan. The majority of the inhabitants are Muhammadan Uzbegs. The former capital (Old Bokhara) is a station on the Russian Trans-Caspian Railway The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A *Soviet* Republic of Bokhara was established and its independence was recognised by *Soviet* Russia by treaty of March 4, 1921

Khiva, or *Khorezm*, formerly the Khanate of Khiva, lies between Bokhara and the Kara Kalpak territory of the R.S F.S R, and has a population of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly productive (rice, wheat, cotton, silk, fruit, hemp),

Tadzhik.—The autonomous Soviet State of the Tadzhik lies between Bokhara (on the W.) and the Kara Kirghiz territory of the R.S.F.S.R., with Afghanistan as a southern neighbour. The inhabitants are largely nomads, and almost all are Muhammadans. CAPITAL OF UZBEKISTAN, Samarkand (population 85,000), other towns: Taskend (245,000), Andijan (80,000), Bokhara (75,000), Kokand (121,000), Namagan (71,000). Khiva has about 10,000 inhabitants.

VII.—MONGOLIA.

Mongolia, formerly part of the Chinese Empire, has an estimated area of about 1,360,000 square miles, and a population of 3,000,000 to 5,000,000, of whom the greater number are Buddhists. In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and the Russian Union (in treaty with China) declared a protectorate over Mongolia in 1924.

North-West (or Outer) *Mongolia* covers an area of about 360,000 square miles, and consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the head-waters of the Yenisei, the Irtish and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides and skins, and gold. The chief centres are Urga (Kuren), Uhassutai, and Kobdo, all of importance as trading centres on the main caravan routes.

Inner Mongolia covers an area of about 1,000,000 square miles and includes the *Gobi* ("Desert"), or *Sha-mo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwang-ho river. In the north-east of Inner Mongolia rises the Keru-lun, which flows into the Dalai Nor, in Manchuria. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi, the general direction of the caravan routes being from south-east to north-west. The principal centres are: Kalgan, Kuku-khoto, Kuku-erghi, Dolon-Nor and Biru-khoto. In the north-east, Keru-lun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechili and the western route from Urga, in N.W. Mongolia.

Russian Protectorates.—The Russian Protectorate recognises three areas in Mongolia, viz., *Inner Mongolia*; *North-West or Outer Mongolia*, with administrative centre at Urga, re-named Ulan-Butor-Khoto (Town of the Red Knight); and *Tannu Tuva*, which is part of North-West Mongolia, between the Sayan and Tannu Ola ranges, with administrative centre at Chem Belder, or Krasny (Red Town).

SALVADOR.

(República de El Salvador.)

President (1927-1931), Señor Dr. Don Pio Romero Bosque, *assumed office* March 1, 1927.
Vice-President, (vacant).
Foreign Affairs, Education, Justice, Charity and Health, Señor Dr. Don Francisco Martinez Suarez.
Interior Development, Agriculture and Labour, Señor Dr. Don Manuel Vicente Mendoza.
Finance, Industry and Commerce, Señor Don José E. Suay.
War, Marine and Aviation, Señor Dr. Don Alberto Gomez Zárate.

Envoy Extraordinary and Minister Plenipotentiary to Gt. Britain, Señor Dr. Don Antonio Reyes-Guerra, 95 99 Lancaster Gate, W. 2.
Consulate-General, 7 Union Court, Old Broad Street, E.C. 2.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 13,176 square miles, with a population estimated in 1925 at 1,634,210. It is divided into 14 departments. In 1925 there were 57,352 births and 32,870 deaths.

Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States. The government is based upon a written constitution and is composed of (*a*) the Executive power, which is exercised by the President, (*b*) the Legislative power, which is in the hands of the National Assembly, and (*c*) the Judicial power, which rests ultimately with the Supreme Court. Elections take place once every four years, and the President is ineligible for a successive term.

The surface of the country is very mountainous, many of the peaks being volcanoes. The highest peak is the Santa Ana volcano (8,300 feet). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services. There is a wet season (winter) from May to October, and a dry season (summer) from November to April. Earthquakes have been frequent in the history of Salvador, the most recent being that of 1919, when great damage was done to the capital and other towns.

The principal river is the Rio Lempa. There is a large volcanic lake (Hopango) a few miles to the east of the capital, while further away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the present Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The lighthouse of the Pacific."

The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as maize, indigo, rice, balsam, &c. Cotton-growing on a large scale was commenced in 1924, but on account of the ravages

wrought by insects it was practically abandoned after two seasons. In the lower altitudes towards the east henequen is produced. The principal exports are coffee (80 per cent. of total value), sugar, indigo, balsam, henequen, hides and skins The chief imports are cotton textiles, flour, iron and steel goods, lard, motor cars, manures, jute sacks and chemical products

The total length of the railways is 346 miles; a British railway nearly 100 miles in length connects Acajutla with the capital and with the important coffee centre of Santa Ana. A line from the port of La Union (on the Gulf of Fonseca) to the capital was opened in 1922. Two new lines were opened in 1927, one from the Capital to Santa Lucia, a suburb of Santa Ana, tapping the upper Lempa Valley, the other from the coffee centre of Ahuachapan to Santa Lucia. Construction of a new line from Santa Lucia to Zacapa (in Guatemala) is in progress. During 1924-26 the re-draining and re-paving of most of the capital were completed, and plans have been made for the macadamizing or paving of several hundred miles of rural roads, many of which are now impassable during the rainy season. There is a good motor road between the port of La Libertad and the capital, while motor transportation is usually possible between the capital and Guatemala City, over the International road opened in 1923

There are 197 post-offices and 255 telegraph offices. There is a wireless (receiving and transmitting) station at the capital, and during 1926 a broadcasting station was inaugurated.

The language of the country is Spanish.

	1927
Revenue	£2,051,449

SAN MARINO.

Regents, Two "Capitani Reggenti"
Consul-General for San Marino in Great Britain, Grand-Uff. Melvill A. Jamieson, F R.G.S., 42 Pall Mall, S W. 1.
Vice-Consul, Comm Giovanni Soviani.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 38 square miles, the population 12,952 There is an army of about 1,000. The city of San Marino (pop 2,000) occupies the slope of Mount Titano, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A D, a fine church and Government palace, and a theatre The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utilization and export of gravel from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 16, 1899.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre)

British Consul-General, D. F. S. Filliter (Leghorn, Italy)

SARRE TERRITORY.

Under the *Treaty of Versailles* Germany renounced the government of the Sarre Basin in favour of the League of Nations, the government being entrusted to a commission of 5 members nominated for one year by the League At the expiration of 15 years from Jan 10, 1920, the population will be called upon to decide by a plebiscite the government under which they wish to be placed. The total area is about 743 square miles, with a population of about 713,000 The chief towns are Sarrebruck (117,000), Neunkirchen (35,000) and Saint Ingbert (18,000).

SERBIA. *See* Yugoslavia.

SIAM.

(Muang T'ai.)

King, Prajadhipok, *born* Nov. 8, 1893; *succeeded* Nov. 26, 1925.
Foreign Minister, H.H. Prince Traidos.

Envoy Extraordinary & Minister Plenipotentiary in London, H.S H. Prince Varnvaidya, 23 Ashburn Place, S.W. 7.

The Kingdom of Siam, or Muang T'ai (area about 195,000 square miles; population, 1923, 9,513,000), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. The King is an absolute monarch, and appoints his successor. There is an Executive Council of Ministers with an adviser in Foreign affairs (usually of American nationality), and a Financial adviser (hitherto always of British nationality), and, since 1895, a Legislative Council of State, consisting of the Ministers, eight royal princes, and over twenty members appointed by the King, who has an absolute power of veto. There is also a Supreme Council of Five which advises the King in important matters. A

number of English, French, Italians, Danes, and Americans are employed in the various State departments. There is an army of nearly 50,000 men, and a few small gunboats; compulsory military service has been introduced. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,800 Europeans. The principal religion is Buddhism. There are 364 Government schools and 4,124 schools of all kinds, attended by 448,380 children. The Chulalankarana University is organised with faculties of medicine, political science, engineering, and literature and science.

The upper part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Eighty-five per cent. of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping, which had held the lead in tonnage for many years past, has ceased to visit Bangkok since August, 1914, and, as a consequence, there has been a large increase in Norwegian and British shipping. The chief products of Siam are rice, teak, and tin (from Lower Siam). The area under rice is being much enlarged by irrigation. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1926 27 rice constituted 69 14, tin 9·52 and teak per 3 47 per cent. of the exports from the port of Bangkok; while hides and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 3 per cent. *ad valorem*. Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies and sapphires, there are no important mineral products as yet. About 1,640 miles of railroads (mostly State-owned) are now open for traffic. Railways from Bangkok run to Saraburi (260 miles N.E.), with an extension (23 miles) to Tha Chang, Chiengmai (462 miles N. of Bangkok), Krabinburi (100 miles E.); the southern line to Trang, on the west coast of the Malay Peninsula, was open to traffic in October, 1916, and in July, 1918, was completed to the Kedah border where junction with the Federated Malay States Railway system was effected. There is through railway connexion between Bangkok and Penang and Singapore, and the railway is being extended from Petriv to the Cambodian frontier. Good roads are few. There are 4,000 miles of telegraph lines.

Consul-General, Illmo. Señor Don Enrique Gaspar, 47 Bloomsbury Square, W.C. 1.

Vice-Consul, Señor Don Pedro Lecuona.

A Kingdom situate in the south-west of Europe, between 36° 43′ 45″ N. lat. and 4° 25′ E. 9° 20′ W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,327 miles 712 formed by the Mediterranean and 605 by the Atlantic and it comprises a total area of 196,700 English square miles, and an estimated population, in Jan. 1924, of 21,763,000 —110 to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges —the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadal-

quiver, the Ebro, and the Minho The Constitution upon which the present Government is formed is dated June 30, 1876. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits as olives, oranges, lemons, almonds, pomegranates, and dates The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality The vine is cultivated in every province, in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the War, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1923 there were about 10,000 miles of railway open, and 69,400 miles of telegraph line The sea-going mercantile marine over 50 tons, on Jan. 1, 1923, consisted of 1,198 steamers (1,008,890 tons) and 591 sailing vessels (97,491) In 1923, 19,500 vessels of 24,584,581 tons (displacement) entered and 16,913 vessels of 20,773,523 tons (displacement) cleared at Spanish ports

Defence The authorised peace establishment, including forces in North Africa, was, in 1923, 19,827 officers and 284,212 men; in 1924 these forces were increased by 100,000 men, and the army of occupation in North Africa reached the figure of 250,000 all ranks. War strength. Field Army, first line, 300,000; second line, 450,000.

The Navy consists of 3 (25,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers; there are also 7 torpedo boat destroyers, 20 torpedo-boats, 7 submarines, and 21 gunboats.

Education, Primary, is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Many private schools are under clerical control, and supervision is lacking. *Secondary* High Schools are in each province, but the curriculum is defective. *Universities* at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid

	1926-27. *Pesetas.*†

BRITISH CHAMBER OF COMMERCE FOR SPAIN, 8 Rambla de los Estudios, *Barcelona* (Branch, 9 Calle Marqués de Cubas, *Madrid*).
Madrid, 1,150 miles; transit, 45 to 50 hours.

The BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Iviza, and Formentara; the total area is 1,935 square miles, with a population (1923) of 342,462. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CEUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of 35,219.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 473,497. The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Teneriffe.

Spanish Colonies.

The Spanish Colonies (exclusive of Ceuta and the Canary Islands, which form an integral part of the kingdom) consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

FERNANDO PO (*Fernando Póo*) lies in the Bight of Biafra in 3° 12′ N. lat and 8° 48′ E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. Total population 20,650. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies of the island of Fernando Po are:

Annobon Island (*Anno Bom*), in the Gulf of Guinea, in 1° 24′ S. lat. and 5° 35′ E. long.; population 1,391.

Corisco Islands, consisting of Corisco, Bata, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce. Total population 96,072.

RIO DE ORO is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between 21° 20′-26° N. lat., and extending eastwards to about 13° W. long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs; population 253.

Rio Muni (or *Spanish Guinea*) is a coastal settlement of West Africa between Cameroon and French Congo (1° N. 2° 10′ N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast.

SPANISH MOROCCO. - Spain exercises a protectorate over a part of Northern Morocco (*see* "Morocco") and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements

Melilla is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. The population is 50,170.

Alhucemas is a settlement on the bay of that name, and includes six islands; population 322.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 398.

Spanish Southern Morocco. Ifni, on the Atlantic coast of Morocco, about 200 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 318.

THE SUEZ CANAL.

The Suez Canal.—The *Compagnie Universelle du Canal Maritime de Suez* (1 Rue d'Astorg, Paris VIII) is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1928, £51,476,876). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a minimum width of 45 metres (147 ft. 8 in.), having cost 864,196,095 francs to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 9·75 metres (32 feet). The average time for the transit through the canal is 15 hours. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is en-

trusted to a council of 32 administrators, of whom 10 are British (three representing H M Government and seven the shipowning interest)

British Commercial Directors, Viscount Inchcape, P.C., G.C.S.I., G.C.M.G., K.C.I.E (*Vice-President of the Company*); Sir Alan G Anderson, K.B.E; Sir Aubrey Brocklebank, Bt; Sir John Cadman, K.C.M.G., Rt. Hon Sir R. S Horne, G.B.E., K.C., M.P., T Harrison Hughes; Sir E Wyldbore-Smith.

Representing H.B.M. Govt., Sir Ian Malcolm, K.C.M.G; Sir J T. Davies, K.C.B, C.V.O., The Earl of Cromer, G.C.I.E, G.C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1917, with the percentage of British vessels :—

Year	No of Vessels.	Net Tons	British Tonnage.
			%
1917	2,353	8,368,918	73·6
1918	2,522	9,251,602	79·5
1919	3,986	16,013,802	70·9
1920	4,009	17,574,657	61·7
1921	3,975	18,118,999	62·9
1922	4,345	20,743,245	64·5
1923	4,621	22,730,162	62·8
1924	5,122	25,109,882	59·7
1925	5,337	26,761,935	59·9
1926	4,980	26,060,377	57·4
1927	5,545	28,962,043	57·1

The tonnage of the *merchandise* carried was 25,776,000 tons in 1913; 17,047,000 tons in 1920, and 29,500,000 tons in 1927. Details of the nationality of the vessels passing through the Canal in 1927 are appended :—

	No. of Vessels.	Net Tons	Per cent (Tonnage).
British	3,085	16,534,445	57·1
Netherlands	575	3,024,848	10·5
German	529	2,763,783	9 6
French	343	1,807,431	6·2
Italian	332	1,514,453	5·2
Japanese	152	914,424	3·2
United States	111	682,214	2·4
Norwegian	142	669,797	2·3
Swedish	72	325,911	1·1
Danish	65	291,889	1·0
Greek	66	196,411	0·7
Belgian	24	96,548	0·3
Russian	13	59,019	0·2
Spanish	11	30,160	0·1
Yugoslavian	7	28,704	0·1
Finnish	2	7,548	0·03
Turkish	6	5,987	0·02
Portuguese	1	5,461	0·02
Egyptian	4	4,491	0·01
Ecuadorian	2	3,226	0·01
Czechoslovakian	1	1,344	0 004
Argentine	1	1,147	0·004
Siamese	1	807	0·003
Totals	5,545	28,962,048	100·000

The transit receipts in 1870 were 5,718,756 fr., and in 1927, 208,685,837 fr.

The rate of transit dues as from April 1, 1928, is 7 fr per ton, and 4 fr 50c. for vessels in ballast.

The net dividends for the year 1927 amounted to 455 fr. on the ordinary 250 fr. shares, and 448·045 fr. on the Actions de Joussance.

The 5,485 vessels included in the total for 1927 are grouped under the following categories .—

	No.	Net Tonnage
Merchant vessels	3,344	16,498,918
Mail steamers	1,392	8,849,014
Warships and transports	233	1,032,755
Government chartered vessels	55	357,934
Vessels in ballast	521	2,223,427
	5,545	28,962,048

SWEDEN.

Chancellor, O. Gad.
Swedish Church, Harcourt Street, Marylebone Road, W. 1.

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Lan," with an area of 173,105 square miles, and a population, Dec. 31, 1927, of 6,087,923, nearly all Protestant This area includes the great lakes of Hjalmaren, Vanern, Vattern, and Malaren. Nearly 40 per cent. of the population are devoted to agriculture, about 240,000 being owners and 57,000 tenants of the land they cultivate The country may be divided into three separate districts, the northern,

forest; central, mining and agricultural; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, rye, wheat, barley, potatoes, roots and grasses. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphite and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich: iron of excellent quality, lead, zinc, sulphur, manganese, arsenic, granite, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic, coal is being worked in Scania (Skåne). The chief imports are coffee, tobacco, and other ordinary colonial produce, corn, coal, machinery, motor cars, mineral oils, cloth, cotton, wool, manures, skins, iron, copper, and yarn. The chief articles of export are timber, wood pulp, paper, machinery, iron ore, matches, butter, pork, and stone. In 1927 the exports of wood pulp and paper were 1,880,000 tons.

Railroads 10,110 miles in length (of which 3,870 are the property of the State) were open on Jan 1, 1928, and 49,125 miles of telegraph wires (inclusive of 21,380 railroad telegraph wires). 143 control stations, and 1,943 railroad and 1,574 other telegraph stations. There were at the same date 533,930 miles of telephone wires.

Defence.—Service in the *Army* is universal and compulsory, about 27,400 being trained annually; war strength about 400,000. The *Navy* consists of 70 fighting vessels (340 guns), 11 being ironclads, with submarines, and some training ships, &c.

Education.—(i.) *Primary:* Compulsory and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce, and navigation. (iv.) *Universities:* Uppsala, Lund, and private faculties in Stockholm and Gothenburg.

	1927-8.	1928-9.

and Secretary and Acting Commercial Attaché, M. Clement Rezzonico.
Chancellor, M. Paul Hilfiker.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50′–47° 48′ N. lat and 5° 58′—10° 30′ E long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 3,886,090 in 1920, who are divided between Roman Catholics, 41 per cent., and Protestants, 57 per cent, Jews numbering 21,000, and others 43,000 The population is formed by three nationalities, distinct by their language, 18 German 71 per cent, French 21 per cent, Italian 6 per cent, and Romansch (Grisons), 1½ per cent It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-fifth of the whole surface. The chief industries comprise the manufacture of silks, artificial silks and silk ribbons, wool, cotton and cotton ribbons, linen, embroideries, straw plait, machines, paper, chemicals, chocolate, condensed milk, dyestuffs, and tobacco: while the metallurgical, electrical and pharmaceutical industries are also extensive; clocks and watches have long been the staple products of Geneva and Neuchatel. In 1926 there were 3,390 miles of railway in operation, 885 miles of telegraph line (24,700 miles of circuit), 18,305 miles of telephone line (539,500 miles of circuit), and 4,006 post-offices.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 198 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 35,000 francs, the Vice-President and other members of the Federal Council 32,000 francs each. The members of the Federal Council are elected for three years, each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council.

Defence: Militia. Active Army, 12 yrs.; initial trg., 65 90 days Subsequently 11 days per ann., *then* Landwehr, 8 yrs; 1 trg, 11 dys. for disintd. branches only, *then* Landsturm to age 48]. *War Strength*, 140,600; Landwehr, 65,000; Landsturm, 57,000.

Education.—Control by cantonal and communal authorities. *No* central organ. Illiteracy rare in Protestant cantons (i.) *Primary:* Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons School age varies (ii.) *Secondary* Age 12–15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*. Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

SYRIA AND LEBANON.

Syria.—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate (Cilicia was restored to Turkey by the French in 1922).

The Emir Feisal (son of the ex-King of the Hedjaz and, since 1921, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as Independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (*q.v.*). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaoutes (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beyrout. The latter three States were later grouped together to form the *Syrian Federation*, with a nominated Council. The Federation has now been abolished. *Damascus and Aleppo* have been amalgamated into a single State, and the *State of the Alaouites* is again independent. The actual form of government differs in each of the States, but the guiding principle in each is French control.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, and its Northern limits are at present being marked out by a Commission. The Northern boundary between Syria and Asiatic Turkey was defined in the agreement between France and Turkey, and is roughly as follows:—From a point immediately S. of Payas (on the Gulf of Alexandretta) to Meidan Ekbes (the railway station and environs remaining in Syria), thence S.E. to the railway station of Tchoban Bey, leaving the districts of Marsova to Syria and of Karnaba and Killis to Turkey; thence along the Baghdad Railway to Nussebin and along the old highway to Jizireh ibn-Omar on the Tigris (the districts of Nussebin and Jizireh-ibn-Omar remaining in Turkish territory, with the roadway between these two places). The E. boundary (which has not yet been finally delimitated) separates Syria from Mesopotamia along a line running roughly N.E. from the E. side of Jebel Druze to a point 15 miles S.E. of Jezrieh Ibn Omar (80 miles E. of Mardin); the S. boundary (which has been only partially delimitated) follows a line from Ras el Nakoura on the coast, N. of Akka, and running S.E. by E. to the Hedjaz railway line S. of Nasib, with a projection northwards to include the head waters of the Jordan, the Hule Lake and the Lake of Tiberias being included in Palestine. Within these limits the estimated area is 100,000 sq. miles, with a population of about 3,000,000, of whom the greater number are Orthodox Muhammadans, with a proportion of Shiites and Druses. The products of Syria are wheat, tobacco, fruit, wine, silk, liquorice, copper and brass goods; there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier, running parallel with the coast. The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen. The principal Syrian towns are Damascus (est. pop. 300,000), Aleppo (250,000), Homs (70,000), and Hama (60,000). Damascus contains the Mosque of the Ommayedes and the tomb of Saladin, and in the south-western quarter is "The Gate of God," through which the pilgrimage to Mecca used to pass, while the "street called Straight" (Acts ix, 11) runs E. to W. through the city. Damascus is an important commercial centre, and among its industries are metal work and mother-of-pearl inlay, and also native-made silk and cotton stuffs. At *Baalbek* (Heliopolis), on the western slopes of the Anti-Lebanon range (35 miles N.N.W. of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world (60 × 17 × 14 feet), weighing 1,500 tons. The railway system consists of a line from Beyrout to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, *viâ* Homs, was reopened in 1921. A narrow-gauge tramway runs from Mameltein along the coast. From Damascus there is railway communication with Palestine, and with Transjordan (at present interrupted) and The Hejaz, *viâ* Deraa, and the Syrian railways link up with the Baghdad railway at Aleppo. Road communications between Beyrout and Baghdad, *viâ* Damascus, have been developed by the opening up of the desert motor routes. Baghdad is now within 24 hours of Beyrout.

In the autumn of 1925, following a revolt of the Jebel Druze in the Hauran, rioting took place in Damascus on Oct. 18, and the city was bombarded by French artillery, when part of the Azm palace and parts of the "Street Called Straight" were destroyed by shell-fire or burned. Soon after the receipt of news of the disturbances in Syria, the High Commissioner (Gen. Sarrail) was recalled by the French cabinet. A long period of disorder followed, but in Sept., 1927, public security was practically normal. The future constitution of the State of Syria is under discussion, but at Sept. 30, 1928, nothing had been settled.

Beyrout is the residence of the French High Commissioner and the capital of the Lebanese Republic. Damascus was the Federal capital, and has become that of the new United State.

The Lebanese Republic (the former Turkish provinces of Lebanon and Beirut), declared a State by the High Commissioner, under the title of *Etat du Grand Liban*, in 1920, extends along the Mediterranean littoral from the Palestine frontier to Nahr el Kebir (15 miles N. of Tripoli) and is bounded on E. by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about 120 miles, and its width varies from 30 to 35 miles. The estimated area of the Lebanese Republic is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives, wheat, grapes, oranges and mulberry-trees. Great efforts are being made to develop the district as a summer resort. The capital is Beyrout (pop 150,000), which is the chief seaport and commercial centre, and also the administrative capital of Syria. Tripoli is the next important town and seaport. Minor ports are Junieh, Tyre and Sidon. The national flag is the French tricolour with a Cedar of Lebanon on the white band.

The Ottoman Turks are derived from Central Asian tribes, who were converted to the Muhammadan faith in the seventh century These Muhammadan tribes attacked and conquered the Asiatic Provinces of the Byzantine (Eastern Roman) Empire, and by the middle of the fourteenth century they had spread from Asia Minor into South East Europe. In 1453 they captured Constantinople, and spread over the whole of the Balkan Peninsula, their name of Osmanli, or Ottoman Turks, being derived from Othman, or Osman (1299–1326), a notable Turkish leader in the fourteenth century. Early in the sixteenth century the Ottoman Empire was spread over Egypt and northern Africa, and penetrated northward into Hungary, a great part of which was incorporated with the Turkish dominions until 1699, when the *Peace of Carlowitz* freed the country from Turkish rule. In the nineteenth century the outlying African dominions, with the exception of Tripoli, broke away from their suzerain, or were occupied by other Powers, and in the latter part of the century the northern states of the Balkan Peninsula asserted their independence, under guarantees of the Christian Powers The outcome of these political upheavals was a demand for better government in the remaining dominions of the Sultan During the process of constitutional reforms, which drove the Sultan Abdul Hamid (1876–1908) from the throne, war broke out between Italy and Turkey, and Tripoli and Benghazi were ceded to Italy under the *Treaty of Lausanne* (Oct. 12, 1912) These events were followed in the autumn of 1912 and the early months of 1913 by a disastrous war with the states of the Balkan League (Bulgaria, Montenegro, Serbia and Greece). At the outbreak of hostilities the European dominions of Turkey extended westwards to the Adriatic and northwards to Bosnia-Herzegovina (Austria), thus including the districts known as Macedonia, Thrace, and Albania By the *Treaty of London* (1913), the north-western boundary of European Turkey was a line drawn from Enos, on the Adriatic coast, to Midia, on the Black Sea, thus excluding Adrianople, which had capitulated (after a long siege) to the Bulgarian forces At the outbreak of the second Balkan war (in which Serbia and Greece were aided against Bulgaria by Rumania), Turkey re-occupied Adrianople, thus recovering a part of the lost dominions. In the Great War of 1914-1918, Turkey threw in her lot with the Central Powers and made unsuccessful attacks on Egypt and South Russia Great Britain sent an expedition to Gallipoli (which was withdrawn) and to Mesopotamia and Palestine, which removed those countries and Syria from Turkish rule, while various tribal revolts in Arabia ended the Turkish suzerainty in that peninsula. On Oct. 30, 1918, Turkey surrendered unconditionally before the conquests of the various Anglo-Indian and Imperial British columns and their Arabian allies. The final peace settlement with Turkey was the subject of protracted negotiations The first definite proposals were embodied in the *Treaty of Sèvres,* which was signed on Aug. 10, 1920, but was never ratified. The rise of the Turkish Nationalist movement in Asia Minor, which brought into existence a *de facto* Government at Angora, and the defeat of the Greek armies in August-September, 1922, finally destroyed any possibility of the *Treaty of Sèvres* being brought into force.

Treaty of Lausanne.—As a result of the Peace Conference, which met at Lausanne from November, 1922, until February, 1923, and again from April to July, 1923, a treaty was signed there on July 24, 1923 This treaty was almost immediately ratified by Turkey and Greece, and came into force as between Great Britain and Turkey on Aug. 6, 1924 The main provisions of the treaty and various instruments annexed to it were that Turkey retained Eastern Thrace, including Adrianople, while ceding Syria, Palestine, Mesopotamia and the rest of Arabia. The northern boundary of Mesopotamia was to be settled by negotiation within nine months, or, failing that, by reference to the League of Nations. In the event, a settlement was not reached until June 6, 1925, when by a Treaty signed at Angora by British, Turkish and Iraq

delegates the frontier was at last definitely fixed, the town of Mosul being included in the Iraq State. Italy was confirmed in possession of the Dodecanese, and Greece in possession of the islands formerly held by Turkey in the Aegean, except Imbros and Tenedos. Turkish rights over Egypt, the Sudan and Cyprus came to an end. A special convention demilitarised zones on either side of the Bosphorus and Marmora, and laid down rules for preserving the freedom of the Straits in peace and war. These rules are applied under the auspices of the League of Nations by a commission composed of representatives of Turkey, France, Great Britain, Italy, Japan, Bulgaria, Greece, Rumania, Russia, Serbia and, in the event of her accession, the United States. The minorities clauses were the same as in recent European treaties. Turkey ceded ground for military cemeteries at Anzac and elsewhere. The old extraterritorial privileges of foreigners ("Capitulations") were abolished, but a special convention concluded for seven years provided that foreigners residing or trading in Turkey were to be subject to no taxes or disabilities not imposed on Turks. A commercial convention concluded for five years established an import and export tariff and laid down that there should be no discrimination against foreign shipping and trade.

Turkey in Europe (23,975 sq. kilometres = 9,256 sq. miles) thus consists of Eastern Thrace, including the cities of Constantinople and Adrianople, and is separated from Asia by the Bosphorus at Constantinople and by the *Dardanelles* (Hellespont)—about 40 miles in length, with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (738,762 sq. kilometres = 285,246 sq. miles) comprises the whole of Asia Minor, and extends from the Aegean Sea to the western boundaries of Georgia Erivan and Persia, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria, and Iraq. This area corresponds approximately with *Anatolia* ("Land of the Rising Sun," or Orient) and includes *Cicilia* round the Gulf of Alexandretta, assigned to France by the Allies, but restored to Turkey by the French. Cilicia is generally fertile and produces wheat, cotton, wool, sesame, &c., and is capable of considerable agricultural development; the chief port of Cicilia is Mersina.

Population.—The first general census of Turkey was taken on Oct. 28, 1927, and showed the population of the Republic to be 13,660,275 the excess of women over men being approximately 500,000. The population of each of the 8 Regions into which the country is divided was given as follows:—

Region.	Sq. Kil.	Population	Per Sq. Kil.
Black Sea	73,621	2,174,425	29
Marmora & Ægean	92,744	2,746,069	29
Mediterranean ...	56,279	753,639	13
Turkey in Europe	23,975	1,044,306	43
Western Vilayet..	71,180	1,303,114	18
Central Anatolia...	228,791	3,499,707	15
E. Anatolia	40,125	604,303	14
Eastern Anatolia	176,621	1,534,712	8
Total.....	762,736	13,660,275	18

Government.—Sultan Muhammad VI. Vehiduddin fled to Malta on Nov. 20 without, however, abdicating, and the Heir Presumptive, Abdul Mejid Effendi, succeeded, after election by the Grand National Assembly at Angora, without any temporal functions and with the title of Caliph Abdul Mejid was a direct descendant from Othman, and bore the "sword of Allah" girded upon Sultan Selim in 1517. On October 29, 1923, the Grand National Assembly proclaimed Turkey a republic and elected Ghazi Mustafa Kemal *Pasha* President of the Republic; on March 3, 1924, the Grand Assembly passed a law abolishing the office of Caliph and ordering the Caliph and the other members of the dynasty to leave Turkish territory. The Caliph and his family, from which for over four centuries the "Commander of the Faithful" had been drawn, were expelled from Turkey on March 4, 1924, and the remaining members of the dynasty within the next few weeks. The *Grand National Assembly* is a single chamber legislature, with a 4 year mandate, which delegates its executive power to ministers acting in its name and responsible to the Assembly for their actions. The third National Assembly of Turkey, which met on Nov. 1, 1927, on the same day re-elected Ghazi Mustafa Kemal Pasha, President of the Republic for a period of 4 years.

Religion.—The majority of the inhabitants are Muhammadans, but there are numbers of Christians (of the Latin and Eastern rites) and Jews in Constantinople. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic; later in the year the President announced his intention of adopting the Western alphabet in place of Turkish characters. Education is nominally compulsory and free. There are primary schools, training schools for teachers, and at Constantinople a university, founded in 1900.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still very primitive in centres that are not served by railways. The peasant is, however, gradually adapting himself to the more modern methods, particularly in the vilayet of Aidin, Adana, and Mersina. The *live stock* in 1926 was stated to include 5,493,000 cattle, 530,000 horses, 22,872,000 sheep, 10,876,000 goats and 970,000 asses and mules. Cereals are abundantly produced, as well as tobacco, raisins, figs, cotton, opium, beet-sugar, nuts, olives, valonea and liquorice root, and many varieties of fruit are grown. Samsun is the chief centre of the tobacco growing industry, which is also of importance at Smyrna, Ismid and Brusa. The export of merchandise is considerable and consists principally of opium, tobacco, cotton, carpets, gums, mohair, wool, hazel-nuts, raisins and figs. The forests should be a source of wealth, but scientific exploitation is disregarded; beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Brusa and Ismid, but this industry is declining. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver, and arsenic are among the minerals produced.

Communications.—In Europe Turkey has about 150 miles of railway. In Asia Minor there are

over 2,000 miles, consisting of the Anatolian Railway (645 miles), Baghdad Railway (393 miles), Smyrna-Aidin (376 miles), Smyrna-Cassaba (420 miles), Angora-Caesarea (228 miles), Samsoun-Zileh (175 miles), and Mudania-Brusa (26 miles) Since 1924 the Turkish Government has devoted increasing attention to road and railway construction. Railway schemes in contemplation or in progress include Cesarea-Samsun, Eregli-Angora, Keller-Diarbekr, Cesarea-Ulu-Kishla, and Kutahia-Balikesser. There are electric trams in Constantinople, Scutari and Smyrna. In 1926 the mercantile marine consisted of 174 steam and motor vessels, with a total gross tonnage of 136,766.

	1927–28	1928–29.

Note:—The National Debt figures for 1927 include Turkey's share of the repartitioned Ottoman Public Debt, but though an agreement was reached in the summer of 1928 with regard to interest and amortisation, it has not yet been ratified.

The *Ottoman Debt* is administered by a Council: S. C. Wyatt (*Delegate of British and Netherlands Bondholders*); M. E. de Clostères (*French*), M. B. Nogara (*Italian*), Vacant post (*Turkish*), A. H. Reid (*Ottoman Bank*) *Commissary*, Zekiai Bey; *General Manager*, M. Morel (*acting*). Mr. Wyatt and M. de Clostères preside alternately.

CAPITAL OF TURKEY, ANGORA, the headquarters of the Republican Government, an inland town of Asia Minor, about 200 miles E.S.E. of Constantinople, with a population (Census 1927) of 74,784. Angora (or Ancyra) was the capital of the Roman Province of *Galatia Primæ*, and a marble temple dedicated to Augustus (now in ruins) contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city is being laid out on modern lines, with parks, statues and avenues. CONSTANTINOPLE, the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire, A.D. 364; population (Census of 1927) 673,029 (Stamboul 261,504, Pera 286,970, Scutari 124,555) Other cities are Smyrna (153,845), Adana (72,652), Brusa (61,451), Konia (47,286), Gazi-Aintab (39,572), Cesarea (39,544), Adrianople (34,669), Eski-chekin (32,203), Diarbekir (31,511), Erzerum (30,801), and Samsun (30,333) There are also 14 localities with 20 to 30,000 inhabitants, 39 with 10 to 20,000, and 79 with 5 to 10,000 inhabitants.

FLAG: Red, with white crescent and star.

Industries, Señor Carlos Mandillo (*acting*).
Public Instruction, Señor Enrique Rodriguez Fabregat.

Minister Plenipotentiary and Envoy Extraordinary in London, Señor Don Antonio Rachiu.
Legation, 3 Elvaston Pl., S. Kensington, S.W. 7.
1st Secretary, Dr. Don Roberto E. Mac Eachen.
Consulate-General,
81 High Holborn, W.C. 2.

The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25'—57° 42' W., containing an area of 72,180 square miles, and a population on Dec. 31, 1926, of 1,720,418.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 19th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent

many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug. 25, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Treinta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated, with a Constitution of Sept 10, 1829. The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office. By an amendment to the Constitution (which came into force March 1, 1919) an administrative council was appointed to share the Executive power with the President.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the Rio de la Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

Wheat, barley, and maize are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (8,431,613 in 1925) and sheep (14,443,341 in 1925), the wool of which is of excellent quality. Gold mines exist at Cuñapirú. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and bloodstock. The principal imports from the U.K. are woollen and cotton goods, hardware, and coals. There are 1,499 miles of railway open (1926), of which 1,486 miles are in British hands, and three short lines owned by the State; 45 kilometres of the State line from San Carlos to Garzón have been opened and 73 kilometres from San Carlos to Rocha are now open to traffic; and 4,850 miles of telegraph, with 19,039 miles of telephones. There were 995 post-offices, dealing with 116,687,496 letters and packets. The language spoken is Spanish.

	1926–27.	1927–28.

Consulates at *Birmingham, Cardiff, Glasgow, Hull* and *Southampton*.

The most northerly Confederation of South America, situated approximately between 1°40′ S. lat. and 12° 26′ N. lat. and 59° 52′ – 73° 15′ W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1925 gave the population as 3,026,878.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. Margarita has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonzo de Ojeda and Amerigo Vespucci, the former naming the Gulf of Mara-

caibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Lastoguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories He died in 1830, at the age of 47, and his remains were re-interred at Caracas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822–1830, since which time it has been independent There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1892, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcón divided the country into States and formed them into a Federal Republic. The present constitution rests upon the fundamental law of June 13, 1919, under which the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years; a new Constitutional Law of 1925 left that position unchanged.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincote and de Usupamo enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries: The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Cauna contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the north-east. The Orinoco is navigable for large steamers from its mouth for some 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles further up stream. Among the many tributaries of the main stream are the Ventuari, Caura and Carom from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The costal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea level in the Maritime Andes The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from April to October, the dry cooler season from November to March.

The principal industries are agriculture and cotton raising The oilfields are of increasing importance, the production being as follows:—

1923 ..... *metric tons*		640,000
1924	,,	1,330,912
1925	,,	2,812,428
1926	,,	5,318,000

The principal imports are cotton prints and shirtings and cotton drill, mainly from the U K, and hardware, principally from the U S. The principal articles of export are coffee (53,639 metric tons in 1925); cacao (20,941 metric tons in 1925); goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer

In 1926 there were about 680 miles of railway in operation.

Spanish is the language of the country.

Yugoslavia consists of the former Kingdoms of Serbia and Montenegro and of Croatia and Slavonia, part of the Banat, Bosnia, Herzegovina, part of Carniola, and part of Styria, and has an estimated area of 248,050 square miles, with a population estimated at 13,000,000 in 1927.

Montenegro (*Tzrna-Gora*) was, before the Turkish occupation of the remaining territory, a province of the Serbian Empire. Its independent existence ended with the decision of its Parliament (Nov. 29, 1918) to depose King Nicholas and reunite with Serbia. The chief towns are Cettinje (pop. 5,000) and Podgorica

Pre-War Serbia had no seaboard, but the inclusion of Croatia, Dalmatia and Montenegro in the Kingdom of Yugoslavia gives access to the Adriatic down a lengthy coast. The principal Yugoslav ports are Susak, Split, Dulnovnik and Kotor, and by an agreement with the Greek Government Yugoslavia has a free zone at the port of Salonika. In 1926 there were 4,050 miles of normal gauge and 1,083 of narrow guage railway in operation. The Danube forms a great commercial highway, and the tributary rivers Save and Tisa provide other important shipping routes; the port of Belgrade is now the second busiest on the Danube. There is a passenger and mail air service run by a French company from Belgrade to Bucharest, and from Belgrade (*via* Vienna) to Paris. The Army on a peace footing consists of 130,000 officers and men, the war strength being about 250,000.

The Greek Orthodox, Roman Catholic, Protestant, Muhammadan and Judaic faiths are recognised by the State, nearly 47 per cent. of the population is of the Greek Orthodox faith. There is a State system of education, and there are Universities at Belgrade, Zagreb, Ljubljana and Skoplje.

The principal industry is agriculture, over 80 per cent. of the population being engaged therein. The principal exports are maize, wheat, timber, live stock and meat products, prunes, eggs, poultry and skins.

THE International Institute of Agriculture at Rome was founded in 1905 as the result of a Convention made between the representatives of 40 different countries. The number of nations subscribing to the Convention has now risen to 74, and the Institute may be regarded as the pioneer of official international institutions, and as the most representative of all. It is estimated that the countries and colonies adhering to the Institute represent over 98 per cent. of the population of the world.

The following is a complete list of the countries now adhering to the Convention of 1905, and therefore represented at the Institute and contributing to its funds:—

Abyssinia.
Argentina.
Austria.
Belgium.
  Belgian Congo.
Brazil.
Bulgaria.
Chile.
China.
Colombia.
Costa-Rica.
Cuba.
Czechoslovakia.
Denmark.
Ecuador.
Egypt.
Estonia.
Finland.
France.
  Algeria.
  French West Africa.
  Indo-China.
  Madagascar.
  Morocco.
  Tunis.
Germany.
Great Britain and
  Northern Ireland
  Australia.
  British India.
  Canada.
  Irish Free State.
  New Zealand.

San Marino.
Siam.
Spain.
Sweden.
Switzerland.
Turkey.
United States.
  Hawaii
  Philippine Islands.
  Porto Rico.
  Virgin Islands.
Uruguay.
Venezuela.
Yugoslavia.

The essential objects of the Institute are defined in Article 9 of the Convention and may be summarised as follows:—

The Institute, confining its activities to the international sphere, shall:—

Collect, examine and publish, with the least possible delay, statistical, technical and economic information with regard to farming, crop and live-stock production, trade in agricultural products and the prices current on the different markets.

Indicate the wages paid for farm work.

Record any new diseases of crops which may have appeared in any part of the world, showing the countries affected by such diseases, their progress and, where possible, any effective measures for their control.

Study questions concerning agricultural co-operation, insurance and credit in all their forms; collect and publish all information that may be useful in the various countries for the organisation of systems of agricultural co-operation, insurance and credit

Submit, should occasion arise, for the approval of the various Governments, measures for the protection of the common interests of farmers, and for the improvement of their conditions

The Institute has its seat in Rome, in a palace in the Villa Borghese, specially erected through the munificence of H.M. Victor Emmanuel. The Governing Body consists of a General Assembly of delegates of the adhering Governments, meeting once every two years, and of a Permanent Committee of Delegates, resident in Rome, acting as its executive. Apart from the General Secretariat to which, in addition to the ordinary administrative offices, the Section of Agricultural Legislation is attached, there are special bureaus dealing with General Statistics, Agricultural Science, and Agricultural Economics, respectively.

Information on agricultural questions is given mainly through periodical publications, issued in English and French and, in some cases, also in Spanish, Italian and German These periodical publications include two Year-Books, the *International Year-Book of Agricultural Statistics* and the *International Year-Book of Agricultural Legislation*, and also a monthly review *The International Review of Agriculture* and a monthly bulletin entitled the *International Crop Report and Agricultural Statistics*. These periodical publications are from time to time supplemented by monographs based on special research or specially acquired information The publications of the Institute may be obtained in London from the Ministry of Agriculture and Fisheries, from Messrs P. S. King & Son, or by direct application to the Institute

The Library of the Institute which contains nearly 100,000 volumes and pamphlets, and 70,000 unbound volumes of periodicals from all parts of the world, offers quite unusual facilities for the study of agricultural problems, and may be freely consulted by all properly accredited persons Some 3,500 periodicals are regularly received by the Institute Library.

Following on the part taken by the Institute in the work of preparation for the World Economic Conference held at Geneva in May 1927, the President of the Institute, Prof G De Michelis, and the Delegate for the United States of America, Prof. Asher Hobson, were invited to become members of the Economic Consultative Committee of the League of Nations, which met 14 to 19 May, 1928, at Geneva. M. De Michelis presented a report containing an account of the work accomplished by the Institute in connection with the resolutions of the Conference, and also a programme of the work proposed which includes the question of international agricultural credit, world supplies of wheat, meat, sugar and wool, and agricultural education During the session the possibility of closer collaboration between the International Institute of Agriculture and the League of Nations was discussed.

The Agricultural Advisory Committee, which is a Joint Committee consisting of six representatives of the Governing Body of the International Labour Office and six representatives of the Permanent Committee of the Institute, will hold its fifth meeting in Rome early in 1929. This Committee, which was constituted in 1922, meets alternately in Geneva and Rome with a

view to co-ordinating the studies of agricultural problems undertaken by either body.

In connection with the work of the International Scientific Agricultural Council of the Institute, which held its first general meeting in November 1927, certain of the Commissions, and in particular the Sub-Commission on Farm Accountancy, have held important meetings at the Institute during 1928.

The position of the Institute as an organ of liaison for all bodies interested in agriculture has been effectively re-affirmed by the creation of an International Commission for co-ordination in Agriculture with headquarters at the Institute. The membership already includes a large number of representative international organisations dealing with agricultural questions. The Commission met for the first time on May 3, 1928, when the discussion of a very full agenda led to some practical results, particularly in connection with arrangements for future agricultural congresses, avoidance of overlapping, etc.

The work of preparation for the World Agricultural Census 1930-31 has been further advanced; the Director of the scheme, Mr. Leon M. Estabrook has, during the past two years, visited all the European countries, including Soviet Russia, the whole of North America, the West Indies, most of the countries in South and Central America and in Asia, also Australia, New Zealand and many parts of Africa, including the Union of South Africa. The object of these visits has been to discuss ways and means with the authorities concerned, and to solve special difficulties arising from the circumstances of different countries. As a consequence 74 States have definitely accepted the scheme, and among these, Great Britain, Belgium, France, Italy, the Netherlands and Portugal have undertaken to apply it in their Colonies. The statisticians who formed part of the official delegations to the General Assembly of October 1928 had the opportunity of giving advice on certain points of detail in the application of the scheme, and of discussing them with the Director. The value of the Census as providing a practically complete inventory of the agricultural resources of the world has been recognised alike by the World Economic Conference at Geneva, and by the Imperial Agricultural Research Conference held at Westminster in the late autumn of 1927.

The IXth meeting of the General Assembly of the Institute took place in October, and in addition hospitality has been given during 1928 to the following two important congresses: the *International Cold Storage Congress* from 10 to 15 April and the *Vth International Seed Testing Congress* from 26 to 29 May. Among important items in the future programme of the Institute are, an *International Conference for Plant Protection*, and an *International Conference on Questions Relating to Meat*.

President: His Exc. Prof. G. De Michelis, Delegate of Italy.

Vice-President: M. Louis-Dop, Delegate of France.

British Delegate (also representing the Indian Empire, Canada, Australia, and New Zealand): R. J. Thompson, C.B., O.B.E., Ministry of Agriculture and Fisheries.

Delegate of the Union of South Africa: D. J. De Villiers.

Delegate of the United States of America. Prof. Asher Hobson.

General Secretary.

THE NOBEL PRIZES.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. *The first awards were distributed on the fifth anniversary of Nobel's death*, Dec. 10, 1901 (for awards before those recorded below *see* former issues of WHITAKER). The awarding authorities are the Swedish Academy of Science—(*a*) Physics, (*b*) Chemistry; the Stockholm Faculty of Medicine (*c*) Medicine or Physiology; the Swedish Academy of Literature (*d*) Literature; and a committee of five persons elected by the Norwegian Storthing (*e*) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from Nobelstiftelsens Styrelse, Sturegatan 14, Stockholm, Sweden.

LIST OF AWARDS (Value, 1928, about £8,700).

Year.	(*a*) Physics.	(*b*) Chemistry.	(*c*) Medicine or Physiology.	(*d*) Literature	(*e*) Peace.
1917	Ch. G. Barkla	*No award*	*No award*	K. Gjellerup H. Pontoppidan	Comité International de la Croix Rouge.
1918	M. Planck	F. Haber	*No award*	*No award*	*No award.*
1919	J. Stark	*No award*	J. Bordet	C. Spitteler	Woodrow Wilson.
1920	Ch. E. Guillaume	W. Nernst	A. Krogh	Knut Hamsun	Léon Bourgeois.
1921	Albert Einstein	F. Soddy	*No award*	Anatole France	K. H. Branting. Chr. L. Lange
1922	Niels Bohr	F. W. Ashton	A. V. Hill O. Meyerhof	J. Benavente	F. Nansen.

WORLD'S PRODUCTION OF CEREALS.

WHEAT.

Country.	Production (Millions of Quarters of 480lb.)	
	Actual 1927	Estimated 1928
U.S.A.	109	113
Soviet Union	94	say 90
Canada	55	65
India	42	36
France	35	35
Argentina	30	...
Italy	25	29
Spain	18	16
Australia & N.Z.	15	...
Germany	15	16
N. Africa inc Egypt	13	12
Rumania	12	16
Hungary	9	11
Yugoslavia	7	13
U.K.	7	6
Poland	7	7
Bulgaria	6	6
Japan & Korea	5	5
Czechoslovakia	5	5

The Argentine and Australasian crops are only maturing at time of publication. Estimates point to 32 and 20 million quarters respectively.

The total world's production (1928) of wheat is probably 560 million quarters.

RYE.

Country	Production (Millions of Quarters of 480lb.)	
	Actual 1927	Estimated 1928
Soviet Union	113	say 91
Germany	32	35
Poland	27	28
U.S.A.	7	5
Czechoslovakia	6	6
France	4	4
Hungary	3	4
Spain	3	3
Sweden	2	2
Belgium	2	3
Austria	2	2
Lithuania	2	2
Canada	2	2

The total world's production (1928) of rye is probably 195 million quarters.

BARLEY.

Country.	Production (Millions of Quarters of 400lb.).	
	Actual 1927	Estimated 1928.
U.S.A.	32	41
Soviet Union	26	say 30
Germany	15	16
India	15	13
Japan and Korea	13	14
Canada	12	17
Spain	11	10
N. Africa & Morocco	11	11
Poland	9	10
Rumania	7	9
Czechoslovakia	7	7
France	7	6
U.K.	6	6

The total world's production (1928) of barley is probably 210 million quarters.

OATS.

Country.	Production (Millions of Quarters of 320lb.)	
	Actual 1927	Estimated 1928
U.S.A.	119	145
Soviet Union	90	say 100
Canada	46	50
Germany	44	43
France	37	34
Poland	23	26
U.K.	20	21
Czechoslovakia	10	9
Sweden	8	7
Rumania	6	6
Denmark	6	5
Argentina	5	...

The total world's production (1928) of oats is probably 460 million quarters.

MAIZE.

Country	Production (Millions of Quarters of 480lb.).	
	Actual 1927 and 1927/28	Estimated 1928
U.S.A.	325	342
Argentina	37	...
Rumania	17	12
Soviet Union	15	say 15
Brazil	15	say 10
Yugoslavia	10	10
Italy	10	7
India	10	9
Mexico	9	8
Egypt	9	9
S. Africa	8	8
Hungary	8	5
Bulgaria	2	3

The maize crops of the Southern Hemisphere for 1928–29 are not yet at a stage warranting estimates of yield.

The total world's production (1928 and 1928–29) will probably be 485 million quarters.

THE WORLD'S GRAIN CROPS,

in Millions of Quarters, 480lb. of Wheat, Rye and Maize; 400lb. of Barley; 320lb. of Oats.

	1923	1924	1925	1926	1927	1928
Wheat	477	437	499	520	525	560
Rye	109	167	201	188	205	195
Together	586	604	700	708	730	755
Maize	490	442	503	485	480	485
Barley	157	161	189	181	185	210
Oats	370	413	447	420	415	460
Together	1,017	1,016	1,139	1,086	1,080	1,155
All five together	1,603	1,620	1,839	1,794	1,810	1,910

For 1923, Russia's production of Rye, Maize, Barley and Oats not included (not known) but included for 1924 and onwards.

PRINCIPAL WHEAT IMPORTERS, 1927.

Country.	Imports in Millions of Qrs. of 480lb (year 1927)

ANGLO-FRENCH NAVAL AGREEMENT.

OWING to the response accorded by the other Powers, proposals by Great Britain and France regarding the limitation of naval armaments made no progress, but they created great interest not only in this country but on the Continent and in the United States. The first announcement of the negotiations was made unexpectedly before the Parliamentary holiday by Sir Austen Chamberlain, who said that the French and British Governments had reached a compromise on the differences concerning naval disarmament which had been in evidence on the Preparatory Commission at Geneva. Two months later the United States condemned the proposals in a Note to Great Britain, and not until another month had elapsed were the details issued by the Foreign Office, the delay being due to fear of embarrassing other Governments by what might have seemed an attempt to force their hands. The compromise was initiated by conversations which were opened by Sir Austen and M. Briand immediately after the deadlock arose at Geneva. Eventually the French Minister proposed the division of submarines into two classes, coastal submarines to be exempt from all limitation in view of their strictly defensive character. The British Government replied that it was unable to regard small submarines as having a strictly defensive character, but in deference to the views of other Powers it was ready to consent to the French suggestion. As the assent of the other great naval Powers was essential to success, Britain proposed to communicate to the Governments of the United States, Italy and Japan the terms of the compromise, namely, that the Disarmament Conference would have to deal with four classes of warships—capital ships, i.e., ships of over 10,000 tons, or with guns of more than 8-in. calibre, aircraft carriers of over 10,000 tons, surface vessels of or below 10,000 tons armed with guns of more than 6-in. and up to 8-in. calibre, and ocean-going submarines, i.e., over 600 tons. Within the maximum limit, each Power would have to indicate for each category the tonnage it proposed to reach. Limitation is already enforced on the first two categories by the Washington Agreement of 1922. In reply to representations from Germany, Sir Austen Chamberlain declared that although the text of the compromise itself referred exclusively to naval limitation, there was an understanding with the French Government that Great Britain would withdraw her opposition to the views of the French and most other Governments on the question of trained reserves, but that no other engagements had been assumed by either of the two Governments. The United States reply particularly criticised the absence of limitation on 6-in gun cruisers or submarines of 600 tons or less, remarking that the agreement sought to impose restrictions only on types peculiarly suited to the needs of the United States. Italy made it clear that it could not concur in a discussion of the naval problem separately from the question of the limitation of armaments on land and in the air, while Japan accepted the proposals in principle.

THE CHANGE IN THE PRIMACY.

AFTER over a quarter of a century as Archbishop of Canterbury, Dr. Randall Davidson, at the age of eighty, laid down his office on Nov. 12, his "golden wedding" day, being succeeded in the Primacy by Dr Cosmo Gordon Lang, Archbishop of York, in whose place Dr. William Temple, Bishop of Manchester, was appointed. Dr Davidson was the first Archbishop to retire from the chair of St Augustine, and a special procedure had to be devised to deal with the situation. When the King, "with great regret," received the Primate's intimation of his desire, His Majesty, on the recommendation of the Prime Minister, appointed by Royal Warrant a Commission for the purpose of receiving the resignation. This Commission consisted of the Archbishop of York, the Bishop of London, the Bishop of Durham and the Bishop of Winchester. They reported their acceptance of Dr Davidson's resignation, to take effect on Nov. 12, and this was approved by the King. Dr. Davidson was known to be greatly affected by the dual rejection of the revised Prayer Book by the House of Commons, and after the adverse vote he was seen to be in tears, but he denied that his resignation was due to disappointment. He received many honours after his decision was made public, the freedom of both London and Canterbury being conferred upon him, while a national tribute, consisting of nearly £17,000, was handed to him by the Prime Minister. But the greatest mark of esteem was reserved for bestowal by his Sovereign, who created the retiring Primate a Baron, and under the style of Lord Davidson of Lambeth his wide knowledge and many sympathies were retained for the Legislature from which he would otherwise have had to retire.

CHARING CROSS BRIDGE.

IN December, 1926, the Royal Commission on Cross-River Traffic recommended that at Charing Cross a double-deck steel bridge should be constructed alongside and east of the existing Hungerford railway bridge, with space for six railway tracks on the lower (*i.e.* the present) level; the upper part should consist of a 60-foot roadway, with two footways of 15 ft., which on the north would cross the Strand, pass behind St Martin's Church, and reach ground-level near the Cavell statue, while on the south it would pass by the main entrance to Waterloo Station at platform level. As this scheme would involve the abolition, in due course, of the present Charing Cross Station, a new station should be built on a site bounded on the east by Buckingham Street. The cost was estimated at £7,500,000, and the Government made the question of a contribution subject to a favourable report upon the scheme by engineers to be appointed in conjunction with the London County Council and the Southern Railway Company. In May, 1928, the engineers reported to the Ministry of Transport that, though the Commission's scheme presented serious constructional difficulties, it involved no insuperable engineering problems, but that they estimated the cost at £11,720,000; as, however, the scheme would not comply with certain of the railway company's requirements, nor afford the requisite facilities for road traffic, modifications would be required, necessitating an increase of the estimate to £13,050,000. They put forward an alternative scheme, estimated to cost nearly £11,000,000, the main features of which were the abolition of Charing Cross Station, the erection of a new terminus on the present

Waterloo Junction site, opposite the main façade of Waterloo Station, and the erection of a river bridge for vehicular and pedestrian traffic only. It must be said in fairness to the Commission that they would have preferred a solution involving the abolition of the existing station, but they were informed that the opposition of the Southern Railway Company and of the travelling public would be very strong. Subsequently, at the instance of the Ministry of Transport, the engineers' scheme was amended by altering the proposed site of Charing Cross Station from Waterloo Junction to the Lion Brewery site, adjoining the southern ends of Waterloo and Hungerford Bridges, and by including the development of the river frontage by the construction of an embankment. The estimated cost of the scheme thus amended, of which consideration was promised by the railway company and the London County Council, is £11,660,000, or including the embankment, £11,930,000. In July the London County Council approved the scheme on the condition that the Government should contribute 75 per cent. of the cost, leaving the Council a maximum liability of £2,982,500. The consideration of the proposals by the railway company necessitates the consultation of the shareholders.

CITY OR TOWN.

DURING the sittings of the Royal Commission on Local Government the question was raised as to which towns had the status of a city. The Home Office were consulted, and their reply was given in the form of a memorandum.

"The title of a city which is borne by certain boroughs is a purely titular distinction. It has no connexion with the status of the borough in respect of local government, and confers no powers or privileges. At the present time and for many centuries past the title has been obtained only by an express grant from the Sovereign effected by means of letters patent; but a certain number of cities possess the title by very ancient prescriptive right. There is no necessary connexion between the title of city and the seat of a bishopric, and the creation of a new see neither constitutes the town concerned a city nor gives it any claim to the grant of letters patent creating it a city. If a town wishes to obtain the title of city the proper method of procedure is to address a petition to the King through the Home Office It is the duty of the Home Secretary to submit such petitions to his Majesty and to advise his Majesty as to the reply to be returned. It is a well-established principle that the grant of the title is only recommended in the case of towns of the first rank in population, size, and importance, and having a distinctive character and identity of their own. At the present day, therefore, it is only rarely and in exceptional circumstances that the title is given."

CLINICS FOR RHEUMATISM.

RECENT investigations have proved that the effect of rheumatism as a malady has hitherto been grossly underestimated, and in 1927 the British Committee on Rheumatism urged that clinics for physical treatment should be established in London and other large towns for the investigation, diagnosis and treatment especially of early cases. It has been calculated that nearly one-sixth of the industrial invalidity in this country is due to diseases classed as rheumatic. At a conference on rheumatic disease held at Bath in May, 1928, it was stated that the estimated payments under the National Health Insurance Scheme in Great Britain during 1927 on account of rheumatism amounted to £5,000,000, involving a loss of wages to insured persons of £12,000,000, making a total loss of £17,000,000, exclusive of the cost of any institutional treatment. The establishment of clinics would render possible the investigation of early stages of the disease, throw light on its causation, and lead to effective prevention in numerous cases. At the request of the British Committee on Rheumatism, the British Red Cross Society issued an appeal for £40,000 to build and equip in London the first of these clinics. It is intended that this clinic, which is expected to be opened in 1929, should be available both for men and women who are able and willing to pay a reasonable fee for treatment, and for the industrial worker who can receive treatment and continue meanwhile his employment. It is hoped that as many as 12,000 patients yearly will be able to receive treatment and that the clinic will be self-supporting.

C.O.D. EXTENSION.

THE inland cash on delivery service commenced in March, 1926, and applied only to packages sent by parcel post with limitations as to weight and value. The number of parcels carried by this service increased from one million in 1926 7 to one and a half million in 1927-8, averaging about £1 in value. In view of the success of the experiment as regards C.O.D. parcels, the system was extended on 30th April, 1928, to the registered letter post and to consignments by railway. The essential features of the development, which is regarded as experimental and is liable to modification after a period of trial, are:

LETTER POST

The method of sending C.O.D. packets by letter post is similar to those in force for parcels, except that registration is obligatory. It is limited to Great Britain and Northern Ireland. The sender must indicate on the packet his own as well as the addressee's name and address, together with the amount of the Trade Charge; tie-on address labels are not permissible. He must tender the parcel at a Money Order Post Office, fill up a special Trade Charge Form and pay the postage, registration fee and C.O.D. fee. Packets, on which the amount to be collected does not exceed £10, are delivered by the postman upon payment by the addressee; where the amount exceeds £10, the addressee is notified of arrival at the Post Office, where he must pay and collect the packet. The Trade Charge Order is then completed by the Post Office, returned to the sender and is payable through a Bank. The C.O.D. fees, which are additional to the postage and registration fees, must be paid in stamps on the Trade Charge Form They vary according to the amount to be collected (Trade Charge) and are the same as for the C.O.D. parcel service, viz.;

Trade Charge.	Fee.
Not exceeding 10s.	4d.
Exceeding 10s. but not exceeding £1	6d.
" £1 " " £2	8d.
" £2 " " £5	10d.
" £5 " " £20	1s.

and 2d. for each additional £5 or fraction of £5 up to the maximum of £40.

CONSIGNMENTS BY RAILWAY.

This arrangement is confined to stations (including piers served by railway-owned steamers) in Great Britain and does not apply to the Isle of Man, Channel Islands or Orkney and Shetland Islands. Perishable articles, such as fish, meat, soft fruit, cut flowers, etc, and livestock, explosives and dangerous goods are excluded from its scope. The sender must obtain from a Money Order Post Office a combined address label and receipt form for each package, consisting of a double address label and a detachable receipt, each bearing a number for identification. The double label has one portion for the address of the Railway Parcels or Goods Agent at the delivery end and the other for the name and address of the sender and consignee. The receipt portion after signature on behalf of the railway company is dispatched by the sender to the consignee as a C O D registered letter; this is delivered, on payment of the Trade Charge, to the consignee who can then obtain the consignment from the Agent upon surrendering the receipt. The maximum value of the consignment is £40 and the fees for the transmission of the receipt are the same as for the registered letter (*see* above). In addition to the ordinary rail charges, the railway company charge a special fee of 3*d.* on every consignment.

COMMONWEALTH LABOUR CONFERENCE.

DELEGATES attended from Australia, Guiana, Canada, Ceylon, India, Ireland, Newfoundland, New Zealand, Palestine, Rhodesia, South Africa and Trinidad at the British Commonwealth Labour Conference that opened at the House of Commons on July 2, 1928, with Mr J. R MacDonald as President. The previous Conference was in 1925. Eight subjects formed the main agenda in--Subject Peoples, Inter-Commonwealth Relations, World Peace, Trading within the Empire, Migration, Socialisation, Labour Policies and Results. The Indian delegates withdrew at the third meeting consequent upon the attitude of the home Labour Party on Indian Government and the appointment of two of its members to the Simon Commission.

COMMUNIST PARTIES.

WHILST a purge has been going on in the Labour Party of members who support Communist doctrines, there is not much doubt that the few Communists in Britain have been exceedingly active, giving the impression of much greater strength than they possessed. In Feb. 1928, the Executive of the Communist International of Moscow issued orders to the British Communist Party to "arouse the Left Wing workers for the struggle against bureaucracy as a means towards winning the leadership of the working class in the class struggle against capitalism." The leaders of the Labour Party and T.U.C. were to be opposed at elections by Communist candidates. In May, the Home Secretary in a Parliamentary Paper stated—"There is no doubt that the Communist organisations in this country are largely dependent upon moneys from foreign sources." Delegate Conferences have been held by International Class War Prisoners' Aid (May), National Minority Movement (August), National Left Wing Movement (Sept.). There was a resolution of 1,000 words before the N.M.M. that was presided over by Mr. Tom Mann.

CO-OPERATION.

THE essential feature of co-operation is the association of individuals, either as consumers to purchase goods or services for their own consumption, or as producers to market those of their own production. Almost anyone is aware to-day of the very wide margin prevailing between cost of production and selling price to the consumer of the common necessities of life, and the object of co-operation is to narrow this margin so as to cheapen commodities to the consumer on the one hand, or on the other, to obtain a better selling price for the producer. Co-operative societies are registered under the Industrial and Provident Societies Acts, but it is not essential for a society to be co-operative in character to obtain registration under these Acts, provided that it restricts the interest which any member may have or claim in its shares to £200, and otherwise complies with the statutory requirements. In Great Britain the co-operation of consumers has been remarkably successful, but co-operation of producers comparatively slow and often a failure. A certain measure of production has been undertaken by the retail co-operative societies, and by the wholesale buying agencies established by them, but such production is mostly an assembly of costly materials produced elsewhere into more finished products, and adventures into the more basic forms of industry, such as agriculture and mining, have not as a rule been attended with so much success. There have been many proposals to link up the two lines along which co-operation is developing, and to make the one type of association serve the interests both of consumer and producer, but owing to the divergence of interest and the difficulty of arriving at a satisfactory and permanent basis of adjustment, the efforts in this direction have hitherto been in the main unsuccessful.

(*a*) *Co-operation of Consumers.*—This form of co operation in Great Britain has been based on an ideal, which in a large measure has been responsible for its successful development. Co-operative trading societies are so constituted that interest on share capital is always at a fixed rate and the members' control is not increased in proportion to their shareholding. Profits are regarded rather as a legal but immoral exaction, and any surplus arising on trading is returned to the purchaser in proportion to the value of his purchases. Frequently, however, members do not exercise their right to withdraw in cash their share interest and dividends on purchases, but allow them to accumulate and so provide further working capital for the extension of the movement. In almost any year, the societies as a whole, if they were able to alter their constitution and withhold dividends on purchases, could pay a 20 per cent. dividend on their share capital in addition to the customary fixed rate of interest of from 4–5 per cent. Moreover, reserves are continually piling up in the form of goodwill with every extension of business. They are never distributed, but are handed down free of charge from one generation of co-operators to another. Co-operation among consumers thus grows like a snow-ball in spite of outside competition and industrial set-backs. In 1927 there were 1,314 retail, 3 wholesale, and 66 productive associations controlled by consumers.

Sales in 1927 by the retail societies totalled £198,173,000 and roughly three-quarters of these supplies were obtained from the wholesale societies whose sales at wholesale prices totalled £106,073,000. Sales by the productive societies amounted to only £3,670,000. These 1,383 consumers' societies had an aggregate membership of 5,540,000 (the retail societies having gained almost 900 000 new members in three years), and combined capital and reserves of £162,581,000. The societies employed in all some 211,900 persons and their total wages bill amounted to £27,886,000. The aggregate disposable surplus for 1927 of the retail societies amounted to £23,281,000, out of which the fixed share interest charges absorbed £3,895,000, and dividends on sales £17,980,020, or about 1s. 10d. in the £ on the retail purchases. The following statement shows the productive output by the three classes of consumers' societies in Great Britain in 1927. –

—	Value of Productions (including Materials)	Cost of Materials used	No. of Employees engaged	Wages and Salaries
	£	£		£
1. Food and Tobacco including farm and dairy produce,	57,698,000	45,924,000	27,500	4,040,000
2. Clothing and Textile including boot making and repairs	8,607,000	4,806,000	24,800	2,824,000
3. Building, Wood working and Engineering	4,859,000	2,380,000	11,700	1,926,000
4. Other Industries	6,144,000	3,236,000	13,700	1,651,000
Total.	77,308,000	56,346,000	77,700	10,433,000

Allowing for the increased level of prices in 1927 compared with 1913, it would seem that the consumers' societies, as a whole, are producing nearly twice as much as they did before the war, but of the goods distributed by the retail societies, still only about one-seventh of the wholesale value is created within the movement. In contrast to the volume of production undertaken by consumers' societies, it may be mentioned that co-operation by producers (i.e. associations of workpeople comprising some 8,600 employees) were responsible in 1927 for productions valued at only £3,421,000 (including materials), and that practically three-quarters of this total represented clothing and textile goods.

(*b*) *Co-operation in Agriculture.**—Societies engaged in agriculture co-operation fall into three groups: (1) Requirement societies, whose principal function is to supply their members with seeds, manures, implements, dairy utensils, etc.; (2) Produce societies whose chief object is to market members' produce; and (3) Service societies which supply some agriculture service, e.g., threshing. As will be seen from the following comparative statements for these three groups, agricultural co-operation which showed signs of expansion during the war and immediate post-war year, has since declined, a decrease since 1920 of 28 per cent. in the number of trading societies (groups 1 and 2) being accompanied by a decline of 17 per cent. in membership. Many societies, including some of the larger county farmers' associations, bacon factories, and other societies engaged in the disposal of produce, have been compelled to wind up during the past few years, finding themselves in a hopelessly insolvent position, and consequently unable to obtain further working capital or credit. Many of the consumers' societies, too, have ceased to undertake farming as an auxiliary to their ordinary business. In the service societies (group 3), the reclaiming of land for building purposes is reflected in a reduction by more than 10 per cent. in the number of small-holdings and allotments societies and in the acreage under cultivation during the three years 1924-26.

(1) REQUIREMENT SOCIETIES.

	Number of Societies	Membership	Sales. £
1914	274	29,603	1,816,000
1920	667	118,553	13,269,000
1926	438	93,261	7,968,000

This group in 1926 comprised 313 farmers' societies with 74,486 members, and their sales totalled £7,828,000 including produce valued at £901,000. The remainder of the figures for 1926 relate to associations of allotment holders for supplying their members with requisites. The particulars for 1914 and 1920 include also figures in respect of the Agricultural Wholesale Society, Ltd., which went into liquidation in 1924 with a deficiency of practically £300,000.

(2) PRODUCE SOCIETIES.

	Number of Societies.	Membership.	Sales. £
1914	129	10,401	936,000
1920	338	45,688	8,203,000
1926	*285	39,623	*5,678,000

The bulk of the produce apart from hops (see below) consisted of milk, dairy produce, eggs and poultry. An important addition to the group is a new society formed as a central selling agency to stabilise prices when government control of hops came to an end. This society in 1926 had a membership of 1,342, and disposed of hops to the extent of £2,054,000 during its first year. The other produce sold by societies in this group consisted mainly of bacon, wool, livestock and fish. The formation in Scotland during the last few years of a number of sheep stock club credit societies whose members collectively are assisted by state advances, affords one of the few examples of post-war co-operative agricultural development which so far is proving highly profitable to members.

(3) SERVICE SOCIETIES.

	Number of Societies.	Membership.
1914	347	29,954
1920.....	937	253,046
1923	974	278,036
1926	888	267,077

* A few societies connected with fishing are included; their transactions, however, were relatively very small.

* In addition 269 consumers' co-operative societies had farming and dairying departments, the value of whose produce amounted to £2,457,000

This group in 1926 included 683 associations whose objects are to provide their members with small-holdings or allotments, and out of a total membership of 141,648, some 94,400 were tenants with roughly 25,000 acres under cultivation.

Sales by all agricultural trading societies in Great Britain, including the agricultural produce of consumers' societies, totalled £15,104,000; societies in *England and Wales* disposing of requirements valued at £6,769,000, and produce £6,502,000, whilst societies in *Scotland* sold requirements valued at £471,000, and produce to the value of £1,362,000.

(c) *Co-operation in Housing*.—The following table shows the phenomenal growth of the building society movement in Great Britain, the figures given relating to all societies registered under the Building Societies Acts. The function of these societies is to assist their members in acquiring dwelling houses, business premises, etc., for occupation or investment, by making loans upon the security of a mortgage on the property.

	No. of Members	Advanced during year.	Total Mortgage Assets
		£	£
1914 ..	627,240	8,762,000	61,050,000
1920 ...	747,589	25,095,000	68,812,000
1927 ...	1,416,456	55,887,000	197,748,000

Building societies are not wholly co-operative in character. It is true that to some extent they are managed by the borrowers, who themselves provide a substantial part of the capital required for advances, but, at the same time, they are open to the membership of persons whose main concern is to find a profitable outlet for their capital. The above figures for building societies completely dwarf the operations of those societies registered under the Industrial and Provident Societies Acts which are connected in various ways with the provision of housing accommodation. As some of the societies registered under the latter Acts are not co-operative in character, and in many the tenants have no interest in the societies otherwise than as tenants, it would seem that co operation among consumers generally (*i.e.* tenants) in the provision of housing has made no great headway. At the end of 1926 the 264 societies registered under the Industrial and Provident Societies Acts had 19,262 members (of whom less than one-third were returned as tenants), and capital including reserves amounting to £9,975,000. Rents receivable by these societies aggregated £529,000 and resulted in a net profit of £54,800 after meeting share interest charges amounting to £31,700. A number of these societies have received state aid in the form of loans and subsidies. Of the various co operative housing schemes, mention may be made of the Bournville Village Trust, which has been followed by a number of similar societies, and of societies promoted by some of the large railway companies. In the latter, estates are being developed by the Great Western Railway Co. at Acton and Hayes, where the weekly charge to employee tenants, including rates, ranges from 13*s.* 6*d.* to 19*s.* 9*d.* Mention may also be made of societies such as those in St. Pancras and Chelsea which have recently been formed for the conversion of slum property into blocks of residential flats. A number of co-operative stores run building or mortgage departments as auxiliaries to their trading departments, and are making headway. For example, a large co-operative stores in the North Midlands reports that it has advanced in all some £2,770,000 to 12,800 of its members to assist them in house purchase, while up to the end of 1927 the capital expenditure in the provision of housing accommodation by one of the large co-operative stores operating in South London approximated to £800,000

(d) *Co-operation in Recreation*.—Working men's clubs are registered under either the Friendly Societies Acts or the Industrial and Provident Societies Acts. Most of the older clubs were registered under the former Acts, but since 1920 a large number of clubs, particularly those composed of ex-service men, have been registered as Industrial and Provident Societies. Under the two Acts there were 4,070 clubs at the end of 1925 and they had nearly 1,300,000 members. The income of these institutions is mainly derived from sales of refreshments which in 1925 totalled nearly £10,780,000, an average of about 3*s.* 2*d.* per member per week. The premises, furniture and fittings owned by the societies were valued at £6,579,000. The premises, etc, are usually acquired with the aid of loans, which are often obtained from local brewers, or in the ex service men's clubs from the United Services Fund. In course of time clubs are usually able to repay their loans, and in 1925 their net balance of assets over all liabilities exceeded £3,350,000 In addition to social clubs special authorities have been given by the Treasury for registration under the Friendly Societies Acts of societies whose object is the promotion of music or sports and games. The advantage of registering such bodies is either not generally known or is ignored as only a few societies, such as brass bands or quoits clubs, have been registered.

(e) *Co-operation in Investment*.—A few societies have been registered in the past under the Industrial and Provident Societies Acts with the object of enabling members to co-operate in the investment of their savings, but such societies were of relatively small importance until the advent of the First Co-operative Investment Trust, Ltd. The ultimate aim of co operation being to eliminate profits by bringing consumer and producer into direct relationship, it is frequently argued by co-operators that investment trusts ought not to be regarded as co-operative undertakings because their aim is to secure additional profit for the investor. There is in fact very strong feeling in the co-operative movement against any investment with private enterprise. Even the C.W.S. Bank, which holds more than £25,000,000 on deposit and current account, refrains, as far as possible, from investing in private enterprises, and so does not really enter into competition with the ordinary bank whose main function is organisation of the supply of credit for industry In some sense, however, investors are consumers; their object is to purchase deferred income on as advantageous terms as possible, and provided the growth of co-operation is not handicapped by lack of adequate capital, there does not appear to be any reason why the most loyal co-operators should not combine to obtain a maximum of profit from the investment of their savings in private enterprise. The investment trust, in any event, has not sprung from the co-operative movement but has originated

outside it. In theory the idea of the co-operative trust is a sound one. Its success rests solely upon the ability of the members to obtain officers to direct the operations of the trust who have experience and capacity in financial matters, and are at the same time of irreproachable integrity. In some measure this may be said to be the handicap of almost any co-operative undertaking, although experience shows that in the co-operative movement proper there is the added handicap of unwillingness on the part of members to pay highly enough for the specialist abilities required for the successful management of large undertakings and the difficulty of devising a method of selecting such officers so as to ensure that they are selected solely on the merits of their capacity. It is early yet to judge of the success of Co-operative Trusts, but those first in the market have unquestionably captured public support and from the outset shown that so far at any rate they have been capable of earning a very high rate of interest. They have also shown themselves able to set aside substantial reserves derived from realisation of investments. The First Co-operative Investment Trust, Ltd., at the end of its fourth year had a membership of 18,322 and a share capital of £1,262,845. The Trust also borrows heavily from its bankers. Up to January 31, 1928, it had earned some £136,000 in interest and dividends on its investments, and £17,000 in underwriting and other commissions, while the net surplus from realisation of investments was sufficient to meet actual depreciation and create an Investment Reserve of £35,000. Press reports state that the position in the following half-year was by no means so good, but no later official returns have yet been filed. Expenses connected with organising the trust and obtaining new business have been heavy—about £30,000 for the four years. They have been met, however, not out of ordinary revenue, but from the income derived from entrance fees, which totalled in all some £58,000. The Second Co-operative Investment Trust, Ltd., registered a few months after the First, had a membership of 10,536, and a share capital of £293,658 at the end of September, 1927, while since its formation it has earned in interest and dividends some £11,000, in underwriting and other commissions £2,000, and a net surplus of £4,000 on realisation of investments. In all about forty co-operative investment trusts have been registered under the Industrial and Provident Societies Acts, including the Third and the Fourth which have been formed by the same promoters as the First and Second Trusts mentioned above.

CO-OPERATIVE PARTIES.

Co-operative Party.—The Conference took place at York, Jan. 28-9, 1928, with Mr. A. Barnes, M.P., in chair. There were present 230 delegates representing 82 societies. According to the Secretary's statement, 444 societies with 2,500,000 members were in the Union, and so, practically, one half of Co-operators gave direct support. The resolutions passed by the Conference were mainly on Labour Party lines.

Co-operative Wholesale Society.—The net sales in 1927 of C.W.S. amounted to £75,292,233. A pensions scheme was adopted in March, 1928, by 229 votes to 212, for the employees of the C.W.S. It is non-contributory, and will concern about 40,000 workpeople.

Canada.—At the Lloydminster, Saskatchewan, Congress of the Canadian Co-operative Union on June 28, 1928, it was decided by a unanimous vote to establish a Co-operative Wholesale Society for the whole of the Dominion. The number of Co-operators, including the Grain Pool, was returned at 526,000, with market produce, in 1927, of £130,864,000.

CO-PARTNERSHIP.

GRADUAL increase is still shown in the number of firms that have some kind of profit-sharing system with their employees, but the progress is alarmingly slow in view of the virtues of Co-partnery. At the end of 1927 there were 440 establishments with 447 schemes concerning 235,000 employees; comparative figures for 1923 were 412, 428 and 189,000 respectively. These aggregates include Co-operative Societies. In businesses, other than Co-ops., of the 577 Co-partnership schemes known to have started, only 297 were in operation at the end of 1927. These were roughly classed as Share Issue 93, Deposit 26, Cash or Saving Bank distribution 119. Addition to Superannuation or Provident Fund 13, various 46. It is to be noted that in 1901 there were only 25 schemes of the cash bonus distribution compared with 119 of 1927. Predominance in aggregate of employees remains with the electrical, gas and water corporations that have 41,100 members in their schemes. Manufacture of food and drink holds second place with 27,300; chemical, soaps, paint and glass industries third with 25,700; with assurance and banking fourth at 24,900. In the 222 schemes for which full details are available, the average distribution per employee worked out at £8 19s. 7d. for 1927 compared with £9 8s. 4d. in 1926. The *Industrial Co-partnership Association* held a Conference at Oxford in July, 1928. A demonstration of 13,000 Co-partners in the Gas Light and Coke Co took place at Olympia on May 12, 1928, at which a presentation was made to the Governor, Sir David Milne Watson. In August, 1928, the Imperial Chemical Industries issued details of an employees' shareholding scheme by means of which employees could obtain shares in the concern at 2s. 6d. below market price, paying for them by instalments over two years; restrictions in matter of number so held, etc., apply. In September, 1928, Lewis' Drapery Companies of Oxford Street announced with a new share issue and merger a co-partnership scheme.

COST OF LIVING.

STATISTICS that follow will suggest that we have almost reached a stationary point in the Index Figure for the Cost of Living. It is held by economists that the high prices will remain until the gold standard of pre-1914 is returned. On the other hand, there may be a gradual increase in the cost of living, for rationalisation is tending to reduce production of food to the quantity required with the result that no surplus exists to bring down prices. The Food Council, still without real power in fixing prices, has continued its work of investigation, but has always been in the rear of price movements instead of looking ahead and preparing in advance against possible profiteering in prices or cornering of supplies. Wages are almost stationary, except for the fall of 2½ per cent.

on the railways and the working of the sliding scales or their equivalents in mining areas.

1st day of Month.	Index Figure above that of July, 1914 (100) Low. High	Workpeople whose wages changed (In 000's)	Net Increase in weekly wages (In 000's £)

D.O.R.A. AND SHOP HOURS.

THE Shops (Early Closing) Acts, 1920 and 1921, embodied many restrictions upon sales, which were originally imposed as war-time measures under the Defence of the Realm Acts to secure economy in the consumption of coal, lighting and luxury foods. Vent was given more and more strongly to the feeling that the restrictions had long outlived their usefulness and that their continuance eight years after the cessation of war was a cumbersome anachronism. To allay the public irritation, a Departmental Committee, under the chairmanship of Sir William Mackenzie, was appointed in March, 1927, to inquire into the working of these Acts. This Committee recommended the abolition of such of the restrictions as were considered to be purely vexatious, but considered that others of proved value should be preserved; the principle of a general closing hour was upheld on the ground that the general health of shop assistants had improved and that they had benefited in other ways from being relieved from the great hardship of the long hours which they formerly had to work. Practically all the recommendations of the Committee were introduced into a private member's Bill which was passed as the Shops (Hours of Closing) Act, 1928, and came into force on August 3, 1928. This Act, which applies to Great Britain only, repealed entirely the Acts of 1920 and 1921, and made permanent provision for the general closing of shops, with certain exceptions, not later than 9 p.m. on one day in the week, known as the "late day," and not later than 8 p.m. on any other day; Saturday is fixed as the late day, but the local authority is empowered to prescribe by order some other day. Notable exceptions to the general rule are confectioners' shops and tobacconists' shops. Table waters, sweets, chocolates or other sugar confectionery or ice cream may be sold until 10 p.m. on the late day and 9.30 p.m. on other days, but if the local authority is satisfied that a variation is desired by the majority of the occupiers of the shops affected, it may by order substitute an earlier hour, not however earlier than 8 p.m. The general closing hours, i.e., 9 p.m. on the late day and 8 p.m. on others, apply to the sale of tobacco and smokers' requisites, but the local authority can substitute later hours up to 10 p.m. on the late day and 9.30 p.m. on others, if satisfied that it is the desire of at least two-thirds of the occupiers of the shops affected. Much of the agitation against D.O.R.A. centred round the restrictions on the sale of tobacco, confectionery and ice-cream in theatres, cinemas and music halls; under the Act, these commodities may be sold at any time during the performance to any *bona fide* member of the audience, but only in a part of the building to which no other members of the public have access. The clause, which occasioned most discussion and had ultimately to be withdrawn, sought to exempt from the compulsory closing restrictions "one-man shops," i.e. shops in which no assistants are employed.

EIGHT-HOUR DAY.

POSITION of the nations in regard to the Washington Pact for the maximum eight-hour working day has remained practically the same throughout 1928. At the meeting of the International Labour Organisation on Feb. 2, 1928, at Geneva, a proposal of the British Government was carried for a "Draft on the Working of the Convention" to be submitted to the Governing Body of the I.L.O. in April, 1929, when the agenda should also include the question of the revision of the Convention. Delay by the British Government in putting the Convention into legislative form was criticised by the International Congress of Miners at Nimes on May 29, 1928, and miners in the countries that had not adopted the Convention were invited to engage in a violent campaign accordingly. At the September T.U.C., the resolution was passed unanimously to place ratification of the 1919 Pact in the fore-front of the Labour Party programme at the next General Election. The International Federation of Metal Workers at their London Conference on May 30, 1928, deplored the proposals for revision of the Pact, and called on all organised workers to protest against delay in ratification.

EX-SERVICEMEN'S SOCIETIES.

BRITISH LEGION.

LAST available figures relate to September 30, 1927, that were issued in connection with the first Annual Conference to be held outside London at Scarborough, May 27–29, 1928. Number of active branches in England, Wales and Ireland was 2,939, plus one unattached British Legion in Scotland had 178 branches, and there were affiliated 54 regimental branches and 41 more overseas. Net amount of the Appeals Branch receipts for the year was £303,666, of which £292,479 went to the Benevolent Fund; the Relief Department received £258 544 of this. Poppy Day Collections had grown from £106,006 in 1921 to £517,000 in 1927. This is an average of approximately 3*d.* per head of the population, but it includes collections on ships at sea, besides £28,745 from Malaya, Ceylon, Gold Coast and Nigeria, plus sales of wreaths. Imitation poppies have been sold on Armistice Day for private profit, but this has been stopped by a new Act of Parliament. Earl Jellicoe succeeded the late Earl Haig as President, and took the chair at Scarborough. The Prince of Wales

and Marshal Foch attended in presence of 60 delegates. On the Sunday a two miles march took place of the delegates and ex Servicemen from surrounding districts to a service conducted by the Bishop of Hull. Marshal Foch appealed for unity of effort and maintenance of the Entente. The Prince asked for a spirit of optimism. Earl Jellicoe praised the international aspect in the British Legion's membership, of the British Empire's Services League and the F.I.D.A.C. (*Fédération Inter-Alliée des Anciens Combattants*), and looked forward to a time when the whole of the bodies dealing with ex-Servicemen would be co-ordinated. Matters before Congress included: Merging of Officers' Benevolent Department (withdrawn); Removal of distinctions between pre-War, War-time and after-War ex-Servicemen (defeated); List of officials of United Services Fund in receipt of £250 per annum or more (carried), Only ex-Servicemen to be employed under Funds (defeated); Paid officials to be ineligible for committees (carried), forty-three resolutions dealt with pensions, and most of these were carried; British Legion to have representatives of Court of Referees under Unemployment Insurance Acts (carried); National campaign to find work for unemployed ex-Servicemen (carried).

Pilgrimage to Ypres.—11,000 pilgrims of B.L. and British Empire Service League visited old Battle Front of Belgium and France in first week of August, 1928. A Ceremony of Remembrance was held at Menin Gate in presence of Prince of Wales and Count of Flanders on August 8, when the whole of the visitors marched past.

Douglas Haig Homes.—A National Fund was instituted following the death of F.M. Earl Haig under this title. Housing accommodation is to be erected in the big industrial centres for the ex-Service men and their dependents. A substantial portion of the Fund is being earmarked to enable accommodation besides D.H. Homes to be available. Waiting lists exist for the War Seal Foundation and Poppy Day Factory Flats that are occupied solely by disabled men.

B.L. WOMEN'S SECTION.

Annual Conference held at Central Hall, Westminster, under presidency of Lady E. Spencer-Churchill on May 4 & 5, 1928. Duchess of York, Lady Haig and Lord Jellicoe visited the meetings. The growth of branches was shown to be at a speedy rate; on Jan. 1 there were 511, but by the Conference 803 were on the register, including 18 in the Irish Free State.

OFFICERS' ASSOCIATION.

The Officers' Benevolent Department of the B.L. has a separate Royal Charter as Officers' Association. Eighth Annual Report, available March, 1928, showed an average weekly number of cases dealt with as 1,276. It was estimated that the sum of £450,000 would be necessary to place Dept. on financial basis as long as need for activities existed. Fees for education of children were expected to reach their peak in 1932.

B.L. (SCOTLAND).

Gen. Sir I. Hamilton urged union between English and Scottish B.L.s at the Annual Conference of the B.L. (Scotland) at Dumfries on June 3, 1928. The Executive Committee subsequently announced that a resolution had been passed to close the negotiations for amalgamation. Lord Glentanar, President, announced on Sept. 26, 1928, that legal difficulties formed the main obstacle against amalgamation. But they could not hinder co-operation and unity of purpose.

OTHER BODIES.

The Stationery Office, on behalf of the War Office, publishes a handbook at 6*d.* in which details are given of all known Military Societies and Funds. Their extent is much greater than generally realised.

King's Roll. 243 committees exist in Britain to forward enrolment of still more firms on the King's Roll as employing disabled ex-servicemen. These committees work with the King's Roll National Council, of which Earl Jellicoe is President.

Soldiers' and Sailors' Help Society. Duke of Connaught presided at Annual Meeting at Caxton Hall on June 27, 1928. Society had dealt with 43,708 cases in year, an increase of 4,727; work had been found for 3,146 men. Grant of clothing and money amounting to £79,246 were given to 16,795 cases.

The *Lord Roberts Memorial Workshops* had record sales of £118,000 in the year.

National Association for Employment of Regular Sailors, Soldiers and Airmen 43rd Annual Meeting at R.U.S.I., Whitehall, was presided over by Sir W. P. Pulteney on June 11, 1928. He mentioned 23,988 men had been registered during the year, permanent work was found for 10,967 and temporary for 4,131, increase on year of 1,293 and 16.

FIXED EASTER.

THE League of Nations in 1923 appointed a Committee to consider the question of the reform of the Calendar generally and the stabilisation of Easter in particular. This Committee was unable to find evidence of any general support for reforming the calendar as a whole, but reported that the religious authorities would be ready to consider the stabilisation of Easter if the benefit to mankind of such a reform were clearly defined and proved. It was clear that, as regards secular interests, the proposal would receive wide support, as stabilisation was urged by educational authorities all over the world, by the International Chamber of Commerce and by most of the European railway organisations. With the object of enabling the Government to take up the question and to ask the League whether some agreement for the stabilisation of the festival could not be secured, at any rate among the Western Powers of Europe, a private member's Bill to regulate the date of Easter Day and dependent dates was introduced into the House of Commons in February, 1928, and, after amendment, became law in August as the Easter Act, 1928. The Act provides that, as from a date to be fixed by an Order in Council, Easter Day shall be the first Sunday after the second Saturday in April. The scope of the Act is at present limited to the United Kingdom, the Isle of Man and the Channel Islands, but may, within narrow limits, be extended by Order in Council to other parts of the Empire and to mandated territory. In order to ensure uniformity of action with other countries and the support of the religious authorities, the Order in Council cannot be made until a draft of the Order has been laid before

both Houses of Parliament and approved by resolution, with or without modification; in framing the draft, consideration must be given to any opinion officially expressed by any church or other Christian body. The next step towards a fixed Easter therefore is to secure the unanimous opinion of the Christian churches that stabilisation will be for the benefit of mankind.

GENEVA ECONOMIC CONFERENCE.

A DOCUMENT was published by the League of Nations in May, 1928, analysing the economic conditions and reporting upon the work of the Economic Consultative Committee that had met at Geneva earlier in the month. World trade had advanced considerably since the War with the greatest progress in Central and Eastern Europe and with Western Europe relatively better than North America. Praise was accorded to the commercial treaties on the lines recommended by the Economic Conference in the case of France and Germany and those that concerned Germany and Yugoslavia, Germany and Greece, Austria and Hungary, and Hungary and Czechoslovakia. The E.C.C. resolution on tariffs in recognising the difficulty of international agreement advocated agreements with regard to particular groups of commodities as an early step to total removal. Appeal was made to Governments that "the upward movement of tariffs should cease." The working of the International Management Institute, created to deal with the Conference's recommendations on Rationalisation, was to be directed to promoting international trade by abolition of apparently unnecessary type differentiations.

No progress was reported on Industrial Agreements, so the Economic Organisation was instructed to confine its attentions again to the study of the various agreements in force and the measure of publicity given them. The Economic Organisation of the League of Nations was invited to follow up the studies already made on the subjects of coal and sugar since the world was suffering from over-production in case of each commodity. In Agriculture it was recommended that a collection should be made of all available data on production, training, marketing, credits and transport and also there should be an examination of the most suitable means for linking up co-operative societies of consumers and producers. The Gold problem was offered to the League for consideration with an emphasis on the reduction of the fluctuations in the purchasing price of gold. The Report of the *Chamber of Shipping* of U.K. (issued on Feb. 19, 1928) stated inter alia —"There is not enough trade to fill the ships because the world's trade is reduced by the world's trade barriers. Shipping is still, and will be, depressed until the world realises the true economic policy and trades instead of barring trade."

GIFTS TO THE NATION.

Two remarkable gifts, each of half a million pounds sterling, were made to the nation during 1928 for the ultimate purpose of reducing the National Debt. The first was made anonymously, the unknown donor setting aside £500,000 to be managed in trust for the nation. The wish was expressed—and acceded to—that the capital should accumulate at compound interest over a long period of years, so that eventually, with all its accrued proceeds swelling progressively, it should be applied to the reduction of the National Debt. He voiced a hope that others might from time to time be prompted to follow his example. The fund was entrusted by the donor to a famous firm of bankers to secure the benefit of their long experience in finance. The Chancellor of the Exchequer, who, in publicly acknowledging this generosity, described the action as "inspired by clear-sighted patriotism," only a few months later had a similar announcement to make. He informed the House of Commons that Lord and Lady Inchcape, the parents of the Hon. Elsie Mackay, who perished in an attempt to fly the Atlantic, and their other children, desired, as none of them wished to benefit by her death, to place in trust with the nation the sum of £500,000, the residue of her estate, which passed to them. Their wish was that this gift should ultimately be applied to the reduction of the National Debt. They proposed that it should accumulate for a period roughly of 50 years, unless at some other date the proceeds, with other sums which might be available, should be sufficient to redeem the whole of the liabilities of the State. Until the previous year the law prohibited a bequest accumulating over more than 21 years, but this provision was amended in view of the expectation of the first gift of half a million. In reply to a question in Parliament it was stated that, apart from these special accumulating funds, the total gifts from individuals received since the outbreak of the war amounted to £2,109,337, of which £625,960 was in securities and the balance in cash. Several other gifts were made after that intimation, including one of £10,000 "in gratitude to those who voluntarily gave or risked their lives for Empire, Home and Country." Another donor gave 25,000 dollars in bonds as a contribution towards the payment of interest on the British Debt to the United States.

GLOZEL "FINDS."

IN 1927, rival schools of archæologists were engaged in a violent controversy as to the authenticity of prehistoric "finds" made near Glozel, a hamlet to the south of Vichy in Central France. It was said that, in March, 1924, a farmer named Fradin in the course of ploughing had unearthed large stones which had led to excavations being undertaken by Dr. Morlet, a local amateur archæologist; these yielded an abundance of inscribed tablets, pottery, weapons, carved horn, slate axes and many other kinds of prehistoric objects. It was claimed that the "finds" were valuable as marking an important stage in the study of early man, and that the site was a burial place of some prehistoric tribe which might be found to form a link between Palæolithic and Neolithic man. A strong cleavage of opinion amongst archæologists soon became evident; some declared that the discoveries were spurious and called attention to the complete absence of method with which the excavations had been carried out, while others, who accepted them as genuine, disputed about the period to which they should be attributed. The site was scheduled by the French Government in October, 1927, as an ancient monument of national importance, and in the same month a Commission was appointed by the International Institute of Anthropologists to conduct an impartial examination. Meanwhile, the Glozel

controversy became a topic of interest in the Press and a theme for the music halls. The Commission came to the unanimous conclusion that the exhibits which it had examined at Glozel were not antiquities and that certain of the objects excavated bore signs of recent burial, but offered no suggestion as to the method or date of their introduction into the soil; a reservation was also made in the form of a list of such objects as it considered might be regarded as genuine. In consequence of this finding, the order scheduling the site as a national monument was annulled; in view, however, of the reserve which characterised the report, the opinion of the Commission, though hailed by the "anti-Glozelists," was not accepted as conclusive and the controversy continued; subsequently a second Commission was appointed and issued a statement that after three days' digging it was convinced that the objects discovered belonged to the Neolithic period. Public interest, however, languished but was periodically resuscitated by reports of libel actions and other proceedings which followed in the wake of the controversy.

GREYHOUND RACING.

POPULARITY of these "animated roulette tables" seemed to grow in 1928. There is hardly an industrial centre of any size in England that has not one or more greyhound racing tracks within its immediate area on which racing and betting take place weekly, sometimes nightly. The attendance can be realised from the announcement made by the Greyhound Racing Association for its controlled tracks that between March 24 and August 7, 3,000,000 paid for admission; White City and Harringay had a million each in four months. Attempts made to use the grounds of Crystal Palace and Alexandra Palace became public questions and the agreement made by certain Trustees of the Crystal Palace to allow greyhound racing had to be cancelled. Mr. J. Buchan, M.P., introduced a Bill to give local option control of greyhound tracks, and though it reached a Second Reading by 222 votes to 18, the Government refused to furnish the essential facilities for its passage into Law. A National Greyhound Racing Club has been established on the lines of the Jockey Club for the purpose of regularising the racing and on January 22, 1928, issued a list of 43 tracks that they had "licensed." Greyhounds have continued to realise high prices that are out of proportion to the stakes ever likely to be won in race prizes. The investing public has supported the issues of an inflated nature of shares in greyhound track companies, but the prices quoted for the shares in general in the Stock Exchange Lists have suggested rather poor bargains. There is not an entire unity amongst the managements of the tracks, and the scheme for closing down for three months in the winter has had a mixed reception, though at the time of writing there will be a total suspension of two months. The life of the tracks depends upon fresh money being placed in the betting pool by those who are willing to gamble and lose.

HOSPITALS FOR THE MIDDLE CLASSES.

THE question of hospital accommodation for the middle classes—a term open to criticism but sufficiently well-defined—has been frequently discussed in the Press. Attention has been directed to the case of a middle class person who requires treatment and nursing, and who may have to choose between the general ward of a voluntary hospital, primarily intended for the "needy poor," and a nursing home, the fees of which he is unable to afford for any length of time. It has been suggested that money should be raised to build and equip a hospital or hospitals, each with 300 to 500 beds, to meet such cases, and that the accommodation should be graded according to the rooms selected by the patient; it is contended that, if run on a sufficiently large scale, such hospitals could be made a paying proposition. An interesting report, which throws light upon the general question as regards London, was issued in July, 1928, by a special committee, known as the Pay Beds Committee, of the King Edward's Hospital Fund for London, which was appointed in 1927 to inquire and report upon the question of hospital accommodation in London for persons prepared to pay more than ordinary voluntary hospital patients. The voluntary hospitals within the area covered by the Fund, i.e., within the 12-mile radius from St. Paul's, were asked to supply particulars of any special beds available for such patients. The number of hospitals which supplied the information was 130, and the total number of available beds in these hospitals at March 31, 1928, was about 15,600; of these the number of hospitals providing special beds was 80, and the number of such special beds 1,055, at fees ranging from two guineas or even less per week to ten guineas, more than half, however, being from four to five guineas. It was recorded that of these 1,055, 494 were in existence before the war and 590 in 1920, while the percentage of pay beds to total beds had increased from 4 in 1920 to 7 in 1928. Evidence was given to the Committee of the need for additional beds of this class; 92 of the 130 hospitals reported an unsatisfied demand, of these, 44 had extension schemes which provided for pay beds and would increase the total from 1,055 to over 1,300, and if further schemes in contemplation were carried out, the total would ultimately exceed 1,900. The Committee were clearly of opinion that the scope of the Voluntary Hospital should no longer be considered as restricted to the sick poor, but that present day conditions demanded a wider interpretation to include provision for people with moderate means. In considering alternative methods of increasing the accommodation the Committee discussed the question of separate hospitals for paying patients, but, while acknowledging there might be room for this method as well as the pay bed system, were in doubt as to whether the same number of beds could not be provided more efficiently and economically by adding a comparatively small number to each of several existing voluntary hospitals, and whether it would not be more convenient for patients to have the beds thus distributed in different parts of London rather than concentrated in a small number of large institutions.

I.L.P.

THE Annual Conference of the Independent Labour Party was held at Norwich, April 8 to, 1928, with Mr. J. Maxton, M.P., in the Chair. His reply to the suggestions that the I.L.P. was simply a duplicate body of the Labour Party was the I.L.P. "had a special function and a higher and even more responsible duty than that of the Labour Party, and they insisted upon the continuation of their separate life." Delegates

complained of loose propaganda methods and lack of team work amongst Labour M.P.s. A plea for dovetailing the Co-operative and Socialist Movements was put forward by Mr. Shinwell, M.P. Resolutions were carried in favour of 44-hour week, family allowance of minimum of 5s. weekly for each child from State, a living wage for all workers irrespective of occupation, determined opposition to all war, impossibility of industrial peace under capitalism, nationalisation of most industries, adoption of practical schemes for relieving unemployment, re-organisation of the mining industry. Mr. Philip Snowden, M.P., resigned from the Party at end of 1927, after a membership of 34 years. His reason was that the I.L.P. as a separate body was "no longer useful nor necessary." Mr. Maxton and Mr. Cook (M.F.G.B. Secretary) became associated in a manifesto that was partly answered by Mr. J. R. Macdonald in July, 1928, in "Under the incompetent lead that the I.L.P. has had for some years . . . the I.L.P. has become unhappy and mean. . . . The very last men who can reform anything or guide anything are the men who have been making a mess of the affairs of the I.L.P." Messrs Maxton and Cook opened an extremist campaign at Glasgow (July 8) and Cardiff (August 25) against what they termed "Mondism" that would lead to industrial peace, and in its place would revitalise the old Labour-Socialist programme and agitation of unrest. The I.L.P. endorsed the manifesto as it gave an effective lead to "a speedier attainment of Socialism."

Scottish I.L.P.—Baillie Dollan presided over Conference of 200 delegates at Kilmarnock, January 9-10, 1928, at which resolutions were passed in favour of one month's full pay holiday for all workers, 6-hour maximum day, guaranteed weekly wage, State allowance for children under sixteen. Mr. Macdonald was considerably criticised in the speeches. A Women's Conference of the same body, held at Glasgow, September 15, 1928, passed similar resolutions. Mrs. Jean Roberts, who presided, put the cost of the family allowances at £115,000,000, and this would be obtained by taxation.

The *Welsh I.L.P.* meet twice yearly to pass similar resolutions. Another off-branch in the *Guild of Youth* at a Conference at Derby in May found opportunity to condemn the efforts made by the T.U.C. for industrial peace by negotiation.

IMPROVING THE NATION'S MUSEUMS.

After considering the problem for a year, the Royal Commission on National Museums and Galleries made a number of important recommendations in an interim report which was issued during the autumn. The Commissioners declared that the National Collections were unrivalled in range, variety and value, and that it would be disastrous, both from the standpoint of the educational needs of the country and of the national prestige, if they were not liberally maintained and exhibited with dignity. The development of the National Museums and Galleries, they said, had not kept pace with the growth of population and with educational needs. Economy had already been pushed beyond the point of prudent administration. The needs of certain of the institutions were described as urgent, notably those of the British Museum, the Natural History Museum, the Geological Museum, the Science Museum, the National Portrait Gallery, the Royal Scottish Museum, and the National Library of Scotland. They recommended building operations at these institutions costing £779,000, which represented a saving of £800,000 upon the expenditure involved in larger and more comprehensive schemes put forward before the inquiry. At the British Museum the problem of outstanding urgency was that of the Library. The Commission urged that the reconstruction of the Iron Library should be set in hand as soon as possible, but as this would probably take 12 to 15 years to complete they proposed immediate minor improvements, together with the concentration of the whole Newspaper Department at Hendon, the estimated cost of the changes being about £283,500. The alterations recommended in the case of the Natural History Museum were mainly with the object of relieving congestion in several departments, but in regard to the National Portrait Gallery an immediate extension towards the west on the site reserved for such extension was urged. This, they were informed, would provide the wall space required for the adequate exhibition of the present collection, together with room reckoned to provide for additions for perhaps 15 years. The cost was placed at not exceeding £40,000. The Commissioners had some interesting things to say regarding the value of the nation's collections. Some idea of money values would be indicated, they remarked, when it was stated that one of the smaller London collections alone had been estimated by a competent authority to contain treasures worth £15,000,000. The Elgin Marbles, it was mentioned, were beyond price. The report added that the Commissioners were impressed by the isolation and lack of concerted effort which characterised the present organisation of the National Museums and Galleries. Bound by a policy too individualistic and self-centred, the Governing Bodies, they declared, had failed to represent their case for assistance coherently and convincingly either to the Government or to the Public.

INDUSTRIAL FAIRS.

British Industries Fair was held for the eighth annual occasion at White City, London, and Birmingham (for heavy machinery and goods) from Feb. 20 to March 2, 1928. Over 100,000 "trade" admission tickets were surrendered at the White City and it was understood that the orders given were voluminous. The tickets showed that over 60 Dominion and Foreign countries were represented. In London, 1,400 firms displayed articles on their stalls that occupied 257,000 sq. ft. of exhibition space, the Empire Marketing Board taking 10,000 sq. ft. for food products and raw materials. In Birmingham, the Fair covered 10½ acres compared with 6 acres of 1927, with a 50 per cent. increase in exhibitors to 900. The pity is that the Exhibitions are of short duration and that the public can be admitted only in the evenings; the nightly attendance in London averaged 6,000. British Celanese, Ltd., entered the London Fair for the first time; the growth of the space taken by the Textile Section was 3,000 ft. in 1926, 10,000 in 1927 and 20,000 in 1928. The pottery and glass ware display was estimated to be the greatest ever shown under one roof. Fifty wireless firms had stalls. Sport had the biggest of all departments. In Birmingham, brassfoundery, hardware and ironmongery led with 228 firms; power, lighting, etc., had 204

representatives; engineering, 210, building and decoration, 82; agriculture, 52; metals, 42. The gas industry occupied 16,000 sq. ft. London needs a permanent home for the B.I.F. Arrangements were begun at the 1928 Fair for the 1929 Fair. An extra hall is being taken with 100,000 sq. ft. of stand space to add to the more than quarter of a million of 1928 in London. By June, two-thirds of the space had already been booked. In Birmingham, the stall space will be increased to about 250,000 sq. ft. to make the total of the two over 600,000 sq. ft. for displays alone.

Abroad.—At International Lyons Fair, March 3–28, 1928, 20 nations were represented and invitations sent to 47 countries. Paris Fair of May 12–28, 1928, had 7,000 exhibitors. 9th Commercial Fair at Brussels opened April 12, 1928, with 33,000 sq. yds. of stand space, Great Britain had 120 firms represented compared with 1,845 of Belgium, 440 of France, Germany and Japan 135 each out of a total of 2,889 exhibitors. British goods have been poorly represented, if at all, at Leipzig and Frankfurt and other Continental Fairs of 1928; the reason was poor results and experiences previously.

Newcastle-on-Tyne, 1929. The North East Coast Exhibition will be held at Newcastle-on-Tyne from May to Oct., 1929. Engineering and Industries will have the two dominating buildings, and it is hoped that the Exhibition will remove the depression and slump that have settled of recent years in the North East of England. The King has promised to open the Exhibition. Sir Charles Parsons will be President.

INDUSTRIAL PEACE.

An invitation was addressed to the General Council of the Trade Union Congress on Nov. 23, 1927, by Sir Alfred Mond in the name of certain leading employers, "to meet us to consider questions . . . relating to the entire field of industrial re-organisation and industrial relations." Without prejudice, the invitation was accepted on Dec. 20, and a sub-committee appointed by the T.U.C. to arrange subjects to be discussed. First meeting of G.C. of T.U.C. and the Employers was held Jan. 12, 1928. After ten speeches, meeting adjourned and sub-committees appointed by both parties to go into the questions to be discussed. These sub-committees met on Mar. 21, when an agenda was drawn up covering every main head in labour controversy from victimisation to banks and rates. It was decided to hold weekly meetings for discussing the items so listed. First public step of importance was the sending of a letter by the Conference to the Chancellor of the Exchequer on April 12, in which the request was made for a full enquiry into the best form of credit policy for the country. The letter pointed out that the Conference did not think it desirable that the credit policy of the nation should be determined automatically by the Gold Movements, as in pre-1914, and that the Bank of England should not be tied too strongly by a Gold Reserve Law that would hamper co-operation with Europe in economising and regularising the use of gold whilst preventing undue fluctuations in its price. A second full joint Conference met, July 4, with Mr. B. Turner in Chair and Lord Melchett (Sir A. Mond) in Vice-Chair, to adopt an interim report. It was claimed that the letter resulted in the 1928 Bank Notes and Currency Act being less rigorous in the tieing down of the Bank of England. Recognition of trade unions "should be encouraged and extended" to "full recognition." To deal with any case of victimisation, "some appeal machinery should be provided." A National Industrial Council should be formed with quarterly meetings, joint Conciliation Boards, machinery for continuous investigation into industrial problems; the N.I.C. would be representative of Fed. of British Industries and Nat. Confed. of Employers' Assns. and the T.U.C. The tendency to Rationalisation and the definition of the Economic Conference at Geneva were adopted and welcomed subject to the proviso that workpeople should not suffer by displacement. On June 26, the G.C. of the T.U.C. again considered the Report, and decided to continue the negotiations. A resolution, moved by Mr. Hicks and seconded by Mr. Cook, to discontinue the meetings was defeated by 15 to 6: five members were absent. Throughout the meetings, Mr. Cook, of the Miners, has been the opponent to all negotiations and arrangements. He has attacked what he has called "Mondism" insistently. The N.U.R., at the Delegate Conference of July 3, supported the meetings by 64 votes to 16.

INDUSTRIAL TRANSFERENCE BOARD.

Following an announcement made in the House of Commons by the Prime Minister on Dec. 6, 1927, an Industrial Transference Board was appointed on Jan. 6, 1928, with Sir W. Fisher, Sir J. Cadman and Sir D. J. Shackleton as members. The Board was to facilitate the transfer of workers, especially miners, for whom no work existed in their areas to neighbourhoods where opportunities existed or might arise. The Board's Report was issued on July 23. It was held that the absorption by the rest of the country of 200,000 unemployed was not impossible and pointed out that 120,000 new labour engagements took place weekly. Loans through the Labour Exchanges to meet travelling and like charges were proposed, as were Training Centres for adults and juveniles. At least half the surplus consisted of men over 36 years; their placing was most difficult. Settlement on small agricultural holdings was faced with expense. Possibilities were ripe of 1,000 families from depressed areas to take up forest holdings. Emigration had fallen markedly, but immigration had increased. In Aug., 1928, 150,000 circular letters an unfortunate means especially at holiday time for securing personal attention - were sent out in the Prime Minister's name to employers by Labour Exchanges in which an earnest appeal was made by Mr. Baldwin for work to be found for at least one man extra in every workshop; 8,500 were found work as harvesters in Canada in August. In April, 1928, the Ministry of Labour published the results of investigations into 10,000 unemployment cases. It was found that a nucleus existed mainly of men above 45 years of age who had been on benefit for long periods. Of 8,404 male cases, 275 had each been on benefit for more than 800 days. The figures for age periods of four years showed that from 16 to 59, the percentage of claimants to the estimated insured of the period was highest between 25 and 29 when it formed 11 per cent. Of 1,074,000 insured between those ages on a certain date, 118,000 were claimants for benefit. The International Labour Office has carried out an investigation on *Seasonable*

Employment. From a report available in Sept., 1928, the remedy of deseasonalisation was put forward in mobility of labour, limitation of influx of new labour and an effective re-organisation of the labour market Seventh and final Report issued by Ministry of Labour on *Apprenticeship* in July, 1928, showed that there were about 315,000 boy apprentices and 110,000 boy learners in skilled occupations in Great Britain, but only one-seventh under 21 in industrial occupations were serving any recognised apprenticeship The smaller rather than the larger establishments undertook the burden of apprentices Apprenticeship of the modern type is vastly different from its predecessors. And it is showing a decline.

INTERNATIONAL CIVIL LAW.

At The Hague in Jan. 1928, the sixth Conference of International Civil Law set on foot a special preparatory committee for reporting to the next Conference the nature of a universal standard for a Sale Contract. This work is being done at the express wish of the International Law Association and the International Chamber of Commerce, and if the Sale Contract can be regularised in a common form by all nations international trade should soon feel the benefit. The Conference completed the draft of an international agreement for dealing with bankruptcy cases and the acknowledgement and execution of judgments given in foreign Civil Courts Agreement was also noted on the draft in relation to inheritance and testamentary cases. The 1902 and 1905 agreements on marriage laws, separations and settlements were amended and further alterations were sanctioned in trusteeships. A draft was prepared to acknowledge the supremacy of the International Court of Justice at The Hague in matters of International Civil Law. An amendment of the 1925 draft to secure international acknowledgment of foreign judgments was considered to be one of the best achievements of the 1928 Conference.

LABOUR PARTY.

In July 1928, the Labour Party issued a big pamphlet of its programme with a list of proposed measures to be passed if the Party obtained a majority in the House of Commons. In his foreword, Mr. J. R. MacDonald asked for power "to lay the foundations of a new social order." The programme that had been ordered by the Blackpool Conference of 1927, included the old Socialist doctrine of "vesting the ownership in the nation" of "land, both agricultural and urban, the production and distribution of the coal and power . . . . the network of communications . . . . industrial life assurance . . . ." A supplement to these 50 pages was issued on Sept 20 to explain the Banking Policy. Therein, it was proposed to control the Bank of England by a Corporation composed by representatives from Government departments, Industry, Labour and Co-operative movement: spread of co-operative and municipal banks; individual savings to be used for "enterprises of national advantage"; carrying out of Genoa Conference recommendations in regulation of gold by international agreement. Mr. G. Lansbury, M.P., presided over the Annual Conference at Birmingham, Oct. 1-5. The representation of the Party on the Simon Commission was confirmed by 2,959,000 card votes to 150,000. The issued Party programme received a discussion lasting four days in which the more advanced element found fault with the absence of the "Socialism in our Time" element, the more so as Mr. Clynes put the period of carrying out the programme as extending over 25 years. Mr. Snowden outlined to an extent a Labour Budget in which Death Duties would play a big part and that the unearned increment would be taxed on a much higher scale than usual. Apparently the Bank of England was to become a Government department so far as financial control was concerned. The war chest of the Party was admitted to be in a poor state, and an appeal was made for funds to be collected throughout the country. A collection on the Conference resulted in £710.

THE LIBERAL INDUSTRIAL REPORT.

A comprehensive industrial policy, designed for use in conjunction with the land and mining policies previously outlined, was proposed in the report of an executive committee set up by the Liberal Party, which was issued last year after a long enquiry. An attempt was made by the committee, of which Mr. Lloyd George, Sir Herbert Samuel and Sir John Simon were members, to deal with every phase of industrial life with the object of improving the position of the state of the employer and the worker. The report emphasised the necessity of maintaining our export trade and extending our foreign markets, but the opinion was expressed that the hope of our export trade generally must lie in the development of the newer trades. The creation of an "Economic General Staff" to warn Ministers of what was ahead and to advise them on all the broad questions of economic policy, the conversion of the Ministry of Labour into a Ministry of Industry, taking over the functions now performed by the Home Office under the Factory Acts, the Shop Acts and the Workmen's Compensation Acts, and the administration of the Mines Acts from the Board of Trade, and the establishment of a Council of Industry to undertake the duty of advising and stimulating industries towards co-operative action in the pursuit of efficiency were advocated. The committee proposed that workers' councils should be compulsory, their functions being mainly consultative, but their assent being necessary for works rules. These councils should receive annually a statement upon the financial condition of the firm as fully as would be offered to the shareholders, together with an explanation of trade prospects, and they would be consulted in regard to welfare work and on schemes of profit-sharing or ownership. Describing the distribution of the ownership of property or capital as "so grossly unequal as to constitute a social danger," the committee suggested that after existing capital had received an adequate return the balance should be shared with employees in the form of capital allotments. To combat unemployment it was proposed that a programme of national development should be adopted, including road construction, housing, electricity, waterways and docks development, forestry and reclamation. Our system of local rating was described as far more injurious to industry than our system of national taxation, and the committee proposed that the relief of the able-bodied poor should be transferred to the State, that the system of grants-in-aid should be extended, that site values should be rated, and

that rating areas should be reorganised The setting up of a Board of National Investment to take over the functions of the National Debt Commissioners and the Public Works Loan Board was also proposed, all capital resources accruing in the hands of the Government Departments being pooled and new capital expenditure by public boards and other official bodies financed out of this pool.

LONDON SQUARES.

THE permanent preservation of London's squares and open spaces in the public interest was recommended by a Royal Commission, under the chairmanship of Lord Londonderry, which reported last year, and early legislation on the subject was proposed, a suggestion with which the Government were unable to comply during the present Parliament. The Commission remarked that "the enclosures, particularly those which abut on roads and are open to the public view, are a very distinctive and attractive feature of the plan of the parts of London in which they are situated," not to be found except to a very limited extent in other towns in this or other countries. "It is beyond question," they declared, "that the enclosures add greatly to the amenities not only of their immediate surroundings, but of London as a whole, and the air spaces they afford are of benefit to the well-being of the community. Their loss to any extent would affect an alteration in the characteristic development of the parts of London concerned, which would, in our view, be deplorable." One of the Commission's recommendations was that local authorities should consider the desirability of replacing shrubberies and hedges around enclosures by grass verges, and the practicability of removing heavy railings and replacing them with railings of a lighter and more attractive type. At the same time the Commission did not think that the local authorities concerned should be given any general powers of compulsorily acquiring the enclosures as open spaces. Neither did they suggest that compulsory powers should be granted of requiring arrangements to be made for admitting children to enclosures, but they urged that every effort should be made to secure voluntary arrangements of this nature. The enclosures should be reserved as ornamental gardens or pleasure grounds, for play, rest, or recreation, and the erection of buildings or structures other than those necessary or convenient for the enjoyment of the lands should be prohibited. The number of these enclosures is 461, and their total area amounts to 1,400 acres, and the Chief Valuer of the Inland Revenue estimated the maximum compensation payable if the recommendations were carried out as not exceeding £600,000, a sum which would not include the enclosures belonging to the Inns of Court, where special considerations are involved, and five enclosures excepted from the recommendations because their future had already been decided.

MINERS AS CANADIAN HARVESTERS.

Mainly with the object of finding work for the unemployed miners of Great Britain, of whom, according to the Industrial Transference Board, there were 200,000 who would never again return to the pits, owing to the changes in the coal-fields, the Canadian authorities agreed to take 10,000 men from this country for the harvest during the autumn. There was a ready response to the offer, particularly in the mining areas, and although slight trouble was caused by a handful of Communists, the scheme was a success, and many of the emigrants secured permanent employment in the Dominion, as was hoped when the arrangement was made. The offer made by the British and Canadian Governments was to take the men out and bring them back at half fares from the port of embarkation to Winnipeg, the British Government making a grant of £5 to each man towards the outward fare of £12. Loans of £10 were also arranged through the shipping companies for food and railway fare. The harvesters were guaranteed work for six or eight weeks at wages from £3 to £5 a week, with all found. The men accepted were all between the ages of 18 and 40, and single men were preferred. This plan was the most ambitious in the direction of finding employment overseas that had been attempted, and was part of a Government scheme for increased facilities for overseas settlement. Lord Lovat, the Parliamentary Under Secretary for Dominion Affairs, paid visits to Canada, Australia, and New Zealand, to discuss the matter with the Dominion Governments, the object being to provide facilities for settling on the land a large number of unemployed men from this country, who would be trained in farm work by the Government.

MUNICIPAL BANKS.

ON Sept. 28, 1926, a Committee comprising of Lord Bradbury (Chairman), Sir L. Halsey, Sir H. Haward, Col. S. Peel and Sir W. Schooling, was appointed "to consider whether it is desirable to permit a further extension of Municipal Savings Banks, and, if so, within what limits and subject to what conditions, statutory or otherwise." The Report was made public on Jan. 24, 1928. Evidence was given by 38 witnesses at 21 meetings. Part I of the Report summarised the history and position of Municipal Banks Part II reviewed the evidence and recommended that the general establishment of Municipal Banks "within the next ten years would not be in the interests of the community as a whole and that even apart from questions of national finance it is exceedingly doubtful whether special incentive to thrift provided by such banks is so great as to outweigh the risks involved." It was admitted that the Municipal Banks would provide some additional incentive to thrift, but the proportion of savings so obtained might be small, whilst it was pointed out that Municipal Banks might lead to spending by Local Authorities through Loans from the Bank. Birmingham was much quoted by witnesses to the Committee. The first branch of the Birmingham Municipal Bank was opened in August, 1926, under Statutory Powers and by Oct., 1929, 24,411 depositors had joined in lodging £603,319 and withdrawing £295,708. Under the old Act, this Bank had to close within three months of the end of the War and this duly took place with a deficiency of £7,149 met temporarily by the Corporation and subsequently transferred to the new Municipal Savings Bank that had been established under a later Omnibus Act. The new Municipal Bank was opened at Birmingham on Sept. 1, 1929. On August 31, 1928, the deposits of the Bank totalled £9,145,784 with 259,701 accounts. The mortgages granted on local property totalled £1,687,048. The 46th

Branch of the Bank was opened on Sept. 25, 1928. The rate of interest paid on deposits is 3½ per cent. Manchester's City Council has advocates in favour of a Manchester Municipal Bank. In Sept., 1928, a Committee of the Council had the matter under consideration. The Labour Parties believe in Municipal Banks, whereas they must come in antagonism with Co-operators who have their own Bank and Saving Societies.

NATIONAL RELIEF FUNDS.

MANSION HOUSE FUNDS in connection with big disasters are handed over to the Public Trustee for administration upon the closing of the lists. He works under an administrative Committee, to whom he presents a report at the close of each year. In his last, i e , that for Dec. 31, 1927, he stated that the disbursements were based on the intention to eventually liquidate the whole of the individual funds at the death of the last dependent. The *Titanic* Fund (April 15, 1912) had still a capital of £287,329 with 461 relief recipients. The *Empress of Ireland* Fund (May 29, 1914) with £87,189 and 127 dependents, the *Lusitania* Fund (May 7, 1915) with £22,081 and 26 dependents; and the General Fund of £3,781 were the other chief administrations. The *Connemara* Fund (November, 1916) was almost extinct. The General Fund includes £2,500 from Canada and is to be used to help members of the Mercantile Marine suffering from any special sea disaster. It seems strange that these National Funds apply only to big disasters, and it can be assumed that dependents of sufferers in small disasters may count as ill-fortune that they were not on a large scale whereby strings of public purses would have been loosened.

NEW SILVER COINAGE.

1928 has witnessed the issue of entirely new silver coinage in the British Isles and it goes without saying there have been ample criticisms of the designs. The term "silver" is no longer correct for this form of token money since one half is alloy; 120zs of pure silver are sufficient for 132 shilling coins. Silver coins dated up to 1920 are disappearing from circulation owing to the higher percentage of silver; what are not swallowed up abroad are being called in unofficially by the mint. Whereat the Treasury hope to add to their profit. The King's Proclamation authorising the new coinage was made on Nov. 3, 1927, to come into force on the following Dec. 1. Mint sets of the new coins were sold to collectors at 3*s.* 9*d.* premium. The objection to the coinage is the quick change in colour from bright silver, but from the public point of view nothing matters provided wages can be earned and the money spent. France is re-considering the design of its gold and silver coinage and changes will probably be made in 1929. But there is as little chance in France as in Britain of gold coinage in circulation whilst gold remains at 84*s.* 11½*d.* per oz. An illicit trade is still being done with gold sovereigns minted before the war; they change hands at a premium to be melted down.

NURSE CAVELL FILM.

THE proposal in February, 1928, by an English film company to show a film entitled "Dawn," dealing with the trial and execution of Nurse Cavell became the subject of much controversy, and raised the whole question of regularisation of the censorship of films in this country. Considerable feeling was said to have been aroused in Germany in connection with this film on the strength of the alleged historical inaccuracy of incidents in the execution scene, and diplomatic representations were made both in London and Brussels as to the danger of embitterment of international relations by the public exhibition of the film. No film censorship exists in Belgium other than a Commission to decide which films may be shown to children. In England the only statutory power to control the character of films is vested in the local licensing authorities, who attach a condition to the grant of the licence that no film, which has not been passed by the British Board of Film Censors, an unofficial organisation with Mr. T. P. O'Connor as chairman, shall be exhibited without their previous consent. In response to an invitation from the producer, the Foreign Secretary, Sir Austen Chamberlain, declined to attend a private view of "Dawn," and expressed his strongest repugnance to its character, this action was, of course, taken in his personal and not official capacity. Subsequently, the Board of Film Censors declined to pass "Dawn," stating that in their opinion the theme of the film rendered its exhibition in this country inexpedient in the present circumstances. A private exhibition to about 10,000 guests at the Albert Hall was arranged, but had to be abandoned, as the London County Council, as the licensing authority, stipulated that the film must first be submitted to them, since it had not been passed by the Board of Censors. As a result of a private exhibition to representatives of the London and Middlesex County Councils in March, 1928, the London County Council decided to sanction the public exhibition subject to certain "cuts," and a revised form of "Dawn" was duly shown to the public early in April. Before this date the film had been exhibited without incident in Brussels. Whilst many people deprecated the commercial exploitation of the trial and execution of Nurse Cavell, they deemed the fate of the actual film of small importance in comparison with the questions of principle raised. The fact that the Foreign Secretary had, even in his personal capacity, visited the Chairman of the Board of Film Censors to ask the Board to give particular attention to "Dawn," if it came before them, was considered to involve the principle of an indirect political film censorship. Opinions were advanced that the present system was illogical and needed a responsible authority with defined powers, that the question of censorship was judicial and should not be left to local authorities, whose functions were administrative, and that the censorship should be made uniform with the censorship of plays. The Government, however, after careful consideration, announced that they did not contemplate at that time, March, 1928, taking any action in connexion with the censorship of films.

PARLIAMENTARY CONFERENCES.

Inter-Parliamentary Union.—The 25th Conference of the Inter-Parliamentary Union was opened in the Berlin Reichstag by M. Brabec, V.-P., of the Czechoslovak Senate, when Prof. Schucking (Germany) was elected President. In his address, he pointed out that the Union was a desirable and necessary counterpart to the League of Nations. Dr. Treub (Netherlands) put in

a plea for economic disarmament in the removal of all tariff walls. The admission of Egyptians to the Conference was raised, but the Council in a very carefully worded resolution confined itself to expressing disapproval of an act that would interfere with parliamentary regime. A long resolution was passed proposing settlement of all international disputes by conciliation or arbitration with territorial changes taking place only in accordance with the expressed will of the population affected. In the discussion it was pointed out by Mr Fitzgerald (U.S.A.) that America could not be bound by a clause to the effect that in case of a nation being attacked other states would be bound to stand by it and in the division the U.S.A. delegation did not vote on this particular clause.

Empire Parliamentary Union. — Delegates from Australia, India, Irish Free State, Newfoundland, South Africa, South Rhodesia, India, New Zealand and Britain visited Canada, arriving at Quebec on August 24, 1928. Delegates were welcomed by Canadian Govt. and toured Montreal, Toronto, Winnipeg, Edmonton Calgary, Victoria, Vancouver and Nova Scotia. Discussions ranged over commerce, economic development, Empire settlement, wheat pool, Pacific trade and Oriental immigration.

PEACE PACT.

On August 27, 1928, the Peace Pact was signed at the French Ministry of Foreign Affairs in Paris by representatives on behalf of (in the order stated in the Pact) U.S.A., France, Belgium, Czechoslovakia, British Empire, Germany, Italy, Japan and Poland. Article 1 stated they "condemn recourse to war for the solution of international controversies and renounce it." Article 2 was that settlement of disputes "shall never be sought except by pacific means." Article 3 dated its effect from the ratification by signatories, gave its extension as "long as may be necessary for adherence by all the other Powers of the World." Wide publicity with the aid of cinema film and movietone was given to the actual signing, but it seemed that Belgium's enthusiasm was damped by memories of the famous "Scrap of Paper" and Italy found difficulty in associating Fascist doubts on schemes to end war with the Pact. Within a week of signing the Pact, 39 of the 49 nations not amongst the signatories had signified intention of becoming parties to the Pact. Failing in 1927 to secure an agreement between Britain, Japan and U.S.A. on the building problem of the Navies, the British and French Governments made attempts to arrive at a mutual understanding in August 1928, for their cruiser programmes. The tentative agreement was submitted to U.S.A. and on Sept. 28, the official U.S.A. reply was published. In it was the sentence, "The position of the Government of the U.S. has been, and now is, that any limitation of naval armament to be effective should apply to all classes of combattant vessels." Thus was almost a restatement of the position in the 1927 discussion. Finally the U.S. Government stated it "remains willing to use its best efforts to obtain a basis of further naval limitation satisfactory to all naval powers." The suggestion was also made that variation in classes under such restrictive agreement could be made to suit the needs of individual powers by deducting from the tonnage of one class the excess on another.

PETITIONS OF RIGHT.

TECHNICALLY, it is not possible under English law for a subject to bring an action against the Crown, for, on the principle that the Crown can do no wrong, it is not liable for breach of contract nor for torts, and this immunity extends to Government Departments, except where these are corporate bodies, as e.g., the Commissioners of Works. Civil actions, however, for breach of contract, for recovery of money due under a contract, or for recovery of real or personal property may be brought by the particular process of Petition of Right. This must be presented to the Crown through the Home Office, and requires the sanction of the Attorney-General. A Petition of Right is not available for actions arising out of torts committed by a servant of the Crown, but the remedy open to a person thus injured is a direct action against the servant personally. The procedure by which the Crown commences an action against an individual is archaic and cumbersome, viz.: by means of an Information filed by the Attorney-General. Amongst other anomalies are the rules that the Crown neither gives nor receives costs, and that the subject cannot enforce "discovery" against the Crown, i.e., he is debarred from demanding the disclosure of certain facts, documents or deeds bearing upon the case. It was clear that reform was long overdue, and in 1921 a strong Committee was appointed by the Lord Chancellor, Lord Birkenhead, to consider the position of the Crown as litigant, to propose such amendments of the law as they considered advisable and feasible, and to prepare a Bill which would give effect to any changes recommended. Before the conclusion of the prolonged enquiries, the Lord Chancellor, Lord Haldane, in 1924 modified the original terms of reference by requiring the preparation of a Bill on the assumption that the alterations involved were both desirable and feasible, and a short Report and draft Bill were presented in February, 1927. The main provisions of this Bill were that (i) Petitions of Right and Informations should be abolished, (ii) the Crown should be liable for torts caused to subjects, (iii) the Crown should be enabled to recover, and be liable to pay, costs as in cases between subject and subject, and (iv) the Crown should be liable to produce documents in the same way as ordinary litigants, subject to certain qualifications and safeguards in cases where production would be contrary to the public interest. During the preparation of the Bill, the draft was submitted on two occasions to twenty-one Government departments, in order that any suggestions or criticisms might be considered before the Bill was finally drafted. In May, 1928, attention was publicly drawn on behalf of the General Council of the Bar and the Council of the Law Society to the length of time the question had been under consideration and to the fact that, although more than a year had elapsed since the presentation of the Report and draft Bill, no action had yet been taken by the Government, but the Attorney-General announced in July that he could hold out no hope of early legislation on the subject of the Crown Proceedings Bill.

PETROLEUM SHIPS IN RIVER PORTS.

THE quantity of petroleum imported into the United Kingdom has increased from 55 million gallons in 1910 to 562 millions in 1926, and the dangers attendant upon the transport necessitate

a rigid control over the method of distribution. The risks involved in allowing tank ships to proceed up rivers in order to discharge at inland ports are very real. In the event of collision or grounding and the consequent discharge of a quantity of volatile spirit into the river, ignition by means of a spark, hot ashes or other agency might cause considerable loss to riverside property and to other ships, especially in narrow or congested parts of a river. Difficulty has been found, however, in imposing such regulations as shall be adequate for safety and at the same time shall not unnecessarily hamper the development of an important trade. In the case of the River Thames, the bye-laws of the Port of London Authority prohibit petroleum ships from proceeding up the river beyond the Mucking Light at Thames Haven, from this point, which was fixed as far back as 1872, the spirit, if conveyed by water, is taken by licensed tank barges to the up-river depots. These barges may only travel during hours of daylight, must moor in cases of fog, and must not exceed a stated maximum capacity. The question of the alteration of the Thames Haven limit has been considered from time to time, and in 1927 the Port of London Authority, being compelled by recent legislation to revise certain bye-laws, advertised their intention of allowing (i) petroleum ships of any size carrying petroleum spirit as cargo, whether in bulk or otherwise, up to any quantity, to navigate the river as far as Crayfordness, some 14½ miles above the Mucking Light by river; (ii) ships with not more than 1,250 tons of spirit to proceed as far as Bow Creek, and (iii) ships with not more than 2,000 gallons to navigate any part of the river within the Port Authority's jurisdiction. Among the considerations which influenced the Authority to extend the existing limit were the improvements that have taken place in modern spirit-carrying ships, the fact that a general relaxation in bye-laws had been made at a great number of ports, even to the extent of permitting spirit vessels to enter docks, and the conviction that less possibility of danger would exist with single tank vessels navigating the river than with the tows of tank barges now continually passing up the Thames. This proposal raised considerable opposition and the Minister of Transport in November, 1927, ordered a public inquiry into the question. Objections to the alteration were lodged by local authorities, shipping interests, oil interests, insurance interests, barge owners and fire engineers, and representations in support by other oil interests and by companies owning land on the riverside. The inquiry was conducted by Major T. H. Crozier and Professor J. S. S. Brame and lasted over twenty-seven sessions from December to February; its first session on 13th December synchronised with what was in the circumstances a somewhat dramatic event. A tank ship, the "Seminole," laden with 9,000 tons of petroleum, ran ashore on the Pluckington Bank in the River Mersey; in a few hours the plating on both sides was cracked by the strain and spirit was liberated from two of the tanks; at a later stage some of the other tanks were affected and the total loss was estimated at 4,535 tons; ultimately, the ship was sufficiently lightened, by means of pumping out into another tank ship, to float off the bank on the 19th December. At the outset smoking on the landing stage and ferry boats was stopped, steam lorries were prohibited from using the ferries and the Brunswick Dock, in which the "Seminole" lay, was closed. It was not until the 31st December that the last of the restrictions was removed and, while no fire occurred, serious inconvenience and expense were caused to the ordinary shipping traffic. The report issued by Major Crozier and Professor Brame contains much interesting information on the general question of the river transport of petrol; the practice in many other ports than London is mentioned, instances of collisions and other accidents with the resultant damage are recorded and particulars are given of experiments conducted by witnesses to determine the degree and period of inflammability of petrol films on water. As regards the Port of London Authority's new bye-law, the opinion is expressed that the relaxation of the limit for petroleum tank ships would introduce an increased danger which precautions could not entirely eliminate and that the necessity of the case did not call for the proposed alteration; that, although the existing system of conveyance by barge presented a measure of inconvenience the system could not be said to have in any way broken down nor had the public interests suffered. These findings were confirmed by the Minister of Transport, who subsequently refused to sanction the alteration of the existing limit at Thames Haven, but, in accordance with minor recommendations in the report, decided that ships carrying not more than 1,000 tons of petroleum spirit or other petroleum in barrels or drums should be allowed to navigate the river to and from Bow Creek, and that ships with not more than 2,000 gallons in barrels or drums should be allowed throughout the Port of London.

POLICE PROCEDURE.

RECENT proceedings in the Courts and, more particularly, a prosecution which came to be known as "the Savidge case," itself the subject of a subsequent inquiry by a Tribunal, aroused considerable public uneasiness as to police methods and procedure in the investigation of crimes and offences and led to the appointment in August, 1928, of a Royal Commission to consider the general powers and duties of the police in England and Wales in such investigations. The personnel of the Commission, which is predominantly lay in character, is Lord Ebbisham, Sir Howard Frank, Sir Reginald Poole, Mr J. T. Brownlie, Mr Frank Pick, Dame Meriel Talbot and the Lord Mayor of Liverpool, Miss Margaret Beavan, with Lord Lee of Fareham as chairman. The terms of reference are:—"To consider the general powers and duties of Police in England and Wales in the investigation of crimes and offences, including the functions of the Director of Public Prosecutions and the Police respectively; to inquire into the practice followed in interrogating, or taking statements from, persons interviewed in the course of the investigation of crime, and to report whether in their opinion such powers and duties are properly exercised and discharged, with due regard to the rights and liberties of the subject, the interests of justice, and the observance of the Judges' Rules both in the letter and the spirit; and to make any recommendations necessary in respect of such powers and duties and their proper exercise and discharge."

POSTAL CHEQUES.

The institution of cheque facilities for Post Office Savings Bank depositors was recommended by a committee of the Post Office Advisory Council during last year, but no action has yet been taken. The committee came to the conclusion that unless the facilities offered were such as to compete advantageously with commercial banks, or to break fresh ground, it seemed probable that the average balances maintained in accounts would be relatively small, and that there would be a difficulty in making the system pay its way. They considered that the primary difficulty in applying cheque facilities to Savings Bank depositors was the fact that no references were required from them, and that there would be considerable danger in allowing them the use of cheque books without some additional safeguards. A suggested safeguard would be to place a maximum limit on the amount of the cheques that could be drawn, and to issue such cheques only when balances were sufficient to cover the maximum amount drawable. They recommended that a postal cheque system on the Continental model should not be embarked on at first; that in the hope of encouraging a wider expansion of banking habits and economy of currency a tentative step should be made in the direction of offering cheque facilities for Post Office Savings Bank depositors; and that a system of limited cheques available to such depositors with adequate balances should be considered as a means of testing the extent of the demand for cheque facilities among this section of the community.

THE PRAYER BOOK.

THE House of Commons twice in a period of seven months rejected the new Prayer Book presented to the Legislature by the Church of England for sanction. At the end of 1927, after the House of Lords had approved the Measure by a large majority, the elected Chamber defeated the motion by 247 to 205, and the Bishops, following a long consideration, decided to submit the Book again with changes designed to remove misapprehensions. The House of Bishops agreed on the new Measure for introduction into the National Assembly, and this was approved by 35 to 5 in the House of Bishops, by 247 to 35 in the House of Clergy, and by 478 to 220 in the House of Laity. Next Convocation consented to the amended Measure, only six Bishops voting against the proposal in the Upper Houses of Canterbury and York, while in the Lower Houses, Canterbury voted in favour by 226 to 48, and York by 50 to 19. The Assembly then gave general approval by 396 to 153 in the three Houses The House of Commons, however, again rejected the Measure, this time by 266 to 220, the opposition being led, as on the previous occasion, by the Home Secretary. Again the Bishops conferred, and as a result they announced provisional sanction to such deviations from and additions to the Authorised Prayer Book as were set forth in the 1928 Book, an action which the Home Secretary strongly denounced as being against the law. Synods were held in the Dioceses to secure the view of the clergy upon this proposal, and while it was sanctioned in some Dioceses, in London the voting was against the Bishop's recommendations.

RADIO-CABLE FUSION.

THE Government approved an important scheme for the fusion of the cable and Marconi companies, which was recommended by a conference representative of the whole of the Empire, set up to examine the situation in regard to the communications between the various parts of the Empire The main proposal was the formation of a Merger Company, so that in the interest of efficiency and economy, all means of communication should be under one control. The company would acquire all the Ordinary shares of the Eastern, Eastern Extension, and Western Telegraph Companies and all the Ordinary and Preference shares and Debentures of the Marconi Wireless Telegraph Company. A Communications Company was also suggested, to which the Cable and Marconi Companies would sell all their communication assets in exchange for shares, and which would acquire the Government cables and hold the lease of the Post Office Beam stations. The capital of this company was not to exceed at its inception £30,000,000. The conference recommended that the Communications Company should take over the Pacific Cable Board's cables, the West Indian Cable and Wireless System worked by the Pacific Cable Board, the Imperial Atlantic Cables, and the lease of the Post Office Beam Services, the latter to be rented on a lease of 25 years. The rental payable by the Communications Company and the service of the Pacific Cable Board debt would be guaranteed by the Merger Company. To avoid conflict of policies it was urged that the boards of directors of the undertakings concerned should be identical, two of the directors (one to be Chairman of the Communications Company) to be approved by the Government on the suggestion of the cable companies. An Advisory Committee, which the Communications Company must consult, was suggested, to include representatives of the Governments which took part in the conference. The Communications Company would be allowed to make no increase in the rates prevailing at the date of its formation except with the assent of the Advisory Committee. British control of all the companies was insisted upon, and it was regarded as essential that the Governments might assume control of the systems in time of war or other national emergency and that the Fighting Services were entitled to build and work cable and wireless stations for their own purposes, although not for commercial purposes. After the report had been presented, it was officially announced that the Imperial Government had accepted the whole of the recommendations, with the support of the Canadian, Australian, New Zealand, South African, and Irish Free State Governments and the conditional support of the Indian Government.

RAILWAY ACCIDENTS.

THE year 1928 was a bad year from the point of view of railway accidents, but in the opinion of experts the number of fatalities was not due to any slackening of precautions or to other causes which could have been foreseen, but to the fact that accidents tended to run in cycles. The Railway Companies Association gave the number of passengers killed during the year as 46, compared with 27 in 1927. For the ten years before 1927 the average number of train accidents was 2·3 per annum, and the average number of passengers killed was 9·3 per annum.

Some important facts with regard to the use of gas for train lighting were given by an official at the inquiry into the last serious accident of the year, that at Charfield, in which 15 lives were lost. This authority stated that the London Midland and Scottish Railway Company had 11,874 gas-lighted vehicles and 11,633 electrically lighted. Gas-lighted coaches were being broken up or converted at the approximate rate of 1,000 a year. Commenting on this statement, another railway official stated that all new passenger coaches were equipped for electric light, while gas-lighted coaches were gradually scrapped or converted for electricity. It was also stated at the Charfield inquiry that steel-framed coaches were being experimented with, but they were heavier and were hotter in summer and colder in winter, in addition to costing 50 per cent more.

RAILWAYS AND ROAD TRANSPORT.

JUST as the stage coach and the canals as means of transport were affected by the invention of the steam engine and the consequent development of railways, so the application of electricity and internal combustion to transport vehicles has produced a serious challenge to the railways. Before the war the advent of trams and motor omnibuses had diverted from the trains considerable passenger traffic in suburban areas, which subsequent electrification of suburban lines of railway failed more than partially to recover, and during the last few years the use of motor vehicles for long distance transport, both of passengers and goods, has intensified the competition to such an extent that the financial position of the railways, already seriously affected by trade depression, has caused grave apprehension as to their future. Although the railway companies possessed certain powers of road transport, under which 3,000 motor vehicles, apart from horse vehicles, were engaged, these powers were limited and, in order to meet the growing competition, bills were promoted in Parliament in February, 1928, by the Metropolitan Railway Company and the four groups of amalgamated railways, viz., London Midland and Scottish, London and North Eastern, Great Western and the Southern, to obtain extended powers of road transport. After the second reading in the House of Commons, in order to save undue delay and heavy expense, these bills were referred to a Joint Select Committee of the Lords and Commons instead of a Private Bill Committee in each House. As was only to be expected, the Bills met with determined opposition on the part of the threatened interests, and the Select Committee considered objections on behalf of the chief road transport companies, various municipalities and county councils, the Federation of British Industries, the National Farmers' Union and other organisations. On behalf of the railway companies it was urged that, while the railways already bore every burden upon their own road vehicles which was borne by other owners of road vehicles, they also paid local rates, which other owners did not, and that these rates assisted in subsidising the use of roads against rails; that railway companies had had to sink their own capital in providing and maintaining their own permanent way and in operating signalling and other appliances for the public safety, whereas public funds provided and maintained the tracks for road users as well as the policemen to regulate the traffic in the public interest; that, in contrast to the control of railways, road transport was a gigantic new industry growing up entirely uncontrolled by Parliament, and constituted a virtual monopoly, into which however they sought permission to enter, that the removal of the road restrictions upon railways was essential to the satisfactory solution of the transport problem as a whole and, that, unless the powers were given, the continued diminution of traffic would cause either rates and fares to be increased or the railways to become unremunerative. The case for the opposition to the Bills rested mainly on the fear that the railway companies, armed with unlimited road transport powers, would by reason of their resources be in a position to eliminate existing road transport undertakings by intensive competition, at uneconomic fares if necessary, and thus establish a general monopoly of the means of public transport. It was also suggested that the amount of passenger traffic lost to public motor vehicles was exaggerated and the loss to private motors considerably underestimated The Joint Select Committee after 34 days' hearing came to the conclusion that the case for the Bills had been proved, with the exception of that promoted by the Metropolitan Railway Company, and that the extension of powers sought for should be granted, subject to certain safeguards By virtue of the Acts, therefore, which received the the Royal Assent in August, 1928, the four trunk railways are empowered to provide transport services by road, subject to certain conditions Notice of every regular and experimental service provided must be given to the Minister of Transport and no regular service may be withdrawn unless notice of withdrawal has been published, in the event of any objection by a representative body of traders or any local authority, the service cannot be withdrawn without the Minister's consent. Provision is made for modification by the Railway Rates Tribunal of any fares, rates or charges considered unreasonable by traders or by a local authority, and power is given to the Minister to hold a public inquiry if he considers that the public interest is prejudicially affected by the exercise of any powers given by the Act Protection is also given to local authorities providing within their areas adequate and satisfactory services of tramcars or omnibuses. In view of the existing traffic congestion in the metropolitan area, the use of railway road vehicles for comparatively short journeys therein is prohibited, as no passengers may be accepted for stages entirely within the Metropolitan Police District and the City of London. It should be added that the Committee, when considering the Railway Bills, were impressed with the urgent need for amending the chaotic state of the law relating to traffic generally. A Royal Commission under the chairmanship of Sir Arthur Griffith-Boscawen, was subsequently appointed in July, 1928, to consider the whole question and to suggest measures for securing better traffic regulation, control, co-ordinated working and development, but it is probable that this extensive inquiry will take nearly two years to complete.

RATING REFORM.

IT has long been recognised that the existing system of local taxation is archaic and needs drastic revision to secure a more equitable

incidence. Continued trade depression has focussed attention upon rates as a factor in the cost of production, and stress has been laid upon the fact that the greater the depression in an area, the higher become the rates, and the higher the rates, the greater the cost of production, and so the more unemployment. It was clear, therefore, that industry, and particularly the export trades, might receive a much needed relief by means of a more equitable distribution of rates, and, in order to effect this, the Government, as a corollary to the 1928 Budget, inaugurated a scheme of reform. This scheme provides for the relief of agricultural land entirely, and industrial and freight hereditaments from three-quarters of the local rates, for the widening of the areas of certain local government services, and for the increase and redistribution, on the block grant principle, of the existing Government grants to local authorities, based on the actual needs of the various areas. The first step to this end was taken in the Budget which imposed a new tax of 4*d* per gallon on petrol and certain other oils as from April 25, 1928, the proceeds to be paid into a suspense account to create a pool for financing the scheme. The next step has already been taken by the passing of the Rating and Valuation (Apportionment) Act, 1928, which provides the machinery for claims for relief from rates available for agriculture, mines, the majority of factories and workshops, and for freight-transport hereditaments, e.g., railways, docks, and canals. This relief is to date from October 1, 1929; but in the case of railways, the date has been advanced to December, 1928, and the relief must be passed on to the basic industries by means of reduced freight charges. The outlines of the remaining portion of the scheme, which it is proposed to submit to Parliament early in the autumn session, have already been published. They involve the abolition of the Boards of Guardians (including, in London, the Metropolitan Asylums Board together with the Metropolitan Common Poor Fund), and the transfer of their powers to the County and County Borough Councils on April 1, 1930; the transfer to the County Councils of the complete responsibility for the maintenance of all roads in rural districts; and the abolition on April 1, 1930, of the existing assigned revenue grants, the grants under the Agricultural Rates Acts, 1896 and 1923, the percentage grants in aid of health services, and the classification grants for certain roads. As regards the latter, the annual block grants that are to be substituted will be made up of the estimated loss of rates due to the derating of the productive industries mentioned above, the loss of the superseded grants, and an additional sum of new money amounting to £5,000,000 for England and Wales; these are to be fixed in total and for each authority for five years, and revised both in total and for each authority every five years. The apportionment between the authorities is to be determined by an ingenious but complicated formula, which endeavours to make the assistance vary with the need for local government services in any area according to the ability of the area to meet the cost; its main factors are population, the proportion to the total population of children under 5 years of age, and the rateable value per head of population; these are combined with two special factors, the proportion of unemployed insured men to the total population, and the population per mile of public road. In order to avoid too great a disturbance in local finance by a complete allocation on this basis at one step, the grant allotted will, for the first 15 years, be based partly on the present distribution of grants and partly on the formula, so that the whole will not be distributed entirely on the formula basis until 1945. Certain modifications are made to meet the special circumstances of London. The grants to non-county boroughs and urban districts will be made at a uniform figure per head of actual population, and to each rural district at one-fifth of the uniform figure, arrived at by means of a further calculation based on actual population. In reply to a criterion that the proposals granted a greater measure of relief to the prosperous than to the depressed industries, the Government stated that it was estimated that of the total relief given the latter would receive three-fourths. An alternative scheme to grant more immediate relief by a less complicated method, involving a transfer of large departments of local expenditure, such as poor relief, to the State, was rejected as liable to abuse on the ground that, as the services would still have to be administered locally, the financial responsibility would be divorced from the administration. It is estimated that, had the scheme of derating been in operation for the year 1926 7, the approximate loss of rates in England and Wales would have been £24,000,000. A revaluation of the whole of England and Wales except London is now nearing completion, but the revised rateable values will not be in force until April 1, 1929, so that no reliable forecast can yet be made of the amount of rates which would have to be made good out of the Exchequer after October, 1929. There is no doubt that the Bill embodying these proposals will be subjected to searching criticism during its passage through Parliament in the autumn session.

SAFETY FIRST.

It is rather unfortunate for a public movement when certain supporters question the title, for misunderstandings usually follow. Consequently proposals for changing from "Safety First" on the ground that "it is not quite in accordance with British qualities of courage and sportsmanship" created in the early months of the year some controversy amongst those who had spent time in putting forward the advantages of reducing possibilities of accident by removing risks under the title of Safety First. A new title of the "Safety League" for the National Safety First Association has been proposed. But whatever happens the need for continuing the work amongst schoolchildren and the public is only too obvious. The plea was put forward at the Safety First Officers Conference of supplementing the child's last year at school by visits to factories to familiarise him with conditions. It was pointed out that 17 per cent. of accidents in industry concerned children under 18; in the course of a year, 51 children were killed and 23,000 were maimed by industrial accidents.

A two days' debate on Accident Prevention in Industry was held by the Conference of the International Labour Organisation at Geneva, May 30–31, 1928. Mr. E. Bevan of the British Transport Workers' Federation followed up the recommendations of a German delegate to couple up with safety first the investigation of industrial diseases as the latter was an often contributing factor. Mr. J. A. Gregorson of the Iron and

Steel Trades proposed Industrial Museums. Sir G. Eyre of Australia mentioned the surplus of accidents in the five years following the war compared with the casualties of the campaigns in an increase of 70 per cent. There was considerable controversy over the accidents at the docks, a special Committee of 24 being appointed to deal with the subject. New York State has carried the Safety Movement to the extent of compulsory insurance by employers against accident of their workpeople, instituting a State Insurance Department side by side with Insurance Companies. The number of accidents reported to Bureau of Compensation in 1927 was 521,624, these referring to only accidents in course of work.

S.D.F.

BUT for the enthusiasm of some of the old Brigade of Socialists, the Social Democratic Federation, always to be associated with the name of H. M. Hyndman, would have faded away long ago. Its membership, like that of the Socialist Party of Great Britain, is numerically small. Still, it passed weighty resolutions at the Annual Conference at Nelson in August, 1928, when Mr. F. Montague, M.P., occupied the chair. A desire for a stronger socialist note to be sounded from Labour platforms was expressed, but loyalty to the Labour Party was imperative. The determination of the Labour Party in expelling those opposed to independent democratic working-class political action was approved in a resolution of the Conference. From the discussions there appeared in the Party a wide difference in opinion upon the actions of the T.U.C. in taking part in the negotiations with employers for Industrial Peace. Some of the delegates desired to end the conversations immediately.

STABILISATION.

SINCE the end of the War, the following changes have been made in Foreign Currency values due to the stabilisation by the countries concerned of their discounted bank and national paper monies:—

Old Quotation (1924)	(Per £1 Britain) Country	New Quotation (1928)
24 krone	Austria	34·58½ schillings
25·22½ francs	Belgium	35 belgas
25·22½ francs	France	124·21 francs
20·43 marks	Germany	20·43 marks.
(German paper money dated before 1923 is valued as waste paper.)		
25·22½ drachmae	Greece	375 drachmae.
24 krone	Hungary	27·82 pengo.
25·22½ lire	Italy	92·46 lire.
As Russian State	Poland	43·38 zloty.

The masterly stabilisation effort of 1928 was that of France. From 25·22½ fc. to the £1 pre-War it dropped—thanks to much early Peace gambling on the Exchanges—to 244 fc. to the £1 in July, 1926. By strong financial measures, the French Government was able to increase the rate to 124 fc. at which figure it remained almost stationary from January, 1927. The French Chamber and Senate by 448 votes to 18 and 256 to 3 gave their agreement to the Government's Policy that would base the exchange at 124·21 fc. per £1 and 25·52 to the U.S.A. $. The programme of the French Government placed the notes on a gold basis and theoretically exchangeable for gold at the basis of 65·5 milligrammes per franc (9/10ths fine). British holders of French Bonds, especially those taken up during the War, are naturally sore over the stabilisation because it wipes out their hopes of being repaid at par value; even the interest paid is only at one-fifth of the old paper figure. Italy was enabled to place her currency on the gold basis and thus stabilise the lire at 92·46 lire to the £1 by fixing the gold standard by an Order in Council of December 22, 1927, at a parity of 7·919 grammes of fine gold to 100 lire. To enable a sure foundation to be established for the fixed rate, the Bank of Italy arranged agreements with the Central Banks—in the U.S.A. the credit of $125,000,000 was arranged so that 94 per cent. of the lire notes should be covered by gold holding or foreign loans.

A new Bank of Greece was established in May, 1928, to enable the currency stabilisation to be carried out from May 14. New notes were issued on the basis of 51,212 drachmae 87 lepta to 1,000 grammes of gold.

TELEGRAMS UNPROFITABLE.

IN view of the continued deficit of the Telegraph service, a Departmental Committee, under the chairmanship of Sir S. Hardman Lever, was appointed in 1927 to examine the possibility of effecting substantial economies in the working of the service and to report what changes, if any, in the tariff would be necessary to extinguish or substantially reduce the annual deficit. The figures given below for the four years to 1925-6 show the decline in the popularity of the telegram and the increasing loss on the telegraph services proper, i.e., Inland, Foreign and Wireless —

Year	No. of Telegrams.	Deficit. £
1922-3	70,483,000	1,423,000
1923-4	68,765,000	1,215,000
1924-5	66,924,000	1,364,000
1925-6	64,991,000	1,463,000

For 1926-7 the deficit was £1,429,000; no separate accounts are kept for the Inland service but the loss in 1926-7 is estimated in the Report at £1,571,000, equivalent to 7·38*d.* per telegram sent (after adjustments for Press and other telegrams at reduced rates) or, allowing for increased cost due to a recent wages award, about £1,600,000 a year. With the exception of the recommendation for an increase in the tariff, referred to below, the portion of the Report which caused most discussion was that which dealt with the right of dismissal of staff. The Committee laid stress on the absence under Civil Service conditions of the two main incentives, which in large business undertakings operate to obtain satisfactory results, viz., a bonus or other compensation for increased effort and the liability to dismissal at any moment in case of inefficiency; they gave it as their considered opinion that without the unhampered right of dismissal, it was impossible to expect the Telegraph, Telephone or other services to show satisfactory results and that this factor was the root fault of the system. In addition the exploration of the possibility of a complete fusion of the telegraph, cable, wireless and telephone services is suggested. The Committee felt themselves limited to generalisation in these matters by the terms of reference, but made several more specific recommendations for immediate consideration. Omitting those which relate more particularly to internal organisation, the most interesting are; (i) a freer

use of the telegraph trunk system for transmission of telegrams during less busy hours; (ii) a speeding up of the abolition of the Morse appliances, (iii) making the services more speedy and attractive by withdrawing irritating restrictions e.g., insistence on the public themselves affixing stamps to telegraph forms, by extension of scope and by increased publicity; (iv) an increase in the special rate for Press telegrams. As regards the tariff, the Committee considered the flat rate basis the only satisfactory tariff for British conditions and habits, that the increase in telegrams consequent upon a reduction in tariff would be insufficient to produce a net increase in the revenue, owing to the amount of short distance traffic which would be retained by the telephone, and that an increased tariff should be carefully considered. If an increase were decided upon, the most suitable tariff is recommended as being a fixed charge of 1*s.* 10*d.*, plus ½*d.* per word with a rebate of 3*d.* on each telegram handed in between 2 p.m. and 9 a.m. Examples of this tariff as compared with that at present in force are set out below:—

No. of Words	At present (all hours).	As proposed - 9 a.m. to 2 p.m.	2 p.m. to 9 a.m.
	s. d.	*s. d.*	*s. d.*
12	1 0	1 7	1 4
16	1 4	1 9	1 6
20	1 8	1 11	1 8
26	2 2	2 2	1 11
30	2 6	2 4	2 1
60	5 0	3 7	3 4

No alteration in the charge for telegrams had been made however up to the time of going to press.

THAMES FLOODS.

DURING the night of January 6–7, 1928, an abnormally high tide on the River Thames caused the river to overflow at many points and to burst its banks in three places, at Putney, Hammersmith and Westminster, involving the loss of fourteen lives and considerable damage to property along the riverside; amongst the buildings flooded were the Tate Gallery and the Tower of London. In view of the consequent distress relief funds were opened by the Lord Mayor, the Mayors of riverside boroughs affected and by others. At a conference of public authorities held at the Ministry of Health on January 16, 1928, a committee was appointed to investigate the broad causes of the disaster and to suggest measures to obviate any such recurrence. The report of the committee in February stated that the floods were due to a combination of the spring tide, meteorological conditions in the North Sea and the presence of flood water in the Upper Thames, and that, from the records of past tides, there was every reason to consider flood works to a height of 18 ft. and of corresponding strength as amply sufficient; this tide had, however, exceeded the highest previously recorded, in 1881, by 11 ins. Dealing with the possibility of a recurrence, the Committee felt that further expert investigation was necessary, and recommended that this should be undertaken by the Liverpool Tidal Institute in co-operation with the Hydrographic Department of the Admiralty and the Meteorological Office, the cost to be shared between the London County Council and the Port of London Authority. As the London County Council, pending the result of this inquiry, could not be expected to incur the expense, which might well amount to millions of pounds, of requiring a general raising of the present standard of height and strength of flood works, it was suggested that the statutory duty of supervising and inspecting flood defence works within the County of London should be definitely placed upon the Council and that, in anticipation of legislation, they might well take any needful measures. A system of warnings from Southend upwards was advocated and also powers for the London County Council to prohibit in low-lying areas the erection of new dwellings or the re-erection of existing dwellings with floors below a specific minimum level. There is no doubt that it had come as a great shock to the general public that basement rooms were allowed to be used as sleeping quarters in areas liable to flood, but as the report stated, any question of stricter standards in order to prohibit such use could only be dealt with as part of the general housing programme, except where the rooms did not at present conform with existing statutory requirements. It is understood that, as a preliminary measure, a special survey of all the river defences has already been undertaken by the London County Council along the Thames river front under their control, which extends for about forty-five miles, exclusive of that occupied by Crown property.

THE TOTALISATOR.

WHEN, in 1926, the Betting Tax became part of the national fiscal policy, it was felt that the coming of the totalisator was imminent on the ground that, if betting were to be taxed at all, the most scientific method should be employed. It is generally agreed that the totalisator or pari-mutuel provides the best method of collecting such a tax; it is a mechanical device which indicates the amount of money staked on each horse running and is altered every time a fresh deposit is made, so that a backer can at any time see his position in the event of a win by the horse he has backed. The method has long been in use in the Dominions and Colonies and on the Continent, where its introduction is said to have been vindicated by the advantageous results. The opposition to the principle of the installation of the totalisator mainly rests on the feeling that its establishment involves a further State recognition of the betting habit and practice, and on the fear that it will cause a substantial increase in the volume of betting. The chief advantages claimed are the improved administration of the Betting Tax and the minimisation of evasion, the purification of the Turf by the removal of the less reputable type of bookmaker and of the "welsher," a reduction in credit betting and the probable contribution of substantial sums towards the maintenance of racing and the breeding of British thoroughbreds. After a full investigation of the question, the Jockey Club in 1927 passed a resolution in favour of the installation of totalisators on racecourses controlled by the Club and the National Hunt Committee. As the erection and operation of a totalisator on a racecourse would have made the latter a "place" within the prohibition of the Betting Act, 1853, a bill was introduced by Major R. G. C. Glyn in March, 1928, containing one operative clause, providing that the Act of 1853 should not apply to racecourses on days when races were held under the rules of either of these two bodies. This Bill, which originally only formulated a general principle and did not

even contain the word "totalisator," emerged from the committee stage after a prolonged and stormy passage with five clauses, was adopted by the Government, and after further amendments became law on August 3, 1928, as the Racecourse Betting Act, 1928. It was intended to vest the operation of the totalisator in the Jockey Club and National Hunt Committee, but under the Act a Racecourse Betting Control Board was constituted, consisting of a paid chairman, appointed by the Home Secretary, and 11 other members appointed as follows :—

By the Home Secretary	1
Secretary of State for Scotland	1
Minister of Agriculture and Fisheries.	1
Chancellor of the Exchequer .	1
Jockey Club	3
National Hunt Committee	2
Racecourse Association, Ltd ..	1
Committee of Tattersalls .	1

The Board was duly appointed in August under the temporary chairmanship of Sir Reginald Blair, pending the appointment as chairman of Sir Clement Hindley on his return from India. The Board is responsible for the issue and revocation of certificates of approval of racecourses, without which the use of the totalisator would remain illegal, for the determination of the percentage deduction from the money staked by means of the totalisator, and for the distribution of the stakes after such deduction. The percentage deduction is to be paid into a "totalisator fund," out of which working expenses and contributions to charities are to be met, and periodical grants are to be made for purposes conducive to the improvement of breeds of horses or the sport of horse racing in accordance with a scheme to be prepared by the Board and adopted by the Secretary of State. Annual accounts and reports are to be submitted by the Board to the Secretary of State and laid before both Houses of Parliament. Considerable apprehension as to the future of bookmakers had arisen as soon as the introduction of the Bill was mooted, but the Act makes a condition of the grant of a certificate of approval to any racecourse that a place must be provided for bookmakers to carry on their business, and that the charge to a bookmaker for entrance to an enclosure for this purpose must not exceed five times, and for his assistant must not exceed the amount of the highest charge made to the public for admission to this enclosure. Betting with persons under 17 either by means of the totalisator or otherwise is prohibited under penalty of a maximum fine of £50. No fixed percentage is laid down by the Act for the deduction from the stake money to be paid to the totalisator fund; in the course of the discussion on the Bill 8 per cent. was frequently mentioned. In this connexion it is interesting to note that the deduction in France is 11 per cent. distributed thus: 3 per cent. for charitable purposes, of which 1 per cent. is for the devastated regions; 1 per cent. for the construction of drinking water mains to the capital; 1 per cent. for the same purpose in the devastated regions; ¼ per cent for agricultural instructional establishments; 1½ per cent. for horse-breeding; and 4 per cent. for the Racing Societies which run the meetings. Partly as a corollary to this Act and partly to minimise the incentive to evasion, the Betting Tax was reduced on October 1, 1928, from 2 per cent. on bets made on the racecourse to 1 per cent., and on other bets made with a bookmaker from 3½ per cent. to 2 per cent.

TRADE DISPUTES.

The year 1928 has been one of the lightest on record in the way of industrial troubles. As usual, the petty troubles over wages in the various coalfields have been responsible for about one-third of the total strikes, and it is to be feared that a down-tools policy is encouraged in certain circles rather than negotiation should be followed. The textile trades have furnished the worst disputes, and in three months cost them workpeople the equivalent of over a half-million working days. That at Nelson lasted from May 30 to July 12, in which the employers instituted a lock-out. A weaver had objected to a fine for bad work and was dismissed, the question of his reinstatement was made the factor of the quarrel. He was subsequently found another job and an enquiry was set up to discuss future fining and dismissals. The other was a wage dispute in the dyeing and finishing industry of Huddersfield and South Lancashire: 3,000 workpeople were concerned from June 16. July 13 when a modified advance was arranged. There are in existence all kinds of Councils that properly used would obviate any need for strikes or lock-outs, and the new proposal by the Industrial Joint Conference will simply add another.

The following are official Ministry of Labour Statistics —

	Disputes in Progress	Workpeople Involved. (In 000's.)	Days Lost (In 000's.)
1913 (whole year)	1,459	664	9,800
1920 ,, ,,	1,352	1,932	26,570
1925 ,, ,,	604	442	7,970

N = New Strikes.

BOOT AND SHOE OPERATIVES.

Mr. T. F. Richards presided over the 38th Conference of the Boot and Shoe Operatives held at Great Yarmouth, May 28–June 1, 1928, in which 100 delegates took part representing 80,000 members. He pointed out that the Agreement in the industry between employers and workpeople had been in existence since 1895, and that no strike had taken place since then. The attempts on the part of the Minority Movement within and without the Union were condemned by 95 per cent. of the delegates on the vote. Certain amendments of rules included one that gave more power to the Executive in dealing with infringements, but a proposal that five women delegates should be sent to the Women's Section of the Labour Party was defeated. On Sept. 27, 1928, it was announced that a further agreement for at least two years had been signed by means of which certain minor advantages to employees were added to the conditions

of employment. Proposals of a 44-hour maximum week and minimum wages of 65s. and 40s. had to be dropped in view of trade competition from abroad. The official Labour Exchange figures show a percentage of unemployment in industry of 19·1.

ENGINEERS.

The Amalgamated Engineers Union has been associated in 1928 with the claims of the shipyard workers in their application for wages increases, but a proposal put forward at the A.E.U. meeting at Southport in May for the re-opening of negotiations for the amalgamation of all societies of engineers into one union was defeated. The Industrial Peace negotiations were condemned by the National Committee who, on the other hand, by 42 votes to 11 decided to refuse to tolerate members of the Minority Movement in their union. The A.E.U. offered a commission of 2*d.* to officers for every contracting-in form obtained from members for the Political Levy. The International Metal Worker's Federation representing 2,500,000 met in London in May.

MINERS.

Unemployment at practically 25 per cent. has faced the miners throughout the year. Apart from this, there has been a triangular fight in the organisation of the men. The Miners' Federation of Great Britain has failed to find a common leadership with the President, Mr. H. Smith, leaning towards negotiation, and the Secretary, Mr. A. J. Cook, tending in the opposition direction of the "class war." The Communist element is dominant in the S. Wales area and has been on the point of capturing the Scottish section by the employment of smart minority tactics. In addition to this sectionalism, there has been the growing support to the non-political unions of which that in the Nottingham area has been most prominent as a thorn in the side of the M.F.G.B. and also the T.U.C. A ballot was staged in the spring in the Nottingham area over the question of union, but its result had no effect on the war between the two elements; the T.U.C.'s intervention was an entire failure. At the Federation yearly Conference at Llandudno in July, 1928, a card vote in favour of the continuation of the Industrial Peace Conference was carried by 380,000 to 240,000, a sign of the division of opinion within the M.F.G.B. Wages have fallen in many districts, but with the re-organisation and amalgamation of the better coal mines these should improve again. But there is no hope of full employment and the industry's task is to "rid itself of the quarter of a million surplus of would-be-employees for whom there is no work. (*See* par. on Industrial Transference Board.)

POST OFFICE WORKERS.

The passing of the 1927 Act practically removed Civil Service organisations from active participation in the Trade Union Movement. The Whitley Council almost ceased to function with the Post Office employees in 1928. The difficulty has been in regard to the status of two organisations known as the Association of Counter Clerks and the Guild of Postal Sorters. The Official Side of the Council insist to these having representation whilst the Union of Post Office Workers, backed up by the Civil Service Clerical Association, maintain that the constitution of the Service side is a matter for the employees to decide. In the case of voting in this matter, the new bodies would be swamped out by the Union of the P.O.W. The various Committees in connection with the Council simply had to be suspended in Aug. 1928. Following the reduction of the C.S. cost of living bonus in Sept. 1928 in accordance with the fluctuation on the Ministry of Labour Index Figure, an agitation began again for a re-consideration of the methods of calculation of both Index and bonus.

RAILWAYMEN.

Consequent upon the failure of the railway companies to maintain an economic level of working, it became evident that there would need to be a revision of the involved agreements between companies and employees so that the wages bills could be reduced in an endeavour to cut the working costs. Happily there were leaders on both sides who could foresee bickerings and unpleasantness and possibly sectional strikes arising out of the revision and they began to look for other means for settling the problem. The result of private talks paved the way to a Conference on July 18 between railway managers and the full Executives from the N.U. of Railwaymen, Assoc. Soc. of Loco. Engineers and Firemen and the Railway Clerks Assn. Two further Conferences followed when it was announced on July 27, that an agreement had been found whereby through a 2½ per cent. reduction in all wages and salaries of railway employees there would be no need to interfere with the standard agreement. Meetings of individual unions confirmed this arrangement and it came into force generally on Aug. 13. The saving is expected to reach £3,000,000 in a year.

N.U.R.—Annual Conference of National Union of Railwaymen was held at Bristol, July 2-6, 1928, with Mr. J. Gore in the Chair. Principal subject was wages. A minority made its presence known in actively criticising most of the proposals and work of the Leaders, there being a distinct Communist element as is the case with the Miners and minus effective voting power. The N.U.R. were concerned deeply with the transport question in view of the competition of road motors. The N.U.R. made a further attempt at beginning of 1928 to get the A.S.L.E.F. to form a single body but the latter seem to desire to retain their old independence.

Co-operation.—Endeavours have been made by the railways to secure the co-operation of employees in reducing expenditure and stopping pilfering. The L.M.S. has especially held meetings of the staff and men's representatives with this end in view. The 4th Annual Railway Carnival was held at Manchester on Sept. 30, 1928, when Sir F. Pole (Gen. Man. of G.W.R.) "crowned" the "Railway Queen" in the presence of 50,000 railway workers and their families.

SHIPYARDS.

Practically the whole of 1928 has been concerned in an attempt by the trade unions to secure higher wages for the employees in the shipyards. Gradually the bonus of 10s. lost in 1922–3 has been returned, but the demands from the unions for bigger increase was firmly refused on the ground of "serious falling off in orders, decline in freights and number of boats laid up." There has been very little in the way of trade disputes but the unemployed figure has been as high as 27 per cent. The new procedure for avoiding

trade disputes in the industry came into force in June when Mr. H. P. MacMillan, K.C., as an Independent Chairman, presided over a National Conference of representatives from the Shipbuilding Employers' Federation and Trade Unions at Westminster in June to settle wage disputes. A ballot taken in the Boilermakers' Society returned a majority of 3,491 in June, 1928, against any known Communist holding an office in the Union.

TRANSPORT WORKERS.

A minimum of disturbance has taken place amongst the Transport Workers in 1928. The National Council of the Port Labour Employers acknowledged at their annual meeting of Feb. 21, 1928, that its business was to maintain peace in the dock industry. There were 120,000 employees covered by the Joint National Council. During the summer, negotiations were in progress between the Transport and General Worker's Union of about 400,000 members and the Workers' Union of 150,000 members for amalgamation, and in Oct. 1928, an agreement practically needed only the sanction of the individual members. The National Union of General and Municipal Workers at their Delegate Conference of May, 1928, at Keswick rejected two resolutions that proposed a world conference of trade unions to establish an International and compulsory resignation in the case of a full-time official being elected as M.P.

TRADES UNION CONGRESS.

The outstanding event in the T.U.C.'s year has been the Conference with the Employers on Industrial Relations. The first steps in this connection were outlined at the 1927 T.U.C. The 1928 progress is dealt with in a separate article under INDUSTRIAL PEACE.

Political Levy.—Following upon the 1927 Act that changed contracting-out into contracting-in by trade union members for the political funds, the T.U.C. and Labour Party held a joint conference on Nov. 14, 1927, for the purpose of arousing enthusiasm and so obtaining contractors-in. The conference also dealt with poaching of one union upon another's membership. In March, a joint circular was issued by T.U.C. and Labour Party pointing out the need of following through expenditure from the General Fund so that there was no question of such money being used for political purposes.

Congress.—Mr. B. Turner presided over the 60th Congress held at Swansea Sept. 3-8, 1928, when 619 delegates from 160 organisations having a membership of 3,814,842 were entitled to attend. These figures showed a decrease from 646,168 and 4,163,994 of 1927 but, apart from the compulsory absence of the Civil Servants' trade unions on account of the 1927 Act, the drop was small. A card vote on action of the General Council in carrying on the Industrial Peace Conference returned support at 3,075,000 to 566,000. On the proposal of the Railway Clerks' Union, the G.C. were instructed to hold an enquiry into the tactics of the Minority Movement within the trade unions. The proposed taking over of the Labour College was referred back. In spite of opposition from two Painters' Societies, a card vote of 2,683,000 to 2,046,000 accepted the affiliation of a Sign and Ticket Writers' Union. The Amalgamated Engineering Union's proposal of a reorganising commission to review the trade union conditions in industries and lead to more powerful organisations was carried by 1,864,300 to 1,231,000. The National Union of Seamen was unanimously expelled from membership. A proposal by the A.E.U. for the establishment of a United Trade Union International, summoning of such and reconstruction of old Anglo-Russian Advisory Council was defeated by 2,877,000 votes to 439,000. The Railwaymen accomplished the defeat of a resolution from the General Workers for the abolition of the cost of living sliding scale in wages. Repeal of the 1927 Act had a unanimous resolution. The Congress accepted a scheme for the re-organisation of National Transport, including compulsory insurance against accidents under a Government scheme.

Domestic.—A new building has been erected adjoining the Transport Workers' Offices in Smith Square, Westminster. It contains six floors and will be occupied by the T.U.C. and Labour Party. The T.U.C. took possession in March, 1928. There is a hall on the premises that will hold 400 delegates. A contribution of £250 was made by the T.U.C. to the funds of the Lilloah (Bombay) strikers in May, 1928.

Scottish T.U.C.—31st S.T.U.C. was held at Perth April 18-21, 1928, with Mr. J. Nairn in chair. He viewed the Industrial Peace Conferences: "We have not wantonly sought industrial disputes. We shall do our utmost to avoid such disputes in future." A proposed boycott of non-union newspapers was discussed, a division being taken over the question whether reporters should be ordered to withdraw. The Congress refused to accept the proposal for a single Trade Union International.

G.F.T.U.

The Annual Conference of the General Federation of Trade Unions was held at Great Yarmouth in July, 1928, when resolutions were passed in favour of—Inspection by Board of Trade of proposals for issue of new capital in connection with any company with a view to protect small investor and also employees; more efforts to secure trade union organisation on industrial basis to meet the tendency to transfer factories from big to small population centres; workmen's compensation to cover industrial diseases; review of the British Consular Service to make it more zealous in expanding trade; revision of the Old Age Pension scheme.

VOLUNTARY INSURANCE

WHEN National Sickness Insurance was introduced in 1911 there was already in existence a network of voluntary associations which catered for the needs of the "industrious" classes (as they were called in an early Act of Parliament dealing with Friendly Societies). How do these associations stand to-day? In numbers they have unquestionably diminished. The Reports of the Registrar of Friendly Societies show that in 1926 21,488 registered Friendly Societies and Branches in Great Britain made returns, as compared with 26,593 in 1910. The decrease included 2,400 Branches, 1,900 Sickness and Death Societies, 400 Dividing Societies and 200 Juvenile Societies. Deposit societies alone had increased, and they are still only few in number. To a large extent, however, the reduction in number has been due to amalgamation, but in addition many of the old societies have ceased to exist in any form. In membership, there is on the surface evidence of improvement, for the total membership of friendly societies in 1926 approached 7,500,000, or

800,000 more than in 1910, and if allowance is made for burial societies, which as a result of the Industrial Assurance Act are now Collecting Societies, the increase would be doubled. When the increases are analysed, however, there is less ground for congratulation. Usually they are connected with railways, municipalities, etc., and some were in existence before registration. A large part of the increase, too (particularly in the affiliated Orders), consists of juvenile members, many of whom will possibly never be absorbed into adult voluntary insurance. Most of the remaining increase is to be found in the Deposit Societies and to a less extent in Dividing Societies; the ordinary societies insuring against sickness and death showing an actual decrease in membership. In one direction the position of friendly societies has undeniably improved. They are generally in a much better position to fulfil their contracts, owing largely to the increased rate of interest at which their funds can be invested. The growth of Deposit and Dividing Societies suggests a change in the outlook of Friendly Society entrants. The rules of many old societies show that in the past Friendly Societies appealed more to the spirit of mutual helpfulness. The modern society is apparently compelled to appeal rather to the member's self interest. Friendly Societies are not the only bodies undertaking voluntary insurance. Trade Unions as a rule offer similar benefits, and Collecting Societies and Industrial Assurance Companies assure death pay, endowments and sometimes other benefits.

WORLD'S DAIRY CONGRESS.

NEARLY 2,000 delegates from 45 countries attended the World's Dairy Congress held at the Central Hall, Westminster. Mr. Walter Guinness, of Agriculture, opened the proceedings on June 27, 1928. The Congress split into sections, the Chemical one going to Reading University in pursuit of the methods for detection of adulterated milk. All aspects of dairy farming with improvements in modern methods were considered. A method of food rationing for cows was put forward in which it was maintained that a 50 per cent increase in milk would follow. Mr. Eschweiler, the Belgian State Agriculturist, pointedly asked why in face of the scientific data available whereby increased supplies of milk could be obtained from cows, so few dairy farmers troubled to make any improvement upon old time methods. The output from a cow is in relation to the diet provided. Pasturisation of milk was praised by Dr. Corry Mann as having been responsible for the decline in child mortality, and he asked for compulsory pasturisation under an Act of Parliament of all milk supplies in towns of more than 10,000 population. The Ice Cream Industry was introduced by Mr. F. Rasmussen of the U.S.A. Ice Cream Manufacturers' Assn. Ice cream was the balance wheel of the dairies, it took the surplus milk at the biggest production period of the year and so not only maintained prices but acted economically for the nation. In 1926 4,464,144,000 lb of milk were used in U.S.A. for ice cream production. The percentage of milk solids in good ice cream was 22. Prof. A. Mertens of Louvain University looked to the increased consumption of ice cream in Belgium to assist farmers who were adding to their herds. Dr. O. Gratz, director of the Hungarian Dairy Experimental Station, drew attention to education in dairying with the Kisber State School. First class milkers (stallschweizer) were trained so that farmers would have the full knowledge available in dairying. Only certified persons could engage in Hungarian butter and cheese making. A special Veterinary Section of the Congress discussed the communication by animal to man of disease. *Milk* hygiene is a compulsory subject at Budapest Veterinary School. A very small percentage of British farmers attended the meetings.

DISTANCE OF THE HORIZON.

The limit of distance to which one can see varies with the height of the spectator. The greatest distance at which an object on the surface of the sea, or of a level plain, can be seen by a person whose eyes are at a height of 5 feet from the same level is nearly 3 miles. At a height of 20 feet the range is increased to nearly 6 miles, and an approximate rule for finding the range of vision for small heights is to increase the square root of the number of feet that the eye is above the level surface by a third of itself, the result being the distance of the horizon in miles, but is slightly in excess of that in the table below which is computed by a more precise formula. The table may be used conversely to show the distance of an object of given height that is just visible from a point in the surface of the earth or sea. Refraction is taken into account both in the approximate rule and in the Table.

At a height of	the range is	At a height of	the range is	At a height of	the range is
5 ft.	2·9 miles.	500 ft.	29·5 miles.	4,000 ft.	83·4 miles.

THE YEAR'S WEATHER.

(1927) *October.*—Apart from heavy rain on the 1st and 2nd, fine, dry weather prevailed generally up to the 12th, and in some parts until the 20th. From then onwards conditions became less settled, and from the 21st until the end of the month frequent rain was general. The last week was unusually mild, and widespread destructive gales occurred on the 28th and 29th. Winds were south-westerly to westerly over Scotland and western parts of the British Isles, but northerly winds prevailed over the eastern districts. Gales occurred on the 2nd, 28th and 29th. Gusts of over 60 miles per hour occurred on the 2nd in exposed places, while at Southport a gust of 74 miles per hour was recorded. The gales of the 28th and 29th were the most severe since the violent gales of January 28, 1927, and at Southport since the gale of December 22, 1894. Among the highest gusts were 96 miles per hour at Southport, 89 m.p.h. at Weaver Point, 85 m.p.h. at Quilty, 78 m.p.h. at Cairngorm, and 77 m.p.h. at Scilly on the 28th, and 78 m.p.h. at Fleetwood on the morning of the 29th. Seas of unusual height were caused by the storm, and low-lying ground of the district of Fleetwood was flooded by water exceeding 4,000,000 tons. On the east coast 74 m.p.h. was recorded at South Shields and 72 m.p.h. at Spurn Head on the 29th. The mean temperature of the month was above the normal in all parts, and day temperatures exceeding 65° F. and night temperatures of 45° F. were recorded in several places. The week ending the 29th was well above normal, the excess in eastern England being 7·4° F. The extreme temperatures for the month were (England and Wales) 72° F. at Huddersfield on the 7th and at Lenton Fields on the 8th, and 25° F. at Castleton on the 21st; (Scotland) 70° F. at Crieff and Perth on the 7th and 16° F. at Braemar on the 21st, (Ireland) 72° F. at Lisburn on the 7th and 29° F. at Lisburn on the 20th. Rainfall in England and Wales was everywhere below normal, and in parts of south-east England less than 50 per cent. of the normal was recorded. In Scotland, with the exception of Shetland and parts of the border district, there was an excess, and flooding occurred in some parts, especially in Fortarshire. Snow fell in the south on the 2nd and about the 20th. In most parts of Ireland less than the normal was recorded, but Malin Head had 150 per cent. and Balbriggan 135 per cent. The following heavy daily falls were recorded: 2·24 inches at Ford on the 1st; 2·05 inches at Balbriggan and Newtownbarry on the 21st, 1·22 inches at Mansfield on the 22nd; 2·01 inches at Dean Prior on the 27th: and 1·81 inches at Keswick on the 28th. Sunshine was above normal in the western parts of England and Wales and the Channel Isles, but below the normal in central England and London area. Some good sunshine records were obtained during the bright spell commencing on the 3rd, and on the 20th, 29th and 31st. Fog was experienced in many places in the morning or at night, and on some occasions it persisted throughout the day. Aurora was observed at several places in Scotland on various dates, and a brilliant parhelion was seen at Aberdeen on the 29th.

November.—The noteworthy features of the weather of the month were the unusually high temperatures for the time of the year, recorded during the early days, and the spell of cold, wintry weather which prevailed during the period 7th to 14th in most parts. The mild south-westerly winds of the latter part of October continued during the first few days, and temperatures exceeding 60° F. were recorded on the 2nd and 3rd. Over parts of the north of England, Ireland and Scotland heavy rainfall was experienced on the 1st and 2nd. With the shifting north-eastwards of the low pressure system, the winds became northerly and increased in places to gale force. By the 7th wintry conditions had become established, and the fall in temperature was most striking. At Aberdeen on the 8th the maximum temperature was 35° F. as compared with 61° F. on 2nd and 3rd, and at Kew Observatory 38° F. as against 62° F. on the 3rd. Snow fell in many places, and severe frosts were widespread about the 12th and 13th, the temperature in the screen at Balmoral falling to 13° F. on the night 12th to 13th. From the 14th to 17th milder conditions prevailed, with heavy rain in places but by the 18th strong easterly winds were experienced, reaching gale force along the east coast and in the North Sea between the 19th and 21st. Quiet cloudy weather prevailed from the 22nd to the end of the month, with much fog at times, especially on the 26th. Southern England had heavy rain on the 29th, e.g., 1·57 inch at Upton Grey (Hampshire). The highest recorded gust of wind during the month was 84 miles per hour at Lerwick on the 28th. Mean temperature over the British Isles as a whole differed only very slightly from the normal. Higher temperatures than ever recorded before in November occurred on the 2nd at Eskdalemuir 60° F., Yarmouth 64° F. and Tynemouth 67° F. The extreme temperatures of the month were (England and Wales) 67° F. Chopwellwood, Geldeston, Tynemouth and Wakefield on the 2nd, and 21° F. at Burnley and Leyland on the 8th and Bronyard on the 12th (Scotland) 65° F. at Kelso on the 2nd and 9° F. at Braemar on the 12th and 13th. (Ireland) 62° F. at Dublin (Phœnix Park) and Kilkenny on the 2nd, and 20° F. at Markree on the 13th and 30th. The rainfall over England and Wales was above normal but irregularly distributed, the extremes being Norwich 202 per cent. and Ashburton 78 per cent. of the normal. Scotland was also above normal, but unevenly distributed, the south-east being deficient, but the south-west and north being in excess. Ireland was generally below normal, especially in central districts. Among the heaviest falls of the month were 4·03 inches at Treherbert (Glamorgan) on the 1st, 3·15 inches at Lochgoilhead on the 18th, 2·30 inches at Strathspey (Lancaster) on the 2nd, and 1·73 inches at East Ayton on the 7th. Sunshine was generally below normal in central, eastern and southern England, and above normal elsewhere. Some good sunshine records were obtained, among which were 8·4 hours at Ventnor, Porton and Ross-on-Wye on the 11th, and 8·3 hours at Falmouth on the 12th. Aurora was observed in Orkney or Shetland on seven occasions and at Gordon Castle on the 27th and 30th.

December.—The weather during the first fortnight was generally unsettled, with moderate temperature, but with the exception of a spell of mild weather from the 21st to 24th, the latter half of the month was cold and wintry, with

strong easterly winds and gales. For the first ten days generally dry weather prevailed in eastern districts. With the spread of an Atlantic depression eastwards on the 5th mild conditions were general, with southerly gales and much rain in the north and west. On the 14th snow fell in the north and rain and sleet in the south. Very cold air reached England on the 16th, and during the next few days very low day temperatures were recorded, and from the 16th to 20th inclusive the temperature did not rise above freezing point at many places in south-east and midland England and parts of Scotland. Mild, stormy, and unsettled weather set in on the 20th in the south-west, and extended to northern and eastern districts on the 21st. Rain fell during the night of the 20th 21st and on the morning of the 22nd glazed frost occurred in the south-eastern districts, causing much inconvenience and many street accidents, some of which proved fatal. Wintry conditions were renewed in the north on the 24th and south on the 25th. Heavy rain was continuous in the south throughout the day on the 25th, and turned to snow in the evening and fell heavily throughout the night in the south and throughout the 26th and 27th in the south-east. Owing to the strong north-easterly winds which reached gale force in some places much drifting occurred, and many villages were isolated for several days. Milder weather did not become general until after the 31st, temperatures below freezing point being widespread on the morning of the 31st, and further snow fell, mostly in London, Midlands and Wales. Easterly winds were prevalent throughout most of the month and at Southport easterly winds were experienced more than in any month during 56 years' observations. Gales were experienced on several days, and were widespread during the period 25th to 29th. The highest gust was 69 miles per hour at Pendennis on the 11th. Temperature was everywhere below the normal, and the extreme temperatures of the month were (England and Wales) 56° F. at Canterbury, Reading and Rhyl on the 6th, Killerton and Paignton on the 21st, and Teignmouth on the 22nd, and 7° F. at Bungay on the 19th. (Scotland) 53° F. at Achnashellach on the 6th, 0° F. at Logie Coldstone on the 17th and 18th and at Braemar on the 18th. (Ireland) 56° F. at Markree on the 6th and 19° F. at Armagh on the 8th. December was one of the three months of 1927 when rainfall over the British Isles, as a whole, was below the normal, the others being May and October. Over Scotland only 44 per cent. of the normal was recorded, and in several places it was by far the driest December on record. Glenquoich had only 3 per cent., Fort William 5 per cent., and Invernary 9 per cent. of the normal. Over 20 sunless days were experienced at several places, but some daily records of 6 to 7 hours were obtained on the 6th and between the 26th and 29th. Fog was experienced on several days chiefly in England. Aurora was observed in Scotland on thirteen occasions, and on the 28th as far south as Oxford and in London on the night of the 20th to 21st.

Year, 1927.—A dull and wet summer was the outstanding feature of the weather of 1927. Not since 1879 has a summer compared with it for lack of sunshine and persistent wetness. Other noteworthy features were the severe gales of January and October, the excessive rainfall of September, the high temperatures of early November, and the severe snowstorms of Christmas week.

January, with the exception of the third week, was generally mild, wet and windy, with westerly winds prevailing. Very stormy weather was experienced about the middle of the month and between the 26th and 29th, when gales were widespread. Gusts of over 100 miles per hour were recorded at Dunfanaghy, Tiree and Paisley. In London on the 21st snow was 5½ inches deep. *February* During the first half of the month an unusual prevalence of fog occurred, with cold weather from the 8th to 13th. The second half was mild and unsettled, with excessive rainfall in Southern England and Wales. *March* was wet in England and Wales and Ireland, and very mild. Temperatures exceeding 60° F. were recorded about the 19th. The month on the whole was the mildest March in Scotland since 1893. *April.* Frequent rain, and showers of hail, sleet and snow, with a fine warm period from the 18th to 22nd, and cold but sunny weather with severe ground frosts during the last week, were the main features. *May* was relatively dry in most parts. During a short warm spell about the 7th temperatures between 70° F. and 80° F. were recorded. On the 4th thunderstorms occurred over a very large area, and the lightning did much damage to buildings and growing crops. *June.* With the exception of generally fair weather from the 11th to 13th, and rather high temperature about the 16th, cold, unsettled weather with local thunderstorms, heavy rain and high winds prevailed. On the 16th 85° F. was recorded at Greenwich and Camden Square. In contrast to this it was the coldest June in Edinburgh since 1764. It was the only month during which Aurora was not observed. Ball lightning was reported at Harpenden (Herts) on the 28th. *July* was thundery and unsettled generally. From the 10th to 13th heavy rain and thunderstorms were experienced in the south-east of England. During the thunderstorm of the 11th over London, much flooding was caused by the torrential rain, which in places was of very rare density. *August.* A few fine days at the beginning and end of the month were experienced, otherwise the month was unsettled and wet, except in the north-west of Scotland, where the weather was relatively dry and sunny. At Durham, it was the wettest August since before 1850. Severe thunderstorms were experienced in Scotland on the 5th, and caused much flooding. *September.* From the 1st to 6th, temperature was generally above normal otherwise it was an unsettled, extremely wet and rather cold month with many thunderstorms and strong winds. At Edinburgh it was the wettest month on record since August 1877 and the wettest September since 1785. The most severe thunderstorm for many years visited the south and south east of Scotland on the 7th and extensive flooding occurred in the Lothians and border counties. *October.* Apart from heavy rain on the 1st and 2nd, mainly fine dry weather, with much morning and evening fog, prevailed until 12th; unsettled conditions with heavy rain prevailed from the 22nd until the end of the month. During the gale of 28th-29th, at Southport, during one hour, the mean velocity was 70 miles per hour, and gusts reached 96 miles per hour, and at Fleetwood a gust of 78 miles per hour was recorded. *November.* Unusually warm weather prevailed during the first few days. From the 7th to the 14th a wintry spell

was general, and then cloudy weather with much fog in the Midlands and south east of England, and strong winds and unsettled weather in the north and west prevailed. Heavy rain occurred in southern England on the 29th. *December* was generally dull and wintry, with easterly winds prevailing. Severe snowstorms occurred from the 24th to 27th. Over a large area, from 16th to 20th, temperature did not rise above freezing point. In Scotland it was the driest December since 1890, only 44 per cent. of the normal rainfall being recorded. Not since the severe storms of January 1881 and March 1891, has such a snowstorm occurred as that of December 25 and 26 over the southern part of England. Several villages were isolated by deep drifts for several days. For the year as a whole, the mean temperature was slightly above normal No really hot spells were recorded and in most parts the temperature did not exceed 80° F. The extreme temperatures were (England and Wales) 85° F. at Camden Square and Greenwich on June 16 and 2° F. at Bungay on December 19. (Scotland) 82° F. at Ruthwell on July 10 and 0° F. at Braemar on December 18 and at Logie Coldstone on December 17 and 18. (Ireland) 80° at Mountmellick on May 7 and 19° F at Armagh on December 8 The year was extremely wet and the general rainfall of the British Isles was 118 per cent, of the normal for the period 1881-1915. The most notable rainstorm of the year was in London on July 11, when over three inches fell, two inches falling in a little over half an hour. The only excesses of sunshine over the normal for the year occurred in areas in the north and west of Scotland and north of Ireland. A severe earth tremor was experienced in eastern districts of Scotland in the early morning of January 24 and another in western districts of Scotland on the morning of January 27.

(1928.)—*January* was throughout mild, stormy, and extremely wet. In parts of the British Isles the cold weather of December continued on Jan. 1, and some very low temperatures were recorded, among which was 11° F. at Eskdalemuir [and Chelmsford. Mild conditions began to spread on the 2nd, and were general by about the 5th. With the return of milder weather, heavy rain was experienced together with strong winds and gales in Southern England on the 1st and 2nd. Westerly to north-westerly gales were widespread on the 6th, and gusts of 84 miles per hour at Spurn Head, 83 miles per hour at Southport, and 82 miles per hour at Fleetwood, were recorded. During the early hours of the 7th an abnormally high tide occurred on the Thames, the tidal reaches attaining their highest level for at least 50 years. Serious flooding occurred at Westminster, Southwark, Putney, and Hammersmith, and fourteen people were drowned through being trapped in basements. Unsettled weather, with much rain and strong winds characterised the remainder of the month. The prevailing winds were south-westerly, and high winds and gales were frequent, those on the 6th, 10th, 24th, and 25th being most severe in the north. A gust of 87 miles per hour was recorded at Lerwick on the 24th, while on the 6th, the wind attained a mean hourly velocity of 60 miles per hour, with a gust of 82 miles per hour at Fleetwood. The mean temperature was everywhere above normal. Ground frosts were frequent, and some low readings were recorded, among which was 13° F. at Wisley on the 18th. The extreme temperatures of the month were (England and Wales) 50° F. at Wisley on the 6th, 11° F. at Good Easter (Chelmsford) on the 31st; (Scotland) 59° F. at Turnberry on the 5th, 8° F. at Braemar on the 1st; (Ireland) 60° F at Dublin (Trinity College) on the 21st, 19° F. at Markree Castle on the 31st. Rainfall over the British Isles was everywhere very much above the normal, and the percentage values for England and Wales and Scotland (210 and 214 per cent. respectively) are the highest since before 1870 Ireland's figure of 166 per cent has been exceeded in January on five occasions. Several places recorded rainfall of 0·1 in or more on every day of the month. At Manchester, where 7 68 ins or 306 per cent of the normal was recorded, it was the wettest January for at least 135 years, and at Bolton for 97 years. In the Lake District and Snowdonia 25 ins. was exceeded, which is as much as the average yearly rainfall of London Considerably more than twice the normal fell over wide areas of Scotland, and 20 ins was exceeded at several places including 26·15 ins in the Loch Katrine area and 25 05 ins. at Ardtornish Parts of Ireland, also, had more than 200 per cent of the normal, and at Gearahameen (Kerry) 18 50 ins. was measured. Among the heaviest daily falls were 4 01 ins at Cwm Dyli (Snowdon) and 3 24 ins. at Rosthwaite (Borrowdale) on the 12th, and 3 14 ins at Didworthy (Devon) on the 18th. Although the month was so wet, sunshine was about 01 above normal in most parts, while at Totland Bay it was the sunniest January since 1908 The largest daily amount was 8 1 hours at Torquay on the 27th. The Zodiacal Light was seen at Oxford on the 16th, 17th, 19th, 22nd and 24th, and Aurora was observed in Shetland on five occasions, and at Aberdeen on the 26th and 27th.

February.—The mild, unsettled weather of January continued throughout the first half of the month, with heavy rain at times and severe gales on the 10th and 11th. The second half was relatively dry and sunny. Ground frosts were frequent during the latter part of the month. Showers of hail and sleet were general in the north during the first few days, and wind reaching gale force was experienced in some parts, a gust of 77 miles an hour being recorded at Leiwick on the 1st. On the 10th a sharp fall in temperature (10° F. in many places) accompanied a line squall, with hail, sleet or snow, and thunderstorms in some parts, and towards the evening the wind reached gale force in many places. After the 17th the weather became mainly fine, with day temperature above normal, and frost at night The only rain of importance during this period, being during the night of the 28th-29th. During the gales of the first fortnight the following gusts were recorded. At Dunfanaghy (Donegal) 91 miles per hour on the night of 6th to 7th, 84 miles per hour at Southport, 86 miles per hour at Holyhead, and 104 miles per hour at Liverpool (Bidston) on the 10th. The mean temperature of the month was well above normal in all parts. Some very mild nights were recorded during the early part of the month, when minimum temperatures of nearly 50° F. were recorded. The extreme temperatures of the month were (England and Wales) 60° F. at Colwyn Bay on the 15th, 22° F. at Castleton on the 26th and 28th, and at Durham on the 28th. (Scotland) 59° F. at Inverness on the 9th, Gordon Castle on the 21st, and at Turnberry on the 24th, 17° F. at Braemar

on the 23rd. (Ireland) 61° F at Killarney on the 15th, 29° F. at Malin Head on the 11th Most of the month's rainfall fell during the first fortnight, and among the heaviest daily falls were 4·65 ins at Cwm Dyli (Snowdon) on the 4th, 3·70 ins at Kinlochquoich on the 7th, and 3·02 ins at Treherbert (Glamorgan) on the 15th. Much flooding occurred in some parts, and at Southport the floods were the worst for 50 years Although very little rain fell during the last two weeks, the month's rainfall over the British Isles as a whole was 120 per cent. of the normal Sunshine reached or exceeded the normal in all parts, and in south-east England the mean daily amount represented 138 per cent of the normal. Several records of between 8 and 10 hours were recorded, among the largest being 9·9 hours at Eastbourne, 9·8 hours at Croydon, Bath and Jersey on the 27th, and 9·7 hours at Margate on the 26th. Much fog occurred about the middle of the month, mostly in the eastern and central districts Aurora was observed at several places in Scotland on various dates. A mock sun was seen at Clacton on the 18th and at Marlborough on the 25th.

March was mainly mild and unsettled, with a cold wintry spell during the second week, and an unusual frequency of easterly winds. Most parts of the British Isles experienced rain or drizzle on the 1st, but during the next few days fine warm weather was general, and many places recorded temperatures exceeding 65° F By the 6th a decided fall in temperature had occurred, and until the 13th, easterly winds, sleet or snow and severe frost was general over the whole country Some bright periods occurred during this spell, and sunshine records of 10·3 hours were recorded at Tiree on the 9th and Scilly Isles on the 10th. Unsettled weather, with wind reaching gale force at times, was then general until the end of the month. Much rain fell in Scotland and Ireland and the western parts of England and Wales from the 16th to 21st. There were, however, some bright periods on the 28th, 30th and 31st. Pressure was below normal everywhere with the exception of northern and eastern Scotland, and during most of the month winds were easterly and mainly moderate. Gales occurred in the north of Scotland on the 16th and 17th, and were fairly widespread between the 19th and 23rd and on the 29th. Gusts of between 50 and 60 miles per hour were recorded at several places, and at Pendennis 60 miles per hour was recorded on the 29th. Temperature was about normal or above in all parts On the 4th Kew Observatory had a maximum temperature of 64° F., which is a record there for the time of year, while on the 11th the maximum was 32° F., which is a record low temperature there for early March. Several low screen temperatures were reported, among these being 11° F. at Rhayader and East Anstey and 12° F. at Stogursey (Somerset) on the 13th, and at the last-named the grass minimum on that date was 3° F. The extreme temperatures of the month were (England and Wales) 67° at Westminster on the 4th and 11° F. at Rhayader on the 13th, (Scotland) 59° F. at Ford on the 4th and Gordon Castle on the 17th and 16° F. at West Linton on the 13th; (Ireland) 59° F. at Dublin (Phœnix Park) on the 17th and 14° F. at Mountmellick on the 13th and 14th. Rainfall was above normal, and expressed as a percentage of the normal for the period 1881 to 1915 was 127. Some heavy falls were recorded, among the largest being 3·40 ins. at Glengyle on Loch Katrine, 2·66 ins. at Aberfeldy on the 20th, and 2·41 ins. at Borrowdale on the 29th. During the period 16th to 20th, 7·1 ins. fell at Arrochar, with nearly 2·1 ins on the 19th and again on the 20th. Snow and sleet fell in many places, Glasgow having 6 ins on the 11th and Guernsey 1 in. on the 12th. On the 12th snow was lying to a depth of 8 ins. at Margate and 6 ins. at Durham and Copdock, while many places had 3 ins. Although sunshine was on the whole below normal, several good daily records were obtained: 10·9 hrs. at Ventnor and 10·3 hours at Cranwell on the 26th, 10·1 hours at Tiree and 10 hours at Malin Head on the 31st, and 10 hours at several places in southern and south-east England on the 5th. Much fog occurred in many parts of the British Isles during the period 2nd to 6th, on the 14th, and about the 23rd. Aurora was observed at Aberdeen on the 11th, Lerwick on the 12th and Baltasound on the 13th, and the zodiacal light was seen at Deerness on the 9th and 10th and at Oxford on the 10th.

April was on the whole changeable and showery, with considerable bright periods, and a wintry spell during the third week. The month opened with unsettled weather, and much rain fell during the period 2nd to 5th. On the 6th warmer conditions spread over the British Isles and continued during the next few days, several places recording day temperatures of over 65° F. Thunderstorms occurred locally on the 10th and 11th. By the 12th winds backed to east, and a sharp fall in temperature took place. Cold conditions with ground frosts continued until the 21st. Strong winds, reaching gale force, and heavy rain occurred in many places during this wintry spell. From the 22nd until the end of the month warmer conditions prevailed, and temperature rose above normal, and exceeded 70° F. in several parts of England and Scotland. The mean pressure of the month was everywhere below normal and wind was mostly moderate to light, but gales occurred on the 8th and 9th and about the 15th At Pendennis Castle a gust reaching a velocity of 69 miles per hour occurred on the 14th. Temperature was about normal everywhere. A minimum temperature of 55° F registered at Kew Observatory on the night of the 9th 10th was a record night minimum there, for April. At Rhayader grass minimum temperature of 13° F. was recorded on the 17th, 18th, and 20th. The extreme temperatures for the month were (England and Wales) 76° F. at Worksop on the 26th, 22° F. at Laton and Woburn on the 18th. (Scotland) 73° F. at Kelso on the 26th, 18° F. at Braemar on the 16th (Ireland) 68° F. at Birr Castle on the 29th, and Kilkenny and Killarney on the 30th, 25° F. at Markree and Newtownforbes on the 21st and at Markree on the 22nd. The rainfall over the British Isles as a whole was the lowest for April since 1902, but the distribution was uneven, for while Brighton had 233 per cent., Holyhead had only 38 per cent. of the normal. Edinburgh experienced the driest April since 1912. Among the heaviest falls of the month were 2·40 inches at Ardtornish on the 9th and 1·20 inches at Inverary on the 22nd, while over two inches fell in the Scilly Isles and Cork on the 24th. During the cold spell of the 14th–21st snow and hail fell on several days in many parts. Sunshine was generally below normal, with the exception of Ireland, but

several good sunshine records were obtained, 14·0 hours at Bude and 13·9 hours at Hastings and Ilfracombe on the 28th. Very little fog occurred during the month, and then mostly on the coast. Aurora was observed at several places in Scotland on the 15th to 17th, and the Zodiacal Light was seen at Ross-on-Wye on the 8th and 18th and at Deerness on the 16th and 22nd.

May.—The weather of the month was marked for its general dryness, practically everywhere in the British Isles the rainfall being very much below the average. The first and last weeks were sunny and warm, while the intervening period was cool and mainly dull. The month opened cool and dull, with occasional light rain, but by the 3rd warm sunny weather with temperature exceeding 70° F. was general, and many places had over 13 hours sunshine on each of the four days, 3rd to 6th. Thunderstorms accompanied by heavy rain occurred in the south and south-west on the 3rd, 4th, and 5th. A change occurred round about the 7th, and northerly winds prevailed, with temperature generally low, especially during the third week, but several good sunshine records were obtained during this period. Rain occurred widely from the 14th to 23rd with some heavy local falls, and thunder (especially in the south) was reported from the 18th to 21st. From the 24th the weather improved and by the 26th bright, warm weather was general over the British Isles. Temperature round about 80° F. was recorded in a few places on the 28th and 29th. Heavy rain occurred in Scotland, Ireland and some parts of western England and Wales. On the 31st the weather had become generally cooler. The wind during the month was mainly between north and east, and light to moderate in force, although most parts experienced strong winds or gales on the 15th, 16th, 17th, 18th and 30th. The highest gust occurred at Weaver Point on the 17th when 59 miles per hour was recorded. At Southport, only in 1915 and 1917 has the duration of easterly winds been exceeded. The mean temperature of the month was about normal in most places. At many places during the nights 8th-9th and 9th-10th temperature fell below freezing point and severe ground frosts occurred. On the 23rd the maximum temperature of 47° F. was the lowest value for the last 10 days of May recorded at Kew Observatory since 1891. In contrast to these low temperatures, 80° F. was recorded at a few places on the 28th and 29th. The extreme temperatures of the month were (England and Wales) 81° F. at Camden Square (London) on the 28th, and at Overcourt, near Bristol on the 30th, and 24° F. at Good Easter on the 10th. (Scotland) 76° F. at Aridtornish on the 31st, and 24° F. at Eskdalemuir on the 10th (Ireland) 79° F. at Killarney on the 31st, and 28° F. at Markree Castle on the 22nd. While the rainfall over the British Isles as a whole was much below the normal, it was very unevenly distributed as shown by the following percentage values of the average at various stations; Jersey, St. Heliers, 276 per cent., St. Leonards 185 per cent., Birmingham 22 per cent., and Buxton 23 per cent. At Fort William the total for the month was only 21 per cent of the normal and the lowest recorded in May for at least 40 years. In Ireland little rain fell during the first half of the month, and most of the month's total was accounted for by the heavy falls of the 17th, 26th and 27th. Falls of over 1 inch were very rare. Sunshine was mostly below normal except in Ireland and the west of Scotland, and unevenly distributed, for instance, Tiree recorded 249 hours, Oban 218 hours, while Aberdeen only had 124 hours. Several good daily records were obtained, among them being 15·0 hours at Deerness on the 3rd, 14·8 at Tiree on the 9th, 14 1 at Aberystwyth on the 10th, 13·9 at Portsmouth on the 6th, and 13·8 at Deal on the 11th. Aurora was observed at Aberdeen on the 10th, Gordon Castle on the 19th, and as far south as Waterford on the 20th.

June was a month of unsettled, cool, and wet weather. The month opened fine, and brilliant weather was fairly general during the first three days, but with the approach of a depression on the 4th, rain began and a rapid fall in temperature occurred. From then until the end of the month unsettled conditions prevailed, with much rain and occasional thunderstorms. There were, however, many bright intervals. Much heavy rain fell on the 12th and 13th and falls of nearly 2 ins. were recorded at Roches Point and Brighton. In several parts of England, temperature rose to about 75° F. on the 13th, but in Scotland and northern England, day temperature generally did not exceed 55° F. A period of bright sunny weather occurred from the 15th to 17th, but the lowest day temperatures in England were experienced during this period and some frost was reported on the morning of 16th. Unsettled wet weather again became general on the 18th and continued until the end of the month, with gales in exposed places. Heavy rain occurred on the 28th, and falls of about 4 ins. occurred at Festiniog, Merioneth and Rosthwaite, Borrowdale. Pressure during the month was generally below normal, and the wind was mainly south west to north west, and frequently strong. Gales were reported at several places, and among the highest gusts were 66 miles per hour at Pendennis and 64 miles per hour at Scilly on the 9th, and 60 miles per hour at Lerwick on the 11th. The mean temperature of the month was nearly everywhere below normal, especially in Scotland, where it was nearly as cold as June 1927, which was by far the coldest June for over 60 years. The extreme temperatures for the month were (England and Wales) 80° F. at Camden Square (London) on the 13th, and 30° F. at Castleton on the 2nd and Marlborough on the 11th (Scotland) 77° F. at Stirling on the 1st and 28° F. at Balmoral, Braemar, Logie Coldstone, and Thorntonhall on the 5th (Ireland) 76° F. at Killarney on the 1st, and 35° F. at Aldergrove on the 18th and at Markree Castle on the 20th. Rainfall was above normal in practically every part of the British Isles, and expressed as a percentage of the normal the values were England and Wales 145; Scotland 184; and Ireland 196, and as a whole it was the wettest June since 1912. At Blundellsands, with the exception of June 1907, it was the wettest since before 1876. Some snow was reported in parts of Scotland during the second week, and thunderstorms occurred in most parts, chiefly during the second and third weeks. Sunshine was below the normal in southern and western England and Wales and southern Ireland, but elsewhere it was about or above normal. Several good daily records were obtained, among these being, 10 3 hours at Tiree on the 2nd and 19th, and 15·1 hours at Ross-on-Wye on the latter day. Some fog

occurred, mainly in coastal districts during the first week. Solar halos were observed at Oxford and Mayfield on 20 and 13 days respectively

July.—The outstanding feature of the month's weather was the long period of hot, dry weather which set in after the first week The cool unsettled weather of June continued during the early days, and heavy rain occurred in many places. From the 7th to 26th, an anticyclone occupied a central position over the British Isles, and hot, dry weather, with much sunshine, was experienced over most of England and Ireland. Many places experienced 20 successive days without rain, while Llanthony Lock in Gloucestershire had 26 days. Temperature generally, reached its highest on the 15th, when London experienced 91° F. in the shade, but Scotland, Ireland, and parts of England had readings of about 90° F. round about the 22nd Rain fell generally in the south on the night of the 26th, with thunderstorms in the south-west, extending to other parts on the 27th to 29th. Unsettled weather with bright periods continued until the end of the month. As a contrast to the hot spell, snow was reported on Ben Nevis, the Cairngorms, and other Scottish mountains. Winds were mainly westerly to south-westerly, and frequently strong. Gales occurred in some parts, and among the highest gusts were Dunfanaghy 75 miles per hour, and Tiree 60 miles per hour on the 2nd, and Lerwick 65 miles per hour on the 14th. The mean temperature of the month was above the normal generally over England, except in the north-west, and was rather below normal in north and west of Scotland and Ireland The extreme temperatures for the month were (England and Wales) 91° F. at Camden Square (London) and Newport, Isle of Wight on the 15th, and 33° F. at Welshpool on the 13th. (Scotland) 76° F at Logie Coldstone on the 11th and Banff on the 14th, and 36° F. at West Linton on the 31st. (Ireland) 83° F. at Killarney on the 22nd, and 35° F. at Markree Castle (Sligo) on the 31st In spite of the heavy rain at the beginning and end of the month, rainfall was generally below normal, and expressed as a percentage of the average for the period 1881 to 1915, the values were, British Isles 74, England and Wales 71, Scotland 91, and Ireland 63. The distribution of rainfall was very uneven, Wakefield only had ·35 in., Pontefract ·43 in., and Osgodby ·45 in., while Glenquoich had 12·84 ins. (which was the heaviest fall in July for at least 50 years), and Artornish 7·41 ins. Many heavy daily falls were recorded, among the heaviest being 3·22 ins. at Bettws Garmon on the 4th, 3·07 ins. at Glenquoich on the 10th, and 2·50 ins. at Ardgour on the 10th. Sunshine was in excess in eastern and central England, but there was a considerable deficiency in western and northern Scotland. Many daily records of over 15 hours were obtained, 15·5 hours at Jersey on the 12th, Ross-on-Wye on the 24th, and Harrogate on the 15th. At Birmingham the total of 15·3 hours for the 14th, was the largest there for 41 years. In eastern England some places had more sunshine than in the July of the exceptional summer of 1921. Very little fog occurred during the month, owing to unusually low humidity. A mirage was seen at sea off Aberdeen on the 12th.

August.—Mainly fair weather prevailed in eastern England, but unsettled conditions, with bright periods was general in the north, and east. Thunderstorms with heavy rain were frequent, and occurred in most parts. The month opened with fine weather in Ireland and Scotland, and extended over most of the British Isles on the 2nd. Heavy rain occurred in southern England on the 3rd and 4th, but on the 5th day temperatures of 75° F. and over were recorded in many parts Heavy rain occurred in Ireland during the night of 5th 6th and in most parts with the exception of south-east England on the 6th and 7th (2·44 ins. at Cahirciveen on the 6th, 1 61 ins. at Douglas, and 2·20 ins at Borrowdale on the 7th). From the 8th to 10th an improvement with bright intervals and showers occurred, but from the 11th to 14th the weather was very unsettled, with heavy rain at first. During this period 3·46 ins. of rain was measured at Eskdalemuir. A temporary improvement occurred on the 15th, when many places recorded 10 hours or more of sunshine. From the 19th until the end of the month unsettled weather with thunderstorms and rain prevailed, but many sunny periods were experienced, especially on the 30th, when over 12 hours of sunshine was recorded at several places. Pressure was at most places below the normal for the month. Winds were mainly between south and west, light to moderate in force. A gust of 59 miles per hour was recorded during a gale at Pendennis Castle on the 27th Mean temperature was generally about normal. The hottest day was generally the 5th or 11th, and the coolest about the 3rd, 16th, or 21st, and the coldest nights were at the beginning and end of the month and about the 19th. The extreme temperatures of the month were: (England and Wales) 82° F. at Camden Square (London) on the 11th and 30° F. at Castleton (Yorks.) on the 5th. (Scotland) 79° F. at Perth on the 5th and 33° F. at Braemar on the 21st. (Ireland) 77° F. at Lisburn (Antrim) on the 5th and 36° F. at Dublin (Phœnix Park) on the 21st. Rainfall over the British Isles as a whole was above normal; but the distribution was uneven, for while Achnashellach had over 2 ins. less than normal, Eskdalemuir had 4 ins. more than the normal. Thunderstorms occurred frequently, especially from the 11th to 15th and 23rd to 29th. At Armagh on the 29th a violent thunderstorm of an hour's duration occurred, accompanied by rain and hail amounting to 1·65 inches. Much of the hail was still lying on September 1. In the south and west of Scotland a severe storm also occurred on the 29th, doing much damage in the Dumfries area. With the exception of central and eastern England and in Ireland, sunshine totals were generally below the normal, especially in the Shetlands. At Lerwick only 24 per cent. of the possible sunshine was recorded. Many good sunshine records were obtained, especially on the 5th, when over 13 hours were recorded in many parts of England. Very little fog was experienced during the month. Solar halos were reported from Grayshott on as many as 23 days. Aurora was observed at Baltasound on the 26th, and Zodiacal Light at Deerness on the 29th.

September.—The outstanding features of the month were the excess of sunshine in all parts and the deficiency of rainfall over England and Wales, and central and eastern Ireland. The opening days were bright and sunny, 10 to 12 hours sunshine being recorded in many parts on the 1st and 2nd. Fine, settled weather continued in south-eastern England until the 9th,

but rain fell in parts of Ireland and Scotland on the 2nd, and spread by the 5th to most parts with the exception of south-eastern and eastern England. On the 5th and 8th day temperatures of over 80° F. were recorded in some parts Thunderstorms, with heavy rain, were widespread on the 9th. From then until the end of the month generally settled conditions prevailed. Some heavy rain occurred in Ireland on the 14th, Scotland and Ireland between the 16th and 19th, and most parts of England and Ireland on the evening of the 27th and on the 28th. Winds were mainly south and west and light to moderate in force with the exception of coastal districts Gales were recorded at Tiree on the 17th, when a gust of 56 miles per hour occurred, and at Kingstown on the 28th. During the first half of the month day temperatures were generally above the normal, but subsequently dropped to an unusually low level for the time of year, especially about the 23rd. The mean temperature of the month as a whole was generally below the normal. Some ground frost occurred during the last two weeks. The extreme temperatures of the month were: (England and Wales) 85° F. at London (Camden Square) on the 8th and 27° F at Roden (Shropshire) on the 30th; (Scotland) 73° F. at Liberton (Edinburgh) on the 13th and 23° F. at Braemar on the 30th; (Ireland) 75° F at Dublin (Trinity College) on the 4th and 29° F. at Markree Castle (Sligo) on the 23rd and 26th The rainfall, expressed as a percentage of the normal for the period 1881–1915, was England and Wales 47, Scotland 110, Ireland 92 and the British Isles 73. The value for England and Wales was the lowest for September since 1910, when the rainfall was only 25 per cent of the normal, and was in marked contrast with the value for September, 1927, when the value was 233. Many places, including Spurn Head 11 per cent., Lincoln and Worksop 13 per cent. and Meltham 14 per cent., had less than a quarter of the normal. Among the heavy falls of the month were 1·78 ins at Mallaranny on the 3rd and 1·10 ins at Inverness on the 5th. Some snow fell on the Cairngorms on the 28th. Sunshine was generally well in excess of the normal, especially in the east and south-east of England. At Edinburgh it was the sunniest September since 1906, and at Kew Observatory since 1911. Fog occurred frequently during the month, and on the 22nd and 23rd dense fog occurred in the Firth of Clyde. Aurora was observed at several places in Scotland on various days, and Zodiacal Light at Deerness on the 8th.

STORMS AND FLOODS IN 1927-28.

(1927) *October* 1. During a heavy storm off the mouth of Bergensfjord, Norway, a German oil tank lighter foundered. Seven men were drowned. While heavy snow fell at Laramie, Wyoming, a temperature of 97° F. was recorded at Lancaster, near Philadelphia. 2. A heavy storm swept Denmark, and considerable damage and interruption was caused to telephone and telegraphic services 23. Heavy snow, accompanied by a gale, fell to a depth of over 2 feet at the Hospice of St. Gothard. Vehicular traffic was temporarily stopped.

November 3. Rains of unprecedented violence fell continuously for over 20 hours in the New England States of Vermont, Massachusetts and Connecticut. Over 120 people were drowned in the floods, and damage estimated at about $200,000,000 was done to property. In Vermont alone 15,000 milch cows were lost. 5. A severe cyclone swept the surrounding districts of Nellore, Madras. Between 200 and 300 people lost their lives in the floods. 7. A heavy gale caused considerable damage all over Portugal, and a slight earthquake shock was felt at Lisbon, but no damage occurred. 12. A storm of unusual character for the time of year swept Bombay, and nearly 5 inches of rain fell Several ships were lost, with passengers and crews numbering over 200. 16. A cyclonic storm struck Washington, and swept across New York State and parts of Pennsylvania, and much damage was done to property. 26 and 27. Torrential rainstorms raged over Western Algeria. Over 2,000 people lost their lives in the floods. Mud deposits from 6 inches to 3 feet deep were left behind, ruining all crops.

December 3 and 4. A series of gales along the Atlantic seaboard worked havoc with shipping, and a number of sea fronts including Atlantic City were flooded. In New York temperature dropped 40°. 6. During a severe blizzard which swept Southern Alberta, four men lost their lives, and heavy losses of ranch stock occurred. 8. A 50 mile an hour gale, with heavy snow and temperature below zero, swept Minnesota, Iowa, and Wisconsin. At Chicago the temperature fell 40° in five hours. Several ships were lost on the Great Lakes, and many lives lost. 9. Severe gales in the Atlantic caused much delay to shipping, and several passengers were injured by the mountainous seas. The waves at times were estimated at 75 feet in height. 13 and 14. Torrential rains caused severe flooding of the Arkansas and White rivers. 18 A heavy fall of snow occurred on the French Riviera. At Cannes the average depth was 7 inches, and scenes unprecedented within living memory occurred. 20. A violent storm accompanied by a heavy fall of snow occurred in Constantinople. All ferry boats in the Golden Horn and Bosporus were suspended. 21. Glazed frost occurred over north-western France, and many accidents happened to pedestrians. Conditions were much the same in Berlin. 25. Owing to torrential rains, the rivers Glacus and Selinus, which are normally dry channels, came down in spate and devastated the coastal plain, between Vostitza and Patras in the northern Peloponnese. 26. Over 3 inches of rain fell at Wezzan, in Northern Nigeria, and the River Rhu Feira rose over 3 feet in a day. About 1,800 square miles were under water and damage estimated at about £400,000 occurred. 28. Owing to a severe gale the *Aquitania* for the first time was unable to enter the port of Cherbourg, and had to stand off the coast all night. An abnormally high tide, due to a violent sirocco, prevailed in the Bay of Naples. Water to a depth of 12 feet invaded the sea front. 30. A violent squall caused a British aeroplane on the Croydon–Le Bourget route to make a forced landing at Fort Nieulay, near Calais.

(1928) *January* 1. A drop in temperature of 35° accompanied a gale of 45 miles an hour in New York. 7. Heavy gales and thunderstorms were experienced in many parts of Germany. 16. The weather observatory on Mount Evans, Greenland, reported a storm in which the wind reached a velocity of 120 miles per hour. 18. During a storm off the Belgian coast, three seamen were lost overboard from the fishing vessel *Nieuport*. Violent snow storms followed by a hurricane caused much delay to Atlantic shipping. The *Aquitania* had several portholes smashed in. 24. Gales along the Atlantic seaboard caused considerable damage to property, many people were injured in New York. A school building was blown down in Tennessee and four children killed, and at Fall River, Massachusetts, an amusement park was overturned by an 80 mile an hour gale. 28. Heavy snow storms occurred in many parts of America together with very hard frost. The Niagara Falls were almost entirely frozen.

February 2. Great swarms of locusts at Wady Musa, near Petra, were swept away by a sudden violent wind storm. 8. During a great storm in the Eastern Baltic the water rose in the Neva, broke up the ice at Leningrad, and flooded the low lying parts. 10. A violent storm of wind and rain swept over northern and eastern France. The wind reached a velocity of 144 miles an hour, causing much damage. 11. A violent gale over Switzerland did considerable damage. 16. Owing to a sand storm two R.H. 9. aeroplanes on a flight to Singapore were forced down in the desert near Heliopolis, Cairo. 17. During a heavy storm over the Dutch coast, the British steamship *Shonga* ran aground near Ymuiden, and broke in two. The Rhone burst its bank at La Palud, near Marseilles, and flooded the surrounding districts. Owing to the rapid thaw of snow on the Austrian Alps, many streams were converted into raging torrents, causing much damage throughout the country. 19. Severe tropical rainstorms caused much inconvenience to Mr. Bert Hinkler, near Singapore, on his flight to Australia.

March 2. Owing to heavy seas the liner *France* was unable to land passengers at Cadiz. The liner took 6 hours to travel 75 miles. 11. A hurricane, accompanied by blinding rain, swept the Pacific coast of Japan, and five steamers making for Tokyo Bay were wrecked. Six inches of rain fell in a few hours at Taquaratinga (Brazil). 13. The dam of the St. Francis reservoir, 45 miles north of Los Angeles, gave way, and let loose the bulk of its 1,300,000,000 gallons of water upon San Francisquito Cañon, and only five of a population of 400 came out alive. 17. A tornado cut a path 300 feet through the town of Sorrento, Florida. One person was killed and 15 others were injured. 21. During a gale over northern Germany, a partly constructed coal haulage bridge collapsed, and ten workmen were killed and four injured. Snow fell at Turin, Milan, Bologna and Trieste. 25. Violent storms and exceptionally high tides occurred along the east coast of France, and much damage done. Two airmen were killed when a sudden gale caught their machine on landing at Istres aerodrome. 26. Five rivers in California and Nevada overflowed, and flooded the countryside, and the lower parts of several towns. 28. On the Cantabrian coast of Spain a storm blew down a number of trees, and at Santander 55 outbreaks of fire were caused. 29. A violent gale raged along the French Mediterranean seaboard and a villa was blown down at Canet Plage. 30. A sudden rising of the Saskatchewan River caused severe flooding in the Pike Lake District. Many cattle were drowned. 31. A violent gale accompanied by heavy rain over the Swiss Alpine regions caused the rivers to rise by 2 feet in 12 hours.

April 1. Ten inches of rain fell in two days over the Midland and Karoo areas of Cape Province. Reservoirs and dams overflowed. 4. Severe storms and floods did considerable damage in Kansas, Oklahoma, Texas, and Arkansas. The worst damage occurred at Shawnee, Oklahoma, where 7 inches of rain and hail fell in a few hours. 5. Four persons and 50 cattle were killed during a heavy hail storm in the Tor appar Hills. Much damage was done to the S.S. *Leviathan* by a huge wave in the Atlantic, and many other ships were delayed by the storm. 11. A violent hailstorm swept Eastern Switzerland causing much damage to fruit trees, especially in Cantons Zurich and Thurgau. 14. Much flooding occurred throughout the coastal belts of south eastern Queensland. More than 40 inches of rain fell in 5 days in the Dawson River basin. A family of 7 persons were drowned. 16. A heavy storm, accompanied by torrential rain, caused a landslip at Monte Serrat. Fortunately there was no loss of life. 28. Twelve people were killed and much damage was done to property by storms and floods in the Eastern States of America. 29. A thunderstorm, accompanied by heavy rain and hail, broke over Paris. Ten inches of snow and hail fell at Wiesbaden.

May 2. A violent cyclone swept over Stara Zagora causing great damage. Many roofs were carried away, and 50 persons injured. 3. During a hurricane over the town of Cluz (Klausenberg) hailstones the size of eggs fell, killing six children. 9. Owing to heavy rains, and the bursting of a mill dam, the Bievre suddenly overflowed and flooded a large area. 9. A strong gale swept Budapest, and over 100 persons were injured by falling chimneys and slates. 12. During a storm encountered 60 miles north of Mongalla, the Italian Somaliland flight was forced down and damaged. 13. The church of Longpre-les-Corps Saints, near Amiens, was struck by lightning and the 12th century belfry was badly damaged. 15. A violent thunderstorm deluged the aerodrome at Seville. 16. Damage to the extent of several million lire was caused in the fertile district of Ottaiano by 48 hours incessant caustic rain. 18. A landslip on the St. Gothard railway caused the collapse of one line for more than 100 yards between Immensee and Goldau. 22. After a violent thunderstorm, snow fell down to 2,300 feet on the Savoy mountains. Rain fell for 24 hours in Canton Ticino, and fruit trees were damaged by the cold, and the harvest ruined by rain. 30. A terrific thunderstorm accompanied by vivid flashes of lightning occurred at the commencement of the balloon race at Pittsburgh. Thirteen of the 14 balloons were forced down and 2 men were killed and 2 injured.

June 1. Violent thunderstorms broke over Eastern Switzerland and several villages were flooded, and much damage was done to crops near Eggiwil (Berne Canton), lightning struck a party of tourists and one was killed and one injured. 9. High winds, accompanying two electrical storms, did considerable damage in south-eastern Washington, and at Bolling Field aeroplanes and sheds were damaged to the extent of $200,000 (£40,000). 10. Torrential rain over

Switzerland, lasting 24 hours, caused much flooding, and the level of the Rhine rose about 3 feet. 11 A tornado swept over the Nebraska border at McCook, doing much damage in that town. Two persons were killed and about 20 injured. An aeroplane was lifted 200 feet into the air, and crashed 13 Ten inches of rain fell at Bombay in 24 hours, flooding the low lying parts of the town. 14. During a fierce storm in the Newcastle (New South Wales) district two steamers were wrecked. Five members of the crews were drowned. At Colaba Observatory 19 inches of rain fell in four days, while 17 inches was recorded at Byculla. 15. A break in a dyke 12 miles south of Newport, Arkansas, drove 1,000 people from their homes and flooded over 35,000 acres of land At Kennett, Missouri, more than 25,000 acres was flooded owing to a 150 feet break occuring in the levee 17. Tornadoes swept over Oklahoma and southern Kansas, killing 8 people and injuring about 100. A further 75,000 acres were inundated at Kennett, where a second break occurred in the levee. The damage to property amounted to $2,000,000 (£400,000). 21 A Spanish fishing boat capsized during a squall near Adra. Five of the crew of six were drowned. 26 After a thunderstorm, followed by torrential rain, a church in Zamora, Spain, was flooded to a depth of 6 feet, and one of the side altars was displaced by the water. 30. During a violent thunderstorm a small bridge on the Interlaken-Grindelwald line was swept away by a sudden torrent in a water course which is generally dry at this time of year, and a railway engine fell into the ravine.

July 3. During a thunderstorm in Toronto several buildings were struck by lightning Three men were killed and four injured Severe storms occurred in many parts of Germany, and several people were injured by falling trees, and the vineyards were damaged by hailstones 5. Many persons were injured during a storm which swept Warsaw. Three aeroplanes were wrecked and much damage was done to property. 6. A violent thunderstorm swept part of Switzerland and Upper Savoie doing widespread damage to crops and fruit trees. Many windows were broken by hail A furious storm and dense fog occurred off the Chilean Coast The transport Anganos was driven on the rocks, becoming a total loss. There were only 4 survivors out of a total of nearly 300 on board. 9. At the Petawa Military Camp, near Ottawa, 3 men were killed by lightning striking the guns and stables. 19. An exceptionally violent thunderstorm, accompanied by a cloudburst, broke over Oberammergau, famous for its Passion Play. The whole village was flooded and plunged into darkness. 20. Twenty-two inches of rain fell in 24 hours at Porbandor. 22. During a violent thunderstorm over the Savoy mountains the level of the Guwaz torrent rose by 45 feet About 40 acres of land, vineyards, and gardens were buried under 6 feet of stones and mud. 29. Heavy rain broke an excessive heat spell in Hungary For 19 days the temperature had ranged between 86° and 98° F.

August 4. During a storm in Central Ontario a girl was killed and a woman paralysed by lightning. Torrential rain caused extensive damage to grain and hay. Five violent storms broke over the Grisons and the Engadine causing the mountain torrents to rise rapidly. Crops were ruined by heavy rain and hail. 5 A heavy thunderstorm brought an end to a long drought at Nice. Large hailstones did great damage to plantations and gardens. A violent thunderstorm at Bamberg in Bavaria, of a violence unprecedented in Germany, wrought great havoc to property, hardly a house being untouched. 7. A tropical hurricane swept over a large part of Florida The gale in some places reached a velocity of 100 miles per hour and did considerable damage. 15. Five and a half inches of rain (about 550 tons to the acre) fell at Kingston, Jamaica, in 24 hours. This was the heaviest fall for 40 years A cyclone, followed by heavy hail, at Haby and Mjaryd, Sweden, caused great damage to crops. In spite of the heat the hail remained in drifts for 24 hours. 17. A tornado, accompanied by heavy rain and hail swept the Algerian coast Fifteen persons were killed and about 250 injured, many seriously 25. A violent thunderstorm swept over Geneva, causing great damage to crops and trees 26. Much damage was done by a cloudburst in the Catskill Mountains, New York. Five people were drowned and 17 were missing 29. A Cloudburst which fell upon Monza, lasting only a quarter of an hour, left mud and water deposits to a depth of 2 feet in the streets. 30 During a violent thunderstorm over Antwerp, the Palais de Glace was struck by lighting Fire broke out and the building was practically destroyed. A cyclone of unusual violence swept over Milan causing 15 deaths, and several hundred people were injured.

September 1 A storm of an intensity unknown for 13 years played havoc at Lahore. Houses collapsed in the city, causing many deaths. Owing to the banks of the Jhelum River in Kashmir breaking, much flooding occurred. The water was about 5 feet deep in the streets 200 houses collapsed, and all the roads were blocked. Sixty-six out of a party of 175 pilgrims perished. 11 A violent thunderstorm accompanied by waterspouts caused much havoc in parts of Northern Jutland. Several people were struck by lightning. 13 A hurricane swept the West Indies, and during the next few days spread to Florida The death roll was in the region of 1,500, and damage to property anything up to $100,000,000 Following the hurricane, over 15,000 cases of influenza, and 5,000 cases of malaria and measles were reported. 15 and 16 Much damage was done by a typhoon which passed close to Hangchow, Chinkiang and Nanking. Scores of Chinese were drowned. About 7½ inches of rain fell in 24 hours, and floods to a depth of 18 inches occurred in Shanghai. 22. A violent thunderstorm caused much damage to crops in Canton Tiemo. The old church of the Madonna del Sarso at Moricote was struck by lightning, and damage exceeding £4,000 was done. 31. During a gale on the Belgian coast a lock on the Nieuport-Furnes Canal was demolished and a breach 130 feet wide made in the embankment, and very extensive floods occurred.

BRITISH ASSOCIATION.—The ninety-sixth annual meeting of the British Association for the Advancement of Science was held at Glasgow from September 5 to September 12. Sir William Bragg, who succeeded Sir Arthur Keith as President, delivered an address on "Modern Developments of the Physical Sciences and their Relation to National Problems." Scientific knowledge and experience, he said, to be of full service, must be in direct contact with the problem to be solved. A new class of worker was growing up, consisting of men engaged in research associations and industrial research laboratories. A high value ought to be placed on their services, because they were in personal contact both with capital and with labour, and might overcome the dangerous separation that had been in existence between the manipulator in the shops and the designer in the drawing office and between the factory directorate and scientific knowledge. There had not been sufficient appreciation of the interests and rewards of a student of research, but with the growth of this new class there would be more value attached to the great services it could render.

The Presidents of the various sections, and the subjects of their addresses, were as follows:—*A*, Mathematics and Physics, Prof. A. W. Porter, "The Volta Effect: Old and New Evidence"; *B*, Chemistry, Prof. E. C. C. Baly, "Phosphorescence, Fluorescence, and Chemical Reaction"; *C*, Geology, Mr. E. B. Bailey, "The Palæozoic Mountain Systems of Europe and America"; *D*, Zoology, Prof. W. Garstang, "The Relation of Larvæ Forms to Evolution"; *E*, Geography, Prof. J. L. Myers, "Ancient Geography in Modern Education"; *F*, Economics, Prof. Allyn Young, "Increasing Returns and Economic Progress"; *G*, Engineering, Sir William Ellis, "The Influence of Engineering and Civilisation"; *H*, Anthropology, Sir George Macdonald, "The Archæology of Scotland"; *I*, Physiology, Prof. C. Lovatt Evans, "The Relation of Physiology to Other Sciences"; *J*, Psychology, Prof. T. H. Gear, "The Nature of Skill"; *K*, Botany, Dame Helen Gwynne Vaughan, "Sex and Nutrition in the Fungi"; *L*, Dr. Cyril Norwood, "The Next Steps in Education"; *M*, Agriculture, Dr. J. S. Gordon, "Live Stock in the British Empire." Dr. Vaughan Cornish, in his presidential address to delegates of corresponding societies, dealt with the preservation of scenic beauty.

The meeting in 1929 will be held in South Africa under the presidency of Sir Thomas Henry Holland. The Association will meet at Bristol in 1930.

AIRCRAFT ATTACK ON WHEAT RUST.—Steps are being taken in Canada to combat wheat rust, which destroys many acres of grain annually. For the past few years the Canadian Federal Department of Agriculture have been trying to fight it from the ground, but now they have enlisted the services of the Royal Canadian Air Force. The airmen, including a technical expert in agricultural bacteriology, are provided with sensitised plates, which are exposed to the air. The spores of the wheat rust floating at high altitudes are caught on the plate and subsequently analysed. They have been detected by this means at a height of 5,000 feet, and fliers have run into clouds of these invisible organisms, which have registered as many as 5,000 to the centimetre. These investigations will, it is believed, solve the mystery of how and why and where the rust has spread in the past.

AIRCRAFT IN ARCHÆOLOGY.—A useful demonstration of the value of air-photographs in the study of archæology has been made by Flight Lieutenants W. E. Purdin and B. T. Hood near Dorchester in Oxfordshire. The photographs revealed two large circles, previously unknown; a rectangular enclosure; a semi-circular enclosure, possibly prehistoric; a track, either prehistoric or Romano-British, 40 ft. wide; traces of several barrows; and a small circle about 20 ft. in diameter, consisting of 12 holes which had once been filled with uprights of stone or wood. The two large circles were partly in two fields, one under barley, the other under beans; but it was only the bean field that showed the circles, of which no trace was to be seen at ground level. In order to test the circles and seek evidence of their date, excavations were carried out by Mr. O. G. S. Crawford and Mr. R. G. Collingwood. Two trenches were cut, the first of which found the inner circle. At one end of the trench the excavators came on sand at a depth of 2 ft. 6 in. through a deposit of reddish-yellow loam. At the other end sand was reached at a depth of 6 ft. 4 in. of brick earth, the silt filling up the old ditch. The circle-ditch originally must have been not less than 36 ft. across from lip to lip. The second trench cut the outer circle at the point where the crops divided. Here a layer of 2' ft. of brick earth covered the sand, and the sides could be seen sloping away from the inner lip. At a depth of 5 ft. 6 in a foot of black stuff represented the middle of the ditch. Beyond two animal bones and some fragments of bone, no finds were made.

ANTARCTIC FLORA.—Some interesting facts regarding Antarctic and sub-Antarctic vegetation are recorded by Mr. R. N. Rudmose Brown, the Polar geographer and naturalist. The great ice sheet, he says, is devoid of any form of life. While the Arctic regions support some 400 species of flowering plants only two species are to be found in the Antarctic. This may be ascribed to the shortness of the Antarctic summer and the low temperatures, for no month has a mean temperature above freezing point. December is well advanced before the rays of the sun lay bare what little soil occurs in a few places. Only for a month or six weeks is the vegetation, except lichens on cliff faces, exposed to sunlight. The ground thaws to a depth of a few inches on a few cloudless days, and even then is saturated with ice-cold water in which root hairs are physiologically inactive. More than 50 species of mosses have been recorded, mostly from Graham Land. About 70 species of freshwater algæ have been found in the South Orkneys, the most interesting being species of *Sphærella*, which colours snow red. Marine algæ are very abundant in Antarctic seas, and grow at times in pools which are frozen solid all winter. Most remarkable of all is the wealth of diatom life in strong contrast to its scarcity in warm seas. The important factors in this case are probably the tendency for the surface layers of water to sink and be replaced by deeper layers richer in nitrates, and the abundance of silica, owing to the low temperature of the water and the great quantity of glacier-swept débris from the land.

AUTOGIRO FLIGHT ACROSS THE CHANNEL.—On September 18 Señor Juan de la Cierva, the Spanish engineer, crossed the Channel from

Croydon to Paris, via Calais, in the autogiro, or windmill plane, which he had invented. He had previously completed a 3,000 mile tour of Britain. The "windmill" has four revolving blades or wings above the fuselage, mounted and free to rotate on an almost vertical mast. It runs on the ground until the wings are revolving at a sufficient rate to lift the machine, which they do independently of its former speed. So long as they continue to revolve it is impossible for the machine to stall and crash as an ordinary aeroplane will do when its forward speed is insufficient That is why the autogiro can descend in an almost vertical path. When it landed near Paris it came down so vertically that after touching the ground it moved less than three yards. The speed is about 100 miles an hour.

CATERPILLAR WHEELBARROW.—A caterpillar wheelbarrow, in which the ordinary wheel is replaced by an endless track, or "caterpillar," to overcome the difficulties encountered in soft or uneven ground without the use of planks, has been introduced The track unit used is a light adaptation of the girder track, and the lower portion, which carries the load, is self-locking at a definite radius, giving the practical effect of a wheel 10 feet in diameter. The track itself is self-cleaning and will automatically eject grit or small stones, thus avoiding the liability to become choked The body of the barrow is of steel, pressed from a single sheet, and is so set in the frame that the top is horizontal when in use - a big advantage when transporting semi-liquid products such as cement-mortar.

CAVE MAN AT CHEDDAR.—During excavations for the widening of the entrance of Gough's Cave, Cheddar, two fragmentary skulls, one of a child of three and the other of a man in the twenties, were found about six feet below the natural surface associated with paleolithic flint implements. Sir Arthur Keith has pronounced them as belonging to the race of the Dordogne and Riviera caves, which lived in Aurignacian times, about 12,000 B.C. Ten feet below the surface a *bâton de commandement*—one of those mysterious rods made from a short length of smoothed reindeer antler was discovered. No perfect specimen has been found before in England A fragment of one came to light in the same cave, in the rocky alcove from which in 1903, the famous Cheddar Man was taken. The *bâton* has a large round perforation near one end and a number of engraved hatchings on the shaft. One theory of their use is that they were ceremonial wands or sceptres. Other authorities believe they were employed as tools for the straightening of the shafts for flint arrows.

CONCRETE MADE FROM ICE.—In Finland a building material has been invented, which consists of sand and cement, made extremely porous by mixing it with crushed ice and snow. The moisture is evaporated by heating, and the slab of concrete thus made is uniformly honeycombed by tiny pores, and is in consequence very light. No additional water in composition is needed, as the water required is formed through the melting of the ice or snow. The degree of porousness of this concrete can be accurately decided in advance according to the quantity of ice or snow used, and hence the weight bears a direct relation to the size and number of the pores. It is possible to use as much as 50 to 80 per cent. of ice or snow, corresponding to millions of minute pores.

DRY ROT IN WOOD.—Certain dry rot in wood, can be boiled to death but cannot be frozen out of existence, states a report issued by the Department of Scientific and Industrial Research. The particular fungus, Merulius Lacrymans, so called because it has the power of manufacturing water, can be killed by boiling water, but can remain alive after exposure for months to temperatures below the freezing point of water. While some kinds of fungi can only set up dry rot in soft woods, the Merulius can destroy oak, teak, and mahogany. The fungi responsible for the spread of dry rot can feed on paper, potatoes, jellies containing extracts of fruits or meats, and some of them can grow on moist garden soil. The result is that a house can become infested with Merulius Lacrymans through the agency of the soil Although when the strings of this fungus are severed from connection with the woodwork they have no food available in the wall except small quantities of fibrous material in the mortar or any organic solution from the soil where the damp courses do not intervene, the solid parts and the liquid contents of the strings themselves represent a certain amount of food material; at the expense of this the strings, when moistened, can put forth fungal threads that may infect the adjoining wood.

EARLY MAN IN THE ORKNEYS.—Some remarkable discoveries indicating prehistoric culture were made by Professor Gordon Childe while excavating on the shore of the Bay of Skail in the Orkneys The site comprised a village consisting of a number of square huts 15 feet across, built of dry masonry, and with each course of masonry projecting beyond the one below. The huts opened on to streets which were roofed over with stone slabs. These roofs had been used either as camping-places or kitchen middens, for they were covered with kitchen refuse. The excavators had to cut through some 5 feet of kitchen refuse before they reached the stone slabs. The interior of the huts showed hearths at several levels, traces of later occupation for which evidence of date was afforded by the remains of the red deer. Professor Childe found that relics were for the most part of stone, in an excellent state of preservation. Pens of stone pointed to the fact that domestic animals, probably pigs, were kept there. Two finds of outstanding importance were made. One was that of two skeletons in a stone receptacle, of which the slabs were built into the wall in such a way as to form an integral part of the structure. It is suggested that they were sacrificed to confer stability on the walls. Secondly, on one of the slabs were regular marks which Professor Childe thinks may represent a script.

ELECTRONS NOT INDIVISIBLE.—Speaking before the British Association, Professor G. P. Thomson said that the electron, instead of being indivisible, could be described in certain phases as having measurable dimensions equal to nine or ten atoms. By means of experiment he and Dr. C. J. Davisson showed streams of electrons discharged in beams travelling at various speeds and allowed to impinge on crystals, from which they were reflected at angles that could be measured. Dr. Davisson used solid crystals of

nickel, from the different faces of which the reflection took place Professor Thomson used films of gold and aluminium so thin as to be transparent, the thickness being 1-millionth of a centimetre, and allowed the beams of electrons to pass through the film, when they were revealed in a pattern on a photographic plate The electron was shown to be capable of expanding like an umbrella when it left the atom, and in the expanded state showed by the pattern it formed that it might have a composite structure and was not an indivisible unit.—In a lecture at the Imperial College of Science and Technology Sir Oliver Lodge pictured the electron as a spherical hollow, or bubble, in the all pervading ether, with a radius of about one 20-million-millionth of an inch. When at rest or moving slowly it could be regarded as a simple sphere, but when moving quickly it became flattened in the direction of motion, and a group of waves in the ether became associated with it At very high speeds, approaching the speed of light, these waves dominated the system, the central sphere being flattened to a plane.

GIANT ELECTRIC POWER SHOVEL.—The largest electric power shovel in the world is in use in the open pit coal mines of Illinois It has a dipper that will gouge out 15 cubic yards or nearly 24 tons of earth in one bite, and lift it to the roof of a ten storey building. One scoop load of dirt is sufficient to fill a trench 7 foot deep, 6 feet wide and 68 feet long, or a room 7 × 7 × 8 feet—about the size of the bathroom in an ordinary home Enough material can be held in the dipper at one time to fill eight large trucks, while enough coal can be picked up in one bite to supply the ordinary family for an entire year. The shovel boom is 120 feet long, and the dipper stick 82 feet long. Thus it can lift material to a height from 90 to 100 feet, and can reach out over a radius of 150 feet from the centre of operations, covering a circle of 300 yards in diameter If set down in the centre of an ordinary football field it could dig out the entire field and deposit the dirt on the bleachers. All the operations are controlled by one man, by means of three hand levers and one foot pedal

GREAT BARRIER REEF EXPEDITION.—On May 26 a scientific expedition, promoted by the British Association, and led by Dr. C M. Yonge, left England for Low Islands, off the coast of Queensland, where they intended to spend 24 months on the Great Barrier Reef, that natural breakwater built by stall-living organisms along a continental coast for 1,300 miles. The individual task of Dr. Yonge will be to study the feeding and lime formation of corals and molluscs, and from the economic point of view the growth and feeding of pearl shell. Other members will study the movements of floating organisms, the chemistry of the water in relation to its inhabitants, the sponges, the marine plants, and various geological and geographical matters. The fisheries will be investigated for the benefit of the Australian Government, and the commercial possibilities of the oyster, turtle, and tortoise explored.

HAKE AND THE FULL MOON.—From a study of the weekly figures of the landing of hake at Cardiff during 1922-25, Mr. C. F. Hickling has come to the conclusion that from the fifth to the ninth full moons of the year there is a regular fluctuation in the landings, so that more fish are landed at full moon than at new moon. He suggests that this is the result of a monthly period of activity in the reproductive organs of the fish. There is also a daily change in the abundance of hake on the sea-bottom. There is so little hake on the sea-bottom during the hours of darkness that it is rarely worth while to trawl at night, especially when the hours of darkness are long, as in winter This apparent nightly migration vertically from the sea-bottom is believed by Mr. Hickling to be due to a "sleep rhythm" in the fish, which is inactive by day but active by night It is pointed out that the hake feeds at night, but apparently not during the day, the surface methods of catching hake, which are most successful at night, depend on the hake seizing a hook or becoming entangled in stationary trammel-nets, whereas the method of catching hake on the bottom, which is most successful by day, depends on the hake being swept passively into a trawl.

IDENTIFYING CULTIVATED PEARLS. Japanese cultivated pearls, formed by inserting suitable objects in the shells of pearl oysters, so closely resemble natural pearls that attempts to distinguish between the two sorts have not proved successful. A machine has now been invented which definitely proves whether or not a given pearl is natural or cultivated. The inventors are Dr. Nacken, Director of the Mineralogical Institute of the University at Frankfurt-on Main, and Dr. Jaeger. When this testing machine is used the pearl is suspended on a silk thread in a glass tube, fixed over an electro magnet in such a position that it is exactly between the two magnetic poles. As the electric current is passed through the magnet it causes the cultivated pearl to revolve, whilst the natural pearl remains stable.

IMPROVED SAFETY LAMPS FOR MINERS.—The problem of increasing the candle power of the miners' safety lamp has been the subject of investigation by Professor R V Wheeler and Mr. D W. Woodhead. They find that by using a blend of petroleum spirit with paraffin and mineral colza, an increase of 35 to 40 per cent. in the candle power is obtained. By increasing the height of the wire gauze chimney, using a wider mesh, a thinner wick with its top concave upwards, and by surrounding the upper part of the flame by a short length of glass tubing open at top and bottom, the candle power can be raised to 2·75.

IVORY KEYBOARD FOR CARILLON. Messrs. John Taylor and Son, of Leicestershire, have brought out an invention by which it is possible to play a carillon of bells, weighing fifty tons or more, by means of an ordinary ivory keyboard resembling that of a piano. Hitherto the carillon has been played off projecting wood levers which were struck by the closed fists and foot of the player. With the new invention the stroke is obtained by means of powerful pneumatic action, and it is so sensitive that a small child can strike a key and swing a bell-clapper weighing a few hundredweights. It is also possible to play from a perforated music roll on the piano-player principle. A device sets the tempo, and the carillon plays right through the music roll.

KIPPERS WITHOUT BONES.—A machine for boning and cleaning herrings, the first of its kind installed in England, made its initial run at Fleetwood in August. This invention, it is claimed, will revolutionise the herring-fishing industry and enable the boneless kipper to be placed on the housewife's table. Designed by an Englishman, and manufactured of stainless metal in Germany, the machine is capable of boning 2,500 herrings per hour, compared with 120 per hour, which is the extreme capacity of the smartest Scots fisher-girl. It is claimed for the machine that even the bones of the herring can be secured for conversion into fish-meal.

LAPWINGS' TRANSATLANTIC FLIGHT.—An extraordinary migration of lapwings from east to west across the Atlantic is recorded by Mr H F Witherby. On December 20 and 21, 1927, flocks of these birds, one of which was estimated to number 500 and another 1,000, arrived in Newfoundland. The source of the migration was definitely indicated by the presence on one of the birds of a *British Birds* ring, which showed that it was a native of Cumberland. It is certain, therefore, that large numbers of lapwings crossed the Atlantic from Britain to Newfoundland - a distance of about 2,200 miles—in a single flight. Mr Witherby shows that the weather conditions were extremely favourable for such a journey. A spell of frosty weather in Britain made it imperative for the birds to seek new feeding grounds; they moved westwards and became involved in a wind blowing almost due west at a velocity of about 55 miles an hour. Thus, added to the lapwing's normal speed of some 45 miles an hour, would permit of the total journey being accomplished in about 22 hours.

LARGEST ELECTRIC BULB.—The General Electric Supply Company of the United States is in possession of the largest electric bulb in the world, a 50,000 watt experimental lamp. At the top of the bulb a radiator made of metal fins carries off the intense heat generated by the white hot tungsten filament, which burns at a temperature of 5,500° F., or twice as hot as molten steel. The bulb is filled with nitrogen, the circulation of which cools the bulb and carries upward into the radiator the thrown off tungsten particles from the filament, thus preventing the blackening of the inside walls of the bulb. The lamp at present is only intended for experiment.

LIGHTHOUSES IN BRITAIN AND FRANCE.—Dr. Du Riche Preller, writing in *Engineering*, gives an account of recent developments in the lighting system of lighthouses in France. In 1922 high power incandescent lamps began to replace the electric arc in lighthouses, and the lighthouses of Dunkirk, Calais, La Cauche (south of Boulogne), and Cape de la Heve (Havre) have now adopted the incandescent lamp system. The lighthouse of Les Balemes, in the Bay of Biscay, is also being converted to incandescent lighting. In British lighthouses 4-kilowatt lamps are used, but in France Philips lamps up to 10 kilowatts are in use. The lights at St. Catherine's Point and the Isle of Man, and those of Grisnez and Ushant on the French side, illustrate the difference between French and British practice. The long-duration flashes of five seconds and the slow rotation of the St. Catherine's give one extreme, and the lightning flashes of one-tenth of a second and the rapid rotation of the Grisnez give the other extreme. The difference between the two systems is probably due to the greater density of the atmosphere on the British coasts, which demands a longer time before the light becomes perceptible, and necessitates intensive illumination of the nearer sea within a moderate range rather than overhead long-distance flashes to the horizon. Violet rays are found to militate against the penetration of the luminous beam into a dense atmosphere. The French system, modified so that the flashes are not less than two-tenths of a second, has been adopted in a number of British lighthouses.

METALLISED LINEN FOR AIRSHIPS.—A remarkable new fabric, metallised linen, has been invented by Mr. Einstein, a Russian. Tested by Professor Larard, the tensile strength was found to be over 1,800 lb per foot width. This invention may revolutionise the construction of aircraft, as the fabric is very light and much stronger than any other type of envelope material. From such a fabric an aeroplane could be constructed of less than half the present weight, yet of considerably greater strength. The petrol tins for an Atlantic trip could be made of metallised material lighter than the thinnest aluminium.

MILLION BOTTLES PER WEEK.—A machine capable of turning out one million pint bottles a week, with only one man to superintend it, has been constructed by the Metropolitan-Vickers Electrical Company at their works at Manchester. The glass is melted in pots or in a tank furnace, and the machine is run on rails to the mouth of the furnace. A 25 h.-p. electric motor is started and bottles are automatically turned out in dual moulds at the above rate. The machine consists of fifteen identical units which rotate around a central pillar. As each unit passes the mouth of the furnace, large arms are lowered into the molten glass, a quantity of which is picked up in a mould by means of suction. A small quantity of compressed air is then admitted to form a cavity in the neck of the bottle. Further rotation of the machine, which has a speed of six revolutions per minute, enables the glass blank thus formed to be transferred to a second mould, the interior of which is of the shape of the finished bottle. A further supply of compressed air blows the bottle to the shape of the mould. The machine moves on to the next stage, when the moulds are lowered and the bottles are discharged on to a conveyor. In the event of a breakdown of any one unit it can be replaced in less than half an hour. This machine is equally useful for the manufacture of bulbs for electric lamps.

MINUTE MEASUREMENTS.—Measurements equivalent to one-25,000,000,000th of an inch have been made by Mr. Charles E St. John, of Mount Wilson Observatory, in researches to prove the contentions of Professor Einstein, that a ray of light is "bent" when it passes a gravitation field, such as the sun. Changes in the rays of light from a distant star produce minute displacements of the dark lines in the spectrum. When rays from one star pass another on their way earthwards the ray is "bent," as was argued by Professor Einstein and confirmed by an

eclipse of the sun. The amount of displacement found by Mr. St. John is a trifle less than one-25,000,000,000th of an inch. It presents another proof of the Einstein theory in regard to light rays.

MISSISSIPPI FLOODS.—Mr H. C. Frankenfield has contributed to the *Monthly Weather Review* a report on his investigations into the Mississippi floods of 1927. He finds that the lower Mississippi floods, which were so disastrous in that year, are caused by a wide distribution of rains over the central plains The waters of the Missouri River above the mouth of the Platte, and of the Mississippi above the mouth of the Wisconsin, do not materially add to the strength of the floods. In comparison with 1922, the previous year of great floods, there was little difference in the rainfall during January and February, but in 1927 there were heavy falls in April in the lower Arkansas valley, and a heavy fall in the Ohio basin in the previous December. The probability of such high waters occurring in the near future is not so great. At the same time, Mr. Frankenfield believes that the floods of 1927 did not attain the possible maximum. He calculates the maximum levels as follows, compared with the 1927 level: Cairo, 58 ft. (1927), possible 66 ft.; Memphis, 47 ft. (1927), possible 55 ft.; New Orleans, 27·5 ft (1927), possible 30 ft. At New Orleans the effect of tides and winds may also be felt.

NEW THEORY OF THE SMILE.—Mr. A. M. Hocart has developed a new theory of the smile, which, he says, has not been properly explained by psychologists. When a dog is pleased, he says, especially when it is full of fun, it opens its mouth slightly, draws back the corners of the mouth, and bares its teeth. If one tickles it under the arm pits as it is lying, it is apt to draw back the corners of its mouth slightly without baring its teeth. A puppy welcomes its master with its ears cocked, a distinct gleam in its eyes, wagging its tail and smiling. As its master draws nearer, it rushes toward him and proceeds to chew his hand. The smile then may be the resultant of two opposite tendencies, the impulse to tear with the teeth and the impulse to suck and lick the object of affection. Adult man does not habitually bite the object of his affection, but there is a tendency that way which usually betrays itself only in words; in children there is a distinct tendency to chew affectionately. The parallel between the man's smile and the dog's is so close, that they may be identified, the differences being due to man's more complex development.

NOISE MADE BY TRAMCARS.—The urgent problem of eliminating noise made by tramcars has been tackled seriously in America. To deaden the noise of grinding gears a groove was cut round the inside of each gear, and lead, a poor conductor of vibrations, was poured in. Above the bearings, where the wheel trucks join the body of the car, insulating shock-proof rubber pads were inserted to insulate against jolts. Other rubber pads were placed between the body and the frame to prevent vibration of the trucks reaching the passengers. A heavy layer of felt-like insulating material was placed under the entire floor of the car, while the air brake pumps were insulated with the same material. Finally a new type of crossing with the intersecting rails sealed in asphalt was devised which is said to prevent the pounding noise of wheels as they pass over it. Six of the new trams on rattle-proof trucks were tried in San Francisco, and are said to ride as smoothly as a limousine.

OIL-ELECTRIC LOCOMOTIVE ENGINE.—A light-weight oil-electric locomotive has been put in service on the Long Island railroad which, it is claimed, combines power, lowness of cost and speed, and will do on 10 gallons of oil work for which a steam engine will require a ton of coal The locomotive is 47 ft. long, weighs 85 tons, and is geared for a maximum speed of 34 miles per hour, though a speed of 80 miles per hour is said to be possible with this type of engine. It burns only the cheapest grade of fuel. Each car contains a 300 horse-power six cylinder oil engine, and each engine drives a 210 kilowatt electric generator, which furnishes power to two traction motors. The generator supplies direct current at 750 volts when operated at normal high speed. It not only supplies power for the traction motors, but also starts the oil engine, receiving power from a storage battery, and charges the battery while idling.

ORIGIN OF HUMAN SPEECH.—Sir Richard Paget, in a paper read before the British Association, advanced a new theory of the origin of human speech. How had the art of articulation arisen? He found the answer from a suggestion made by Darwin that persons cutting with a pair of scissors often moved their jaws sympathetically, and that children learning to write often twisted their tongues as their fingers moved, in a ridiculous fashion. Dr. Rae, of Honolulu, had shown that at least in Polynesian speech, the syllables were the result of mouth gestures which themselves symbolized the succession of ideas to be conveyed, and that the same principle might apply to Aryan speech. Here, said Sir Richard, was the probable origin of human speech. Primitive man would sing, grunt, or roar to express his emotions, just as animals did. He would pantomime with his face and limbs to express his ideas to his fellows, and as he pantomimed with his hands his tongue would follow suit. But as he came to occupy his hands more and more in his crafts he would have to rely more on gestures of his face, tongue and lips. Then it would come about that the pantommic action would be recognized by sound as well as by sight, and speech was thus born.

PALÆOLITHIC MAN IN BRITAIN. Two important announcements regarding the presence of palæolithic man in Britain were made at the British Association. Dr. James Ritchie, Curator of the National Museum in Edinburgh, was able to give the first record of palæolithic man in Scotland, from the evidence of a limestone cave near Inchadamph, Sutherland, which showed that such men had inhabited that country for long periods during the Glacial Age. Mr. A. L. Armstrong described the first discovery of a bone with a palæolithic engraving of a human figure on it made in England. It was made during the systematic excavation of the Pin Hole Cave, in the Creswell Crags, Derbyshire. The total depth of the deposit on the floor of the cave is 15 feet. The engraved bone, probably that of a reindeer, was found beneath stalagmite, 3 feet 6 inches below the floor of the

cave, on an ancient occupation level, together with a series of beautifully made proto-Solutrean and Aurignacian flint implements. The engraving represents a rudely drawn masked human figure standing erect, apparently in an attitude of ceremonial dancing.

PICTURES TESTED BY X-RAYS.—For some time the authorities of the Louvre have used X-rays to test the authenticity of old masters. They have now extended the system so that pictures are now examined by means of luminous films, ultra-violet rays, the spectrograph, and by phosphorescence. The testing is carried out at the Conservatoire des Arts et Metiers—the French equivalent of the National Physical Laboratory. Not only are the pictures in the Louvre, and all offered for purchase, scrutinised, but also paintings received from museums in other countries for examination. Experts are now able to identify any parts of a painting which have been touched by another hand. In this manner "The Toper," a painting ascribed to Franz Hals, in the National Gallery of Scotland, and showing a bearded man wearing a crimson cap and holding a wine-glass, was found to have been tampered with. An application of X rays proved that the cap was an addition, and the wine-glass hid the jaw-bone of an ass in the original work.

PLATE GLASS IN A RIBBON.—The Ford motor works require 21,000,000 square feet of glass every year, all of which is made in their own plate glass factory. The method used consists of casting the glass in an endless, unbroken strip. The molten material comes out of a spout and passes between two cast iron rolls, one 48 inches and the other 9 inches diameter, perfectly sychronised, and at a constant temperature of 200° F. The glass, at a temperature of about 2,000° F, is then allowed to run on rollers fixed to a table 442 feet in length, situated in an automatically controlled heat tunnel, where its temperature is gradually reduced. As the band of glass emerges, it is cut, ground and polished. Much greater efficiency is claimed for this method over the usual one. It was found that whereas 30 per cent. of the output had, under the old system, to be rejected, under the new system this amount was reduced to from 5 to 10 per cent.

READING THROUGH METAL PLATES.—Mr. Edison's dream of the day when books shall be made of metal instead of paper is brought appreciably nearer by the researches of Dr. Carl Mueller, of the Charlottenburg Laboratory, Berlin, who has produced sheets of metal so thin that ordinary type can be read through them. The method of preparing these sheets is to electroplate the metal on the surface of a soluble substance, such as rocksalt, and then dissolve away the support. A ring of thicker metal can be used to support the films, of which 2,500,000 would have to be piled to make a stack an inch high. Such films have been made of iron, nickel, gold, silver, and platinum. Although the nickel is much less transparent to visible light than gold, it readily transmits the shorter ultra-violet rays. The films are very elastic, and will bulge out for as much as a tenth of their diameter without breaking. As these films are practically all surface, a strip of film containing no more metal than a round wire one-hundredth of a millimetre in diameter will carry enough current to light several lamps; if the same current were passed through the wire, the latter would be instantly melted. The use of these films is suggested for radio and phonograph reproducers.

RESISTANT STEEL.—M. Guillet, the famous metallurgist and director of the Geole Centrale, has continued his tests in connection with the "nitruration" of steel, and has announced a new process of treating the metal which, he claims, make it more resistant. This "acier-nitrure," as he calls it, had, he said, been tested in motor engines and aeroplanes, the cylinders being made partly of the usual metal and partly of the new steel. After doing 17,700 miles the ordinary metal in the motor engine showed 40 per cent. of wear, and the new steel only 2 per cent. After running for 100 hours, the cylinders of an aeroplane engine showed wear amounting to ·08 to ·1 per cent., whereas the "nitrurated" cylinders gave no evidence of wear at all. The consumption of oil was also less with the new steel.

REST PAUSES IN WORK.—Dr. Vernon has completed a study on hours of work for the Industrial Fatigue Research Board, dealing specially with the five-hour spell and the two-shift system. It is found that the adoption of a rest pause in the five-hour spell—with opportunity for refreshment—is desirable both for physiological and psychological reasons. The rest pause increases the efficiency of the workers, for in various occupations the immediate effect of a rest pause was to increase the output. There is, however, a number of semi-continuous occupations where the rest pause is not practicable because the loss of time is greater than the nominal rest pause. It is suggested that it might be possible for different groups to take their rest successively. In regard to the two-shift system neither seemed to show significant differences in any measurable standard, nor was there any difference in sickness. Where either system was in regular operation, workers seemed to adapt their habits and to be satisfied; a change over from one to the other was usually unpopular, and in some cases resulted in a high labour turn-over.

SAHARA TURNED INTO A SEA.—A gigantic engineering scheme is suggested by Dr. John Ball, of the Geological Survey of Egypt—no less than the creation of a vast inland sea, thousands of square miles in area, covering the northern part of the Libyan Desert. Investigations show that the area of this depression is about 4,500,000 acres, and that certain parts of it are as low as 450 feet below sea level. The idea is to construct a channel 200 miles long, and wide enough to accommodate ocean liners from the Mediterranean to the site of this "hole" into which water would be discharged from a height of 120 feet. Utilisation of the energy of this artificial waterfall would, it is claimed, provide electric power at ¾*d.* a kilowatt sufficient to electrify the railways and irrigation and drainage works, and lighting for Cairo, Alexandria and the whole of the Delta. Such a scheme is estimated to cost £25,000,000 and maintenance £1,000,000 a year.

ST. PAUL'S STEEL CHAIN.—The dome of St. Paul's Cathedral has been encircled by a chain of stainless steel in the course of work for the preservation of the Cathedral. The dome is supported on eight massive piers, which were constructed of poor material, and subject to a tendency to push them out of the vertical and allow the drum to spread in diameter. This tendency is accentuated by seasonal variations in temperature. The drum expands in hot weather, but, being constructed in masonry, and having no strength in tension, it does not contract by an equal amount in cold weather. It is to stop this progressive spreading of the drum that the stainless steel chain has been *placed in position at a point just below the* whispering gallery. The chain is designed like a bicycle chain. Its total length is 441 feet 3 inches, each bar being about 16 feet long, while the total weight is just under 30 tons.

SCIENTIFIC WORLD CRUISE.—The non-magnetic sailing ship *Carnegie*, of the Carnegie Institute, Washington, set out in May last on a scientific world cruise, which is intended to last 3½ years. The places to be visited, in order, are England, Germany, Iceland, the West Indies, Panama, the Society Islands, Easter Island, Peru, Japan, California, Honolulu, Samoa, New Zealand, Cape Horn, South Georgia, South Africa, Ceylon, India, Western Australia; across the South Pacific again and around the Horn to Buenos Ayres, Argentina, St. Helena, Azores, Madeira, and back to Washington. The first object of the cruise is to take magnetic observations, in order to determine the secular variation without which the magnetic charts used nowadays for aerial as well as ocean navigation, cannot be kept up-to-date. The programme of work also includes atmospheric electric observations, the investigation of radio-propagation, the investigation of the sedimentary deposits on the ocean bed, and the mapping of the sea bed by some depth-finders.

SINGAPORE FLOATING DOCK. The Singapore floating dock, built at the Wallsend shipyard of Messrs. Swan, Hunter, and Wigham Richardson, is one of the largest of its kind in the world. It is 855 feet long, 172 feet wide, with a lifting capacity of 50,000 tons, and contains over 20,000 tons of steel and 3,500,000 rivets. The pumping equipment, which is operated by electrically-driven motors and centrifugal pumps, is capable of dealing with 30,000 tons of water per hour. In the upper part of the dock wall there are seven pumps, three being capable of discharging 6,000 tons per hour each, two 4,000 tons each, and two 2,000 tons each. At one end of the dock there are swing bridges fitted to form gangways connecting the dock walls, on which there are eight electric capstans for warping vessels into or out of dock. There are three workshops, fitted with a wide range of tools and plant, enabling repairs to be carried out expeditiously. As the dock passed through the Suez Canal on its outward voyage there was only a few feet to spare on either side, and all other traffic had to be held up.

SLEEPING SICKNESS AND DULLNESS.—Dr. S. Dawson, in an address to the British Association on "Dullness and Disease," said that our powers of thinking were affected only temporarily by some forms of illness, but permanent effects were caused by alcohol, various drugs, fatigue, certain bodily injuries, and some diseases. Tests that had been made on children showed that diseases of the nervous system, limited to the spinal cord, apparently did not interfere with intellectual performances. The most striking of the after-effects of sleeping sickness was a change of character and emotional disposition. Children who were previously quite normal became quarrelsome, destructive, cruel, irritable, subject to fits of anger and rage. Some of them took to stealing, swearing and lying, sometimes of a very stupid kind. In some cases the after-effect was more obviously intellectual, normality giving place to feeblemindedness. The tests made confirmed the suggestion that sleeping sickness adversely affected the intelligence. His inquiries indicated that while in a few cases sleeping sickness seemed to leave no serious after-effects, yet it did on the whole arrest or retard mental development to such an extent that it appreciably reduced the intelligence of patients, the deterioration being greatest in young children.

STARFISH FISSION. After a long study of New Zealand starfishes Mr. E. W. Bennett supports the view that where the number of rays is more than five they are due to reproduction by transverse fission. Out of 153 specimens examined 132 were six rayed or potentially so, fission being indicated not only by the size and disposition of the rays, but also by the presence of a groove across the disc. After fission the new arms are grown almost invariably in threes, which would account for the preponderance of six-rayed individuals. In another species four new rays were produced after fission, and the characteristic number of arms in this species is eight.

TELESCOPES OF THE FUTURE.—Professor G. W. Ritchey, of Posadena, California, who had a considerable share in the making and mounting of the 100-inch reflector telescope at Mount Wilson, has devised a means for avoiding the great weight and the solid thick discs for reflectors which have hitherto been associated with big telescopes. He suggests that future optical mirrors should be made not of solid discs, but built up of glass plates; light cellular structures, cemented together and figured at high mountain sites, where they are intended to be employed. He hopes to make a reflecting telescope with a practically perfect mirror 50 feet in diameter, and expresses himself with confidence in regard to the realisation of his plans.

TELEVISION PROGRESS.—During the year Mr. J. L. Baird has made considerable advance towards perfection in his television apparatus. On February 9 he succeeded in sending from his laboratory the first glimmerings of images of persons in London to a room in New York. The transmission was by means of a telephone wire from London to the radio transmitter at Purley, and from there it was broadcast to New York. The pattern of a man's head moving was clearly seen, but it sometimes faded away, owing, it was thought, to interference from short-wave stations in Paris and Mexico City. On March 7 another sensational demonstration was arranged, when Mr. Brown, the chief wireless operator on the *Berengaria*, then 1,500 miles out at sea, was shown and recognised the image of his

fiancée, who sat before the transmitter in London. The apparatus was not affected by the vibration or rolling of the vessel. In July Mr Baird showed that television was possible in normal daylight, without any artificial lighting whatever. At the meeting of the British Association he gave a demonstration of his new colour television. The images of an assistant wearing a policeman's helmet and holding a bunch of flowers in his hand were transmitted from one room to another. Mr. Baird pointed out that the process is like three-colour printing or three-colour kinematography. Three images—green, blue, and red—are emitted at a speed of thirty images to the second, or three times the speed of normal television, and the eye blends the three colours into one, and thus gives the impression of natural colours.

TESTING DURABILITY OF TROUSERS.—A special machine has been devised for use by the American Bureau of Standards to test the durability of fabrics for boys' and men's trousers It is shown that if a certain cloth be used the wearer may sit down and get up again 97,000 times before patching will probably be necessary. To arrive at this prediction the cloth is wound on an oscillating drum and rubbed against another piece of the same cloth a certain number of times a minute. After every few thousand rubs its strength is tested on two machines, one ascertaining the pull it withstands before tearing, which is recorded on a dial, and the other ascertaining the resistiveness to bursting pressure. This latter discovery is made by clamping a piece of the cloth, at various stages of increasing wear, in a steel frame over a receptacle full of water, into which more water is forced through a pipe exerting a known pressure of pounds to the square inch. Some clothes, even after considerable wear, managed to resist a force of as much as 50 lb. to the square inch.

TIMBER GROWN READY COLOURED.—A successful experiment has been carried out in Germany in which the rising sap in growing timber has been used as the carrying agent of a dye Two inlets were provided, one consisting of a number of holes in the trunk about 4 feet above ground level, and the other of holes bored in some of the larger roots. These holes were connected by rubber tubing, a reservoir containing the dye suspended from a high branch. The amount of dye required to colour the tree depends on the size of the tree. A tree about 15 inches diameter at 3 feet above ground will absorb 70 to 100 gallons of dye solution, containing 6 lb. of dye, in 18 hours. The colour is said to be fast.

TORTOISES ON GALAPAGOS ISLANDS.—The New York Zoological Society sent out a mission, under the leadership of Dr. C. H. Townsend, to the Galapagos Islands, with the object of saving alive the remnant of the giant tortoises there. At one period the tortoises were innumerable, but thousands were carried off for food, and now they are extinct on all but two or three islands in the group. Dr. Townsend confirms the reports of recent visitors that the giant tortoises cannot long survive even there, as all the eggs and young are destroyed by wild dogs, pigs, cats, and rats. They are now confined to mountainous regions difficult of access to man. The only hope of keeping the stock alive was to establish it in conditions where its safety and continuance could be assured so far as human devices go. Accordingly, the expedition captured 180 live tortoises and placed breeding colonies of fifteen to thirty individuals at half-a-dozen stations in tropical and subtropical Central and North America, in the belief that breeding and successful rearing of young will take place. All the captured specimens have been numbered and weighed, and the experiment should yield valuable information as to rate of growth and age

WONDERFUL CLOCKS AT GREENWICH.—Mr. J. Jackson, of Greenwich Observatory, speaking at the British Association meeting, described the progress of craftsmanship in measuring time scientifically. Two clocks, the invention of Mr Shortt, which were installed at the Observatory in 1924 and 1926, had shown such remarkable accuracy that at Greenwich they looked forward to the time when these or similar clocks could be used to check the rotation of the earth and any small irregularity in the earth's rotation. Each clock consisted of a face pendulum of invar swinging in a vacuum and a slave clock The slave clock did all the work, including the release of the gravity lever which maintained the free pendulum, the free pendulum being interfered with for only part of a second every 30 seconds. The principal irregularities shown by both clocks were a temperature coefficient of three-thousandths of a second per day per one degree Fahrenheit and a gradual slowing down of the pendulum, attributed to a growth of the invar rod The difficulty of producing a still more accurate clock was that of producing a more stable material than invar.

X-RAYS FOR TREES.—Internal ailments of trees are now being diagnosed and studied by the help of X-ray photographs, which are found to disclose decay within a trunk which, to all outward appearance, is sound. The X-rays distinguish clearly between the sound wood and the decayed parts, they also show knots and cavities Even the type of decay which merely lessens the strength of the wood is shown. An X-ray picture of a thin section cut from the tree displays the character of the grain, worm holes, and even worms at work.

YELLOWSTONE PARK NEW GEYSER.—A new geyser began erupting in Yellowstone Park in August It is said to be the greatest now active in the world, and with the exception of Old Excelsior, extinct since 1888, the largest ever seen. It has an elliptical crater, measuring 120 ft by 100 ft, and about 8 ft. deep It hurls water to an average of 75 ft, with occasional spurts reaching to 100 ft. The outbursts occur at intervals of from 15 to 20 seconds, and continue regularly for three hours, when they come suddenly to an end The geyser is then quiet for nine hours, and the crater is dry except in a small fissure and for a few mud-springs. The eruptions of Old Excelsior lasted only half an hour, but they threw large masses of water from 100 to 200 ft in the air. So violent were the outbreaks that the geyser rapidly "erupted itself to death," and for forty years its pit has been occupied by a lake of hot seething water.

THE year can hardly be said to have produced any very outstanding literary feature, unless it be the completion of the "New English Dictionary," a great national possession, the magnificent outcome of seventy years of labour; the conclusion of which was celebrated by a festival dinner.

The popularity and the output of Fiction continue to grow; new books are snowed under within a few months by the constant avalanche of newer ones; and one is tempted to long for a moratorium which would give neglected classics a chance. Foreign literature, particularly from America and Germany, is increasingly reproduced here; and the success of works by Ludwig, Maurois, Bronsor, Hergesheimer, Feuchtwanger and others has been an outstanding feature of the year's production. Of the total number of new books and new editions published in the United Kingdom, Fiction (with 3,368 books issued in 1927) provides roughly one quarter, and the percentage is said to be increasing.

The celebration of the Centenaries of Rossetti, Ibsen, Meredith and Tolstoy naturally stimulated the demand for works of and about these authors.

The death of Thomas Hardy (Jan. 11) left a vacant chair at the head of the literary table to which, as yet, there is no acclaimed successor. Other losses from the ranks of literature include Sir Edmund Gosse, Barry Pain, R. C. Carton, Stanley Weyman, Richard Whiteing, Mary Webb, C. E. Montague, Robert Keable, Donne Byrne, William Le Queux, Charlotte Mew and Austin Harrison. The death of Mrs. Webb, a few days before the Prime Minister's high appreciation of one of her works, "Precious Bane," at the dinner of the Royal Literary Fund, disclosed the embarrassing fact that several of her books were out of print; a significant hiatus which Mr. Cape has expeditiously filled in "The Traveller's Library."

The purveyors of literature—the publishers, booksellers and circulating libraries—have been busily discussing during the year the problem of stimulating the purchase of their wares. "Buy more books" would appear to be a much needed slogan. Mr. W. B. Maxwell, responding for Literature at the Academy Dinner, spoke a little dubiously as to its health, before drinking to it. "We are not as yet a literary nation," he said. "We do not love literature as the Americans, we do not encourage it as the French, we do not believe in its immense power as the Germans, we do not take it to our hearts and homes as the Scandinavians. We talk about books a great deal more than we read them."

The exploration of the causes, and possible remedies, for this apathy—the relative existence of which is not seriously disputed—has taken various directions. As regards authorship, "The giants of Victorian Literature," said an eminent authority, "continue to await their successors." According to Dr. R. W. McKenna, speaking at the last Annual Dinner of the Associated Booksellers, in recent Biography there was "too much dirty linen stretched untidily on the clothes ropes in the back yard." The stream of promising song produced by the War had died down, and the poetry of to-day seemed very disappointing. But, he went on to say:

"The fiction of the day was one of the most interesting manifestations of the intellectual activity of this wonderful age. The young people of to-day and amongst the young he thought they had got to admit a great deal of intellectual force and a great deal of imagination—were finding in fiction a means for the expression of themselves. Their minds, curiously, were in a state of ferment; there was a kind of spiritual disquiet abroad among them. It was not exactly a spiritual quickening, because in a spiritual quickening there was always something directional, a movement towards an ideal. In that spiritual disquiet, or spiritual ferment that was at work among the young people of the day, he did not think there was anything idealistic at all. As a matter of fact it seemed to him the young mind was groping after something, hungering to attain something it would never succeed in capturing because it was not yet certain what it desired. But it was when the waters were troubled that the miracle happened, and he was confident that they were on the brink of a great literary renaissance, and that that renaissance would come through the channel of fiction."

With this partially encouraging forecast it may be well to recall, in contrast, the view expressed by a relative of Thomas Hardy's, at his death, that "he would have done better to stick to architecture, as writing wasn't a respectable way of getting a living."

Passing from authorship to publication, Sir Ernest Benn has informed us that of "12,000 books published annually, two out of three are failures."

In the search for reasons and remedies, expert discussion during the past year has dealt exhaustively, amongst other subjects, with (1) the principles and methods of publisher's advertising, (2) the education of booksellers, (3) the issue of "Readers' Guides" and "Book Lists," (4) the competition of the daily and periodic press, (5) Municipal book trading, and (6) the influence of the circulating library on the book market. This last question raises difficult problems, for whilst admittedly libraries must exist and many books must be read which there is no desire to possess permanently, it is not satisfactory that we should have the name of "a nation of book-borrowers." The Libraries, it was stated, buy from 75 to 90 per cent. of the books that are published, and of these purchases about 80 per cent. are fiction. Mudie's List, by the way, succinctly catalogues Biography, History, Travel, Belles Lettres, etc., as "Non-Fiction," which is at least simple and comprehensive! The booksellers' chances are further handicapped by the large number of second-hand copies marketed by the leading libraries at reduced prices within a few months of publication.

On the other hand the stimulating developments of the commercial side of book production have not unnaturally evoked protests from critics zealous in upholding the status of Literature as the highest of the Arts. Sir Edmund Gosse put on record that he had been strongly tempted to decline the review of a recent volume because of the fulsome appreciation on the publishers' "jacket"; and Mr. Birrell bewailed last summer that "The Book Mart is becoming as noisy as the Stock Exchange. Rival publishers puff their special goods and parade their kept authors with a persistence that would attract notice in the soap business, and employ for these purposes trade circulars, illustrated catalogues,

garrulous travellers and all the artifices of the road"; whilst Mr. George Moore has also just recently uttered a characteristic lament that forests should fail to provide paper pulp for the printing of "all the trash written to-day."

The inadequate representation of Great Britain at the Rome Copyright Conference (at which neither the Publishers Association nor the Society of Authors were directly represented), was the subject of much adverse criticism, as was also the very limited British participation in the Florence Book Fair.

The difficult subject of literary censorship and taboo has been raised once again this year by the Irish Free State Bill to establish a Censorship of Publications, and by the withdrawal of a recently published novel within a few weeks of its issue, following upon a sustained attack in a daily paper. The whole question bristles with incongruities, puzzles and absurdities, which have been sensibly and ably discussed by Mr. Desmond MacCarthy in the October number of "Life and Letters," a new literary monthly of which he is Editor.

If a mere layman should venture to sum up the features of a not very remarkable literary year, he might be tempted to say that the hard thinking had been done as much by the purveyors as the makers of literature. The former have been occupied this year in a systematic and sustained effort to increase the number of readers and buyers of books, taking to heart the confession of the late Chairman of the Society of Authors that we are not as yet a literary nation. Co-operation rather than individualism has been the keynote. Authors and Publishers have met through the Councils of their Societies. Publishers and Booksellers have united in a common Trade organ, published under the title of "The Publisher and Bookseller"; all three have joined in support of the National Book Council and its new venture of the Readers' Guides. Book reading has doubtless to some extent been affected by the development of the cinema, of wireless broadcasting, of motoring; by the fine summer; and especially by the all-embracing "octopus of the daily press." On the other hand Professor Grierson, speaking at the Edinburgh Conference of Booksellers last June, said that drama had revived remarkably, poetry had at least taken on a new movement, the novel was going strong, and biography had become a vigorous branch of literary art. These are encouraging words. At the sordid bottom of the whole question of literary progress lies the question of finance. Dr. Johnson thought a man a fool who wrote for anything but money; and conversely the majority of Englishmen seem to think they would be fools to buy books when they can either borrow them or get along without them. Books are "too expensive," and the sum which is not grudged for a dinner or a theatre stall is extracted hardly for the best of books. The Home Secretary cannot afford to buy Mr. Bernard Shaw's "Guide to Socialism"; the Prime Minister eulogises a little master-piece by an author whose work is then discovered to be out of print for lack of buyers.

The mere multiplicity of books is apt to stagger the man in the street who may have been encouraged by a tempting window display to enter a well-stocked book-shop. Guidance is wanted, but that of the bookseller's assistant is (though often erroneously) apt to be suspect. Nor are distinguished authors always the safest critics, though in Forewords and popular newspapers they are assuming the rôle with gusto. We recall that George Meredith as Reader for Chapman and Hall, declined "The Way of All Flesh," and twice rejected "East Lynne"; and we distrust the counsel of the bookseller who refers in his catalogue to Joseph Conrad's work as "piffle."

Yet the ordinary reader, without whom, after all, literature could hardly exist, is, on the evidence of the Libraries, reading more, and reading better books, even if he is not buying them. The younger generation, who must matter most since they hold life in their laps, seem to be searching (apart from the amusement and diversion of the "thrillers"), dubiously perhaps, yet persistently, in the lives and letters of leaders, in the records of adventurers, above all, in the living presentations of the story-writers, searching for some philosophy of life which might help to replace threadbare shibboleths and discarded dogma. Galsworthy's plays and novels appeal to the questioning mood, and "Swan Song," the final volume of "The Forsyte Saga," and Barton's "What can a Man Believe?" have figured consistently amongst the best sellers of the year.

The selection of books for mention in the following categories cannot, of course, claim either finality or completeness. Popularity, as evinced by the publishers' reissues and the booksellers' sale reports, cannot be the sole criterion. Poor books by established authors sell better than good ones from unknown sources. Critics are seldom omniscient, and not always unbiassed. Personal predilections will out, and the diversity of the reviewers' estimates has been, in several instances, very remarkable. With an annual output running into five figures it is humanly inevitable that, in a brief summary such as this, many excellent productions should escape notice. The period covered is from October 1927 to September 1928.

ART.

The following may be mentioned under this heading:—"A. J. Munnings, R.A.," by Lionel Lindsay; "Old English Furniture," by R. W. Symonds, and "The Walnut Collector," by MacIver Percival; "The Art of Pen Drawing," by Montague Ellwood; A. L. N. Russell's "Architecture"; "Old English Porcelain," by W. B. Honey; the new Grove's "Dictionary of Music," edited by H. C. Colles, the volumes appearing in steady succession; "London's Open Air Statuary," by Lord Edward Gleichen; R. Hobson's sumptuous six-volume "Catalogue of the Eumorfopoulos Collection of Chinese Pottery and Porcelain"; "Blake's Engravings," by Laurence Binyon, and "Blake's Paintings and Drawings," by Darrell Figgis; "Walton's Compleat Angler," illustrated by Eric Daglish. The Studio and The Medici Society have continued their interesting issues of Art Monographs, Books for Collectors and Picture Guides. Signor Venturi's "Michelangelo," translated by Joan Redfern, has been published with nearly 300 collotype reproductions of his work in sculpture, painting and architecture. Campbell Dodgson introduced Douglas Bliss's well-illustrated "History of Wood-Engraving"; Batsford have issued a valuable series of illustrated Histories of Architecture, English, Greek, Roman, Italian and French.

The exhibitions of 1928 at the Grafton Galleries and at Olympia stimulated interest in furniture, porcelain and antiques generally, and in the latest books on these subjects.

BIOGRAPHY.

Amongst the notable biographies of the period were the second volume of Sir Sidney Lee's Life of Edward VII, Lord Napier's of Magdala, by the Hon H D Napier, E. Maxtone Graham's "The Beautiful Mrs. Graham, and her clear perfection as child, sister, friend and wife", Sir Charles Callwell's "Life and Diaries of Field Marshal Sir Henry Wilson", Robert Graves' "Lawrence and the Arabs," which provides a sort of popular version of "The Revolt in the Desert"; J. G McDonald's "Rhodes," illuminated by personal memories of his friend; Lloyd Morris' "The Rebellious Puritan, Portrait of Mr. Hawthorne"; "The Portrait of Sir John Soane," by the curator of his museum, Arthur Bolton Burdett's "W. E Gladstone"; G K. Chesterton's "Study of R. L. Stevenson"; Ralph Straus' "The Unspeakable Curll", Hugh Fausset's "Tolstoy"; James A Williamson's "Sir John Hawkins: The Time and the Man"; Colonel Cornwallis West's "Life and Letters of Admiral Cornwallis"; Emil Ludwig's "Bismarck"; Hamish Miles' translation of M. Maurois's "Disraeli,"; "The Petty Papers," edited by Lord Lansdowne; Miss Isabel Clarke's "Haworth Parsonage" and "The Two Supreme Women of English Literature"; Sir Herbert Barker's "Leaves from my Life"; Keble Howard's delightfully lively "My Motley Life"; Miss D. M Stuart's excellent "Horace Walpole" in the English Men of Letters series; Mr. Buckle's third volume (second series) of "Queen Victoria's Letters"; "Josephine Butler," whom Dame Millicent Fawcett proclaims the most distinguished Englishwoman of the 19th century; Miss Ivis Barry's "Portrait of Lady Mary Wortley Montagu"; Mr. Howe's life of "William Byrd", Mr. Waldman's study of that fascinating paradox, "Sir Walter Raleigh"; Robert Lynd's dexterous "Dr. Johnson and Company"; Lord Ronaldshay's "Life of Lord Curzon" (Vol. I.); "Stalky's Reminiscences," by General Dunsterville; Sorley Brown's passionate and tragic "Life of T. W. Crosland," Hilaire Belloc's brilliant "James the Second", M. Jean Aubry's "Life and Letters of Joseph Conrad"; Count Corti's "Rise of the House of Rothschild"; Miss Evelyn Waugh's "Rossetti"; Isadora Duncan's outspoken "My Life"; "The First Lady Wharncliffe and her Family," by her Grandchildren, two further volumes of George III.'s correspondence, edited by Sir John Fortescue; Henry Bradley's Collected Papers, edited by Dr. Bridges; Hugh Walpole's "Anthony Trollope"; Percy Lubbock's intimate little sketch of "Mary Cholmondeley"; the second volume of Lord Ronaldshay's "Life of Lord Curzon"; Miss Drew's admirably balanced "Jane Welsh and Jane Carlyle," and Norwood Young's severely and, at times, unfairly critical "Carlyle, His Rise and Fall", Miss Rowen Wilson's deeply sincere "All Alone, the Life and Private History of Emily Jane Bronte"; Mr. Whitridge's "Dr. Arnold of Rugby"; the "Letters from Conrad to Mr. Garnett"; "Lenin," by Valerie Marcu; Professor Terry's "J. S. Bach"; Lord Oxford's "Memories and Reflections"; J. Sykes' moving and humorous "Mary Anne Disraeli"; John Buchan's tragic "Montrose", Sir Hall Caine's "Recollections of Rossetti," and Philip Guedalla's wives of great men in "Bonnet and Shawl."

The new volume of the "Dictionary of National Biography" (1912 1921) was issued by the Oxford University Press in November, 1927. Reference hunters for recent notabilities may be reminded that the awkward gap which will increase considerably before the next supplement is, to some extent, filled by Black's "Who was Who?"

The interest in Biography seems certainly on the increase, and the books on Napoleon, Disraeli, Bismarck, Trollope, Curzon and the Carlyles have been amongst those most discussed during the year.

FICTION.

Amongst the more successful and discussed novels of the year were Feuchtwanger's "The Ugly Duchess," for which the achievement of "Jew Suss" had raised high, but, perhaps, hardly fulfilled expectations; Thornton Wilder's widely popular "Bridge of San Luis Rey"; Mrs. Kathleen Coyle's quiet and restrained "It is better to Tell", Miss E. B. C. Jones's "Helen and Felicia"; A. T. Sheppard's distinguished "Here Comes an Old Sailor"; Wyndham Lewis's subtle and original "The Wild Body"; Philip Macdonald's powerful "Patrol", Louis Goldings's finely achieved "Miracle Boy"; Conal O Riordan's "Soldier Born", Mrs. Rosalind Lehmann's very promising first novel, "Dusty Answer"; C. E Montague's "Right Off the Map", R H Mottram's "Our Mr. Dormer"; Martin Armstrong's fine "The Stepson", E. Thompson's compelling war novel "These Men, Thy Friends"; Herbert Asquith's "Young Orland"; Miss Myrtle Johnston's "Hangman Johnny," another remarkable first story by an Irish girl of eighteen; Temple Thurston's arduous, but successful, "Jane Carroll"; Julian Green's very promising "Avarice House"; "The Earthen Lob," by Bradda Field, reviewed by a competent critic as "far and away the most remarkable first novel I have read"; Sheila Kaye Smith's Yorkshire-Sussex story "Iron and Smoke"; E. M. Forster's exquisite (and, alas, final) short stories, "The Eternal Moment"; Gilbert Frankau's "So Much Good"; G. F. Bradley's delightfully irresponsible "Mrs. D.", Ernest Pascal's thoughtful problem story, "The Marriage Bed"; Hugh Walpole's Thackerayan "Wintersmoon"; Mr. Farrel's promising "Young Entry"; Miss Rose Macaulay's cynically sparkling "Keeping Up Appearances"; "The Book of Catherine Wells" (her short stories, and a memoir by H. G. Wells, her husband); D. H. Lawrence's short stories "The Woman Who Rode Away"; Miss Brearly's "A Good Marriage"; Miss Storm Jameson's emotional "Farewell to Youth"; Mr. Le Gros's "Appartica"; Mr Mottram's "The English Miss"; Booth Tarkington's "Claire Ambler"; John Galsworthy's finale to the Forsyte Saga, "Swan Song"; Mr. McKay's sincere negro story, "Home to Harlem"; Mr. Maxwell's good racing novel, "Luck's Pendulum"; M. Rancat's amusing "Honourable Picnic" of Japan to-day; Mr. McKenna's "The Shadow of Guy Denver"; John Presland's (Mrs. Skelton) "Escape Me Never"; Conal O'Riordan's brilliantly compelling "Soldier of Waterloo."

Amongst the output of established favourites and "best sellers," Edgar Wallace's prolific

pen holds pride of place, and other successful creations included Mary Borden's "Flamingo", Robert Hitchen's lurid "The Bacchante and the Nun"; John Masefield's "The Midnight Folk"; Margaret Kennedy's "Red Sky at Morning"; Hugh Walpole's "Jeremy at Crale"; Sir Philip Gibbs's "The Age of Reason", Willa Cather's quietly gracious "Death Comes to the Archbishop"; "Wheat Darkness," by H D Lowry and Mrs. Dawson Scott: Miss Viola Meynell's lovely, if a little irritating, "A Girl Adoring" Henry Williamson's brave tale, bravely told, "Tarka, the Otter"; Phyllis Bottome's brightly versatile "Wild Grapes"; Mr O'Leary's "This Delicate Creature"; H. G. Wells's fantastic "Mr. Blettsworthy on Rampole Island", Norman Douglas's new mythology, "In the Beginning"; J. Hergesheimer's American sketches in "Quiet Cities"; Aldous Huxley's picture of human perversity, "Point Counterpoint", Miss Royde-Smith's unusual murder story, "John Fanning's Legacy"; Godfrey Elton's somewhat sentimental, but sometimes humorous, "Against the Sun"; John Ferguson's mystery novel, "The Man in the Dark"; and George Preedy's clever historical romance, "General Crack."

Novels are still being poured out at the rate of about a dozen a day, yet it may be asserted with some confidence that the standard of quality is improving, and that the percentage of good and readable stories is higher than it was a generation ago. If the last works of the established favourites have not, on the whole, equalled their best, several new comers have won their spurs with brilliant promise.

Though the present summary does not, as a rule, include reprints, mention must be made of the revived interest in Dickens indicated by the new edition of Forster's life, and Ralph Straus's interesting biography. Thackeray and Dickens (whose names are coupled with no more particular aptitude than those of Mr. Wells and Mr. Arnold Bennett) have attained the sphere of fetishism or iconoclasm; their faithful disciples barely keep "this side idolatry," whilst infidels and heretics dare to express their boredom openly The pendulum must swing, and Mr. Shaw Desmond has recently expressed his belief that the future of the novel lies with the realist and the fantasist; that we shall think less about structure, technique and the science of the artificer, more of the purpose, the passion and accomplishment of the artist.

HISTORY.

The Oxford University gave us Professor Morison's admirable "Oxford History of the United States," and the Cambridge Press L. M Sear's valuable "Jefferson and the Embargo"; "Israel among the Nations" by N. H. Baynes, has been warmly commended; and amongst other valuable historical contributions must be noted Sir Arnold Wilson's "The Persian Gulf"; Mrs. Harrison's "Asia Reborn"; E. E. Cumming's remarkable chronicle of a French War Suspect Prison, "The Enormous Room"; Major Newman's up-to-date "Great Britain in Egypt"; Lord Ilchester's "Correspondence of Catherine the Great"; the third volume of Hilaire Belloc's freshly unorthodox "History of England"; the "Journal of the Waterloo Campaign" by General Mercer; "The Connaught Rangers" by Lieut.-Col. H F. N. Jourdain and E Fraser; and Sir Walter Lawrence's "The India we Served."

LITERARY ESSAYS, ETC.

Amongst volumes of interest under this heading may be mentioned Lord Esher's "Cloud-capp'd Towers," a collection of Victorian sketches, John Galsworthy's philosophy of life in "Castles in Spain", Philip Guedalla's impressions of America in "Conquistador"; Mrs. Dowdall's witty "Questionable Antics", Aldous Huxley's serious "Proper Studies", "The Goldfish," another series of Robert Lynd's always humorous essays, Stanley Baldwin's "Our Inheritance", Dame Ethel Smyth's invigorating vitality in "The Final Burning of the Boats", R Haldane's Essays, "Possible Worlds," mentioned under Philosophy, Kellett's bold "Reconsiderations"; Middleton Murry's new collection of essays, "Things to Come", Miss Rebecca West's trenchant essays, "The Strange Necessity", Dr. Bridge's "Collected Essays, Papers," &c.; Rudyard Kipling's collected speeches, "Book of Words", Arnold Lunn's sincere yet reserved, religious yet cynical, reverent but most humorous, "Things that have puzzled me", E M. Forster's Clark lectures, "Aspects of the Novel", J. Spender's controversial articles on "Life, Journalism and Politics", and the Prime Minister's "Presidential Address to the English Association, Oct. 28, 1927." Mention can hardly be omitted of the issue, in sixteen volumes, of "The Complete Works of Walter Savage Landor," classical enthusiast and author of "Imaginary Conversations"; and Mrs. Virginia Woolf's very delightful fantasy "Orlando," must just be included as a bonne-bouche at the close of the year under review.

If there is nothing epoch making, there is certainly abundance of very good reading in the essays under this heading, and a plentiful stimulus to hard thinking

MISCELLANEOUS.

"The Ladies' Pocket Book of Etiquette" by A. F (1838) is irresistibly delightful. Viscount Grey's "The Charm of Birds," received the warm welcome accorded to all his open-air books. The volumes of "The Famous Trial" series, edited by George Dilnot, have provided fascinating interest to many beside the criminologists, Dr. Edward Thompson has given a terrible picture of "Suttee" in India; R. D.'s amusing limericks to old woodcuts in "Less Eminent Victorians," provoked many laughs. Thomas Burke's collected pen-pictures, "The Book of the Inn," was a happy thought.

POETRY AND DRAMA.

A. A. Milne gave us more of Christopher Robin in "Now We are Six"; W. H. Davies contributed "A Poet's Calendar," as well as a novel "Dancing Mad"; Brett-Smith and C E Jones edited the Hallford Edition of Peacock's Works; Force Stead gave us of his best in "Festival in Tuscany"; W. B Yeats's lonely genius finds characteristic and self-revealing expression in "The Tower"; St. John Ervine issued "Four One Act Plays"; "Winter Words," Thomas Hardy's last poems contained much of undimmed lustre and character. Other notable issues were O. Sitwell's "England Reclaimed"; Miss Ruth Sander's moving long poem "The City"; Humbert Wolfe's "This Blind Rose"; Percy Ripley's wistful yet refreshing verse in "White Harvest"; Wallace Nichols's masterly "Prometheus in Piccadilly";

Eugene O'Neill's stupendous drama "Marco Millions"; Siegfried Sassoon's "The Heart's Journey"; Poems by Sir Ronald Ross, the eminent scientist, Harold Monro's "The Earth for Sale", and Edmund Blunden's "Retreat."

The issue of Sir William Watson's "Selected Poems" has emphasized, by contrast, the transitional stage of contemporary poetry; and its publication evoked a welcome and much needed tribute from Wallace Nichols, who showed that with him tradition was not stagnant but inspiring and evolutionary; and that "the magic, passion, beauty, great limpidity, and a quality that perhaps may be termed Englishness" of his lyrics, place him "at the head of the English poets living to-day." It is difficult to forecast the outcome in poetry of the present mood of troublous transition, but its growing-pains at least indicate vitality; yet the note of "modernism" is nowhere more plangent than in some of the later verse of the veteran Thomas Hardy.

POLITICS.

The Mexican part of H. L. Wilson's "Diplomatic Episodes in Mexico, Belgium and Chile," is of considerable historical interest; Dr. Jacks issued his Glasgow Stevenson Lectures in "Constructive Citizenship"; Professor de Ruggiero gave us the English translation of his "History of European Liberalism"; Lord Sydenham collected his essays on War, India and Socialism in "Studies of an Imperialist." Other notable contributions under this head include Miss Headlam-Morley's "New Democratic Constitutions of Europe"; A. Zimmern's admirable "Learning and Leadership"; Prince Lichnowsky's "Heading for the Abyss"; Lord Beaverbrook's "Politicians and the War"; and Lord Birkenhead's "Law, Life and Letters." The last name suggests comment on the increasing literary activities of statesmen and Cabinet Ministers; and it is hoped that the close of another year may see the publication of Lord Balfour's Memoirs, which should prove of immense interest.

RELIGION AND THEOLOGY.

To the "What I Believe" series Miss Royden contributed "I Believe in God', Father Ronald Knox "The Belief of Catholics," and Professor Julian Huxley "Religion without Revelation." Miss Evelyn Underhill's "Man and the Supernatural" was an impressive statement of faith in the supernatural; Rev. H. R. L. Sheppard's "The Impatience of a Parson" won a sympathetic hearing; Professor Cadbury discussed the problems of Lucan personality in "The Making of Luke-Acts"; Dr. Kidd continued Orthodox Church History in "The Churches of Eastern Christendom"; the Bishop of Birmingham expounded the elements of his criticised doctrine in "Should such a Faith Offend?"; Dr. Inge presented in "The Church in the World" collected essays of the deepest interest; Ludwig's "Son of Man" appeared in English; Dr. Gore in "Christ and Society" called again for a spiritual revolution; Dr. Percy Dearmer's collection of "Affirmations" testified the convictions of interesting people on various subjects. The Dean of St. Paul's has probably been the most widely read clerical writer of the year. The fight over Prayer Book Revision led to vigorous controversy, lay and professional, and the questions and their answers as to the limits of belief to day raised very wide-spread and anxious interest.

SCIENCE, ECONOMICS, PHILOSOPHY, ARCHÆOLOGY.

Sir A. Mond contributed expert criticism in "Industry and Politics," and Bertrand Russell, a brief "Outline of Philosophy." Professor W. McDougall gave us a wise and understanding "Character and the Conduct of Life"; the Clarendon Press issued Messrs. Dickinson and Rhys Jenkin's "James Watt and the Steam Engine." Amongst other notable contributions of the year under these heads were Professor J. B. S. Haldane's vivid and amusing "Possible Worlds and Other Essays"; F. H. Knight's translation of Max Weber's "General Economic History"; Edmund Selous "Realities of Bird Life," with an introduction by Professor Julian Huxley; George Santayana's radiant philosophy in "The Realm of Essence"; Dr. MacTaggart's posthumous "Nature of Existence"; M. Londres' clear picture of the White Slave Traffic in "The Road to Buenos Ayres"; G. Bernard Shaw's Important exegesis of Faith, "Intelligent Woman's Guide to Socialism and Capitalism"; Sir James Jean's "Astronomy and Cosmogony"; Dr. Thouless's handbook of Applied Psychology, "The Control of the Mind"; Dr. MacCurdy's suggestive treatise "Common Principles in Psychology and Physiology"; Sir Philip Gibbs's pessimistic outlook in "The Day after To-morrow"; Mr. J. Reid Moir's excellent record of fine amateur archæological work in "The Antiquity of Man in East Anglia"; and Dr. Herbert Norman's comprehensive treatise on "Mental Disorders."

Interest in Psychology and cognate research continues to increase with the ordinary reader, who is impressed by the evolution of scientific thought from the barren agnosticism of earlier years. Men want to believe more, if Science will allow them, as, among other testimony, Sir Oliver Lodge's eager following indicates.

TOPOGRAPHY, TRAVEL AND SPORT.

The following may be recalled amongst books of travel of the year: Dr. Halford Ross's entertaining "By Devious Ways," the chronicle of of a roundabout journey to Assam; William Mordon's interesting adventure "Across Asia's Snows and Deserts," and Horace Bleackley's "Tour in Southern Asia"; Norman Hall's vivid Polynesian picture "Under the South," with which may be mentioned Bohun Lynch's "Isles of Illusion," letters from the South Seas; Zane Grey's "Tales of Sword Fish and Tuna"; Charles Simpson's foxhunting book "Trencher and Kennel"; "The Kiwai Papuans," by C. Landtman; "York Minster Historical Tracts, 627–1927," by A. H. Thompson, which marks the completion of the thirteenth centenary celebrated last year; "Wanderings in Medieval London," by Charles Pendrill, and Ralph Nevill's "Romantic London"; "Green Memories," the delightful reminiscences of Bernard Darwin, whose golf papers in "The Times" are enjoyed by many a non-golfer – a rare tribute to a chronicler of sport; "The Gurkhas," by Major Northey, and Captain Morris gives an admirable and well illustrated account of Nepal, its features and people.

AT the winter exhibition of the Royal Academy, which was opened in January, representative works by seven deceased members of the institution were shown, Sir Luke Fildes, Mark Fisher, Ambrose McEvoy, J. W. North, F. Cayley Robinson, Sir James Shannon and Solomon J. Solomon. But the principle feature of the exhibition was the collection of Old Masters formed by the first Lord Iveagh and bequeathed by him to the nation. The Iveagh pictures, sixty in number, were hung in the Third Gallery and the Central Hall. They comprised fine canvases by some of the English masters of the eighteenth and nineteenth centuries, including Sir Joshua Reynolds, Gainsborough, Romney, Hoppner, Turner, Sir Thomas Lawrence, Sir Henry Raeburn, Crome and Morland; a superb self-portrait by Rembrandt, a beautiful Vermeer, and examples of Cuyp, Frank Hals, Boucher, Guardi, Rubens, Ostade, Vandyck, Wynants and Boucher. Taken altogether the Iveagh bequest of pictures is the finest that the nation has ever received and its value in money is enormous. The pictures attracted crowds to Burlington House during the two months they were on view and have since been seen by thousands at Kenwood, the late Lord Iveagh's beautiful house at Hampstead which is to be their permanent resting place.

Nearly eleven thousand works were submitted for exhibition by non-members of the Royal Academy. The members of the Selecting Committee by whom they were judged were the President, Sir Frank Dicksee; Sir Frank Short, Mr. Arnesby Brown, Mr. Alfred Drury, Sir E. L. Lutyens, Sir H. Hughes-Stanton, Mr. George Henry, Mr. Russell Flint, Mr Charles S. Jagger and Mr. Walter Tapper. The Committee of Arrangement for oil paintings was composed of Mr. Oliver Hall, Mr George Henry, Mr. Arnesby Brown and Sir H. Hughes-Stanton. Sir Frank Short and Mr. Oliver Hall arranged the water-colours, works in black and white, and miniatures; Sir E. L. Lutyens the architecture and Mr. Alfred Drury the sculpture.

Nothing was bought for the Chantrey Collection. The following are the principal works that found purchasers during the three months the exhibition remained open:—"The Black Cap, or the Passing of His Lordship," by Sir William Orpen (£2,100); "November Morning," by Sir George Clausen (£262 10s.); "The Head of St. John the Baptist," by Mr. Charles Ricketts (£400); "The Valley," by Mr. Arnesby Brown (£325); "A River Bed in the South of France," by Adrian Stokes (£200); "Ebony, Ivory, Crimson and Gold," by Mr. Louis Ginnett (£120); "The Path along the Stream," by Mr. Stanhope Forbes (£105); "The Nurse," by Mr. L. Campbell Taylor (£375); "Opal Sea, near Bude, Cornwall," by Mr. Julius Olsson (£110); "Summer Storm," by Mr. Arnesby Brown (£250); "Woods at Cagnes, France," by Sir H. Hughes-Stanton (£200); "In Wales," by Mr. Hal Ludlow (£100); "The Road to the Sea," by Mr. T. Harrison Miller (£105); "Looking on the Cagnes, A.M., France," by Sir Hughes Stanton (£350); "Autumn in the South of France, Haute Alpes," by Mr. Adrian Stokes (£300); "Marazion Beach," by Mr. Stanhope Forbes (£105); "Sanctuary," by Mr. Tom Mostyn (£100); "A Dorset Landscape," by Mr. Algernon Newton (£120); "The Lagoon," by Mr. Sydney Lee (£150); "Sleep: a Study," by Mr. W. G. de Glehn (£100); "Sea Harvest, Jersey," by Mr. Julius Olsson (£120); "The Snow Leopard," by Mr. J. Charles Dollman (£105); "The Old Vine Inn, Weston Turville," by Mr. Alexander Jamieson (£250); "Silent Watchers," by Mr. Arthur Warille (£257 10s.); "Santa Maria della Salute," by Mr. Terrick Williams (£100); "Le Jongleur de Notre Dame," by Mr. Glyn Philpot (£400); "A Venetian Balcony," by Mr. Stanhope Forbes (£105); "Planning the New Expedition," by Mr. Arthur D. McCormick (£150); "Quiet Room," by Sir George Clausen (£157 10s.); "The Sunlit Drawing Room," by Mr. L. Campbell Taylor (£125); "Santa Maria della Salute," by Mr. Stanhope Forbes (£126), "A Garden of Olives," by Mrs. A. L. Swynnerton (£105); "Autumn," by Mr Joseph Farquharson (£250); "A Bridge on the Brent," by Mr. R. Vicat Cole (£200); "Dutch Tea Party," by Mr. Gemmell Hutchison (£170); "Siesta," by Mr. Harold Harvey (£100); "Silver-grey," by Mr. W Russell Flint (£150); and five pictures by Mr. Charles Sims at £300 each: "Behold I have graven thee on the palm of my Hand," "My pain beneath your sheltering Hand," "The Rebel Powers that thee array," "Man's Last Pretence," and "I am the Abyss and I am Light."

The twenty-fifth anniversary of that excellent association, the National Art Collections Fund, was celebrated by an exhibition at the Victoria and Albert Museum of most of the pictures and other works of art that have been added to our galleries and museums through the instrumentality of the Fund. All the finest works acquired through the Fund were included in the exhibition, including Holbein's "Christina of Denmark"; the "Venus and Cupid," by Velasquez, and "The Adoration of the Kings," by Mabuse, which cost, respectively, £72,000, £45,000 and £40,000. Another exhibition at the Museum, held in the autumn, was organised to celebrate the bi-centenary of the birth of Bartolozzi and included many fine examples of his work as an engraver. At the National Gallery the principal event of the year was the opening of the new gallery built to contain the collection of pictures, chiefly Italian, that was bequeathed to the nation by Mr. Ludwig Mond and was acquired on the death of Mr. Mond in 1924. A large and important exhibition of works of art of all kinds was held in July at Olympia, by the proprietors of the *Daily Telegraph*. The pictures, though not numerous, were all excellent of their particular kinds, and included the famous diptych from Wilton House, six hundred years old but as clear and brilliant in colour as if painted yesterday. A notable work at this exhibition was Raeburn's full length of a Highland chieftain, "The McNab." Another interesting exhibition of a similar kind was held by the British Antique Dealers' Association, at the Grafton Galleries, and in connection with it several pieces of rare furniture were presented to the Victoria and Albert Museum. These included an Adam side-table from Mr. M. Harris, a William and Mary chair from Mr. Francis Mallett, and a gilt mirror of about 1730 from the members of the Association collectively. An exhibition of Spanish art, in which the work of Goya was largely represented, was held by the Burlington Fine Arts Club.

The Gainsborough Exhibition, held by Messrs. Agnew in Old Bond Street, contained the finest collection of this master's work that has been seen since the exhibition at the Grosvenor Gallery in 1885. The King lent several canvases

of interest and charm, and a masterpiece, new to the present generation, was the superb full-length of Gainsborough's two daughters, which had not been seen in London for more than forty years. Some fine sporting pictures by Stubbs and others were shown at an exhibition held by Messrs Knoedler. The Fine Art Society showed a collection of portrait miniatures in oil by various artists, collected during many years by Mr. Talbot Hughes; sculpture by M. Aristide Maillol was exhibited in October at the Goupil Gallery in Regent Street; and at Norwich, in the summer, a collection of work was on view by Mr. A. J. Munnings, R.A., a painter of Norfolk birth.

Although high prices were paid for works of art at auction sales, they were outshone by the purchase, privately, of a "Madonna," by Raphael for £150,000. The picture was the property of Lady Desborough, and was sold by her to Sir Joseph Duveen, who, earlier in the year, had cut the record for the auction price of a landscape by bidding £72,000 for one of the versions of Gainsborough's "Harvest Waggon." This, however, was in New York, at the Gary Sale. In London, the great event in the auction room was the dispersal, by Messrs. Christie, of the final portion of the Holford Collection, which realized more than £400,000. Four Rembrandts, "A Man holding the Torah," "The Young Man with the Cleft Chin," the "Lady with Handkerchief," and the portrait of Martin Looten, were knocked down respectively for £50,400, £46,200, £32,500, and £27,300. For a portrait, drawn on vellum by Rembrandt £10,500 was paid; for Vandyck's portrait of the Abbe Scaglia, £32,500, and for Cuyp's "Dordrecht," £22,000. No English pictures fetched very great prices in the Holford Sale, but a Wilson, "The River Dee," was bid up to £4,305. A portrait of Lord Castlereagh, by Lawrence, was sold for £4,410.

What is said to be a record price for a carpet auction was paid at Christie's in July. It was a sixteenth century carpet, and the last bid was one of £23,100. Another record was the sale of Wheatley's series of pictures, "Maidenhood," "Courtship," "Marriage," and "Married Life," for £8,505. A gold snuffbox, one of the famous Hawkins collection, was sold for £1,312 10s. At Sotheby's a family group by Zoffany fetched £5,000; and the famous sixteenth century windows from the chapel at Ashridge, £27,000. The purchaser, whose name was not disclosed, afterwards presented the windows to the Victoria and Albert Museum. In October another generous benefactor to the State Museums, Sir Joseph Duveen, offered to build at his own expense the long wanted extension to the National Portrait Gallery, to carry out urgent reconstruction at the Tate Gallery, and to provide a proper setting for the Elgin Marbles at the British Museum.

THE YEAR'S MUSIC.

OPERA.

THE Covent Garden Season, like so many of its predecessors, opened with the "Ring," "Tannhäuser," "Die Meistersinger" and a revival of "Armide" following, each work being given in German. Several performances were conducted by Bruno Walter, who, if he sometimes allows the orchestra to become overwhelming, at least brings to bear on Wagner a good understanding. Wilhelm Rode made an unusually fine Wotan, recalling Van Rooy of blessed memory: Olcewska's Fricka and Waltraute gave real pleasure; Melchior's Siegmund again proved fully satisfying. Lotte Lehmann's Sieglinde was the joy of her enraptured hearers; for distinction, style and beauty of tone no Sieglinde approaches her; one simply cannot imagine the *rôle* being better sung. Eva, in "Die Meistersinger" also was allotted to this exceptional singer, and she made all that is possible of a somewhat thankless task; Habusch, who at times suggested the late David Bispham, was a truly admirable Beckmesser. The performance of "Tannhäuser" was chiefly remarkable for Ivar Andressen's mellow tone in the Landgrave's music; he reminded the older listeners of Plançon, especially in the strains to which Tannhauser listens with dejected mien. The others were not impressive.

Chaliapin's Boris and Mephistopheles remain as stimulating as ever; indeed, his actual singing is better than it was a year ago, for he now refrains from cheapening—what probably is—the finest actor-singer's art of the day. In "Faust" Chaliapin was associated with Joseph Hislop, who occasionally forced his upper notes, Maryse Beaujon, an entirely capable Marguerite, and John Charles Thomas, who, as Valentine, found the exacting air of the Kermesse scene entirely within his means, since he (apparently) sang it in the original key. "Faust," by the way, had not been given for some time.

Opera also was tried at the New Scala, the pupils of the Royal Academy of Music appearing in "Carmen," "Madame Butterfly" and "The Mastersingers," an English translation being used. Up till recently, performances of operas by London music school students were mostly ridiculous; but it is obvious that the "Academy," waking up to a sense of its responsibilities, possesses instructors to whom voices may safely be entrusted. All three works had capable exponents; even if the tenors rather let the show down, they at least displayed musical intelligence. Unfortunately, a really pleasing tenor is as rare in England as the Roc's egg.

The Old Vic, bent on popularising opera in the vernacular, has ventured on "Lohengrin," "The Marriage of Figaro" and "The Lily of Killarney," the last-named being a most absurd work. Several of the performers were throaty, a national defect, alas!

INSTRUMENTALISTS.

Raya Garbousova, a dexterous young 'cellist, made a good impression on a Wigmore Hall audience, and she doubtless will, in course of time, attain distinction. The newcomer would, however, be well advised to practise the Bach "Suite in G" assiduously before again submitting the piece to critical listeners. The Flonzaley Quartet, which is said to be on the point of disbanding, gave a wonderful performance of Mozart's "D Major Quartet," their playing fairly reaching perfection. Dorothy Hesse, a young pianist with a command of style and technique, offered a well-chosen Bach programme, which

included the "Toccata in G" and the "Chromatic Fantasia"; Wanda Landowska's harpsichord recitals drew crowded audiences. Bruce Simonds, a pianist of unusual attainment, was heard in Beethoven's "Sonata, Op. 101," and Ravel's "Gaspard de la Nuit"; The Lener Quartet gave a series of Beethoven recitals, the leader's tone being unusually sweet; Leon Zighera played the Lalo "Symphonie Espagñole" in rather too emotional a manner. Kubelik's recital at the Albert Hall was chiefly notable for the violinist's forbearance, since he omitted to play any of his own compositions, warned, no doubt, by the reception with which they met last year when he introduced them to London. Incidentally, this naturalised Hungarian's playing has now regained something of its old form.

Many other violinists, 'cellists and pianists gave recitals, some of which must have cost their givers a pretty penny. For they were sparsely attended.

Singers

Tito Schipa, heralded as Barnum used to advertise the famous circus, took the fancy of an Albert Hall audience, and without singing particularly well, his phrasing often being faulty. Sonia Neville, a contralto, ventured upon a recital, at which she was heard to greater advantage in the Brahms's "Wiegenlied" than in other things. Slezak, looking more gigantic than ever, and forcing the tone, attracted a large following to his recital, happily, the singer's *mezza voce* is wholly pleasing. Leslie Holmes, a Canadian baritone of moderate attainment, made a fairly good impression. Muriel Pearson was less successful, her faulty diction in various languages handicapping a voice of some promise. Claire Croiza, at a welcome recital, rang the changes on Faure and Debussy; she is far too good and cultured a singer to waste her art on such uninteresting things. Maartjee Offers, a Dutch contralto, created an excellent impression in "O don fatale," the singer's voice being perfectly suited to this music. Jarmila Novotna elected to use a Czech translation when singing Schubert to those who are accustomed to the (original) German words. The lady's voice, unfortunately, knows not control.

A highly interesting recital was given by Marion McAfee, whose vocal method, style and understanding of all that she interprets are little short of a revelation. A singer of the first rank, her art offers a valuable object-lesson to the intelligent student—indeed, for that matter, the most renowned artists may learn something from this wholly admirable singer. Young people who have advanced in their studies will find a ticket for a McAfee recital an investment yielding an unlimited rate of interest. For the rest, 'tis a rare pleasure to hear this artist of quality, one who satisfies the *connoisseur* at every point.

The season, with the assistance of cajoling and conscienceless agents, brought forward a number of beginners who are not intended by nature to sing. Many of them, however, secured flattering "notices" in the London and suburban news sheets, their critics being more amiable than expert. A "throaty" tenor, for example, was hailed as "Caruso's successor. ..."

Orchestral Playing.

To orchestral concerts there has been no end. Beecham, having emerged from his retirement, and, much to everybody's joy, has shown conductors how to make the most of a score, even going as far afield as Belfast. Albert Coates, whom some consider a trifle flamboyant, displayed similar activity. Henry Wood was again identified with the "Promenades," the season being their thirty-fourth, while fourteen new works obtained a hearing. The various orchestral societies, both professional and amateur, figured at various concerts. The music schools also contributed an occasional programme, generally acquitting themselves well.

The same cannot, alas, be said of the military and other bands which played in and round about London; the bandmasters rarely conducting with the least feeling for music, their misguided outlook was as mechanical as drill. Recently, one of these organizations played Gastaldon's "Musica Proibita" in the Embankment Gardens, the bandmaster taking it *largo*, though the proper time is *andante affettuoso*. The necessary light and shade were utterly ignored, the *presto con anima*, which marks the repeat, shared the same fate. The performance was lamentable.

The Provinces.

Manchester introduced the overture to Respighi's "Belfagor," a dazzling piece of orchestration; Blow's masque, "Venus and Adonis," enlivened Liverpool. Birmingham, ever partial to "The Golden Legend," caused the cantata to be performed; the Bristol Choral Society continues to flourish. The public schools orchestras have put in good work; the Welsh National "Eisteddfod" introduced feeble compositions as test pieces, one of the women soloists "performing with the fruity richness for which she is famous"—according to a local newspaper. Edinburgh amateurs presented themselves in "Prince Igor," "Marta" and "Aida"; Dublin had its "Fete Cecil," the thirty-second; Nottingham enthusiasts were made happy with "The Creation"; Mozart's "Twelfth Mass" was given at Walsall. Worthing has rejoiced in madrigals.

The recondite townlets have been most enterprising; many works had a performance, London singers being engaged for the occasion. Crowded audiences were the rule.

New Music.

Countless songs, pieces for piano, violin and 'cello, as well as more elaborate compositions from Herbert Bedford and J. W. Ivimey, have made their appearance. Few of these efforts are of such interest that one wishes to hear them twice; indeed, some are so poor that, in the interests of English music, they should never have been performed in public. A suite, dealing with an historical subject, is simply childish and foolish in conception; yet it actually has found a publisher.

British composers have abstained from offering the public any more operas. A wise move.

THE LONDON STAGE.—Several young actors and actresses of considerable promise and one dramatist of special merit made the theatrical year notable. The new playwright was John Van Druten, whose *Young Woodley*, dealing with the adolescent passion of a schoolboy for his master's wife, brought him fame. The play was originally banned, but when it was produced by the Stage Society the Lord Chamberlain withdrew his objections because of the excellence and care of the production, and at the Savoy it became an immediate success and enjoyed a long run. The same author's adaptation from Miss Rebecca West's novel *The Return of the Soldier*, though not so great a popular draw, confirmed the good opinion he had formed, and he followed this with *Diversion*. Another striking play was *Thunder on the Left* by Richard Pryce from the novel of Christopher Morley. Mr. John Drinkwater with *Bird in Hand*, and Mr. Jevan Brandon-Thomas with *Passing Brompton Road* joined the authors with long runs to their names. Mr. Arnold Bennett was represented by *Mr. Prohack*, in collaboration with Mr. Edward Knoblock, and by *The Return Journey*, the latter a modern *Faust*, and Mr. A. A. Milne by *The Fourth Wall*. Mr. Noel Coward was not so successful as with his former plays with *Sirocco*, but he showed his amazing versatility in the revue *This Year of Grace*, for the whole of which he was responsible. Several plays by Mr. Shaw and Mr. Galsworthy were revived, and Sir Nigel Playfair marked his widely-acclaimed knighthood by many interesting productions of Shakespeare and old English comedies. Shakespeare in modern dress was again tried at the Court, where *Macbeth* and *The Taming of the Shrew* were played under this condition, and the Old Vic re-opened with several of the great dramatist's plays, an interesting feature being the appearance of Miss Jean Forbes-Robertson as "Juliet."

The following is a list of productions between Nov. 1, 1927, and Oct. 31, 1928:—

ADELPHI, 411, Strand, W.C. 2.- (1927) *Nov.* 14. *The Big Drum*, by Harold Holland (Messrs. Jack Raine, Michael Hogan and Matthew Boulton and Mesdames Una O'Connor and Muriel Alexander). *Dec.* 1. *Clowns in Clover*, a revue by Ronald Jeans (Messrs Jack Hulbert and Bobbie Comber and Mesdames Cicely Courtneidge, June and Irene Russell).

ALDWYCH, Aldwych, W.C. 2.- (1928) *June* 26. *Plunder*, by Ben Travers (Messrs. Ralph Lynn, Tom Walls, Gordon James, Archibald Batty and Herbert Waring and Mesdames Winifred Shotter and Mary Brough).

AMBASSADORS, West Street, Cambridge Circus, W.C. 2.- (1927) *Dec.* 12. *March Hares*, by H. W. Gribble (Messrs. Leslie Banks and Ronald Simpson and Mesdames Athene Seyler, Hilda Trevelyan and Alison Leggatt). *Dec.* 26. *Nine-Forty-Five*, by Owen Davis and Sewell Collins, revived (Messrs. Frederick Leister, Ronald Simpson and Frank Pettingell and Mesdames Margaret Moffat and Muriel Martin Harvey). (1928) *Jan.* 23. *Two White Arms*, by Harold Dearden (Messrs. Owen Nares, Charles Carson and Nigel Bruce and Mesdames Molly Kerr, Sydney Fairbrother, Oliver Rose and Marda Vanne). *June* 6. *The Man they Buried*, by Karen Bramson, translated by Bertha Murrey (Messrs. Owen Nares, Arthur Wontner and Leon M. Lion and Miss Jeanne de Casalis). *June* 28. *Tell Me the Truth*, by Leslie Howard (Messrs. Morton Selten, Rupert Lucas and Stephen Adeson and Mesdames Iris Hoey, Florence le Clercq and Edna Davies). *July* 18. *Many Waters*, by Monckton Hoffe (Messrs. Nicholas Hannen, Milton Rosmer, Frank Harvey and Robert Douglas and Mesdames Maisie Darrell and Edyth Goodall).

APOLLO, Shaftesbury Avenue, W. 1. (1927) *Nov.* 9. *Cyrano de Bergerac*, by Edmond Rostand, translated by Gladys Thomas and Mary F. Guillemard (Messrs. Robert Loraine, Alfred Harris and Francis Lister and Mesdames Winifred Wynne and Maisie Darrell). *Dec.* 19. *Whispering Wires*, by Kate L. McLaurin (Messrs. James Carew, Henry Daniell and Frederick Ross and Mesdames Edyth Goodall and Muriel Alexander). (1928) *Jan.* 16. *The Dance of Death*, by August Strindberg (Messrs. Robert Loraine and Edmund Gwenn and Mesdames Miriam Lewes and Edith Martyn). *March* 14. *The Man Who Changed His Name*, by Edgar Wallace (Messrs. Robert Lorraine, James Raglan, Hartley Power and Clive Currie and Miss Dorothy Dickson). *May* 29. *The Squeaker*, by Edgar Wallace (Messrs. Campbell Gullan, Hartley Power, George Relph, Harry Wenman and Edwin Ellis and Mesdames Mercia Swinburne and Dora Lennox). *Sept.* 20. *The Lord of the Manor*, by John Hastings Turner (Messrs. Frank Collier, Frederick Moyes, C. M. Lowne and Frank Bertram and Mesdames Vera Frizell, Olwen Roose and Lilian Cavanagh). *Oct.* 25. *The Brass Paperweight*, by Konnrad Jevsky, after Dostoievsky (Messrs. Michael Sherbrooke, Elliott Seabrooke and Robert Speaight and Mesdames Lydia Sherwood and Lenia Smithson).

CARLTON, Haymarket, S.W. 1. (1928) *Feb.* 8. *The Yellow Mask*, musical comedy by Edgar Wallace, music by Vernon Duke (Messrs. Bobby Howes, Wilfred Temple and Malcolm Keen and Mesdames Phyllis Dare and Winnie Collins). *Aug.* 15. *Good News*, American musical comedy (Messrs. Bobby Jarvis, H. R. Hegnett and Neil Collins and Mesdames Goodee Montgomery and Zelma O'Neal).

COMEDY, Panton Street, Haymarket, S.W. 1.- (1928) *May* 8. *Our Little Wife*, by Avery Hopwood (Messrs. John Deverell and Guy Newall and Miss Joanne de Casalis). *June* 7. *If We But Knew*, by Andrew Soutar (Messrs. Franklin Dyall, A. Bromley-Davenport and S. J. Warmington and Mesdames Mary Merrall and Helen Ferrers). *Aug.* 22. *The Devil's Host*, by Carl Glick (Messrs. Franklin Dyall, Stanley Lathbury and Victor Stanley and Mesdames Clare Harris and Ann Trevor). *Oct.* 8. *Deadlock*, by May Edginton (Messrs. Lewis Shaw, Robert Horton and David Hawthorne and Mesdames Dorothy Dix and Marie Hemingway). *Oct.* 23. *The Mollusc*, by Hubert Henry Davies, revived (Messrs. Joseph Coyne and Edmond Breon and Mesdames Constance Collier and Cecily Byrne).

COURT, Sloane Square, S.W. 1.- (1927) *Nov.* 16. *Mr. Prohack*, by Arnold Bennett and Edward Knoblock (Messrs. Charles Laughton, Elliott Seabrooke, Scott Sunderland and Carl Harbord and Mesdames Dorothy Cheston, Hilda Sims and Elsa Lanchester). (1928) *Jan.* 9. *The Adding Machine*, by Elmer Rice (Messrs. Frank Randell, Percy Rhodes and Philip Hewland and Mesdames Carrie Baillie and Dorothy Turner). *Feb.* 6. *Macbeth*, Shakespeare's tragedy in modern dress (Messrs. Eric Maturin, Cyril Jervis-Walter, Laurence Olivier and Scott Sunderland, and Mesdames Mary Merrall and Muriel Aked). *March* 5. *Back to Methuselah*, Bernard Shaw's

pentateuch, revived in parts (Messrs Colin Keith-Johnston, Nigel Clarke and Cedric Hardwicke and Mesdames Edith Evans and Gwen Ffrangcon-Davies). *April* 2. *Harold*, by Alfred, Lord Tennyson (Messrs. Laurence Olivier, Nigel Clarke, Robert Speaight, Gerald Howe and Scott Sunderland and Mesdames Gwen Ffrangcon-Davies and Eileen Beldon). *April* 30. *The Taming of the Shrew*, in modern dress (Messrs Scott Sunderland, Ronald Simpson, Clifford Marquand, Nigel Clarke and Ralph Richardson and Mesdames Eileen Beldon and Muriel Hewitt) *May* 29. *Così fan Tutte*, Mozart's light opera, revived (Messrs. W. Johnstone-Douglas and Stewart Wilson and Mesdames Louise Trenton, Dorothy D'Orsay and Vivienne Chatterton) *June* 26. *The Secret Marriage*, Cimarosa's comic opera, English version by Reginald Gatty (Messrs. Clive Carey, Roy Henderson and John Armstrong and Mesdames Dorothy D'Orsay and Louise Trenton). *July* 17. *The Farmer's Wife*, by Eden Phillpotts, revived (Messrs. Ernest Stidwell, Frederick Victor and Cyril Raulson and Mesdames Dorothy Danke and Kirsty Mackintosh) *Aug* 14. *Aren't Women Wonderful?* by Harris Deans (Messrs. Ralph Richardson and Clifford Marquand and Mesdames Dorothy Holmes-Gore and Dorothy Turner) *Sept.* 10 *Yellow Sands*, by Eden and Adelaide Phillpotts, revived (Messrs. Frank Pettingell, Henry Caine and Wilson Coleman and Mesdames Margaret Nicholls and Viola Lyel) *Oct.* 22 *Fortunato* and *The Lady from Alfaqueque*, by Serafin and Joaquin Alvarez Quintero, English version by Helen and Harley Granville-Barker (Messrs. Fewlass Llewellyn, C. B. Clarence, John Gielgud, Eric Stanley and Geoffrey Wincott and Mesdames Gillian Scarle and Miriam Lewes).

CRITERION, 218–223 Piccadilly, W. 1.—(1927) *Nov.* 2. *Chance Acquaintance*, a comedy by John Van Druten (Messrs. D. A. Clarke-Smith, Robert Andrews and F. Owen Baxter and Mesdames Una O'Connor, Helen Haye and Benita Hume). *Dec.* 20. *Quest*, by Ralph Stock (Messrs Hugh Wakefield, Fred Groves and D. A. Clarke-Smith and Mesdames Heather Thatcher and Joyce Kennedy). *May* 22. *Skin Deep*, by Ernest Enderline (Messrs. Frederick Lloyd and Leonard Upton and Mesdames Athene Seyler, Carol Goodner and Henrietta Watson), *July* 10 *Passing Brompton Road*, by Jevan Brandon-Thomas (Messrs. W. Graham Browne, Jevan Brandon-Thomas, Evelyn Roberts and Robert Andrews and Mesdames Marie Tempest, Louise Hampton and Ursula Jeans).

DALY'S, 2–6 Cranbourne Street, W.C. 2.—(1927) *Nov.* 24. *Sirocco*, by Noel Coward (Messrs. Ivor Novello, Aubrey Mather and David Hawthorne and Mesdames Frances Doble, Ada King and Helen Ferrers). *Dec.* 23. *Lilac Time*, musical comedy with Schubert's music revived (Messrs. Frederick Blaney, W. H. Berry and Percy Heming and Mesdames Evelyn Laye and Louise Prussing). (1928) *Feb.* 23. *Lady Mary*, musical comedy by Frederick Lonsdale and J. Hastings Turner with music by Albert Sirmay (Messrs. George Grossmith, Herbert Mundin, Paul Cavanagh and Richard Dolman and Mesdames Helen Gilliland and Vera Bryer).

DRURY LANE, Catherine Street, Strand, W.C. 2. —(1928) *May* 3. *Show Boat*, musical comedy by Oscar Hammerstein from the novel by Edna Ferber, music by Jerome Kern (Messrs. Howett Worster, Cedric Hardwicke, Leslie Sarony and Paul Robeson and Mesdames Edith Day, Viola Compton and Marie Burke)

DUKE OF YORK'S, St Martin's Lane, W.C. 2.—(1927) *Nov.* 28. *Good Morning, Bill*, by P. G. Wodehouse from the Hungarian (Messrs. Ernest Truex, Frank Cellier and Lawrence Grossmith and Mesdames Vera Lennox and Dorothy Minto). (1928) *April* 5 *Thunder in the Air*, by Robins Millar (Messrs. Robert Haslam, J. Fisher White and Frank E. Petley and Mesdames Violet Vanbrugh and Grizelda Hervey). *June* 4. *Many Happy Returns*, revue by Herbert Farjeon (Mr. Morris Harvey and Mesdames Mimi Crawford and Elizabeth Pollock) *Sept.* 19. *Such Men Are Dangerous*, by Alfred Neumann, adapted by Ashley Dukes (Messrs. Matheson Lang, Robert Farquharson and Harcourt Williams and Miss Isobel Elsom).

EVERYMAN, Old Drill Hall, Hampstead, N.W. 3. —(1927) *Nov.* 8. *He Who Gets Slapped*, by Leonid Andreyer (Messrs Milton Rosmer, Charles Carson and Frederick Lloyd and Mesdames Dorie Sawyer and Gabrielle Casartelli). *Dec.* 13. *The Soul of Nicholas Snyder*, by Jerome K. Jerome (Messrs Ion Swinley, Wilfrid Shine and Herbert Lomas and Mesdames Una O'Connor and Josephine Wilson). (1928) *Jan.* 10 *A Night in June*, by Donald Buckley (Messrs Walter Pearce and Cecil Parker and Mesdames Kathleen O'Regan and Nellie Bowman) *Jan.* 20 *The Eldest Son*, by John Galsworthy, revived (Messrs. Frederick Lloyd, Herbert Lomas and John Wyse and Mesdames Irene Rooke and Gillian Lind). *Feb* 6. *The Third Finger*, by R. R. Whittaker (Mr. Melville Cooper and Miss Lila Maravan). *Feb.* 21. *Comrades*, by August Strindberg (Messrs. Ivan Samson and Herbert Lomas and Mesdames Margaret Yarde and Pamela Carne). *March* 12. *Hedda Gabler*, Ibsen's play, revived (Messrs. Walter Pearce and George Zucco and Mesdames Laura Cowie and Margaret Swallow). *April* 3 *The Dumb Man of Manchester*, the old melodrama revived (Messrs. Campbell Gullan and Harold Scott and Mesdames Renée Kelly and Florence McHugh) and *The Sabine Women*, by Andreyer (Mr. Campbell Gullan and Mesdames Renée Kelly and Lola Duncan). *April* 24. *Queen Elizabeth*, by W. G Hole (Messrs Milton Rosmer, Hay Petrie and Arthur Pusey and Mesdames Nancy Price and Clare Harris). *May* 9. *The World's End*, by Reginald Berkeley (Messrs. J. Hubert Leslie, Clement Hamelin and John McNally and Miss Elizabeth Arkell). *May* 25. *The Pigeon*, John Galsworthy's play, revived (Messrs Brember Wills, Alfred Clark and Reginald Dance and Miss Nesta Elizabeth). *Sept* 17. *Guinevra*, by Giovacchino Forzano (Messrs. George Bealby and Leonard Shepherd and Miss Renée Kelly). *Oct.* 4. *The Master Builder*, by Henrik Ibsen, revived (Messrs. Charles Carson, Hugh E. Wright and Frank Moore and Mesdames Florence McHugh, Maud Jolliffe and Josephine Wilson)

FORTUNE, facing Drury Lane Theatre, W.C. 2. —(1928) *July* 17. *Mischief*, by Ben Travers (Messrs. Allan Jeayes, Harold Warrender and Edmond Breon and Mesdames Yvonne Arnaud and Stella Bonheur). *Sept.* 24. *Napoleon's Josephine*, by Conal O'Riordan (Messrs. Leslie Banks and Leon Quartermaine and Mesdames Edith Evans and Athene Seyler).

GAIETY, Strand, W.C. 2.—(1927) *Nov.* 1. *The Girl from Cook's*, musical comedy by R. H. Burnside and Greatrex Newman, with music by Raymond Hubbell and Jean Gilbert (Messrs.

W. H. Berry, Billy Leonard, Edmund Gwenn and Ernest Thesiger and Mesdames Margaret Campbell, Eva Sternroyd and Nan Wild). *Dec* 21. *Peter Pan*, Sir James Barrie's play, revived (Messrs. William Luff, Frank Allanby, Gordon Carr, Charles Trevor and James Wilton and Mesdames Jean Forbes Robertson, Marie Lohr and Mary Casson). *June* 12. *Marjolaine*, musical comedy adapted from Louis N. Parker's play, with music by Hugo Felix (Messrs Oscar Asche, Lionel Victor and Barrington Hooper and Mesdames Lilian Davies, Ethel Hook and Bals Farren) *Oct.* 4, *Topsy and Eva*, musical play, by Catherine Chisholm Cushing, with music and lyrics by the Duncan Sisters (Messrs George Vollaire and John Kelly and Mesdames Kate Opperman and Rosetta and Vivian Duncan).

GARRICK, 2, Charing Cross Road, W.C. 2.—(1927) *Dec.* 19. *Robinson Crusoe*, a pantomime (Messrs. Joe Lewis and Joey Porter and Mesdames Zoe Palmer, Grace Hartington and Peggy Livesey) (1928) *Feb* 1 *Fun Gods*, by Edgar Middleton (Messrs. Frank Royde, Robert Horton, Walter Sondes and Eliot Makeham and Mesdames Eva Moore and Ivy des Voeux) *March* 20. *The Cocoanuts*, a musical show (Messrs. Fred Duprez, Pat Kendall and Max and Harry Nesbitt and Mesdames Pat Kendall and Enid Stamp-Taylor) *April* 7. *The Brothers Karamazoff*, by Dostoievsky (the Moscow Art Theatre). *May* 17. *Call me Georges*, by Hanworth Browning (Messrs. Ernest Truex and Huntley Wright and Mesdames Mary Jerrold and Nadine March). *May* 30. *Whispering Gallery*, by Percy Robinson and Terence de Marney (Messrs Ben Webster, Vincent Holman and Frederick Bartwell and Miss Mabel Terry-Lewis). *Aug.* 28. *The Moving Finger*, by Sir Patrick Hastings (Messrs. Ernest Milton, George Carr and George Curzon and Mesdames Lilian Braithwaite and Marjorie Mars). *Sept* 27. *The Constant Nymph*, by Margaret Kennedy and Basil Dean, revived (Messrs Raymond Massey, Morton Selten, Kenneth Kent and Tony de Lungo and Mesdames Mary Clare, Frances Doble, Jean Forbes-Robertson and Madeleine Carroll).

GLOBE, Shaftesbury Avenue, W. 1.—(1927) *Nov.* 15. *The Squall*, by Jean Bart (Messrs. Malcolm Keen, Wallace Geoffrey and Roy Byford and Mesdames Mary Clare, Rosalinde Fuller and Betty Schuster). (1928) *Feb.* 28 *Blackmail*, by Charles Bennett (Messrs. Frank Vosper and James Rennie and Mesdames Tallulah Bankhead and Henrietta Watson). *May* 9. *Mud and Treacle*, by Benn W. Levy (Messrs. Nicholas Hannen, Ivor Barnard and Robert Harris and Mesdames Tallulah Bankhead and Mabel Terry Lewis). *May* 28. *Six Characters in Search of an Author*, by Luigi Pirandello (Messrs. D. A. Clarke-Smith, Walter Pearce and Fewlass Llewellyn and Mesdames Dorothy Holmes-Gore and Dorothy Black). *June* 16. *Holding Out the Apple*, by Wynne Bower (Messrs. John Gilligat and Paul Gill and Mesdames Hermoine Baddeley, Martita Hunt and Yvonne Rorie). *Oct.* 5. *The Truth Game*, by "H. E. S. Davidson" (Messrs. Ivor Novello and Frederick Volpe and Mesdames Lily Elsie, Lilian Braithwaite and Viola Tree).

HAYMARKET, Haymarket, S.W. 1.—(1928) *Feb.* 29. *The Fourth Wall*, by A. A. Milne (Messrs. Jack Hobbs, Frank Cellier, David Hawthorne, H. R. Hignett, Tom Reynolds, F. Kinsey Peile and Spencer Trevor and Mesdames Nora Swinburne and Mary Sheridan).

HIPPODROME, Cranbourne St., W.C. 2.—(1927) *Nov.* 3 *Hit the Deck*, musical comedy by Hubert Osborne, with music by Vincent Youmans (Messrs. Stanley Holloway, Sydney Howard and and Billy Rego and Mesdames Alice Morley and Ivy Tresmand) (1928) *June* 5 *That's a Good Girl*, musical comedy by Douglas Furber, music by Philip Charig and Joseph Meyer (Messrs. Jack Buchanan, Raymond Newell and Ivan Berlyn and Mesdames Elsie Randolph and Kate Cutler).

HIS MAJESTY'S, Haymarket, S.W. 1. (1928) *June* 25 Season of Russian ballet produced by M. Diaghilev started. *July* 31. *The Phantom Fear*, by Vernon Sylvaine, in collaboration with Sidney Lynn (Messrs. Edmund Willard, Brember Wills, Dennis Wyndham and Robert Haslam and Mesdames Hilda Moore and Betty Stockfeld). *Sept.* 6. *Song of the Sea*, musical play by Arthur Wimperis and Lauri Wylie, with music by Eduard Kunneke (Messrs. Stanley Holloway, A. W. Baskcomb and Claude Hulbert and Mesdames Lilian Davies, Polly Ward, Edna Covey and Mary Leigh).

KINGSWAY, 8, Great Queen Street, Holborn, W.C. 2. (1928) *March* 20. *A Doll's House*, Henrik Ibsen's play, revived for few matinees to mark Ibsen Centenary (Messrs. Harcourt Williams, Gerard Neville and Michael Sherbrooke and Mesdames Gillian Scaife, Molly Rankin and Muriel Aked). *Oct.* 3 *Thunder on the Left*, by Richard Pryce, from the novel by Christopher Morley (Messrs. Lawrence Anderson and Bramwell Fletcher and Mesdames Angela Baddeley, Muriel Aked and Dorothy Holmes-Gore).

LITTLE, Adelphi Terrace, W.C. 2.—(1927) *Dec* 5. *Getting Married*, Bernard Shaw's play, revived (Messrs. Esmé Percy, Frank Darch and George De Lara and Mesdames Winifred Evans and Ada Jenomet). *Dec.* 26. *You Never Can Tell*, Bernard Shaw's play, revived (Messrs. Esmé Percy, Frank Darch and Francis L. Sullivan and Mesdames Dora Macdona and Margaret Macdona). (1928) *Jan.* 16. *Man and Superman*, Bernard Shaw's play, revived (Messrs. Esmé Percy and George E. Bancroft and Mesdames Margot Drake and Dora Macdona). *Feb.* 6. *Mrs. Warren's Profession*, Bernard Shaw's play, revived (Miss Leah Bateman). *Feb.* 13. *The Un-known Warrior*, by Paul Raynal (Messrs. Maurice Browne and Huntley Wright and Miss Rosalinde Fuller. 27. *A Man with Red Hair*, by Benn W. Levy, adapted from Hugh Walpole's novel (Messrs. Charles Laughton, Ion Swinley and J. H. Roberts and Miss Gillian Lind). *May* 14. Grand Guignol season opened with five short plays, including *A Private Room*, by Sir Arthur Pinero (Mr. C. M. Lowne and Miss Olga Lindo). *June* 26. *Samson and the Philistines*, by Sven Lange, adapted by Michael Orme and Kitty Willoughby (Mr. Ion Swinley and Miss Olga Lindo). *Sept.* 3. *The New Sin*, by Basil Macdonald Hastings, revived (Messrs. A. G. Poulton, Richard Goolden, Harvey Braban and Wallace Geoffrey). *Oct.* 1. *Diversion*, by John Van Druten (Messrs. Maurice Evans and C. V. France and Miss Cathleen Nesbitt).

LYCEUM, Wellington Street, W.C. 2.—(1927) *Dec.* 26. *The Queen of Hearts*, a pantomime (Messrs. Dick Tubb, and Jack Beaty and Mesdames Blanche Tomlin and Dorothy Seacombe). (1928) *March* 15. *Lumber Love*, musical comedy

by Leslie Stiles, music by Berte and Emmett Adams (Messrs. Basil Howes, Fred Kitchin and Jamieson Dodds and Mesdames Joan Lockton, Doris Sawyer and Mai Bacon) *June 7 The Flying Squad*, by Edgar Wallace (Messrs. Henry Hewitt, W. Cronin Wilson, Wilfred Caithness and C. W. Somerset and Mesdames Peggy O'Neil and Kate Strudwick). *July 2 My Lady's Mill*, by Eden and Adelaide Phillpotts (Messrs Reginald Bach, Lawrence Anderson, Robert Newton and Gordon Harker, and Mesdames Clare Harris, Helena Pickard and Drusilla Wells).

LYRIC, 29, Shaftesbury Avenue, W. 1.—(1927) *Dec.* 26. *The Black Spider*, by Carlton Dawe (Messrs. O. B. Clarence, Michael Sherbrooke and Archibald Batty, and Mesdames Frances Doble and Madge Snell). (1928) *Jan.* 20. *Sauce for the Gander*, by Russell Mederait and Norma Mitchell (Messrs. Spencer Trevor, Bramwell Fletcher and Robert English, and Mesdames Helen Haye, Iris Hoey and Nancy Price) *April* 10. *Baby Cyclone*, by George M. Cohan (Messrs. Joseph Coyne, Frank Vosper and Alfred Drayton, and Mesdames Cecily Byrne and Kathleen O'Regan). *Aug.* 21. *Her Cardboard Lover*, by Jacques Deval, adapted by Valerie Wyngate and P. G. Wodehouse (Messrs. Leslie Howard and Robert Newton and Miss Tallulah Bankhead)

LYRIC OPERA HOUSE, Hammersmith, W. 6 —(1927) *Nov.* 21. *Much Ado about Nothing*, Shakespeare's comedy, revived (Messrs. Lewis Casson, D. Hay Petrie and Eric Portman and Mesdames Sybil Thorndike and Helena Pickard). *Dec.* 19. *The Taming of the Shrew*, revived (Messrs D. Hay Petrie and Lewis Casson and Miss Sybil Thorndike) (1928) *Feb* 17. *The Beggar's Opera* revived (Messrs. Frederick Ranalow, Scott Russell and Sydney Granville and Mesdames Rose Hignell and Elsie French) *April* 19. *Love in a Village*, by Bickerstaffe, with music arranged from Arne and others by Alfred Reynolds (Messrs. CLOSE SEASON FOR GAME, WILD BIRDS, &c.

It is illegal to pursue the different kinds of game between the following dates (inclusive).—

GAME.	ENG. & W	SCOTLAND.
Black Game or Heath Fowl.	11 Dec. to 19 Aug. (31 Aug in Somerset, Devon, and New Forest)	11 Dec to 19 Aug.
Bustard.....	2 Mar. to 31 Aug	None.
Deer, Male	None	None.
,, Fallow Male	None	None
*Grouse or Red Game...	11 Dec. to 11 Aug	10 Dec. to 11 Aug
*Hare	None	None.
*Heath or Moor Game..	None.	As "Murfowl"
Landrail, Quail	As "Wild Birds."	As "Wild Birds."
*Muirfowl, or Ptarmigan	None.	11 Dec. to 11 Aug.
*Partridge	2 Feb. to 31 Aug	2 Feb to 31 Aug.
*Pheasant	2 Feb to 30 Sept.	2 Feb. to 30 Sept

It is also unlawful (in *England and Wales*) to kill the game marked * on a Sunday or Christmas Day.

In *England and Wales*, hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close time is fixed for them by those laws. In *Scotland* the same remarks apply to deer and hares, to the first four birds, and to wild duck. The close-time for all these birds is, under the Wild Birds Protection Acts, 1880 to 1908, from 2 March to 31 July, both inclusive. Otherwise this close-time applies to all wild birds throughout Great Britain. The penalty for killing any wild bird in such close-time, or for selling or having in possession between 16 March and 31 July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence, or, in the case of the undermentioned birds, £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or egg, where protected -*see* next column) in respect of which the offence was committed. In the Island of St. Kilda the fork-tailed petrel and St. Kilda wren are deemed to be included in the following list, and the birds marked † to be omitted.

American quail.
Auk.
Avocet.
Bee-eater.
Bittern.
Bonxie.

Thicknee.
Tystey.
Whaup.
Widgeon.
Wild duck.
Willock.
Wimbrel.
Woodcock.
Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s, but the Acts do not apply to any person shooting on his own land, or authorising anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, or the Secretary of State in Scotland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary of State in Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

Penalties are imposed on persons setting springs, gins, &c., on poles, trees, mounds, &c., so as to injure wild birds. Persons permitting such acts are equally liable. The use of a hook or like instrument for taking wild birds is forbidden.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. The first Monday in November is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about 12 Aug. to 12 Oct. for stags, and from 10 Nov. to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound.

SALMON AND FRESHWATER FISHERIES.

Salmon and Freshwater Fisheries Act, 1923.—This Act came into force on 1 Jan., 1924. It is "an Act to consolidate and amend the enactments relating to Salmon and Freshwater Fisheries in England and Wales" [18 July, 1923]. By this Act the numerous Acts relating to our inland fisheries have been consolidated and brought up to date with a view to meeting modern requirements.

This Act comprises 94 sections and it should be of considerable benefit to Fishery

Boards, riparian owners, anglers, and to the inland fisheries generally.

"Salmon" are defined as all fish of the salmon species.

"Trout" include any fish of the salmon family commonly known as trout and also "migratory trout" (*i.e.*, sea trout, which under the old Acts were legally "salmon"), meaning trout which migrate to and from the sea.

The so-called "coarse fish" (freshwater fish in the Act) have received additional protection. The important question of pollution is dealt with in three sections:—

Section 8 enables police-court proceedings to be taken where an effluent causes water to be poisonous or injurious to fish or the spawning grounds, spawn or food of fish. The same section provides for notice being given to the Fishery Boards or to the Minister of Agriculture and Fisheries where the construction of new works or the alteration of existing works are contemplated.

Section 55 authorizes a Fishery Board to institute or aid any person or local authority in instituting proceedings under the Rivers Pollution Prevention Acts 1876 to 1893, and, subject to certain safeguards, to extend the scope of those Acts to tidal waters.

Section 59 (1) (p) enables Fishery Boards to regulate by bye-law the discharge of specified effluents. These sections do not interfere with the common law right of procedure by action for injunction and damages. Although the Act provides powers for dealing with pollution, procedure in the nature of peaceful persuasion on the lines adopted by the Standing Committee on Rivers Pollution is likely to have much more comprehensive results than litigation.

Power has been given Fishery Boards to acquire fisheries by purchase or lease and to let the fishing rights, and also to acquire obstructions to the passage of salmon and migratory trout.

Anglers who fish for trout and coarse fish, and pay licence duty for fishing for such fish, are now entitled to representation on the Fishery Boards, the number of such representative members not to exceed one-third of the total number of members of the Fishery Board in the preceding year. These representatives will be appointed under schemes approved by the Minister and pending the constitution of schemes, by the Minister.

The Minister may by Order, on any application he may deem sufficient, require anglers to take out licences to catch freshwater fish, *i.e.*, coarse fish, in a fishery district.

Coarse fish, as well as salmon and trout, illegally bought, sold or exposed for sale or in the possession of any person for sale, may be seized by an authorized officer.

Every package containing salmon or trout and consigned by any common or other carrier (*e.g.*, post or rail) must now have the word "salmon" or "trout," as the case may be, conspicuously marked on the outside thereof at all times throughout the year, and not only, as formerly, during the annual close season.

CLOSE SEASONS.

I. SALMON.

Statutory Weekly Close Time.

In England and Wales net-fishing for salmon is prohibited from 6 a.m. Saturday to 6 a.m. Monday.

In Scotland, from 6 p.m. Saturday to 6 a.m. Monday, and rod-fishing on Sundays.

Annual Close Seasons.

ENGLAND AND WALES (including the Esk in Dumfries). The statutory close season for salmon begins, for nets, on 1 Sept., and for rods on 1 Nov.; for both nets and rods it ends on 31 Jan. For putts and putchers the annual close season is from the commencement of the annual close season to 30 April. By an Act of 1923 the Ministry of Agriculture and Fisheries may make orders varying the law on these and other points. The weekly close-time and annual close season may also be varied by bye-law by local Fishery Boards provided it begins for nets not later than 1 Sept., with a minimum of 153 days, and for rods not later than 1 Nov., with a minimum of 92 days. The statutory dates have been varied as follows (all dates exclusive):—

Eden.—Rods:—In River Eamont and in River Eden above Irthing Foot: 28 Oct.–29 Jan. Nets, &c.:—In Solway below Old Sandsfield: 9 Sept.–11 Feb. Weekly: In public or common waters below Old Sandsfield: 6 a.m. Saturday and midnight Sunday. Rest of District: 6 a.m. Saturday and noon Monday.

Derwent.—Rods: 14 Nov.–31 Mar. Nets, &c.: 14 Sept.–11 Mar. Weekly: Noon Saturday and noon Monday.

West Cumberland. Rods:—13 Nov.–31 Mar. Nets, &c.: 14 Sept.–1 April. Weekly: Noon Saturday and noon Monday.

Kent, &c.—Rods: 31 Oct.–1 April. Nets, &c.: 14 Sept.–1 April.

Lune.—Rods: 31 Oct.–2 Mar. Nets, &c.: 31 Aug.–1 April.

Ribble.—Rods: 31 Oct.–2 Mar. Nets, &c.: 31 Aug.–2 Mar.

Dee. Rods:—13 Oct.–1 April. Nets, &c.: 31 Aug.–1 April. Weekly. Below Old Dee Bridge: Midnight Friday and midnight Sunday. Above Old Dee Bridge: Noon Saturday and noon Monday.

Rheidol and Clwyd. Rods: 31 Oct.–15 April. Nets, &c.: 31 Aug.–1 May.

Conway.—Rods: 31 Oct.–1 Mar. Nets, &c.:—31 Aug.–1 Mar.

Seiont.—Rods: 31 Oct.–2 Mar. Nets, &c.: 31 Aug.–2 Mar.

Dwyfach. Rods: 14 Nov.–2 Mar. Nets, &c.:—14 Sept.–2 Mar.

Dovey. Rods: 31 Oct.–1 April. Nets, &c.:—31 Aug.–1 May.

Ayron.—Rods:—31 Oct.–1 Mar. Nets, &c.:—31 Aug.–1 Mar. Weekly: Noon Saturday and 6 a.m. Monday.

Teify.—Rods: 15 Oct.–1 Feb. Weekly:—In Teify above Cardigan Bridge: Noon Saturday and noon Monday. Rest of District: Noon Saturday and 6 a.m. Monday.

Cleddy.—Rods:—31 Oct.–2 Feb. Nets, &c.:—14 Sept.–16 Mar.

Towy.—Rods:—14 Oct.–2 April. Nets, &c.:—31 Aug.–2 April. Weekly:—6 a.m. Saturday and noon Monday.

Ogmore.—Rods:—14 Nov.–1 May. Nets, &c.:—14 Sept.–1 May.

Taff and Ely.—Rods:—14 Nov.–1 May. Nets, &c.:—30 Aug.–1 May. Weekly:—Noon Saturday and noon Monday.

Rhymney.—Rods:—1 Nov.–2 April. Nets, &c.:—31 Aug.–2 April. Weekly:—6 a.m. Saturday and noon Monday.

Usk.—Rods:—1 Nov.–2 Mar. Nets, &c.:—31 Aug.–2 Mar. Weekly:—6 a.m. Saturday and noon Monday.

Wye.—Rods:—25 Oct.–26 Jan. Nets, &c.:—25 Aug.–2 Feb. Putts and Putchers:—25 Aug.–27 April. Weekly:—Midnight Friday and midnight Sunday.

Severn.—Rods:—1 Oct.–2 Feb. Nets, &c.:—Above Tewkesbury Weir: 31 May–2 Feb. Rest of District: 15 Aug.–1 Feb. Putts and Putchers: 15 Aug.–16 April. Weekly:—Except in Severn and tributaries above Ferry landing at Framilode: Noon Saturday and 6 a.m. Monday.

Taw and Torridge.—Rods:—15 Oct.–18 Mar. Nets, &c.:—13 Sept.–27 April Weekly:—8 a.m. Saturday and 8 a.m. Monday.

Camel.—Rods:—30 Nov.–3 Mar. Nets, &c.:—20 Sept.–5 April.

Fowey.—Rods:—Between Lostwithiel and St. Winnow Point: 30 Nov.–1 May. Rest of District: 30 Nov.–5 April. Nets, &c.:—Below Lostwithiel Bridge: 31 Oct.–5 April.

Tamar and Plym.—Rods.—1 Nov.–2 Mar. Nets, &c.:—31 Aug.–2 Mar.

Avon (Devon).—Rods:—30 Nov.–1 May. Nets, &c.: In the Erme: 29 Sept.–5 April. Rest of District: 29 Sept.–2 May.

Dart.—Rods:—30 Sept.–1 Feb. Nets, &c.:—16 Aug.–1 Mar.

Teign.—Rods:—31 Oct.–3 Mar. Nets, &c.:—31 Aug.–3 Mar.

Exe.—Rods:—30 Sept.–16 Feb. Nets, &c.:—Above line drawn from Woodbury Road Station through the Perch at Turf to the west bank of the Exe: 17 Aug.–16 April. Rest of District. 17 Aug.–16 Feb.

Axe.—Rods:—30 Sept. 1 Mar. Nets, &c:—19 Aug.–1 April. Weekly.—Below Bridge at Seaton: Noon Saturday and 6 a.m. Monday. Rest of District: The first hour after sunset on Friday and the last hour before sunrise on Monday.

Frome.—Rods:—31 July–1 Mar. Nets, &c.:—31 July–1 Mar.

Hampshire Rivers.—Rods:—Westward of a line drawn north and south through the Needles: 1 Oct. 1 Feb. In Manor Beaulieu: 30 Oct.–2 Feb. Rest of District: 15 Oct.–1 April. Nets, &c.: Westward of a line drawn north and south through the Needles, 30 July–1 Feb. Rest of District: 31 Aug.–1 Feb. Weekly:—Except in Wood Mill Pool: Noon Saturday and noon Monday.

Adur.—Rods:—30 Sept–3 Feb. Nets, &c.:—31 Aug.–3 Feb.

Ouse (Sussex).—Rods: 31 Oct.–2 April. Nets, &c.:—31 Aug.–2 April.

Stour (Kent).—Rods:—1 Nov–2 May. Nets, &c.:—31 Aug.–2 May.

Yorkshire.—Rods:—15 Nov. 1 Mar.

Esk (Yorks). Weekly:—Noon Saturday and 6 a.m. Monday.

Tees.—Rods:—1 Nov.–2 Feb. Nets, &c.:—31 Aug.–2 Feb. Weekly:—9 a.m. Saturday and 9 a.m. Monday.

Wear.—Rods:—In Wear and tributaries above Biddick Ford: 31 Oct.–2 Mar. Nets, &c.:—In Wear and tributaries above Biddick Ford: 31 Aug.–2 Mar.

Tyne.—Weekly:—Noon Saturday and 6 a.m. Monday.

Coquet.—Nets, &c.:—14 Sept.–26 Mar. Weekly:—Noon Saturday and 6 a.m. Monday.

No fresh salmon may be sold between 31 Aug. and 1 Feb., except such as come from parts beyond the seas, or as have been taken, if in the United Kingdom, by legal netting. Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1 Feb. and 31 Aug., may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the Kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1 Feb. and 31 Aug., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 31 Aug and 1 May, unless caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom. the *onus probandi* lies on the person exporting In any case, between the dates specified, no salmon may be exported without having first been entered for that purpose. The capture and sale of "unclean" salmon, *i.e.*, salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

SCOTLAND (exclusive of the Esk in Dumfries). The annual close-time must not be less than 168 days. It is, for nets, 27 Aug. to 10 Feb, and, for rods, 1 Nov. to 10 Feb, except as follows:—

Close-time for	Nets.	Rods.
Tay*.....	21 Aug. to 4 Feb	16 Oct. to 14 Jan*
Add, Aray, Eckaig, N. & S Esk, Fyne, Ruel, Shira	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
Rivers of Bute.....	ditto	16 Oct. to 15 Feb.
Conon	—	16 Oct. to 25 Jan.
Awe, Beauly, Spey, Dunbeath, Lossie,	—	16 Oct. to 10 Feb.
Brora, Helmsdale, Kyle of Sutherland	—	1 Oct. to 10 Jan
Halladale, Strathy, Naver, Borgie, Hope, Polla	—	1 Oct. to 11 Jan.
Forss	—	1 Nov. to 24 Feb.
Forth	—	1 Nov to 31 Jan.

Ythan	ditto	1 Nov. to 10 Feb.
Stinchar	ditto	15 Nov. to 24 Feb.
Annan, Ugie	ditto	16 Nov. to 24 Feb.
Rivers of Shetland	ditto	16 Nov. to 31 Jan.
Nith	ditto	1 Dec. to 24 Feb.
Urr	ditto	30 Nov. to 24 Feb.
Thurso.....	—	6 Oct. to 10 Jan.
Findhorn	—	11 Oct 10 Feb.
Ness.....	—	16 Oct to 1 Feb.
Tweed.....	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

II. TROUT AND CHAR.

Statutory Weekly Close Time.

In ENGLAND AND WALES there is a statutory weekly close-time for trout and char for all instruments other than rod and line between 6 a.m. Saturday and 6 a.m. Monday.

Annual Close Seasons.

In SCOTLAND there is a close-time for trout from 15 Oct. to 28 Feb. For pollen the close-time is from 14 Nov. to 31 Jan.

In ENGLAND AND WALES the capture of trout and char is prohibited between 31 Aug. and 1 Mar. as regards instruments other than rods, and as regards rods between 30 Sept and 1 Mar., except (1) in the Thames and Lee, where the close season is from 11 Sept. to 31 Mar.; and (2) in the cases noted below, where the close-time has been varied by bye-law by local Fishery Boards. The sale of trout and char is prohibited throughout England and Wales between 31 Aug. and 1 Mar., unless for fish propagation, stocking or re-stocking of waters, or for some scientific purpose:—

A.—MIGRATORY TROUT.

Eden.—Rods:—Except in River Eden above Irthing Foot 31 Oct.–3 April. Weekly:—In Solway below Old Sandsfield: 6 a.m Saturday and midnight Sunday Rest of District: 6 a.m. Saturday and noon Monday

Derwent - Rods and Nets, &c:- 14 Sept.–11 Mar.

West Cumberland.—Rods and Nets, &c. - 1 Sept.–11 Mar.

Kent, &c.—Rods and Nets, &c.:—In River Duddon and tributaries above Foxfield Viaduct 1 Oct.–2 April. In River Bela and tributaries. 15 Sept.–16 Feb. Rest of District: 1 Oct.–4 Mar

Lune—Rods:—31 Oct -3 April

Ribble Rods: -31 Oct.–3 April. Nets, &c.:—31 Aug -1 April.

Dee—Rods and Nets, &c:—Bala Lake: 13 Sept 15 Jan. Rest of District: 13 Oct. 15 Feb

Elwy and Clwyd.- Rods:- 31 Oct. 15 April. Nets, &c.:- 31 Aug. 1 May.

Conway.—Rods.—30 Oct.–2 April.

Seiont—Rods and Nets, &c:—In Co. Carnarvon; 21 Sept. 22 Feb. In Co. Anglesey: 21 Sept. 14 Feb.

Dovey.—Rods:—31 Oct.–1 May. Nets, &c.:—31 Aug.–1 May.

Teify.—Nets, &c.:—30 Sept 1 Mar. Weekly:—In River Teify, above Cardigan Bridge: Noon Saturday and noon Monday. Rest of District: Noon Saturday and 6 a.m Monday.

Cleddy.—Rods and Nets, &c: 28 Sept.–2 Mar.

Towy.—Rods: 14 Oct.–2 April. Nets, &c.:—31 Aug.–2 April. Weekly: 6 a.m. Saturday and noon Monday.

Ogmore.—Rods and Nets, &c.: 29 Sept.–1 Mar.

Tyne Rods and Nets, &c.: - 30 Sept –22 Mar Weekly: Noon Saturday and 6 a.m. Monday
Coquet. Rods: 31 Oct.–4 Mar. Weekly: - Noon Saturday and 6 a m. Monday.

III. FRESHWATER FISH.

The Salmon and Freshwater Fisheries Act, 1923, imposes a close-time for catching, selling or buying "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than salmon, trout, and char, which live in fresh water, except those kinds which migrate to or from tidal waters and eels and the fry of eels) from 15 March to 15 June, both inclusive, for England and Wales. The close-season, however, does not apply to eels taken otherwise than by angling; or to freshwater fish taken in certain private waters by leave of the owner; or to taking fish in certain cases for bait or for scientific purposes. The Axe, Avon (Devon), Wye, Eden, and Towy districts have been exempted from this close-time; also the Kent and Bela and Severn as regards pike; the Usk as regards eels; and parts of the Severn as regards fish other than grayling. For eels a separate close-time exists (so far as regards fixed engines in salmon rivers) in England from 1 Jan to 24 June, in Ireland, with one or two exceptions, from 11 Jan. to 30 June In the Severn, elvers, or eel fry, are protected from 31 Dec to 1 March and from 25 April to 25 June both inclusive.

IV CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4¼ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye-laws of Sea Fisheries Committees (*vide infra*), the minimum size of lobsters and crabs that may be lawfully taken in different parts of the territorial seas has been increased, and in some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

V. OYSTERS.

There are also local regulations for the protection of oysters, and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close-time for the capture and sale of "Deep-Sea Oysters" is fixed for England and Scotland, from 15 June to 4 Aug.; and for all other kinds of oysters—except oysters taken in the waters of a foreign State—from 14 May to 4 Aug By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from 16 June to 31 Aug in the English Channel between lines drawn (1) from North Foreland to Dunkirk, and (2) from Land's End to Ushant—the territorial seas of England and France being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified, until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1 May to 31 Aug, remains in force so far as French fishermen are concerned. But both Powers agreed by a Declaration signed in 1923 to suspend the close season till 16 June in each year

FISHING LICENCES.

In all fishery districts in England and Wales, and in Ireland, a licence to fish for salmon is necessary, and in most English and Welsh rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In certain districts (*e.g.*, the Lune, Derwent, Severn, Wye, Trent, Yorkshire, and Norfolk) licences for "freshwater fish" are in force. No licence is required for Thames trout or general fish In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued. The rates on salmon nets and other like instruments range from £20 downwards in England and Wales. The rate on draft nets in England and Wales varies from £7 10s. to £2. In England and Wales different rates are charged in different districts for a salmon rod and line, and as the rates vary considerably, application should be made to the Clerk of the local Fishery Board (for addresses *see* next page) for particulars of the existing rates.

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon, trout, and freshwater fish is placed by the Salmon and Freshwater Fisheries Act, 1923, and the Ministry of Agriculture and Fisheries Acts, 1889 to 1919, in the hands of local boards, with the Ministry of Agriculture and Fisheries as the central authority.

Name of District	Coast Limits of District	Address of Clerk.
†Eden	Sark Foot to Seaton	F. W. Seal, Carlisle.
*Derwent	Seaton to St. Bees Head	J. E. Musgrave, Cockermouth.
West Cumberland	St. Bees Head to Haverigg Point	J. F. Baxter, Whitehaven.
*Kent and Bela	Haverigg Point to Warton	Messrs. Hart, Jackson & Son, Ulver-ston
*Lune	Warton to Blackpool	J. T. Sanderson, Lancaster.
*Ribble	Blackpool to Formby Point	T. Reveley, Preston.
*Dee	New Brighton to near Meliden Church	Henry Jollitte, Chester.
Elwy and Clwyd	Meliden Church to Rhos Bay	F. W. Grimsley, St. Asaph.
*Conway	Rhos Bay to R. Aber	C. T. Allard, Llanrwst.
†Seiont	Garth Point to Llanaelhaiarn Point, and to Twyn y Pare Point, in Anglesey	O. J. Williams, Caernarvon.
Dwyfach	Llanaelhaiarn Point to Criccieth	David Jones, Portmadoc.
Dovey	Criccieth to Cynvelin	J. Jones Williams, Dolgelly.
Ayron	Carreg Tipog to New Quay Head	R. C. Evans, Aberayron.
Teify	New Quay Head to Dinas Head	J. Angus, Pontwelly, Llandyssul.
†Cleddy	Dinas Head to St. Govan's Head	R. T. P. Williams, Haverfordwest.
*Towy, Loughor, & Tai	St. Govan's Head to Worm's Head	C. H. M. Griffiths, Carmarthen.
Ogmore and Ewenny	Portheawl to Cold Knap	S. H. Stockwood, Bridgend
Taff and Ely	Cold Knap to Bute Dock	A. Waldron, Cardiff.
Rhymney	Bute Dock to Ty ton y Pill	
*Usk	Ty ton y Pill to Collister Pill	Horace Lyne, Newport (Mon.).
*Wye	Collister Pill to Cone Pill	Major Phillips, D.S.O., Hereford.
*Severn	Cone Pill to Avon Battery	J. Stallard, Worcester
Avon, Brue & Parret	Avon Battery to County Boundary	D. S. Watson, Bridgwater.
*Taw and Torridge	North Coast of Devon	R. E. C. Balsdon, Barnstaple.
Camel	West Boundary of Devon to Peel Point	O. Clayton, Wadebridge.
Fowey	Peel Point to Rame Head	R. Pease, Lostwithiel.
Tamar and Plym	Rame Head to Stoke Point	W. W. Mathews, Tavistock.
Avon (Devon)	Stoke Point to Start Point	W. Beer, Kingsbridge.
Dart	Start Point to Hope Ness	G. E. Windeatt, Totnes.
Teign	Hope Ness to Clerk Rock	H. Michelmore, Newton Abbot.
†Exe	Clerk Rock to Ottermouth	H. Ford, Exeter.
†Otter	Ottermouth to Beer Head	
†Axe	Beer Head to Portland Bill	W. G. Forward, Axminster.
†Frome	Portland Bill to Hampshire Boundary	E. Bolland, Wareham.
*Hampshire Rivers	East Boundary of Dorset to Ryde	C. J. Haydon, Bournemouth.
Adur	West Tarring to Portobello	C. L. Whiteman, Chichester
Ouse (Sussex)	Portobello to Seaford Head	C. H. Morris, Lewes.
Cuckmere	Seaford Head to Fairlight	
Rother	Fairlight to Dungeness	T. L. Smith, Rye.
†Stour (Kent)	North to South Foreland	
Suffolk and Essex	Dovercourt Light to Covehithe Coastgd. Stn.	B. C. Roe, Ipswich.
†Norfolk	Covehithe to Happisburgh	A. J. Rudd, Norwich.
†Ouse and Nene	W. Boundy. of Norfolk to Lapwater Hall	
†Welland	Lapwater Hall to Western Point	
Witham	Western Point to Gibraltar	C. H. Adcock, Boston.
Trent	Ingoldmell's Point to Trent Falls	E. H. Heald, Nottingham.
Yorkshire	Trent Falls to Hayburn Wyke	W. Puckering, Nat. Prov. Bk. Ch'Brs, York.
Esk (Yorkshire)	Hayburn Wyke to Skinningrove Beck	C. E. Brown, Whitby.
Tees	Skinningrove Beck to Hardwick Hall	Albert W. Smith, Darlington.
Wear	Hardwick Hall to Souter Point	W. E. Rahe, Sunderland.
Tyne	Souter Point to Newbiggin Point	J. A. Williamson, Newc'stle on-Tyne.
Coquet	Newbiggin Point to Hawick Burn	H. J. Percy, Alnwick.

Districts may be formed or altered and Fishing Boards appointed or abolished, and the following districts have been formed, including generally all rivers running into the sea between the points named. Except in the cases marked † they also include the sea for three miles from the shore, or to the mid-channel in estuaries.

These Fishery Boards consist mainly of three classes of members—those appointed annually by the Councils of the various counties through which the rivers flow; *ex-officio* members qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by persons who have paid licence duty on instruments other than rod and line for salmon fishing in public waters. There are also members representative of anglers for fish other than salmon. Districts where Provisional Orders are in force are marked thus *.

There are also certain bodies created by local statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Port of London Authority, Lee Conservancy Board, and Conservators of the Medway.

The above-mentioned Boards have power to make bye-laws for the regulation of the fisheries for salmon, trout and freshwater fish. They are also empowered to issue licences for fishing for

salmon, trout, and in some cases freshwater fish generally.

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 24 districts, embracing between them the whole country, each with a separate Board of Conservators

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Acts, 1888 to 1894, the Ministry of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales, and to constitute local Fisheries Committees, either for a single county or borough, or for several jointly. These Committees have power to make bye-laws, to be confirmed by the Ministry of Agriculture and Fisheries, regulating or prohibiting the use of instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the adjoining coast and territorial seas between the points respectively mentioned:—1. Cumberland (Sark Foot to Haverigg Point). 2. Lancashire and Western (Haverigg Point to Cemmaes Head). 3. South Wales (Cemmaes Head to a line drawn through Flatholm). 4. Cornwall (Northern boundary of Cornwall to Rame Head). 5 Devon (Northern Section: Eastern boundary to Western boundary of Devon. Southern Section. Rame Head to Eastern boundary of Devon). 6. Southern (Western boundary of Dorset to Hayling Island). 7 Sussex (Hayling Island to Dungeness) 8. Kent and Essex (Dungeness to Dovercourt) 9 Eastern (Southern boundary of Norfolk to Donna Nook Beacon) 10. North-Eastern (Donna Nook Beacon to River Tyne). 11. Northumberland (the River Tyne to the boundary between England and Scotland)

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

SEASONABLE AND UNSEASONABLE FISH

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best, the letter *c* signifies that it is "close-time" as fixed by statute

(*a*) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(*b*) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(*d*) In the close season, salmon from Holland, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(*e*) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

HUNTS AND HOUNDS.

Staghounds.—England, 8 packs (222 couples); Ireland, 1 pack (35 couples).
Foxhounds.—England and Wales, 287 packs (about 5,000 couples), Scotland, 11 packs (340 couples).
Harriers.—England and Wales, 43 packs (700 couples), Ireland, 7 packs (133 couples).
Beagles.—England and Wales, 60 packs (600 couples); Scotland and Ireland, 5 packs (44 couples).

Pack	Couples	Master.	Kennels
Staghounds (20 couples or more).			
Berks and Bucks	20	Major E. W. Shaekle	Cookham Dene, near Maidenhead.
Co. Down	35	Sir J. McConnell and Mr. F. W. Workman	Ballykine, Ballynahinch, Co. Down.
Devon and Somerset	51	Col. W. Wiggin	Exford, Tiverton.
Lunesdale and Oxenholme	37	Mr. J. R. Heaton	Gatebeck, Kendal.
New Forest	25	Sir G. Thursby	New Park, Brockenhurst, Hants.
Norwich	24	Mr. J. A. Keith, Maj. R. W. Patteson	Barfield, Wymondham.
Quantock	25	Lt.-Col. Sir D. F. Boles	Barbrough near Taunton
Tiverton	20	Mr. J. Yandle	Duvale, Bampton, Devon.
Foxhounds (35 couples or more).			
Albrighton	40	Br. Gen. T. E. Hickman	Albrighton, Wolverhampton
Atherstone	50	Capt. E. Ramsden	Witherley, Atherstone, Warwickshire.

Beaufort's (Duke of)	70	Duke of Beaufort	Badminton, Glos.
Bedale	45	Mr. W. W. Boutdon	Low St., Bedale, Yorks.
Belvoir	60	Mr. C. Tonge and Mr. P. Akroyd	Belvoir, Woolsthorpe, Grantham
Berkeley	42	Earl of Berkeley.	Berkeley Castle, Glos.
Berkshire (Old)	43	Maj. J. L. Nickisson, Mr. A. P. Stevenson	Kingston, Abingdon
Berkshire (South)	45	Mr. G. Hargreaves	Purley, Reading
Bicester	60	Mr. H. M. Budgett	Stratton Audley, Bicester, Oxon
Blackmore Vale	56	Major J. W. Digby, D.S.O.	Charlton Horethorne, Sherborne, Dorset.
Blankney	40	Col. Willey	Blankney, Lincoln
Bracs of Derwent	50	Mr. L. Priestman	Tinklar Hall, Shotley Bridge
Bramham Moor	60	Viset. Lascelles, M.C., D.S.O.	Bramham Park, Boston.
Brocklesby	54	Earl of Yarborough and Lord Conyers, M.C.	Brocklesby Park, Lincs.
Cambridgeshire	50	Mr. D. Crossman and Mr. G. R. C. Foster	Caxton, Cambridge.
Cattistock	60	Lord Digby and Rev. E. A. Milne	Cattistock, Dorchester
Cheshire	60	Mr. W. M. Midwood	Sandiway, Northwich.
Cleveland	45	A Committee	Tocketts House, Guisborough
Cotswold	45	Capt. T. Colville	Ossage, Andoversford, Glos.
Cottesmore	50	Mr. W. J. Baird & Col. S. Green	Barleythorpe, Oakham, Rutland
Cowdray	50	Viset. Cowdray and Hon. Clive Pearson.	Cowdray Park, Midhurst.
Craven	35	Earl of Essex	Walcot, Kintbury.
Crawley and Horsham	44	Lt.-Col. R. W. McKergow	West Grinstead, Sussex.
Croome	45	Major W. Taylor and Col. Wiggin	Croome, Severn Stoke, Worcester
Dartmoor	50	Com. C. H. Davey	Woodlands, Ivybridge, South Devon.
Dorset (South)	45	Lt.-Col. R. G. S. Gordon	Bere Regis, Wareham.
Dulverton	50	Lord Poltimore	Court Hall, N. Molton.
Dulham (South)	40	Lord Southampton	Rockliff Park, Darlington.
Essex	50	A Committee	Harlow, Essex
Ferne's	43	Maj. H. A. Wernet	Great Bowden, Market Harborough
Fitzwilliam, The	54	Mr. G. W. Fitzwilliam and Earl Fitzwilliam	Milton, near Peterborough.
Garth	55	Lt.-Col. F. C. Barker	Bracknell
Glamorgan	45	Mr. R. H. Williams	Llandough, Cowbridge, S. Wales.
Grafton	50	Mr. V. D. S. Williams and Mr. A. E. S. Gunness	Wakefield Lawn, Stony Stratford.
Grove	40	Col. A. French Blake	Barnby Moor, Retford
Hambledon	45	Major E. F. Talbot Ponsonby	Droxford, Bishops Waltham.
Hertfordshire	50	Maj. T. Motion and Mr. W. H. Cooper	Knusbourne Green, Luton.
Heythrop	50	Lt.-Col. E. P. Brassey and Maj. D. St. G. Daly	Chipping Norton, Oxon.
Holderness	50	Col. Stracey Clitherow and Capt. A. Bethell.	Etton, near Hull.
Kent (E.)	40	Mr. H. W. S. Lowndes	Elham, Canterbury.
Meynell	50	Sir H. Nutting	Sudbury, Derby.
Middleton's (Lord)	50	Lt.-Col. M. Borwick, D.S.O.	Birdsall, Malton, York.
N. F. H. (New Forest)	40	Major G. Meyrick	Lyndhurst, Hants.
Norfolk (West)	45	Lt.-Col. C. D. Seymour	Wenenham, King's Lynn.
Notts, South	45	Mr. W. Filmer Sankey, M.C.	Gedling, Notts.
Oakley	45	Capt. E. F. W. Arkwright	Milton Ernest, Beds
Portman	45	Capt. W. P. Browne	Bryanston, Blandford.
Puckeridge	56	Messrs. M. and E. Barclay	Brent Pelham, Buntingford.
Pytchley	60	Lt.-Col. J. Lowther and Mr. R. L. Tree.	Brixworth, Northampton.
Quorn	60	Maj. A. Burrnaby	Barrow-on-Soar, Loughborough.
Somerset (West)	40	Lt.-Col. Sir D. F. Boles, Bart., C.B.E.	Curhampton, Taunton.
Southwold	46	Mr. J. W. Ramsden	Belchford, Horncastle.
Staffordshire (North)	43	Mr. J. Cadman and Capt. F. R. Haggie.	Trentham, Stoke-on-Trent.
Taunton Vale	50	Col. W. H. Speke	Henlade, Taunton.
Tynedale	50	Mr. J. C. Straker	Slaggaw Bank, Corbridge.
Warwickshire	83	Maj. N. H. Huttenbach	Kineton, Warwick.
Worcestershire	52	Mr. A. Jones, O.B.E.	Fernhill Heath, Worcester.
York and Ainsty	48	Capt. H. Whitworth	Acomb, York.
Zetland	45	Mr. H. Straker & Lord Barnard	Manfield, Darlington.
Scotland.			
Buccleuch's (Duke of)	58	Duke of Buccleuch, K.T., and Earl of Dalkeith	St. Boswells, Roxburghshire.
Dumfriesshire	40	Sir J. W. Buchanan Jardine	Glenholm, Lockerbie.
Eglinton's (Earl of)	53	Maj. J. A. Coats	Earlston, Kilmarnock.

THE first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801 for a line 9½ miles long from Wandsworth to Croydon. During the following 47 years parliamentary sanction was granted for construction of thousands of miles of railways and was known as the "railway mania" period.

The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening, for returns of traffic to be made by the companies, as also of accidents involving personal injury, for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session.

The Cheap Trains Act, 1883, amended by the Finance Act, 1921, provides that fares not exceeding the minimum fare shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. On all other fares a duty of 2 per cent is charged between stations within one urban district. Such district shall contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character. Outside this area the duty payable is 5 per cent. The expression "minimum fare" means the lowest fare normally charged to an adult or a child, as the case may be, for a single, a return, or a periodical ticket, as the case may be, for any journey, and the expression "normally charged" means charged otherwise than to a special class of passengers or on a special occasion.

Officers or men in the military or police forces, when travelling on public service, are charged three-fourths or one-half of ordinary passenger rates, according to number travelling. The Act does not extend to Ireland.

Hiring of Special Trains.—The charges per mile for hire of special trains are 10s. Single and 15s. Return, plus the ordinary fare for each passenger according to class of vehicle hired. Minimum £6.

The Workmen's Compensation Act, 1897.—This Act, which received the Royal assent on Aug. 6, 1897, came into operation on July 1, 1898.

The Railways Act, 1921, which received the Royal assent on Aug. 19, 1921, amalgamated all railways in Great Britain (with a few exceptions) into four groups, viz., Great Western, L. & N.E., London Mid. & Scottish, and Southern. Details of this Act are given in previous editions of Almanack.

Irish Free State Railways Act, 1924 (Acht Na Bothai Iarainn, 1924), dated July 23, 1924. The Act in general corresponds very closely to the British Railways Act of 1921. Details of this Act are also given in previous editions of Almanack.

FINANCES OF BRITISH RAILWAYS IN 1913, 1926-1927.

Grand Total, all Staff...	677,148	683,077

THE RAILWAY CLEARING HOUSE.

This Institution was opened in Jan. 2, 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c., are arrived at. *Chairman*, Sir E R Tutton, M P; *Secretary*, P. H. Price, C B E. *Offices*, Seymour Street, N W.

IRISH RAILWAY CLEARING HOUSE

The Irish Railway Clearing House occupies much the same position to the railway system of Ireland as the (London) Clearing House does to the railways of Great Britain It was established July 1, 1848 *Chairman*, Sir Walter R. Nugent, Bt., *Secretary*, W E Richardson, *Offices*, 5 Kildare Street, Dublin. Employees number 170

INDIAN RAILWAYS IN 1926-1927.

The construction of Railways in India commenced in 1853 The mileage opened from 1853 to 1880 inclusive was 9·166, an average of 327 miles a year From 1881 to 1925, 29,052 miles were opened, an average of 645 miles a year.

1.—ANALYSIS OF OWNERSHIP AND OPERATION OF INDIAN RAILWAYS

The following summary sets forth route mileage, gross earnings and working expenditure as on March 31, 1927, according to official classification of ownership and working and other arrangements in force

	Route Mileage	Gross Earnings	Working Expenses
	Miles	Rs (Thousands)	Rs (Thousands)
State Lines worked by the State	13,548 92	57 14 94	38 46 66
State Lines worked by Companies	14,315 33	41 47 24	23 92 69
Branch Lines Co.'s Railways under Guarantee Terms—			
Worked by Branch Line Company	177 93	10 12	7.99
Worked by the Main Line	114 65	13 41	6 84
Branch Line Co.'s Railways under Rebate Terms	2,067 24	2 51 27	1 28 72
Branch Line Companies' Railways under Guarantee and Rebate Terms	166·60	17 39	9 12
Companies' Lines subsidised by Government of India	1,983·52	2 72 05	1.16.16
Companies' Lines subsidised by Local Governments	137·02	46 46	26.95
Guaranteed Companies' Lines	69·70	4 15	3 31
District Board Lines	271 27	39 86	22 25
Companies' Lines subsidised by District Boards	305·93	37 70	22 58
Indian State Lines worked by Indian States	3,153 19	2 59 24	1.77 20
Indian State Lines worked by the Main Line	1,890 39	2 14 21	1.23 82
Companies' Lines guaranteed by Indian State	754 47	1 81 44	70.35
Lines in Foreign Territory worked by British Indian Railway Companies	73 60	25 48	14 98
Miscellaneous	19.12	70	46
Grand Total (all Railways)	39,048·88	1.12 35 66	69 70 08

2.—INDIAN RAILWAY CLASSIFICATION

For statistical purposes, Indian Railway systems have been classified under three classes:—

CLASS I. Railways with gross earnings of Rs. 50 lakhs and over a year

CLASS II. Railways with gross earnings of less than Rs. 50 lakhs a year, but exceeding Rs. 10 lakhs a year.

CLASS III. Railways with gross earnings of Rs 10 lakhs and under a year

Below is a detailed list of the railways in each class.—

CLASS I.

Assam-Bengal.
Bengal and North Western.
Bengal-Nagpur
Bombay Baroda and Central India.
Burma.
Eastern Bengal
East Indian.
Great Indian Peninsula.
Jodhpur.
Madras and Southern Mahratta
Nizam's Guaranteed State.
North Western (Commercial).
North Western (Military).
Rohilkhund and Kumaon.
South Indian

CLASS II

Barsi Light.
Bengal-Dooars.
Bhavnagar State.
Bikaner State.
Darjeeling-Himalayan.
Dibru-Sadiya.
Gackwar's Baroda State.
Gondal.
Howrah-Amta Light.
Jamnagar and Dwarka.
Junagad State.
Morvi.
Shahdara (Delhi) Saharanpur Light.
Mysore (including Birur-Shimoga, Chickjajur - Chital - drug, Mysore-Bangalore, Mysore - Nanjangud and Nanjangud Chamvajanagr Rys.).
Mysore-Nanjangud Rys.

CLASS III.

Aden.
Ahmadpur-Katwa.
Arakan Light.
Arrah-Sasaram.
Bankura-Damodar River.
Barasat-Basirhat Light.
Bengal Provincial.
Bakhtiarpur-Bihar Light.
Burdwan-Katwa.
Cutch State.
Delhi-Rohtas Light.
Dholpur-Bari.
Futwah-Islampur.
Gwalior Light.
Howrah-Sheakhala Light.
Jagadhri Light.
Jamnagar and Dwarka.
Jessore Jhenidah.
Jorhat (Provincial).
Kalighat-Falta.
Kolar District (including Bangalore - Chick Ballapur Light Ry.)
Kulasekarapatnam Light
Porbander State
Tarikere Narasimharajapura Light.
Tezpore-Balipara Light.
Trelvellore Light
Udaipur-Chitorgarh.

3. INDIAN RAILWAY MILEAGE.
Open on March 31, 1927.

4.— Government of India Railway Department (Railway Board).

Member of Council of Governor-General, The Honourable Sir Charles Innes, K.C.S.I., C.I.E., I.C.S.
Chief Commissioner of Railways, Sir Clement Hindley.
Financial Commissioner, Railways, A. A. L. Parsons, C.I.E., I.C.S.
Members, Sir Austen Hadow, C.V.O., and P. C. Sheridan, C.M.G.
Government Director of Indian Railway Companies, W. Stantiall, C.I.E.*
Director, Civil Engineering, A. Lines.
Director, Mechanical Engr., A. J. Chase, O.B.E.
Director, Establishment, S. D. Gupta, M.B.E., M.A.
Director, Traffic, H. C. Sparke.
Director of Finance, A. M. Hayman, O.B.E.
Secretary, J. C. Highet.
Deputy Secretary, J. Kaul.
Temporary Officer, Programme, J. F. Blackwood.
Deputy Director, Stores, H. Jackson.
Deputy Director, Statistics, B. Moody.
Deputy Director, Finance, P. R. Rau.
Asst. Director, Finance, Rai Bahadur B. D. Puri.
Assistant Director, Finance, R. J. M. de Lange.
Assistant Director, Statistics, Gopal Nath Mehra.
Chief Superintendent, E. C. Randlett.
Technical Officer, A. F. Harvey.
Timber Advisory Officer, R. G. Marriott.
Accountant-General, Railways, J. M. Hartley.
Deputy Accountants-General, L. S. Puri, M.A., and Dewan Bahadur.
Assistant Accountant-General (Railways), Rai Sahib S. N. Palit.
Government Inspectors, Lt.-Col. C. J. Clarke, E. B. Beatson, R. R. Byron, W. V. Butcher, W. A. Buyers, T. Neilson, Col. H. G. C. Cowie, C.B.E., D.S.O., E. L. Manley.

* Address: India Office, Whitehall, S.W.1. All others [illegible] India.

INDIA OFFICE
(Railway Section, Financial Department).
Whitehall, London, S W 1.
Secretary (Financial Department), C. H. Kisch, C.B.
Staff, R. Mowbray, C. W Shepheard

Railway Adviser and Government Director of Indian Rly Companies, W Stantiall, C.I.E.*
Consulting Engineers, Messrs. Rendel, Palmer and Tritton.

* Address—India Office, Whitehall, S W 1. All others at Simla, India

ALPHABETICAL LIST OF ENGINEERS AND SOLICITORS OF BRITISH & IRISH RAILWAYS*

(*continued from page* 910).

Railways	Engineer	Solicitors
Belfast & County Down	P A Arnott, C E	E & R. D Bates.
Cheshire Lines Committee	A P. Ross	Beale & Co.

The League of the Empire (Founded 1901).

The League is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The relation of the League to the Education Departments and Governments throughout the Empire has been regularised (*a*) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902-3, (*b*) by the active and widespread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Overseas Governments. One of the effects of this Conference was that the Imperial Government undertook to call the Imperial Conference on Education in 1911. In 1912 the first Imperial Conference of Teachers' Associations was held by the League, and in 1913 was inaugurated the Imperial Union of Teachers. In 1921 an Imperial Conference of Teachers' Associations was held in Toronto; in 1924 another was held in London. A Congress was held in Paris in 1926 in co-operation with French authorities, and first Franco-British Congress in London, 1928. The League, through the liberality of the late Mr. Louis Spitzel, has published a series of text-books on the Empire, under the editorship of Professor A. F. Pollard (1) "The British Empire: Its Past, Its Present, and Its Future" (a book of reference), (2) "The British Empire and Its History" (for Secondary Schools), (3) "The Story of the British Empire." In 1907 the League helped to establish a lace industry in St. Helena. With the co-operation of the Overseas and Home Education Authorities a Scheme for the interchange of Teachers throughout the Empire is now in active operation, over 1,000 interchange appointments have already been arranged. Visits to historical places in England and on the Continent are planned for overseas teachers. The School Affiliation and Comrades' Correspondence Sections were established in 1921. Other work undertaken is the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and a further ing of the keeping of Empire Day.

During the War the League distributed from its depot over a million articles to the hospitals and troops, besides helping prisoners and others in distress. The League has also given colours and shields to all the overseas contingents who fought for the Empire.

Hon. Pres., H.R.H. The Duke of Connaught, K.G.

Chairman of the Council, Montague J. Rendall, M.A., LL.D. (late Headmaster of Winchester College).

Chairman, Executive Committee, Prof. E. A. Gardner, M.A., LITT.D. (late Vice Chancellor, London University).

Hon. Treasurer, The Lord Askwith, K.C.B.

Hon. Secretary, Mrs. Ord Marshall, C.B.E.

Address, 124 Belgrave Road, London, S.W.1.

CIVIL LIST PENSIONS, 1927 28.

A list of Pensions granted during the year ended March 31, 1928, under the provisions of the Civil List Act, 1910.

MRS EVA MORRIS-AIREY, in recognition of the services rendered by her husband, the late Mr. H. Morris-Airey, in furthering the cause of science and the development of wireless telegraphy .. £100

LETTERPRESS PRINTING.

NO other trade or craft holds so high and honourable a position as that attained by printing in modern times. No other power is comparable to that of the printed word.

And no other name stands for sounder reputation and more solid achievement in the annals of British printing than that of Clowes.

The house of William Clowes & Sons was founded in 1803 by a young man, William Clowes, who was just out of his apprenticeship. He came from Chichester, but decided to make his adventure in London, and accordingly opened up on his own account in Villiers Street, Strand, with a capital of £350.

From the first the business was progressively successful. The just enough of type for one day's work, which compelled him at the beginning to run off on the hand press at night what he had set during the day, so as to release the type for further service, was very speedily multiplied. His single press and one journeyman printer as assistant were soon inadequate to the requirements of a rapidly growing business.

Before very long, larger premises in Northumberland Court, Charing Cross, were taken. The work turned out—small jobbing orders at the outset—came to include the printing of Government papers and of books and periodicals for such publishers as John Murray, Longmans, and the Religious Tract Society, for which the firm still print to this day

The printing of newspapers by steam presses was introduced into the *Times* office in 1814. William Clowes & Sons were the first to adopt steam-driven machines for book and general printing. This new departure created a sensation, and a succession of distinguished visitors came to Northumberland Court to see the new mechanical wonder.

It was this first steam press that caused William Clowes to move to Blackfriars—for the Duke of Northumberland objected to its proximity—where in Duke Street, Stamford Street, he established himself at an address which is still the headquarters of this firm, though the premises occupied have of course multiplied and extended themselves amazingly since then.

Twenty years after its modest foundation the printing works of William Clowes had become one of the sights of London to all interested in industrial organisation. They even furnished material for a long and laudatory article in the exclusive *Quarterly Review*.

William Clowes & Sons were entrusted with the printing of the famous Mulready envelopes under the strict supervision of the Post Office.

In going through old files of the firm's correspondence there are many letters from Charles Dickens, whose novels were printed for Messrs. Chapman & Hall by Clowes & Sons. When any of his books were in course of publication (and it may be recalled they were issued in fortnightly and monthly parts), Dickens visited and spent long days at the Duke Street printing works correcting his stories in proof.

When the Great Exhibition of 1851 was being organised, Messrs. Clowes were approached by the Commission to undertake the printing of catalogues and all other matter. The task was a tremendous one, involving as it did the printing of volumes of no lower than 5,000 pages. It was necessary that the whole matter should be standing in type at the same time—a strain on their resources of type which few firms could withstand even to-day.

Besides the Great Exhibition, Messrs. Clowes carried out the printing in connection with all the South Kensington Exhibitions.

When members of the legal profession—both barristers and solicitors—were extremely dissatisfied with the manner in which proceedings in Court were reported, the lawyers formed a committee with the object of providing their own reports, and Mr. George Clowes, of William Clowes & Sons, was consulted. When the project seemed unable to be carried on through lack of capital, the firm offered to finance the publication to the extent of £10,000. The offer was accepted, and from the issue of the first volume the accuracy of the reports and excellence of printing assured the success of the scheme. Perhaps, however, the largest undertaking of all was the printing of the British Museum Catalogue, which took twenty seven years to do, and was full of foreign type.

As long ago as 1873 the firm had so outgrown its premises in Duke Street (in spite of the fact that neighbouring warehouses were being rented for storing paper and printed sheets), that a branch works was established at Beccles, Suffolk. Equipped with the latest type of electrically-driven machinery, this now constitutes one of the largest book-printing establishments in Great Britain.

The relief of pressure on the London works was only temporary, and increasing business necessitated, in 1887, the renting of additional land at Duke Street, where another building was erected. On the expiry of the lease of the original premises in Northumberland Court, this branch of the firm was transferred to more commodious premises in Great Windmill Street, Piccadilly Circus, where the smaller orders from West End customers are executed.

In combination with its capacity to print in any language, the firm has proved itself of inculculable advantage to British merchants and manufacturers by enabling them to translate and produce catalogues, labels, price lists, etc., for any country.

Long ago as they were established, Clowes have never allowed themselves to become old-fashioned in ideas or equipment. They have always been among the first to utilise the intermittent stream of new mechanical and other devices that have from time to time revolutionised print-craft on its technical side; and to-day as modern printers their several establishments stand second to none.

All the World over—

IN whatever corner of the earth your market may be, whatever may be the language of its people, we can produce effective printing for you in the language of that country.

There is no language in the entire world in which we have not printed from moveable type.

No organisation in the world can equal our service in this direction.

If you require advice on your printing, write to us about it.

WHITAKER'S LIST OF SCHOOLS AND CLIMATES

METROPOLITAN SECTION.

CHARING CROSS

(London) has lowest death-rate of all the great capitals; its general healthiness compares favourably with England and Wales: residential advantages are relative evenness and mildness.

CHARING CROSS HOSPITAL MEDICAL SCHOOL

(UNIVERSITY OF LONDON).

The most central of all the University Schools, immediately accessible by Train, Tram, Tube, and 'Bus.

Courses of Study arranged to meet the requirements of all the Examining Bodies.

Low Inclusive Fees.

For Prospectus and full information apply personally or by letter to the Dean—

F. H. YOUNG, M.D., M.R.C.P.,
Charing Cross Hospital Medical School,
London, W.C. 2.

DULWICH, S.E.,

is one of the most attractive residential suburbs of London, for although only 12 miles from the City, it is still an old-world village, with charming walks and drives. Southern Railway.

GIRLS.

BEDFORD COLLEGE

OF DANCING AND PHYSICAL CULTURE.

5, KINGSWOOD ROAD, Dulwich, S.E. 19.

Principal - Miss MILDRED BULT.

Premises.—Detached, in own grounds.

Thorough training for the profession of Teachers of Dancing.

Music, Art, Literature, Gymnastics, Fencing and Dramatic Art.

Special Department for Children. General Education undertaken.

Entire charge where Parents abroad.

Prospectus and fees on application.

METROPOLITAN SECTION (*continued*).

LONDON, W.

London possesses excellent health statistics and has the lowest death-rate of all the great capitals The public parks rival those of all other cities. *Accessible* to all the national educational institutions.

GIRLS.

Previously known as—

THE CIVIL SERVICE DEPARTMENT OF KING'S COLLEGE, LONDON.

Founded by the late Mr. W. BRAGINTON, M.A., F.K.C.

A link between the Schools and the Civil Service or Business Life. Day and Evening Classes for Civil Service Examinations and for Secretarial Work for Women and Girls. Correspondence Classes for all Male and Female Civil Service Examinations. Hostels in London available.

For Prospectus and List of Successes, address—

MISS BRAGINTON, M.A., ST. GEORGE'S COLLEGE, RED LION SQUARE, W.C. 1.

PROVINCIAL SECTION.

ALDERLEY EDGE

(Cheshire). **The Medical Officer of Health writes:**—"Climate mild. Well-wooded country. The Urban District comprises partly the level Cheshire plain and partly the 'Edge,' a hill-rise to the height of 600 feet. Subsoil sandy."

BOYS AND GIRLS.

THE COLTHURST HOUSE SCHOOLS,

WARFORD, near ALDERLEY EDGE.

FOR BOYS AND GIRLS SUFFERING FROM EPILEPSY.

Children are given the most careful medical supervision, taught ordinary school subjects by qualified teachers, play all the usual games, and thoroughly enjoy life. They have the best chance that can be given them of developing [illegible] lines and becoming eventually well-educated healthy men and women.

ASHBURTON.

The Medical Officer of Health writes:—"Ashburton is 300 feet above sea-level and has an excellent water-supply. The drainage is satisfactory. The climate is healthy, and its proximity to Dartmoor renders it more bracing than most parts of South Devon."

BOYS AND GIRLS.

THE GRAMMAR SCHOOL, ASHBURTON, SOUTH DEVON.

(Founded 1314.) Close to DARTMOOR.

Head Master: HENRY NAYLOR, M.A. (Queens' Coll., Camb.)

Premises.—300 feet above sea-level. Chemical and Physical Laboratories, Workshops, Domestic Science Room, Gymnasium. Possesses the oldest schoolroom in England. Senior and Junior Boarding Houses. Girls' Boarding House. 16 acres of playing fields. Large new House opened by Rt. Hon. Lord Eustace Percy, M.P., on May 31, 1928.

Preparation for various professions and occupations, Civil Service and Universities, Scholarships and Exhibitions. Organised Games.

Entire charge where Parents abroad.

Fees.—£16 5s. 6d. to £22 3s. 4d. per term.

ASHFORD

(Kent). The Medical Officer of Health writes:—"A market town with large cattle market, situated in East Kent on River Stour, 14 miles S.W. of Canterbury and 54 miles from London, Southern Railway Open air swimming bath General and zymotic death rates low." Golf, 18 holes. To the lover of natural history Ashford offers a rich and varied field. Pop. 14,355.

GIRLS. **HIGH SCHOOL FOR GIRLS.**

Principal - Miss BRAKE.

Recognised by the Board of Education as an Efficient Private Secondary School.

Buildings. Spacious Tudor residences. Modern sanitation. Charming old-world gardens. Lawns and playing fields 18 acres in extent. Gymnasium. *Aim.*—To provide on Public School lines thoroughly efficient education in cultured Christian atmosphere.

School Course includes preparation for University Examinations and Scholarships, Drawing, Class Singing, Drill, Needlework, Organised Games, Dancing, and Singing. Preparatory House for little girls under 11.

Fees.—25 to 31 guineas per term.

Entire charge taken.

Swedish Drill, Hockey, Cricket, Tennis, Riding, Cycling.

Fees Moderate and Inclusive.

ASHFORD

(Middlesex). The Medical Officer of Health writes: "The town of Ashford, Middlesex, is pleasantly situated in a rapidly growing residential district, with a good train service to London. It is built mainly on a gravel subsoil, and statistics show that the health of the inhabitants is good."

GIRLS. **SHEEN COLLEGE.**

Principal - Miss M. W. DICKENS, A.T.C.L.
(Registered Teacher).

Premises.—Large and airy house built on gravel soil, pleasantly situated. Large garden and playing field.

Aim.—To combine a thorough education, based upon modern principles, with comforts of home. Careful attention paid to health. Diet liberal, varied, and wholesome.

Pupils prepared for Oxford and Cambridge Locals, etc.

Commercial Course for elder girls after a good general education.

Entire charge if desired.

Fees.—17 guineas per term.

ASHTEAD.

A healthy elevated Surrey village and rural residential district between Epsom and Leatherhead, 16 miles from London. Ashtead Woods, once a Saxon forest, are common lands. Surroundings are similar to Leatherhead, 2 miles

GIRLS. **PARSONS MEAD.**

Premises.—Three houses in beautiful grounds with orchard, playing field and 6 tennis courts (one hard).

Physical Training and well-being of pupils of primary importance. Over-pressure avoided Music, Art and Languages special features. Individual character and abilities carefully studied Illustrated lectures.

Literary and Debating, Choral and Dramatic Societies run by the pupils

Physical training and games under resident mistress.

Entire charge where Parents abroad.

For Illustrated Prospectus apply Principals.

Fees.—50 guineas per term

BARNSTAPLE

(Devon), situated on the Taw, is noted for its mild and equable climate. It is exposed to the sea breezes from the W. Has a rainfall below the average. There are no fogs, and the winters are particularly mild.

BOYS.

WEST BUCKLAND SCHOOL,

BARNSTAPLE.

Head Master - Rev. E. C. HARRIES, M.A

A Public School for Professional and Middle-Class People Fees.—£66 per annum.

BIRCHINGTON

(Kent). Quiet sunny resort on North Kentish coast, 3½ m. W. of Margate. Elevated position; soil, sand and marl; good bathing; climate beneficial for all cases requiring bracing air and equable temperature. Pop. 3,503. Southern Rly.

BOYS.

BIRCHINGTON HOUSE.

PREPARATORY FOR PUBLIC SCHOOLS AND ROYAL NAVY.

Principal—

C. A. SEYMOUR SEWELL, M.A. (Cantab.)

Premises.—In own grounds overlooking the sea and golf links.

Aim.—To give a sound educational foundation, with health the first consideration. Small classes. Individual attention.

Curriculum.—Based upon requirements of the Common Entrance Examinations.

Games carefully coached. Daily physical drill.

Entire charge where Parents abroad.
Fees upon application.

BRIGHTON.

The Medical Officer of Health writes:—"The climatic conditions of health resorts on the Sussex coast combine the bracing qualities of the East coast with a larger amount of sunshine. It is because of these climatic advantages that parents are well advised to send their children, robust or delicate, to school or for holiday, to Brighton. On an average extending over a period of 35 years Brighton had 19 per cent. more sunshine than Kew; in the winter months, when sunshine is most important, the excess was as much as 32 per cent. I advise Brighton for its tonic effects on persons tired or run-down, mentally or physically. Children suffering from rickets, enlarged glands, and joint tubercle do well." Pop. 142,427. Southern Railway. Sunshine (1927), 1,629 hours.

Preparation for Matriculation, Oxford and Cambridge Locals, Royal Drawing Society and Associated Board of Royal Academy of Music for Piano and Violin.

Fees—18 to 20 guineas per term inclusive. Music and Dancing extra.

Care of small boys.

CANTERBURY.

The Medical Officer of Health writes:—"Canterbury is an exceptionally healthy city. Its equable temperature, sunny aspect, low rainfall, full water-supply, low death-rate, and excellent drainage make it a desirable health resort."

[*See* p. xciv for HOLIDAY GUIDE.

GIRLS. **ST. HELEN'S SCHOOL,**

Pinecroft, Barton Fields, Canterbury.

Principals - { **Miss W. GERMAN, L.T.C.L.** (First Class Honours R.U.I.) **Miss P. GERMAN.** (Inter Honours, R U I.)

Premises—In own grounds on a height overlooking the city. Electric light. Tennis and croquet lawns. Paddock.

Entire change when desired

Illustrated Prospectus from—

Mrs. LITTLEHALES, Principal.

LOWESTOFT.

The Medical Officer of Health writes —"The Borough of Lowestoft stands on the most easterly point in the British Isles, receiving a large amount of sunshine and a very small rainfall. From its position the town is naturally exposed to the easterly winds, but, speaking generally, the climate is good The constantly increasing influx of visitors shows that Lowestoft is every year becoming more and more popular as a health resort"

GIRLS

ST. CHRISTOPHER'S, P.N.E.U. SCHOOL,

NORTH PARADE, LOWESTOFT.

Principal - - - Miss ROSE

Assisted by a Graduate of the London University, a fully qualified Drill and Games Mistress, and others

A few boarders taken so as to ensure individual care and attention.

Fees.—From 25 guineas per term.

MALVERN

(Worcester). The Medical Officer of Health writes:—"Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The hills, which rise to an altitude of 1,400 feet, are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water-supply is bountiful and of great purity." Pop. 17,809. [*See* p. xcvm for HOLIDAY GUIDE

BOYS.

THE SCHOOL, MALVERN LINK.

Successes and Honours Certificates gained in Oxford and Cambridge Locals, Associated Board of R.A.M. and R.C.M., and Royal Drawing Society, etc.

Modern Languages taught conversationally

Prospectus on application to Principal.

MARGATE.

The Medical Officer of Health writes: "Margate (Kent) is so situated that it is exposed to sea breezes from all quarters except the west. The town is built between two valleys, and, owing to this and the general undulations of the ground, it is exceptionally favoured as regards surface drainage. The streets, except in the lower and older parts of the town, are well laid out, and there are numerous large open spaces, the sea breezes are thus able to circulate freely in all parts of the town. The drainage is of the most up to date construction, and there is an excellent water-supply. During the present year Margate stood at the top of seaside resorts for sunshine, and it is generally thought to be very rich in ultra-violet rays."

GIRLS.

CLIFTONVILLE HIGH SCHOOL,

MADEIRA ROAD.

Principal:

Miss MURIEL STOCKMAN, A.L.C.M.

Premises.—Excellently situated, with a wide prospect over open country. Large garden and lawns.

The rapid growth of Bexhill is to be attributed to its bracing air and sunny climate, and it has been found that the air possesses recuperative and stimulating qualities in a remarkable degree. It is one of the sunniest spots on the South Coast, fogs are practically unknown, while the soil is for the most part sandy, and dries quickly after rain. [*See* p. lxx for SCHOOLS.

LYMINGTON,

HAMPSHIRE Pop. 4,598 Southern Railway 97 miles from London **Situation** On the south-west coast of Hampshire, on the edge of the New Forest. Summer and winter resort. Yachting, fishing, boating, tennis.

THE ESTATE AGENTS AND AUCTIONEERS for Lymington, New Forest, and Milford-on-Sea are LEWIS & BADCOCK, High Street, Lymington. Also Removals and Warehousing. Telephone, 93.

MALVERN,

WORCESTERSHIRE U.D.C. 119 miles from London. Pop. 17,809. **Means of Access** G.W. Railway and L.M. & S. Railway. **Location** On the slopes of the Malvern Hills 8 miles from Worcester. **Elevation** 300 to 900 feet above sea-level **Climate** Dry and bracing. **Water Supply** Pure, constant. **Drainage** Modern. **Soil** Gravel. **Season** Summer and winter **Annual Fixtures** - Shakespeare Week in May; Croquet and Lawn Tennis tournaments in May and June. Malvern is an inland watering-place, important educational centre, and a pretty residential town, consisting mostly of villas standing in own grounds. The highest point of the Malvern Hills is the Worcestershire Beacon, 1,400 feet high, from the summit of which is obtained one of the most extensive panoramic views in Great Britain, embracing the Severn and Wye Valleys, the Cotswold, Mendip and Welsh hills; and in the plain below can be seen Droitwich, Worcester, Evesham, Cheltenham, Gloucester and the Bristol Channel. **Sunshine (1927), 1,333 hours**

The Malvern Hills being a single chain, there are no lateral intervening valleys in the range. This has much to do with the dryness of the climate. The Malvern district is rich in botanical, geological, entomological and ornithological specimens. Assembly rooms (high class bands and theatrical companies), public library, three clubs, tennis, bowls, croquet, golf gentlemen's course (18 holes), ladies' course (9 holes) hunting, boating, fishing. **Places of Interest** Rivers Severn (4 m.), Teme (6 m.), Avon (12 m.); boating, fishing, river scenery. Beckhurst (17 m.) Saxon church. Tewkesbury Abbey (15 m.). Pershore Abbey (16 m.). Bosbury (8 m.) Edna Lyall's tomb. Valley of the Wye—by rail to Liss, and boat down river to Chepstow.

[See p. lxxx for Schools.

HOUSE, LAND AND ESTATE AGENTS, AUCTIONEERS, SURVEYORS AND VALUERS, ROBT. FROST & SON, F.A.I., 5, Regent Street, Teignmouth. Telephone, 89. Particulars of all local properties on application.

TONBRIDGE,

KENT. Pop. 15,929. Southern Railway. 29½ miles from London. Situated on the banks of the Medway, surrounded by some of the loveliest and most varied scenery. Golf (9 holes), hunting, tennis, cricket.

HOUSE AGENT, AUCTIONEER, VALUER, AND STOCK AND SHARE BROKER. For Furnished or Unfurnished Houses to Let or for Sale, or to Buy or Sell Stocks or Shares, whether quoted or not, apply ERNEST SANDERSON, F.A.I., 174, High Street. Telephone, 139.

TORQUAY,

DEVON M.B. Pop. 39,432 **Means of Access**—G.W. Railway. 199½ miles from London. **Location**—S.E. coast of Devon, in the N. recess of Torbay. 25 miles S of Exeter. **Neighbourhood**—Cliffs and hills. **Sunshine** (1927), 1,650 hours. **Climate**—Mild, soft, equable; luxuriant vegetation. **Water Supply**—From Dartmoor; constant, soft. **Drainage**—Modern. **Soil**—Limestone. **Front**—Ornamental promenades and marine drive. **Pier**—1,500 feet, pavilion, skating rink **Beach**—Sand and shingle **Baths**—Corporation (fresh and salt water), Nauheim and Vapour Baths, Radiant Light and Heat, High Frequency and Diathermy Treatments, All Electric Baths, Plombières-Intestinal Douche, Torquay Seaweed Baths, Aix and Vichy Douche, Massage, Peat Baths, Turkish Baths. **Excursions**—Rail and river, coaching and marine.

In a curve of Torbay, on a peninsula between the Rivers Dart and Teign, Torquay is built on seven hills, the highest reaching 400 feet, sheltered N. and E; lower part is built round harbour (enclosed by quay and piers), the houses rising behind in tiers, affording choice of elevation. A fashionable, high-class watering-place, favourite resort for the delicate, and popular winter residence; claims to be warm in winter and cool in summer. Its peculiar charm is the matchless combination of sea coast, wild moorland and beautiful valleys. Good yachting facilities in harbour, and safe anchorage in bay. Convenient centre for excursionists over Dartmoor.

BEACON HOUSE PRIVATE HOTEL. Central, overlooking Torbay. Level with Medical Baths. Separate Tables. Excellent Cuisine. Tel., 3731

MARSDEN LODGE, Morgan Avenue. Board Residence. South Aspect. Central Heating. Telephone, 2411. Both Houses under personal supervision. Mrs. COOMBES CROSSLEY, Inclusive Terms at both Houses. and Mrs. C. M. CROSSLEY.

WINCHESTER,

HAMPSHIRE Cathedral City. Pop. 23,591. Southern and G.W. Railways. 60 mls. from London. The old capital of Wessex is full of historical tradition.

Noted for its College and Cathedral Golf links (3 courses, 18 holes)

CHERNOCKE PRIVATE HOTEL. Quietly situated in own grounds, near Cathedral, College, and Barracks. Centrally heated throughout. Excellent Cuisine. Moderate Inclusive terms. Garage. Telephone, 221 GILBERT LI DEORD, Proprietor.

WORTHING,

SUSSEX M.B. Pop. 35,224. Southern Railway. 61 miles from London. Aspect South. Climate Dry, mild, equable. Sunshine (1927), 1,731 hours. Water Supply Constant, from the hills. Drainage - Modern. Soil - Loam and marl. Beach Safe level sands with plenty of shingle. A select seaside resort, residential town and winter haven for invalids, protected from the north by the South Downs, which rise in breezy uplands some little distance inland, its great charm being that it has developed into a modern seaside town without losing much of its rural aspect; much foliage and sylvan surroundings. Homefield Park, 26 acres (cricket, tennis, bowls); Steyne Gardens, 3 acres, Broadwater Green; Victoria Recreation Ground, Beach House Park (hard tennis courts and Cumberland turf bowling greens), Denton Gardens (golf putting contests), Golf links (two 18-hole courses). Hunting, boating, fishing. Places of Interest: Arundel (10 m.), Bramber Castle (9 m.), Goring Woods (3 m.), Broadwater (1 m.), 13th century Church, Chanctonbury (7 m.) (800 ft.), Cissbury, and other remains of Roman encampments.

THE IDEAL RESIDENTIAL TOWN TWIXT SEA AND DOWNS.

UNSURPASSED FOR SUNSHINE AND EQUABILITY OF CLIMATE.

Worthing is noted for the equability of its climate, which is largely due to its geographical situation. The proximity of the sea and the shelter afforded by the South Downs combine to modify the climate and avoid extremes. The absence of hills enables convalescents to take exercise without exertion, and so derive the greatest benefit from the high percentage of ozone in the air and the large amount of sunshine. A palatial Pavilion at the Pier entrance and a commodious Bandstand Enclosure on the Parade have been added to the town's many attractions. An all-the-year orchestra plays in the Pavilion.

EXPRESS SERVICE (PULLMAN CARS) to LONDON, 78 minutes.

[*See* p. lxxxix for SCHOOLS.

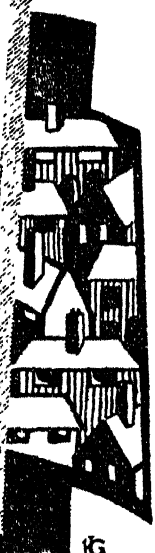
SOUND PROGRESS

For 79 years the Assets of the Burnley Building Society have been steadily increasing. Members' interests are continuously safeguarded by an investment policy which never involves undue risks. Deposits may be placed with a knowledge of perfect security. To purchasers of property generous advances are offered on the simplest terms. Write for our Free literature.

Assets exceed £5,500,000
Reserves exceed £380,000

The BURNLEY BUILDING SOCIETY

12, GRIMSHAW STREET, BURNLEY
Manager: WALTER HARVEY



5% TAX FREE. Many people regard a Building Society only as an organization for promoting the purchase of houses on the instalment system.

Comparatively few realize what a splendid means of investment and saving a Building Society affords.

In this Society 5 per cent., free of Income Tax, is paid on Shares of £25, and on each completed £1 of subscriptions of 5s. or more a month. Withdrawals are paid promptly and without deduction.

In this Society's experience no member has ever lost one penny of either principal or interest.

ABSOLUTELY SAFE.

FOR LIFE ASSURANCE

The Australian Mutual Provident Society is mutual. That is to say, all divisible Surplus, without deduction, belongs to the Policy-holders themselves and is distributed yearly. Moreover, the Society, established in 1849, has been for many years the largest and most prosperous British Mutual Life Office Why is this? Because it offers to Assurers the Acme of Security and Profit, and because its satisfied members are its best advertisement. Why are policies with the A.M.P. Society so profitable? Because while its premium rates are below the average, it possesses in a unique degree the combination of a low expense rate, a high interest return, and a favourable mortality experience. The A.M.P. Society should be covering you. You will be sent full particulars on application. Please mention this publication.

EVERY YEAR A BONUS YEAR.

Assets (1927): £70,000,000. Annual Income: £10,000,000.

DOUBLE YOUR INCOME

ELIMINATE RISK.

Every person whose income is derived from investments knows how harassing is the anxiety entailed by the constant rise and fall in their value

You can get a guaranteed income for life if you purchase a Canada Life Annuity. It is, humanly speaking, equivalent in safety to a Government pension It cannot shrink. What you contract to get is paid you punctually And you get a much larger income.

FOR INSTANCE.

A man of 62 who takes out a Canada Life Annuity for £1,000 gets a yearly income of £100 16s. 2d. A woman of 67 gets a yearly income of £102 0s. 10d. for the same investment.

OVER 10% PER ANNUM.

Other ages pro rata, on equally generous terms. You can invest any amount from £100. The Funds of the Canada Life Company are over £30,000,000, and are under direct Government supervision. Write at once for full particulars to the Canada Life the oldest Dominion Life Office and the office that gives the best value for Annuities.

Write to night (stating age) to Annuity Department,

THIRD CENTURY OF ACTIVE BUSINESS.

BRANCHES AND AGENCIES THROUGHOUT THE WORLD.

APPLICATIONS FOR AGENCIES INVITED.

ENJOY a LARGER INCOME and LIVE LONGER!

If you depend on investments for your income, you are probably only getting about 5 % on your Capital, and you may not be sure of that or of the safety of your money.

Supposing you can get 13 % guaranteed for as long as ever you live, then you would be able to indulge in more of the comforts of life and be relieved of all anxiety. Both advantages will tend to lengthen your life.

13% GUARANTEED for as long as you live.

A man of 70 can obtain from the Sun Life of Canada an Annuity equivalent to 13 % on his Capital. **If his health is impaired, a larger Annuity will be granted.** Older and younger ages get proportionately higher and lower rates, and all receive advantages exclusive to Sun of Canada Annuitants.

There are many other forms of Sun of Canada Annuities: Joint Life, **Annuities with guaranteed return of Capital,** Deferred Annuities, and Educational Annuities. Why not let us send you particulars? Remember the offer is made to you by the **leading** Annuity Co. a Company with Government-Supervised Assets exceeding £82,000,000. In confidence, write, giving exact date of birth.

Address your inquiry to J. F. Junkin (Manager), Sun Life Assurance Co of Canada, 20, Sun of Canada House, Cockspur Street, Trafalgar Square, London, S.W. 1.

£400 A YEAR FOR LIFE for YOU!

Think of it! Not a Salary demanding daily work at the office, but a private income to be paid to you every year as long as you live.

And while you are qualifying for it it begins at age 55 there's full protection for your family: £3,200, plus accumulated profits, will be paid to them in the event of your death. Should that be the result of an accident, £6,400 plus the profits will be paid.

Should illness or accident permanently prevent you from earning any kind of living, £32 a month will be paid to you until you are 55, when the £400 a year becomes due. Meanwhile the Company makes your regular deposits for you.

Every year you will save a very substantial amount of Income Tax - a big consideration in itself.

This can all be accomplished by means of a plan devised by the Sun Life of Canada the great Annuity Company with Government-supervised assets exceeding £82,000,000.

It is a wonderful plan, adaptable to any age and for any amount. It brings independence within the reach of tens of thousands of men who, otherwise, would be compelled to go on working till the end of their days.

Let us explain the plan more fully to you. Write, giving exact age and amount you can save yearly, to J. F. Junkin (General Manager), Sun Life Assurance Co. of Canada, 20 Sun of Canada House, Cockspur Street, Trafalgar Square, London, S.W. 1.

Principal Charitable Bequests of the Year.

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount for charitable purposes is, in a considerable proportion of the cases, approximate, owing to the bequests including a share of the residuary estate, or consisting solely or in part of pecuniary interests, or of blocks of shares, for which a definite value cannot be given.

Reversionary bequests are included where the reversions are *absolute*, generally on the cesser of life interests or a period of years, but, generally speaking, are *not* included where they are *contingent reversions*, depending on certain happenings (usually failure of issue to certain persons or failure to secure the observance of certain conditions) unless there is reason to believe that such contingency is likely to be fulfilled.

The amount of residuary bequests are also subject to variation on the final winding up of the estate, owing to possible variations in the amount of duty payable, as the final figures may place an estate for duty purposes in a different category (either higher or lower) as compared with the original valuation submitted on obtaining the grant of probate.

The table records the principal bequests published during the year, not necessarily those becoming payable during the year, and it does not include bequests previously recorded which have since become payable, either by the winding up of the estate or by the falling in of life or other pecuniary or contingent reversionary interests.

Hospital and religious institutions still account for the greater part of the bequests made, but the tendency noted in previous years to leave money to public bodies for Educational Trusts, National, Local or Community interests is more marked, and there is a noticeable growth in the amount left for Roman Catholic purposes and Institutions.

There is a marked increase in the number of bequests to Masonic Institutions, and this year the Rationalist Press Association is a large beneficiary under certain wills.

Name.	Gross Value of Estate	Approx. Amount	Objects.
	£	£	
Maryon, Mrs. Emma Grace, of Dundee (personal estate)	1,197,505	600,000	£200,000 for foundation of travelling scholarships in engineering, electricity and aeronautics and music, £100,000 to Town Council of Dundee for land for benefit of community, other bequests to local institutions, and one-half of residue to Dundee Royal Infirmary and one-half for such institutions or schemes for Scottish soldiers and sailors disabled in the War as the trustees may determine.
Iveagh, 1st Earl of, of 3 Grosvenor Place, S.W. (provisional valuation)	11,000,000	600,000	Left, in addition to Ken Wood and the collection of Old Masters, £125,000 to the Representative Church Body of the Protestant Church in Ireland, and £65,000 to St. Patrick's Cathedral, Dublin, and £60,000 to King Edward VII Hospital Fund for London, among many other bequests.
Sanderson, James, of Oakshields, N.B. (personal estate)	409,403	150,000	Large bequests for church and charitable purposes in Oakshields and districts, and residue for educational and charitable purposes, including ⅝ part for the advancement and promotion in the University of Edinburgh of technical and scientific study and research in chemistry and engineering branches of the Faculty of Science.

ALEXANDRA ORPHANAGE

HAVERSTOCK HILL, LONDON, N.W. 3

Founded 1758.

Patrons: **Their Majesties The King and Queen.**
President: **H.R.H. The Prince of Wales, K.G.**
Treasurer **(since 1897): The Rt. Hon. Lord Marshall, P.C., K.C.V.O.**

The Orphanage is unsectarian, and helps fatherless and other necessitous children from all parts of the country and the Dominions, without restriction as to class or creed. Boys and girls are admitted at all ages between infancy and 11 years of age, and are cared for until 15. During the past 170 years over 7,000 have been received. Over 340 are now resident, and others await vacancies.

More annual subscribers are needed. Out of £16,000 required annually only £6,000 are assured. The balance must be raised by donations. Legacies are a useful means of helping. Please include the School in your Will. Annual Report sent on request, and the School may be visited by interested friends.

Forms of application for the admission of children and all needful information may be had of the SECRETARY, FRED. J. ROBINSON, A.C.I.S., 73, CHEAPSIDE, LONDON, E.C. 2.

THE SHAFTESBURY HOMES AND "ARETHUSA" TRAINING SHIP

exists to give poor boys and girls a chance in life, and to help them to become good and useful men and women.

(Free of Legacy Duty), to be applied towards carrying on the charitable designs of the said Institution." 1328

EAST LONDON HOSPITAL FOR CHILDREN

SHADWELL, LONDON DOCKS.

CHILDREN CARED FOR - NURSES HOMELESS!

Please help to remove anomaly
which handicaps the Hospital.

Full particulars of work and need from Wm. Wilcox, Secretary at Office, Shadwell, E.

GENERAL LYING-IN HOSPITAL,

York Road, Lambeth, S.E.1. ESTABLISHED 1765.

Patron—**H.M. The Queen.**

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss LILY HEARN, *the Secretary, at the Hospital.* 1346

EVELINA HOSPITAL FOR CHILDREN,

SOUTHWARK, LONDON, S.E.

Under the Patronage of THEIR MAJESTIES THE KING AND QUEEN.

Supported by Voluntary Contributions.

LARGEST CHILDREN'S HOSPITAL IN SOUTH LONDON. Situated in its poorest District.

FUNDS GREATLY NEEDED.

Please help this Charity, "not only because it is a Hospital, but because it is a Hospital for Children."

President—THE EARL OF BESSBOROUGH, C.M.G. *Treasurer* GERALD D. SMITH, Esq.
Chairman D. MALCOLM SCOTT, Esq. *Secretary* H. C. STANSBY SMITH.

THE

GIRLS' LIFE BRIGADE (INC.)

(Associated with the National Sunday School Union.)

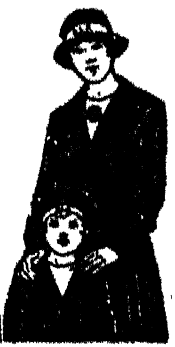
Seeks to develop Christian Character and to inculcate useful habits for life's struggle.

FIVE GREAT AIMS

To awaken a sense of responsibility.
To develop the use of body and mind.
To make girls self-reliant and useful.
To influence them to dedicate all their powers to the service of God.
To keep them in touch with the Church and Sunday School when often they become lost to both.

FOUR-FOLD PROGRAMME

Spiritual, Physical, Educational and Social.



Write for full details to the **Headquarters Secretary, The Girls' Life Brigade, 56, Old Bailey, London, E.C.4.**

Booklet on request.

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING. *Vice-Patron*—H.M. THE QUEEN.
Chairman Executive Committee—H.R.H. THE DUKE OF YORK, K.G.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.

The Home is constructed to accommodate 250 Boys, chosen from the necessitous classes between the ages of about 14 and 15½, and give them a training, up to the age of 17 or the pensions, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy, Air Force or Mercantile Marine.

CONDITIONS OF ADMISSION. 1. The age for admission is from about 14 to 15½ years. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £35 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. *Subscriptions and Donations are urgently needed in order that the above number of boys may be maintained.*

Subscriptions are received by THE WESTMINSTER BANK, LIMITED, 1, St. James's Square, S.W., and by the Commandant at the Home, from whom any further information can be obtained. For financial reasons the London Office has been abolished.

COMMANDANT—MAJOR SIR T. M. S. PASLEY, BART.

GUY'S HOSPITAL

LONDON BRIDGE, S.E. 1,

URGENTLY NEEDS HELP.

President: H.R.H. THE PRINCE OF WALES, K.G.

Founded in 1724 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii., and 41st Victoria, ch. xv., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The Hospital is empowered to receive gifts of, and to hold, land up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital), notwithstanding the provisions of the Mortmain Acts

BEDS	IN PATIENTS (1927)	OUT-PATIENTS (1927)
643	11,313	122,446

Expenditure: £172,281 :: :: Income from Endowments: £66,206

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is less than £10,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of over **£100,000 per annum.**

To form a permanent Memorial, if desired, a Donation or Bequest should be allocated to the Re-endowment Fund, which is permanently invested and the income only applied for the general purposes of the Hospital

A Gift of £1,000 to this Fund, or an Annual Subscription of £50, will respectively endow or support a Bed, over which a name is to be inscribed, in accordance with the wishes of the Benefactor, can be placed

A copy of the Annual Report of the Hospital can be obtained on application to Mr. W. J. Curry, Clerk to the Governors, Guy's Hospital, S.E. 1. Telephone: Hop 1088.

Bankers: THE BANK OF ENGLAND. Treasurer: F. P. WHITBREAD, Esq.

THE HOSPITAL FOR DISEASES OF THE SKIN

70-71, BLACKFRIARS ROAD, S.E.

Telephone: Hop. 1021. ESTABLISHED 1841.

Treasurer—The Rt. Hon. The Lord Mount, P.C., K.C.M.G.

This hospital, established in 1841 and the oldest Skin Hospital in London, is still unable to reopen its beds for in patients owing to lack of funds. Donations and subscriptions are urgently desired. Since its foundation no less than 569,000 patients have been treated, and the scientific equipment of the Institution has always been kept thoroughly abreast of modern developments in research and treatment. The Light Department is provided with X-rays, radium and ultra violet light apparatus. It is a centre both of dermatological therapeutics and education, and welcomes at its clinics medical practitioners and students. Patients should attend daily at 1.30 p.m., or on Fridays at 2 p.m. They are expected to contribute to the funds of the hospital according to their means.

FREDERICK HAYTER, *Secretary.* [182.

THE NATIONAL INSTITUTE FOR THE DEAF

2, Bloomsbury Street, W.C. 1.

President . . . LORD CHARNWOOD

THE FACTS. There are 40,000 deaf and dumb and hundreds of thousands deafened by disease or accident in Great Britain.

THE EFFECTS. Silence and consequent solitude impose grave difficulties in the way of intellectual, social, industrial and religious life.

The National Institute for the Deaf seeks to improve the lot of these deaf and dumb and deafened people in every way possible. Largely increased funds are urgently required to extend this work.
Realising what you owe to hearing, will you help us to help those who have not your advantages? Legacies would make the work permanent. Please send your subscription or donation to:

The Secretary, **National Institute for the Deaf, 2, Bloomsbury St., New Oxford St., W.C. 1.**

Miss Smallwood's

Society for the Assistance of Ladies in Reduced Circumstances

(UNDER ROYAL PATRONAGE)

For over forty years we have waged war against poverty and distress, and in that time many poor Ladies have been helped and some saved from the workhouse, through the administration of the Society.

Many of the Ladies are old, sick, and lonely, and, if help was stopped, would suffer great privation—in fact, would be very near starvation.

Please help us to help them, by sending gifts, large or small, towards keeping up their monthly pensions, paying their doctors' bills and assisting with their rent.

Lancaster House, Malvern.

1856 saw the establishment of the Reformatory and Refuge Union, with the Earl of Shaftesbury as President.

Its chief aim was "To reclaim and elevate the neglected and criminal classes, by educating them in the fear of God and in the knowledge of the Holy Scriptures."

The Union's many activities necessitated devolution as follows:

CHILDREN'S AID SOCIETY. Its Rescue Officers seek out children living in want, misery, crime or moral danger. More than 80,000 children have been helped.
It also maintains:

BLUNHAM BABIES' HOME and FOTHERBY HOUSE for toddlers needing a mother's care.
BRIGHTON HOME FOR & LITTLE BOYS, for those under 10 years of age.
GIRLS' PROTECTIVE HOME, & HASTINGS, for young girls.
GROTTO HOME FOR WORKING BOYS.

£12,000 per annum needed for the children.

INCOME FROM ENDOWMENTS £29,000

ANNUAL VOLUNTARY SUPPORT REQUIRED £80,000

Read these words of

CAPTAIN SIR BEACHCROFT TOWSE, V.C., K.C.V.O., C.B.E.,

and ponder over them:

"If you who read these words lost your sight, you would find that the National Institute for the Blind would do its utmost to arm you for the grim fight you would have to face. Blind myself, I know that every blind person has to go through that fight—and it is a *fight*, I can assure you, a fight against a feeling of utter uselessness that ages the brain and stifles the soul, a fight against a feeling of overwhelming despair that renders you almost incapable of any effort.

"Your memories are full of endless pictures. In a second you can conjure up a loved face, a beautiful view, a brilliant festival, and you owe that marvellous gift to one priceless sense—sight.

"Take away that power—and what would life be worth to you? What would *all* the sunshine of success be, coupled with the perpetual night of blindness?

"I beg you to ask yourself, now, in all sincerity, that question—and to help the National Institute for the Blind to the utmost of your power."

All donations should be sent to the

NATIONAL INSTITUTE FOR THE BLIND

(Registered under the Blind Persons Act, 1920)

224-6-8, Great Portland Street, London, W. 1.

THE proprietors of "Whitaker" desire earnestly to support the many appeals for immediate financial assistance made in the preceding pages by Hospitals and Charitable Institutions all over the country.

The Voluntary System under which these Institutions are carried on requires unremitting effort on the part of those responsible for their finances, and subscribers, donors and testators are adequately rewarded by the progress in scientific research and in the alleviation of suffering and distress which their contributions enable the Institutions to achieve.

These Hospitals and Institutions deserve the heartiest and most generous support it is possible to give.

"Whitaker" Publications

WHITAKER'S ALMANACK

"WHITAKER" was established in 1868 by the late Joseph Whitaker, F.S.A., and was accorded an instant welcome. Its popularity increases annually, and for years it has been a recognised authority, being consulted all over the world. No club, library, hotel, business house or private home is complete without "Whitaker." It is a mine of information in a compact form, to which reference is made throughout the whole year.

"COMPLETE" EDITION, Cloth Cover, 900 pages, net **6s.**
"POPULAR" EDITION, Paper Cover, 568 pages, net **3s.**

WHITAKER'S PEERAGE, 1929

The best and the cheapest Peerage, Knightage and Companionage, containing a full list of the New Year's Honours, 1929, with a complete Obituary for 1928. A very handsome Royal Blue volume, demy 8vo, with gilt top. 800 pages, **25s.**, published end of January, 1929.

THE PUBLISHER AND BOOKSELLER

was founded originally in 1858 by Joseph Whitaker, F.S.A., as THE BOOKSELLER, and was adopted as the official organ of the Book Trade in the United Kingdom in 1928. It is now published under direct editorial control, and with the authority of the Joint Associations: (a) The Publishers' Association and (b) The Associated Booksellers. (Specimen free in reply to Trade card.)

CURRENT LITERATURE

is a book journal issued monthly by booksellers to their customers. It records all books as given in THE PUBLISHER AND BOOKSELLER in one arrangement of classification. *The only complete monthly list so published.* Additional and interesting original editorial matter is given, reviewing the previous month's output. Ask your bookseller for a copy. (Specimen free.)

THE REFERENCE CATALOGUE

has been published at periods for over 50 years and gives the complete catalogues of practically all publishers of note in the United Kingdom. The Index Vol. contains over 300,000 references to authors and titles. Commonly referred to as "The Bookseller's Bible." Weighs over 28 lbs., three vols., demy 8vo, **65s.** net the set.

WHITAKER'S CUMULATIVE BOOK LIST

was started in 1924 and instantly recognised as indispensable to all booksellers and librarians. Each issue gives the details of all publications issued in the United Kingdom, under classified headings, and with an alphabetical index to authors and titles. Published quarterly in cumulative form, each number *cancels by inclusion* the previous issues of the year. *Three, six, nine and twelve* months' volumes supplied at Subscription rate of **25s.** per annum post free.
